

**MERIT AGENCY AVAILABILITY INFORMATION**

The map on the back shows the counties in Missouri. The county location of most offices and institutions of State agencies served by the Merit System are indicated by code letters below. The codes should be used as guides for indicating availability for employment. For example, there is nothing to be gained by indicating availability for a Corrections Officer position in Stone County because there is no Correctional Facilities in that county. Before indicating availability for a county, be sure there is an office or institution in that county for the State agency in which you are seeking employment.

**General Information**

- Cole County** - The central offices of all State agencies except Housing Development Commission are located in Jefferson City. Additional facilities, other than central offices, are shown by code letters.
- St. Louis City** - St. Louis City should be shown separately from St. Louis County for stating availability. Care should be taken to distinguish between St. Louis City and St. Louis County.
- Children's Division and Family Support Division** - Only the Department of Social Services, Children's Division and Family Support Division, has offices in every county.
