

Single Feasible Source Purchase

Title: SATELLITE SERVICES

Description: The Office of Administration, Information Technology Services Division, on behalf of the Missouri National guard, requires the continuation of satellite service and support, specifically including SEON 10-day Services 1563 Kbs X 768 Kbs @ 10:1 contention ratio, Teleport ¼ rack hosting and GHE Cisco 2851 router. TrustComm, Inc. has developed and provides these specific proprietary satellite communications and support services. TrustComm is the only organization that can provide the required services and support. As a result, this represents a proprietary requirement that meets the criteria as a single feasible source under RSMo 34.044, and the State is pursuing this continuation as a Single Feasible Source.
