

Single Feasible Source Purchase

Title: Maintenance, Support, and Other Services for the MSHP CCH and SMS Systems

Description: The Missouri State Highway Patrol (MSHP) requires ongoing maintenance, support, and consulting services for their existing Computerized Criminal History System (CCH) and their existing Statewide Message Switch System (SMS). Ongoing maintenance, support, and customizations are available only from CPI as CPI is the sole owner of the software.

According to RSMo 34.044, a single feasible source can be utilized when the product/service requirement is proprietary and only available from a single provider. As a result, this represents a requirement that meets the criteria as a single feasible source under RSMo 34.044 and the State is pursuing this acquisition of services as a Single Feasible Source procurement.

Agency: Missouri State Highway Patrol

Supplier: Computer Projects of Illinois (CPI)

Buyer: Earl Pettit

Phone No: 573-751-5430
