

Single Feasible Source Purchase

Title: CA Gen Software Maintenance

Description: The Office of Administration, Information Technology Services Division (ITSD) along with the Missouri Department of Transportation (MODOT) requires continued CA Gen Software Maintenance. CA Gen (formerly AllFusion Gen, Advantage Gen. COOL:Gen, Composer and the IEF) is a model based, full life-cycle, application development and generation environment. It is a proven development environment for Corporate Development Teams to design, deploy and maintain high-performance applications for z/OS, UNIX and Windows. CA Gen delivers scalable, complex enterprise solutions for multiple application architectures and reduces risk in development process, technology transitions, and skills transfer by using a model driven approach. The software and the continued maintenance are proprietary to CA Inc. As a result, this represents a proprietary requirement that meets the criteria as a single feasible source under RSMo 34.044 as the state is pursuing this acquisition as a Single Feasible Sources.
