

(A) **General.** Security standards indicated in this section are minimal and apply to physical security of facilities. These standards do not address requirements for security personnel or security requirements for functions or activities of the facility occupants, since these are operational responsibilities of the various department/agencies.

(B) **Locks and Access Control.** The security of locks within a facility will be commensurate with the level of need for security of the area or element being secured. All access devices made for locking facilities or facility equipment will be numbered and identified (in records) with the locking device. Each access device for a facility locking mechanism will be issued by number to a specific individual, and the issue of all access devices will be recorded in a control register. All personnel leaving employment at the facility shall return all access devices issued for facility locking devices and the returns will be recorded in the register. A periodic inquiry will be made to determine the location of all access devices for facility locking devices. If an access device is missing, a determination of need for changing the locks and issuing new keys will be made.

(C) **After Hours Access.** After hours access to every facility shall be limited to an absolute minimum, consistent with requirements for accomplishing assigned functions or tasks. This access shall be documented.

(D) **Security Lighting.** Security lighting will be designed and used with consideration for minimum effective light levels and energy conservation. Controls for automatic turn-on and turn-off should be considered in all security lighting.

(E) **Coordination with Local Law Enforcement.** Coordination will be established with local law enforcement agencies to enhance the security of all state facilities. Coordination will include providing names of persons to be notified in case of emergency or breach of physical security and a request for surveillance and/or patrols of the area. Local law enforcement authorities will be notified of the presence and/or location of items needing a high degree of security and items that may be likely targets for theft and vandalism. Posted signs for notification in case of emergency will list only the telephone number of the local law enforcement or security office. The local law enforcement or security office can then notify personnel who should respond for an emergency. This notification system avoids the danger of an employee being forced to provide entry for unauthorized persons.

(F) **Video Surveillance.** The Division of Facilities Management, Design and Construction and/or the Capitol Police currently use video surveillance in some state facilities as a security measure, including the Capitol Building, and may use video surveillance in other facilities, as determined to be necessary.

(G) **Metal detector and/or security guards.** The Division of Facilities Management, Design and Construction and/or the Capitol Police currently use metal detectors and security guards in some facilities for added security. Metal detectors and/or security guards may be placed in additional facilities, as determined to be necessary.
