

Teammates,

As a state, we implemented Missouri's Show Me Strong Recovery Plan back in April. The plan rests on four essential pillars – testing, PPE, hospital capacity, and data. We have been committed to communicating the best possible information to our citizens every day since the start. One way we do that is through our data.

Our new dashboards, located on the [Show Me Strong website](#), launched last week. They are designed to be user-friendly for the public. The dashboards provide Missourians with multiple charts, maps, and measures about COVID-19 and its impact in the state.

This site is now a one-stop-shop for the expanded dashboards that are already helping citizens, community leaders, and businesses across the state make decisions regarding COVID-19 in their communities. Team members from DHSS, DED, DSS, DESE, OA, DOLIR, DPS, DMH, MODOT, DOC, DHEWD, DOR and the Office of the Governor collaborated to make these ideas come to life. Together, we are taking the next step in our efforts to get better every day for our citizens.

The data can help individuals, employers, nonprofits, and schools better understand the public health, social, and economic impacts the pandemic has on their communities and allow them to make decisions accordingly.

Improvements of the dashboards are continually ongoing, and very soon they will also be mobile-friendly. Any questions you may have about the dashboards can be directed to [COVID-19 Dashboard@governor.mo.gov](mailto:COVID-19_Dashboard@governor.mo.gov).

Thanks for all you do for Missourians each day.

In good health,

Dr. Randall Williams  
DHSS Director
