**2b. Provide a measure(s) of the program's quality.**

- ITSD conducts a survey after the completion of each project. Overall scores are averaged for each quarter. The scale is from 1 to 4 with 4 being the highest. Our projects were an area identified that need improvement. We have developed an impactful training program for both IT and our business partners to address this needed improvement. This program started in the fall of 2019 and we are seeing positive results.

- Security Scans are conducted at least quarterly for an application. Our targets are higher than industry security standard recommendations. This chart depicts our average security score each calendar quarter as well as the recommend target score for a low impact and high impact application. Impact is based on the business criticality of the application. The goal is to remain above 90 for our average scores regardless of impact.

- ITSD scans applications to address any potential cyber security vulnerabilities. The chart below shows how often the very first scan of an application is passing. When an application passes the first scan, there is no rework that must be done to comply with our security standards. The practice of scanning applications and training developers on mitigating cyber security risks keeps citizen data as secure as possible from the inception of an application. Applications are routinely scanned to ensure any new threats are addressed timely.
