

# THE MISSOURI BUDGET

## Fiscal Year 2026

### REVIEW OF FISCAL YEAR 2024 REVENUE

In Fiscal Year 2024, net general revenue collections grew by 1.5 percent over the previous year, as the economic expansion continued to moderate. The increase in net general revenue was primarily driven by strong growth in sales tax collections.

Fiscal Year 2025 revenues are forecasted to decline by 0.6 percent. Fiscal Year 2026 revenues are forecasted to increase by 1.6 percent.

### THE ECONOMIC OUTLOOK

#### U.S. Economic Position

National growth moderated as the labor market loosened and wage growth began to slow. While inflation has slowed down, interest rates are still elevated, crimping investment. Consumption remained a bright spot in the economy even as consumer and business confidence remained weak.

The national unemployment rate hit a cyclical low of 3.4 percent in early 2023. By November

2024, the national unemployment rate had steadily increased to 4.2 percent. The unemployment rate is expected to continue slowly increasing during 2025.

With mortgage interest rates remaining high and affordability continuing to deteriorate, the housing sector had another rough year in 2024. Through November 2024, single-family starts were down (4.3) percent. While housing prices were down (2.5) percent compared to last year. The inventory of homes bounced between seven and nine months during 2024, finishing at a nine-month supply as of November 2024.

Wage growth remained extremely strong even as the labor market cooled through the year. This has helped bolster consumer spending despite waning savings and elevated interest rates. Consumer spending is expected to slow through 2025.

The stock market saw outstanding growth during 2024, up 23.3 percent December 2024 compared to December 2023. Inflation slowed to 2.7% by November 2024. Oil prices remained steady in 2024, despite geopolitical tension in the middle east.

## Economic Projections

<b>Increase by Calendar Year</b>			
	<u><b>2024</b></u>	<u><b>2025</b></u>	<u><b>2026</b></u>
<b><u>US</u></b>			
Real GDP	2.8%	2.1%	2.1%
Employment	1.6%	0.9%	0.3%
Unemployment Rate	4.0%	4.3%	4.5%
Personal Income	5.8%	4.9%	5.0%
Consumer Expenditures	3.9%	3.8%	4.5%
Consumer Prices	2.9%	2.2%	2.4%
<b><u>MO</u></b>			
Employment	2.5%	0.9%	0.3%
Personal Income	5.1%	4.7%	4.8%

The outlook over the next two years calls for a continued slowdown in growth during 2025, but steady growth in 2026. During the next two years, employment growth is expected to slow while the unemployment rate is forecasted to increase as the labor market continues to cool. Consumption is also expected to slow slightly during 2025 before picking up again in 2026.

The Federal Reserve slashed interest rates at the beginning of 2020 to combat the pandemic-induced recession. The Federal Reserve began tapering assets in the fall of 2021 and began raising interest rates in the spring of 2022 to combat high inflation. The Federal Reserve began cutting rates in 2024 as inflation slowed. Forecasts anticipate two additional rate cuts in 2025 before the Federal Reserve pauses.

There are multiple risks to this outlook. Geopolitical conflicts in the Middle East and Ukraine could have a powerful impact on oil and food prices. Potential tariffs risk elevating inflation. In addition, 2025 marks the expiration of the Tax Cut and Jobs Act (TCJA 2018). Tax reform will once again be at the forefront of national policy.

### **Missouri Economic Position**

Missouri’s economy also saw moderating growth during 2024. In November, employment had increased by 2.7 percent for the year. Missouri’s unemployment rate reached a cyclical low of 2.3 percent in mid-2022. Through November 2024, the unemployment rate had inched up to 3.7 percent as higher wages continued to entice more people to enter the labor force. A slowdown in labor market growth is expected to occur during 2025 and 2026.

Personal income remained strong during 2024, with average growth of 4.5 percent during the first three quarters. During the same period, wages and salaries grew by 4.9 percent.

Missouri’s economy is expected to follow the national economy trend through 2026. However, economic growth over the next year will depend on inflation, commodity price fluctuations, as well as consumer and business confidence.

## **REVENUE PROJECTIONS FOR FISCAL YEARS 2025 AND 2026**

Revenue forecasting is challenging under the best of circumstances but forecasting through the past four years has been especially challenging. In addition to the typical forecasting uncertainty, the forecast for the next two years will be significantly impacted by potential federal tax policy, inflation and the Federal Reserve's reactions, geopolitical risks, and continued shifts in consumer behavior.

The Missouri individual income tax rate is being reduced from 4.8% to 4.7% effective January 1, 2025. In addition, a significant amount of social security and public pension income became tax exempt on January 1, 2024. These tax reductions will allow Missourians to keep more of their hard earned income and have been done in a responsible way that will allow Missouri's Budget to continue to deliver the essential services that Missourians want and need. Fiscal Year 2025 net general revenue is forecasted to decline by 0.6%.

The forecast for Fiscal Year 2026 reflects continued economic growth, but no additional reduction to the Missouri Individual Income Tax rate. Governor Kehoe's Fiscal Year 2026 budget is based on a forecasted growth of 1.6 percent compared to the revised Fiscal Year 2025 estimate.

## **REVENUE LIMITATION AMENDMENT**

Article X of the Missouri Constitution establishes a revenue and spending limit on state government. The limit is 5.6 percent of Missouri personal income, based on the relationship between personal income and total state revenues when the limit was established and approved by voters in November 1980. Calculations made pursuant to Article X of the Missouri Constitution show that total state revenues for Fiscal Year 2023 were below the total state revenue limit by \$4.3 billion.

The Office of Administration projects that total

state revenues will not exceed the total state revenue limit in Fiscal Years 2025 or 2026. These preliminary calculations are subject to change as actual state revenue collections become known and as the federal government revises its estimates of Missouri personal income. These projections could change if legislation is approved to increase taxes without a vote of the people. Pursuant to Article X of the Missouri Constitution, revenue approved by the voters is not subject to the revenue and spending limit.

In addition, Article X, Section 18(e) of the Missouri Constitution states the General Assembly shall not increase taxes or fees in any fiscal year, without voter approval, that in total produce net new annual revenues greater than \$50 million, adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the General Assembly's action, whichever is less.

"Net new annual revenues" is defined as the net increase in annual revenues produced by the total of all tax or fee increases by the General Assembly in a fiscal year, less refunds and less all contemporaneously occurring tax or fee reductions in that same fiscal year.

For Fiscal Year 2024, the calculations are \$164.2 million for the personal income amount and \$144.4 million for the one percent of total state revenues amount. Legislative actions in the 2024 regular session resulted in a decrease of \$127.1 million in state revenues when the provisions are fully implemented.

For Fiscal Year 2025, the calculations are \$179.3 million for the personal income amount and \$150.5 million for the one percent of total state revenues amount.

## NOTES TO GENERAL REVENUE SUMMARY

- (1) Unexpended appropriations are counted as a resource in the next fiscal year to avoid premature commitment of uncertain resources until actual lapses are known. This includes reserves authorized by Section 33.290, RSMo.
- (2) The one-time project adjustments are necessary to prevent double-counting one-time obligations against Total Resources Available.
