

## COMPLIANCE COMPONENT

Last updated: 11/02/05

DEFINITION													
Name	County Code Table												
Description	This document contains the basis for the adoption of a county coding standard for the classification of the geographic unit of 'County' utilizing the Federal Information Processing Standards (FIPS) coding schema for Missouri.												
Rationale	Provides a code set for elements describing political boundaries of counties that allows for uniformly defined, coded and maintained codes thereby allowing integration and interaction between state systems within Missouri as well as between Missouri and other entities.												
Benefits	<ul style="list-style-type: none"><li>Provides a standard for coding county level data within the State of Missouri</li></ul>												
ASSOCIATED ARCHITECTURE LEVELS													
Specify the Domain Name	Information												
Specify the Discipline Name	Data Management												
Specify the Technology Area Name	Enterprise Code Tables												
Specify the Product Component Name													
COMPLIANCE COMPONENT TYPE													
Document the Compliance Component Type	Standard												
Component Sub-type													
COMPLIANCE DETAIL													
State the Guideline, Standard or Legislation	<p>Federal Information Processing Standards codes (FIPS codes) are a standardized set of numeric or alphabetic codes issued by the National Institute of Standards and Technology (NIST) to ensure uniform identification of geographic entities through all federal government agencies.</p> <p>FIPS 6-4 provides the names and codes that represent the counties and other entities treated as equivalent legal and/or statistical subdivisions of the 50 States, the District of Columbia, and the possessions and freely associated areas of the United States. Counties are considered to be the "first-order subdivisions" of each State and statistically equivalent entity, regardless of their local designations (county, parish, borough, etc.). Thus, the following entities are considered to be equivalent to counties for legal and/or statistical purposes: The parishes of Louisiana; the boroughs and census areas of Alaska; the District of Columbia; the independent cities of Maryland, <b>Missouri</b>, Nevada, and Virginia; that part of Yellowstone National Park in Montana; and various entities in the possessions and associated areas.</p> <p>State agencies shall use the values provided in county FIPS coding table. An example of this data is as follows:</p> <table><tr><th>County</th><th>FIPS Code</th><th>Description</th></tr><tr><td>001</td><td></td><td>Adair</td></tr><tr><td>003</td><td></td><td>Andrew</td></tr><tr><td>005</td><td></td><td>Atchison</td></tr></table>	County	FIPS Code	Description	001		Adair	003		Andrew	005		Atchison
County	FIPS Code	Description											
001		Adair											
003		Andrew											
005		Atchison											

	to... 225 Webster 227 Worth 229 Wright 510 St. Louis (city) (Independent City)				
	Note: Ste. Genevieve was re-coded from 193 to 186 to maintain alphabetic consistency (1979 December 15).  For the related state geographic element definition standards see <b>Compliance Component – Census Geography Element Standard</b> .

<b>Rationale for Component Classification</b>					
<i>Document the Rationale for Component Classification</i>	The county FIPS code component will standardize the manner in which data captured at the county levels of geography are captured and stored within the database. This allows for fluent and accurate interchange of common data elements between state agencies.				

<b>Migration Strategy</b>	
<i>Document the Migration Strategy</i>	<b>Missouri State Interagency Migration Strategy</b> Agencies shall adhere to this standard when sharing common data elements.  <b>Inter-governmental Migration Strategy</b> Agencies creating new applications shall attempt to adhere to the data elements

	standards when defining the data definitions.
