

Compliance Component

DEFINITION

<i>Name</i>	Implementation Phase
<i>Description</i>	The Implementation Phase is when the system is installed and evaluated in the agency's operational environment.
<i>Rationale</i>	Inspection and acceptance of the delivered system is necessary to verify that the functionality described in the specifications has been included in the deliverables.
<i>Benefits</i>	<ul style="list-style-type: none"> • System Integration – ensures that the system is integrated at the operational site. • Security Certification – ensures that the controls are effectively implemented. <ul style="list-style-type: none"> ◦ Security certification also exposes and addresses the known vulnerabilities in the information system. • Security Accreditation – provides the necessary security authorization of an information system to process, store, or transmit information that is required.
