

COMPLIANCE COMPONENT

DEFINITION	
<i>Name</i>	Minimum System Security Documentation
<i>Description</i>	Minimum System Security Documentation contains the system life cycle and descriptions of the system hardware, software, policies, standards, procedures, and approvals related to information systems.
<i>Rationale</i>	The documentation of hardware, software, policies, standards, and procedures provide the basis for protecting the integrity, availability, and confidentiality of each of an agency's IT resources. This documentation explains how software and hardware is to be used and serves to formalize the security and operational controls specific to agency's systems.
<i>Benefits</i>	<ul style="list-style-type: none"> • The availability of formal resource security documentation will aid in ensuring that each systems operational activities are understood • Formalized documentation of operational practices and procedures helps to eliminate security lapses and oversights
ASSOCIATED ARCHITECTURE LEVELS	
<i>Specify the Domain Name</i>	Security
<i>Specify the Discipline Name</i>	Operational Controls
<i>Specify the Technology Area Name</i>	Security Documentation
<i>Specify the Product Component Name</i>	
COMPLIANCE COMPONENT TYPE	
<i>Document the Compliance Component Type</i>	Guideline
<i>Component Sub-type</i>	
COMPLIANCE DETAIL	
<i>State the Guideline, Standard or Legislation</i>	<ul style="list-style-type: none"> • System owners (agencies) must ensure that security documentation exists to provide a reference to how IT resources have been protected. • The following, minimum documentation, should be current for all resources: <ul style="list-style-type: none"> ○ System Security Plan (see System Security Planning CC) ○ Contingency Plan (see Contingency Plan Development, Documentation and Technical Considerations CC) ○ Risk Assessment (see Risk Assessment CC) ○ Acceptable Use policy ○ Security Certification and Accreditation documents that authorize the system to operate (see Security Certification and Accreditation Process CC) ○ Standard Operating Procedures ○ Configuration or Change Management Plans • The system owner or other IT personnel must maintain supporting system documentation, which may include: <ul style="list-style-type: none"> ○ Vendor-supplied software documentation

	<ul style="list-style-type: none"> ○ Vendor-supplied hardware documentation ○ Documentation for in-house applications ○ Detailed documentation on operation of networks, routers, and switches if applicable ○ Software and hardware acceptance testing procedures and results ○ Operator's manuals <ul style="list-style-type: none"> ● System Security Documentation <ul style="list-style-type: none"> ○ Is considered a sensitive document and must be protected accordingly ○ Must include change management ○ Must be kept current during the entire system lifecycle
