OFFICE OF ADMINISTRATION OVERVIEW

The Office of Administration (OA) is the state's service and administrative control agency. Created by the General Assembly on January 15, 1973, it combines and coordinates the central management functions of state government. OA's responsibilities were clarified and amended by the Omnibus State Reorganization Act of 1974.

The chief administrative officer is the Commissioner of Administration who is appointed by the Governor with the advice and consent of the Senate. The Commissioner appoints the directors of the divisions. OA is comprised of seven divisions, including: **Accounting-** maintains all financial records for state appropriations and funds, processes payments, controls production of warrants, and distributes checks; **Budget and Planning-** analyzes state government programs and provides recommendations and information to the Governor, General Assembly, and state agencies regarding fiscal and other policies; **Facilities Management, Design and Construction-** provides project management and construction administration for capital improvement projects; operates, maintains and manages state-owned office buildings and other structures, and is responsible for acquiring and managing leased space; **General Services-** provides agencies with a variety of support services such as printing, mail services, fleet management, vehicle maintenance, and administration of the legal expense fund and the state employee workers' compensation program; maintains responsibility for the statewide in-house recycling program; transfers and/or disposes of state agencies' surplus property to maximize state resources; and administers the Federal Surplus Property Program. **Information Technology Services-** manages state information technology resources; provides mainframe computer processing services through the State Data Center; manages the State's telecommunication services; and provides Internet services, and network support to all state agencies; **Personnel-** provides central human resource (HR) management programs and services to all executive branch departments in compliance with the State Personnel Law; and **Purchasing-** centralizes procurement to save money by purchasing supplies, materials, and services in larger quantities and encourages competitive bidding and awards on all contracts.

In addition, the Office of Equal Opportunity (OEO) is a program housed with the Office of Administration and has primary responsibility for assisting in the coordination and implementation of minority and women participation programs throughout all departments of the executive branch of state government.

A number of boards and commissions' budgets are also assigned to OA including: Administrative Hearing Commission; Office of Child Advocate; Children's Trust Fund; Governor's Council on Disability; Missouri Public Entity Risk Management (MOPERM); the Missouri Ethics Commission; and the Board of Fund Commissioners Public Debt (House Bill 1), which appears in a separate budget book entitled "Board of Fund Commissioners". Appropriations for state general obligation debt are appropriated to the Office of Administration in House Bill 1 and budget requests appear in a separate budget book entitled "Board of Fund Commissioners".

The Office of Administration also administers a number of debt and related debt obligations appropriations, various pass-through distributions from the federal government, and statutory payments and reimbursements to political subdivisions throughout the State.

Appropriations for all State employee benefits such as social security, retirement, and health insurance, are appropriated centrally to the Office of Administration in House Bill 5, budget requests for those benefits appear in a separate budget book entitled "Employee Benefits."

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The appropriated amount for the Fiscal Year 2023 pay plan was based on a 5.5% pay increase for employees, raising the baseline wage of employees to \$15/hr, and adjustments related to compression issues as a result of the increases.
 The 5.5 percent COLA increase is based on the average increase of four general structure adjustment economic indicators:
 Consumer Price Index for the Midwest – 6.4 percent;
 Employment Cost Index – 4.3 percent;
 World at Work Salary Budget Increases – 2.9 percent; and
 Personal Income – 8.3 percent.

The Prescription Drug Monitoring Program (PDMP) was established through new legislation during the 2021 regular session for the purpose of overseeing the collection and use of patient dispensation information for prescribed controlled substances. A newly created Prescription Drug Monitoring Task Force will oversee this program with technical, legal, and administrative support being provided by the Office of Administration. This program also requires the joint oversight task force to enter into a contract with a vendor through a competitive bid process for operation of the prescription drug monitoring program. The vendor shall be responsible for the collection and maintenance of patient dispensation information.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

OA estimates this will require two additional FTE, with a fiscal impact of \$180,000 PS annually for one Executive Director \$100,000, and one Legal Counsel \$80,000. E&E of \$20,000 is also requested for any necessary travel, meal reimbursements, etc. incurred by these new FTE or the joint oversight task force. Funding will also be required for vendor costs associated with collecting and maintaining all the patient dispensation information. There are custom off the shelf solutions that are utilized by other surrounding states with an estimated cost of \$1,390,652 in the first year for contracted database development. Ongoing contracted costs for operation of the prescription drug monitoring program will be affected by a number of variables including the frequency of data collection, the number of prescriptions being written and filled, the number of pharmacies reporting, and the number of practitioners checking patient drug histories. These costs are estimated to be approximately \$525,000 on an ongoing basis. There is a federal grant the state can apply for which could cover up to \$400,000 of the first year costs associated with starting a PDMP. \$400,000 is being requested in federal authority to allow the state to use that federal funding if it is received.

Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Originally established by Executive Order 94-03, the Office of Equal Opportunity (OEO) works to ensure the State of Missouri is providing equal opportunity within its workforce and its supply chain by certifying minority and women-owned businesses. This includes helping the state agencies satisfy Executive Order 05-30's requirements that all state entities make every feasible effort to purchase specific percentages of goods and services from minority and women owned businesses. Additionally, OEO works to promote Executive Order 10-24's vision of developing and supporting a robust workforce diversity program. OEO needs one (1) FTE dedicated staff person that is skilled in research and data analytics to ensure we are providing the best support to the executive departments to achieve their demographic and utilization goals. This individual will use existing state resources, such as the data warehouse and Tableau, as a supportive tool to engage state agency leaders in meaningful conversations to assist them in achieving their department goals.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The assumptive need for one (1) FTE (Research/Data Analyst position) was derived from:
 - Review of the work within OEO and identification that accessing data pertaining to workforce and supplier diversity is a routine task.
 - Lack of specialized/skilled data analysts -the positions that exist within the current employee structure include program staff.

The state's Pay Grade General Structure for a research and data analyst position, as well as existing positions within Missouri state government related to data and analytics were reviewed to determine a range and necessary competitive wage for the position.

Additional E&E funding will be needed to support this position including: equipment, supplies, furniture, connectivity, program and software licensing,

2. CORE DESCRIPTION

This core request is to fund the operations of the Division of Accounting. The Division provides a central payroll processing function, central accounting service, and a statewide financial reporting function for the State of Missouri. This includes producing payroll ACH/checks and vendor payments. The Division also prepares and distributes comprehensive, accurate and timely financial reports for the State of Missouri. In addition, the Division is responsible for monitoring and oversight of the employee benefits programs; providing support and oversight for issuance of debt; and oversight of all Office of Administration payments. The Division is also responsible for the administration of social security coverage for state and political subdivision employees.

In addition to the primary operations of the Division of Accounting, the State is in the process of replacing SAM II, the State's legacy Enterprise Resource Planning (ERP) with a new ERP system as discussed in HB Section 5.040. This project requires additional FTE needed to implement both the Budget and Finance/Procurement modules which are scheduled to begin implementation around 7/1/22. The Budget implementation is expected to last 13 months. The Finance/Procurement implementation is expected to last 24 months. This project will require technical experts related to budget, finance, procurement, and IT necessary to ensure a successful implementation. Tasks required for implementation are numerous. A short list includes: system design and configuration, workflow development, extension testing, data migration, data reconciliation, training, change management and communication, some process redesign to take advantage of new features, and audits of system security.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The FY2022 staffing request for ERP was reduced to include nine months of funding based on the projected start date of the ERP project. This request includes \$691,038 PS, and \$7,350 for E&E that is needed to provide for the other three months of funding in FY2023 . An additional \$647,729 PS is being requested to adjust the base salary amounts for these positions. As we begin to identify staff members with the skills, knowledge and qualifications needed for a project of this size and complexity, we have found that the salary requirements needed to attract qualified staff will be higher than was originally anticipated. Additional flexibility is also being requested to allow contracted staff to be hired instead of state staff if necessary. This request also includes additional E&E of \$57,074 to allow for the purchase of 23 developer grade laptops and docking stations, 20 standard laptops and docking stations and the monthly VDI fee for all computers to connect to the state network.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 30615	DEPARTMENT: Office of Administration
BUDGET UNIT NAME: ITSD Consolidation	
HOUSE BILL SECTION: 5.025	DIVISION: Information Technology Services Division

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

DEPARTMENT REQUEST

ITSD is requesting 25% flex between PS & EE within section 5.020 and 25% flex between section 5.025 and section 5.020. This is the same level of flexibility that was approved in FY22. This flexibility is requested to help manage priorities for all consolidated agencies. ITSD serves departments with constantly changing needs, which requires some flexibility of funding so that proper spending from the appropriations is maintained. It is critical for ITSD to retain key technical staff that continue to optimize the IT systems and maintain technical support so that E&E operating costs are contained and managed. This flexibility allows ITSD to provide services in the most efficient and reliable manner across departments. 10% Flexibility is also requested between sections 5.005, 5.015, 5.020, 5.025, 5.030, 5.055, 5.065, 5.080 5.095, 5.155, 5.160, 5.165, 5.170, 5.175, and 5.180.

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$2,094,103	Unknown	Unknown

3. Please explain how flexibility was used in the prior and/or current years.

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
To adjust funding sources for PS and EE for various ITSD appropriations.	Flexibility will be used as necessary to optimize ITSD efficiencies and maintain critical IT infrastructure for agencies. Flexibility between divisions would better enable OA to break down silos and work effectively as a team.

ITSD needs to reduce the delivery time for deploying computer equipment to its customers. Due to broken supply chains and difficulty getting equipment, users currently have to wait on needed equipment. Over the past few years the lead time on getting this equipment has consistently been no less than 6 weeks and, in some cases, up to 10 weeks. In cases that an user's equipment is no longer functional, a 6 week lead time results in significant productivity decreases. Having a consistent level of inventory to deploy is vital to keeping users up and the functions of their jobs up and running. Improvements have been made to internal processes to address quicker deployment, but holding inventory will allow ITSD to respond to end user needs in 48 hours instead of 6 weeks.

This fund is a non-count revolving fund that will recoup the funds once equipment is deployed and billed to the appropriate funding source which supports the user receiving the equipment. This request is for appropriation authority only to allow ITSD to procure and pay the vendor prior to deploying equipment on an as needed basis.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an activity measure(s) for the program.

Inventory Service Level:

ITSD has not started this inventory program so there are no starting inventory service level statistics but will measure the amount of stock required to avoid a stock-out scenarios and build ordering processes around this measure.

6c. Provide a measure(s) of the program's impact.

Average time to close equipment request tickets- time from request to equipment deployment. **Our goal is 7 days or less but without a sufficient level of appropriation authority we are only using inventory for higher priority deployments.** The deployments that are still going through the current purchasing process skew average deployment times.

6b. Provide a measure(s) of the program's quality.

Stock- Out:

ITSD has not started this inventory program so there are no starting stock out statistics. We will be tracking the amount of times demand cannot be met due to the absence of required inventory. Goal is no more than 5% of requests fall into a stock-out scenario in the first year.

6d. Provide a measure(s) of the program's efficiency.

Reduction in the number of touches to process an equipment request. Touches include when the customer is checking on the request which will be reduced with faster deployment.

Changes have been implemented to ITSD's inventory tracking system (iTrack) and customer service portal to effectively and efficiently manage end user equipment inventory. These changes will also allow ITSD to monitor the above measures and make adjustment to the process as needed.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

In 2020, the Missouri 9-1-1 Service Board entered a feasibility study to examine implementing Next Generation 9-1-1 (NG9-1-1) across the state. Among other improvements, NG9-1-1 requires robust, mature geographic information systems (GIS) data, submitted by counties and municipalities as their authoritative data set. GIS data is a framework for gathering, managing, and analyzing data based on location. Thus, this NDI is grounded in the theory of “build it once, use it many times.” Counties are already tasked with submitting data to the 9-1-1 Service Board; we propose a State annual harvest of the collected GIS data, with the intent of hosting it in Missouri’s established data clearinghouse for public and government use. To enable the State to take advantage of NG9-1-1 data, they require an Enterprise Agreement (EA) with an established industry leader and partner, Esri, additional server and/or cloud capacity and memory, and personnel in the GIS office to provide support and consulting services across the State to many more agencies. The data will be housed in the established GIS clearinghouse, Missouri Spatial Data Information Service at the University of Missouri.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? Once the State has access to the data, several follow-on allotments are needed to ensure ample processing power and ability for the data analytics. These include additional onsite servers, analytic software for GIS data (Esri ArcGIS), and full-time employee (FTE) resources. Regarding software, the industry standard for GIS software is Esri ArcGIS, utilized in Missouri since the inception of the GIS program. Only ArcGIS has the ability to create complex maps or do geospatial querying and data manipulation, and they have been and continue to be Missouri's standard geospatial platform. Regarding the request for additional FTE, it is imperative to note that access to data and processing power is for naught without the personnel to support the additional capability, as the realization of this request will increase Missouri GIS users from a few hundred employees to a few thousand. Current staff are aligned with funding to support specific agency activities. Additional staff are necessary to expand the presence of GIS software and data to be more readily available, accessible, and centralized, and to position the department to help government users understand what can be achieved. A total of five GIS Specialists and three GIS Solutions Engineers are requested, each providing specific support to expand the State presence of GIS. Regarding hardware, we intend to use the existing State solution for a GIS clearinghouse, requiring two terabytes of cloud data storage at the Missouri Spatial Data Information Service and seven additional on-site servers to process the incoming data. Alternatives to this solution are commercial and significantly

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an activity measure(s) for the program.

- Increase in Missouri census participation, which is measured through the State Demographer's office (including local update of Census addresses (LUCA), group quarters (GQ) review, and redistricting efforts)
- Increase in Missouri Spatial Data Information Service web traffic, which translates to increased data utilization by state agencies
- Increase in GIS-derived solutions hosted on Missouri sponsored websites

6b. Provide a measure(s) of the program's quality.

- Increase in federal funding as a result of LUCA and GQ review participation
- Development of a State geocoder for use by all government agencies supported by OA/ITSD/OGI
- Increase in federal program dollars in five Federal Medical Assistance Percentage (FMAP)-guided programs, bringing Missouri up from 8th in the nation in FMAP-based program fund loss (translating to \$76 million in lost program funds the last year it was counted [FY15])

6c. Provide a measure(s) of the program's impact.

- Consolidation of several disparate systems (including non-compatible geocoders) into a single program, giving unlimited access to data and software capability for data visualization and usability
- Internal and external customers and users benefit from easy to use, accessible applications to drive evidence-based, data-driven decision making and data analysis

6d. Provide a measure(s) of the program's efficiency.

- Customers have direct access to the data and software and additional personnel assigned to assist with analysis, enabling better research and resulting products
- Additional personnel and adequate software licenses will reduce the waiting time for project requests, including conversion from old Access databases
- Faster participation in Census requests, resulting in more time

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

The project charter requesting \$1.67 million annually in GR funds, including the request for eight personnel, was unanimously passed by the CITGC in July 2021. Once the budget request is secured and approved, OGI will begin the process of signing the three-year Enterprise Agreement with Esri for August 2022 purchase. Personnel will be advertised and secured for Fall 2022 start dates. Data will continue flowing for Next Generation 9-1-1 throughout the process, and cloud storage at MSDIS can be purchased as soon as funds are secured, which will enable state access to the data.

*Current Year restricted amount is as of _____.

Reverted includes the statutory three percent reserve amount (when applicable).

Restricted includes any Governor's expenditure restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

Actual appropriation is the budget authority amount after all required flexibility transactions were processed. Flexibility is used to help manage priorities for all consolidated agencies as IT needs for each agency can change very rapidly throughout the year FY19 and FY20. Financial history also combines expenditures from budget unit 30609C which is now combined with this section beginning FY2021. DHEWD also now includes the division of workforce development which is the reason for the large appropriation increase. This amount was reduced from the DED IT Core.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The current manual process required for the submission, review, and posting of CORE 42 courses results in missed deadlines; missing, lost, or inaccurate data; loss of credibility in the department; and failure to meet the statutory requirements. The current manual tracking of courses from proposal to approval has a high probability of human error. State statute requires that institutions indicate in their course catalogs which courses are considered to be part of the CORE 42. Delays by 4-5 months create inaccuracies in institutions' catalogs, because the information is not received in time for their own timelines. Delays in publishing the yearly database of approved courses has caused extra work for our customers (academic advisors and registrars) and has meant that key information has been excluded from college catalogs.

It negatively affected students who did not have access to the most up-to-date information when making choices about course selection and transfer. This can be costly and cause graduation delays for students, as they may have to take additional courses they were unaware of. CORE 42 needs a secure portal for individuals to submit and review courses, a method of communicating both within the portal and externally, and the ability to generate reports both based on actions performed in the portal and on data stored in the portal. Automating CORE 42 will allow staff to be more efficient, course inconsistencies and errors will be minimized/eliminated, managing faculty discipline groups will be more organized, deadlines can be met, and communications between DHEWD and higher education institutions will be improved.

In 2016, Senate Bill 997 established the Higher Education Core Transfer Curriculum Act (Sections 178.785-789 RSMo), directing the Coordinating Board for Higher Education to develop a standard core transfer curriculum and a common course numbering equivalency matrix for lower-division general education courses. This project supports the processes to maintain, evaluate, and communicate the CORE 42 to the thousands of students, faculty, staff, administrators, high school counselors, parents, and other interested parties across the state. However, for each academic year, there are more than 500 new courses to be reviewed, and each course requires an application, attachments, posting to a dedicated review webpage, a review by multiple faculty members, a vote, storage and communication of the results of the review. Course reviews would be more transparent if information could be posted for stakeholders to monitor. The goal of the CORE 42 is to facilitate the seamless transfer of academic credits. DHEWD is currently managing the proposal and review of new CORE 42 MOTRs (Missouri Transfer number) and courses via email and Excel spreadsheets.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

DHEWD worked with ITSD to develop a comprehensive business case that incorporated all costs and risks. For example, It is estimated that the new process will reduce staff time from 508 hours per year to 171 hours per year if the new system is created. The system helps reduce errors and promotes cost avoidance for students as they avoid taking unnecessary courses. This project will ensure students have access to the most accurate and up-to-date information. Delays in publishing the yearly database of approved courses has caused extra work for academic advisors and registrars and has meant that key information has been excluded from college catalogs. Institutional staff and administrators have been burdened by manual processes when DHEWD cannot produce the approved courses in a timely manner. The project is estimated at the cost of \$466,943.76 with five-year maintenance estimated at \$51,385.40, as the Enterprise Solution cost is unknown at this time. It is estimated that the new process will reduce staff time from 508 hours per year to 171 hours per year.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an activity measure(s) for the program.

- Data published is accurate and timely.
- Academic Catalogs are updated timely so students know if a course will transfer at the time of registering for the course.

6b. Provide a measure(s) of the program's quality.

- Improved accuracy of the Missouri Transfer number and selection and course voting approval process.
- Increased transparency in the course submission and approval process.
- Accurate information displayed to students in the course transfer tracker.

6c. Provide a measure(s) of the program's impact.

- Student receive accurate, timely information that helps them make informed decisions and enhances their ability to graduate on time.

6d. Provide a measure(s) of the program's efficiency.

- Time to process course submissions is reduced.
- Final database of courses is published more timely.
- Database errors are reduced.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

DHEWD would work with ITSD to implement the approved project business plan using a combination of state and contracted personnel resources. Automation of this process can create staff efficiencies, as it will relieve the burden of manual processing, will minimize errors, will assist with project organization, and timelines will be more easily met.

The deadlines to publish the yearly list of courses within the CORE 42 is based on the academic calendar and the participating schools' catalog, admissions, and advising schedules. While this deadline is not mandated, the department's failure to meet it causes a ripple effect that delays schedules for multiple stakeholders across the state.

This item requests funding for an automated Fast Track administrative system including a student facing component contained in the DHEWD Student Portal, as well as a component that provides information to postsecondary institutions and DHEWD staff which is necessary for administering the program. Much of the needed functionality has been developed; this funding would allow for the remaining development and testing. This funding would allow ITSD and DHEWD to complete the remaining components that are necessary to allow the system to become fully functional, and would provide the support necessary to adequately administer a grant that converts to a loan program.

In the past few years, economic and social changes have led adults in relatively low pay occupations to have an increased interest in upgrading their employment to positions with higher wages and better benefits. In addition, there has also been increased the need for skilled labor, particularly in the healthcare fields, to meet the new and pressing workforce demands. The Fast Track program is uniquely structured to address these problems as an adult-focused financial aid program which addresses workforce needs by helping adults pursue a certificate, degree, or industry-recognized credential in an area designated as high-need. To improve the process for adults wanting to upskill using resources provided through the Fast Track program, the department requests system upgrades to its Fast Track administrative system. The Fast Track administrative system includes a student-facing component, contained in the DHEWD Student Portal, and an administrative element, that provides information to postsecondary institutions and DHEWD staff necessary to administer the program and better serve students. This request would allow the DHEWD and ITSD to complete vital enhancements to this administrative system.

While additional information and requirements gathering will be needed to detail the nature and scope of the needed additions, there are several key system components that require additional development to ensure the system addresses the needs of students and postsecondary institutions. For students, the DHEWD student portal would be revised to provide students with more complete, real-time information about their eligibility including documentation of the student's current status in the payment, employment, and repayment processes. Postsecondary institutions would see improvements through automated and electronically available calculations of students' eligibility and award amounts. The changes would correct existing problems and further enhance the enrollment status reporting that is required to determine when the student has meet the in-school program requirements to avoid the grant becoming a loan as well as developing processes to handle the employment deferrals and waivers and discharges that are specified in statute.

The costs would include salary for ITSD staff to provide oversight of the project, needed licenses and related software components, and up to three contract ed development

2. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Missouri families, students, policymakers and employers depend on the education and workforce data provided by DHEWD to make employment, education, and career decisions. DHEWD's enterprise data systems, including the Workforce Longitudinal Data System (WLDS), Workforce Information Database (WID), and public-facing Missouri School Credentials for Occupations Resulting in Employment Success (MoSCORES) and Missouri Economic Research and Information Center (MERIC) websites are in need of a range of enhancements that would render them more usable and efficient for DHEWD business and ITSD staff, and in the case of MoSCORES and the MERIC website, more usable and dynamic for public/external users. The need for these enhancements and process improvements have become apparent in recent years as internal staff have maintained the databases, and in the case of MoSCORES and the MERIC website, as external users have requested reports and data which the systems could not produce, and which instead have resulted in time-consuming ad hoc requests. Improvement in the ability to access data about workforce services by employers will provide insights to help better serve employers and the Missourians they employ.

A comprehensive solution will include improved/enhanced search and reporting functionality in MoSCORES, as well as process improvements to automate additional data transfer to and within the WLDS, and from the WID to the MERIC website. Both MoSCORES and MERIC websites will better serve the Missourians who rely on those sites for accurate, easy-to-access data. It would also make use of the enterprise Identity and Access Management and Enterprise Orchestration Engine as those become available, to better work within the state information technology ecosystem, in an effort to partner with OA-ITSD.

The agency worked with ITSD to determine an estimate for this effort. The team looked at what would be needed from the vendor and the development team in order to estimate the resources and the cost for this project.

5. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

5a. Provide an activity measure(s) for the program.

- Improved data management processes and better search and reporting capability will save significant staff time on administration and ad hoc requests, and free up staff to fulfill additional research and reporting obligations.

5b. Provide a measure(s) of the program's quality.

- Enhancements to the WID, WLDS, MoSCORES, and MERIC website would help DHEWD business and ITSD staff maintain all more efficiently and effectively, and in the case of MoSCORES and MERIC, provide more engaging and comprehensive search and data tools for job center customers and other external users, resulting in an improved customer experience with savings from reduced DHEWD and ITSD staff time for maintenance and ad hoc information requests.

5c. Provide a measure(s) of the program's impact.

- With the difficulty employers' face finding qualified candidates, being able to pull reports that show jobs available, qualifications needs, salary ranges, how often job types become available, etc. will ultimately help employers find the job candidates they need without expending resources that could be being reinvested into their business and local economy.
- The MERIC and MoScores websites average approximately 41,000 and 15,400 page views per month, respectively. Those site visitors will be better served by improved options and access to the data.

5d. Provide a measure(s) of the program's efficiency.

- Efficiency can be measured by the reduction in both business and ITSD staff time for manual processes and ad hoc reporting. That time can be spent on other high-need areas of work.
- Additional reporting capability using Catch Intelligence will also better enable DHEWD business staff to meet federal reporting requirements while also freeing time and resources for other projects and information requests.

The Department of Revenue wishes to extend the maintenance contract for their DORA (Department of Revenue Answers) chatbot. The chatbot has been in operation since November of 2019, and has fielded 2.9 million inquiries, over the course of 842,000 unique conversations. The department is requesting \$600,000 to extend the contract. The estimated cost savings of having the bot answer general questions opposed to customers having to call in is \$2,774,000, which equates to \$1,186,257 annually when taking into account the maintenance costs.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The Department already has a vendor source contract that specifies the terms of maintenance support and associated terms for the contract. The \$600,000 requested is in response to the BAFO presented by the vendor. The Department expects the maintenance costs to increase at a rate of 5% percent per year, for each year following FY23.

5. BREAK DOWN THE REQUEST BY BUDGET OBJECT CLASS, JOB CLASS, AND FUND SOURCE. IDENTIFY ONE-TIME COSTS.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

To increase the number of inquires/sessions the Department continues to promote Chatbot DORA availability using Twitter, Facebook and Instagram social media. During the Missouri State Fair Chatbot DORA magnets were made available to the public to promote the SMS number to get assistance. To improve the response accuracy rate the Chatbot teams review and analyze weekly message logs to drive needed updates and draft new question and answers.

In the spring of 2020 Tableau was selected as our enterprise analytics product. Our first priority with Tableau was to get all necessary COVID related dashboards in place to keep the citizens of Missouri informed with critical data related to public health, economic recovery and social impact. Moving forward, it is our goal to have all of our enterprise analytics created in Tableau. This supports our priority to become a data driven government, making the best decisions possible to support the citizens of Missouri.

This funding will allow OA to provide this critical tool at an enterprise level. Keeping the costs to agencies utilizing the tool at a manageable rate and giving access to all agencies. OA's ability to continue paying for the core Tableau costs will allow for more adoption and data driven decision across the State.

\$2,209,400 is what is needed to cover all Tableau server core licenses and data management licenses.

The amount that was appropriated in FY22 for specific agencies is used to pay for the Creator licenses, Tableau premium vendor support and the storage and backup infrastructure needed to support the dashboards and data within the system.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an activity measure(s) for the program.

The number of dashboard pages increased from 213 public facing page and 1,894 internal pages in February 2021 to 497 public facing pages and 5037 internal pages in September 2021

6b. Provide a measure(s) of the program's quality.

The quality of our Tableau environment can be determined by how agencies are effectively delivering vital information to the public. Our Show Me Strong website: <https://showmestrong.mo.gov/data> has been instrumental in delivering valuable COVID data to the public in a timely manner.
DESE is delivering important school data to the public in a easy to understand, interactive format using Tableau.

6c. Provide a measure(s) of the program's impact.

Citizen view of public facing dashboards increased from 267,675 in October 2020 to an average of 429,035 view per month between May and August 2021.

6d. Provide a measure(s) of the program's efficiency.

As seen by the dramatic increase of dashboard pages created by agencies, the analysis of their data is growing by leaps and bounds. The more agencies analyze their data the more insights they gain

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

This funding will allow OA to continue to provide Tableau at an enterprise level and ensure access for all state agencies. Tableau is our enterprise analytics and data visualization technology platform that is a critical foundation for our strategic priority to continue in our journey to transform to a data-driven, more transparent government. Missouri's Tableau journey began in 2020 during the pandemic when public dashboards were launched to inform and educate the public. The COVID-19 Tableau dashboards are still vital to share critical health, social impact and economic data with the citizens of Missouri. ARPA funding dashboards are being built in Tableau as well. In 2021, significant progress was made across state government to have all of our enterprise analytics created in Tableau. Agencies have transitioned department dashboards to Tableau and statewide internal dashboards are now available to all departments to share vital data to help agencies manage their operations. This funding for core Tableau costs will allow for more adoption and data driven decision making across the State.

This item also requests funding for the continued cost of statewide workforce management technologies used to deliver statewide human resources and talent management to all branches of state government. These technologies support a statewide approach that both reduces overall costs and improves operational effectiveness by facilitating data collection and decision making across the statewide enterprise.

MoCareers, the State's centralized application platform, has reduced the overall time to fill open positions across the state by replacing 16 different sites and application tools that were previously in use. It has also enabled statewide recruitment and hiring reporting that previously did not exist. This best in class platform was the recipient of two national awards in its first year of existence. First, MoCareers received the 2020 Government Experience Award from the Center for Digital Government. This award recognizes examples of increased efficiency and the overall experience in government. Secondly, MoCareers won the State IT Innovation of the Year from StateScoop which honors outstanding achievements in the government IT community and public service.

LinkedIn Recruitment, the only technology of its kind, compliments MoCareers in that it helps find, engage with, manage, and hire a diverse pool of candidates. LinkedIn Recruitment puts State of Missouri openings in front of candidates who may have never considered a job in Missouri or state government. This system also allows recruiters to search for unique skill sets and target potential hires. Together, these platforms save departments outreach, branding, and marketing costs associated with hiring new team members. Prior to this statewide contract there was little to no coordinated social media recruiting.

LinkedIn Learning (MoLearning) offers over 7,000 high quality courses to all State of Missouri team members, on-demand, 24/7. This platform enables departments to streamline their curriculum into learning paths targeted at specific groups of team members. In addition, the ability to upload custom content has decreased travel costs associated with in person training. Individual department costs would total over \$680,000 annually.

Qualtrics is a survey and analytics platform originally procured to support ENGAGE 2.0, the State's talent development and management program. Over the past year the use of this tool has been expanded to execute and analyze Quarterly Pulse Surveys, new onboarding and exit surveys, and dozens of other employee engagement surveys across departments.

HB Section: 05.030, 5.055

The statewide onboarding survey launched July 1, 2020. This is an optional survey distributed to newly hired team members when they reach certain key milestones in their employment (30, 90, 180 and 365 days). The data help to target specific improvements in the hiring and onboarding process to ensure that all team members feel valued, part of the team and have the tools they need to be successful in the role at the State.

6c. Provide a measure(s) of the program's impact.

6d. Provide a measure(s) of the program's efficiency.

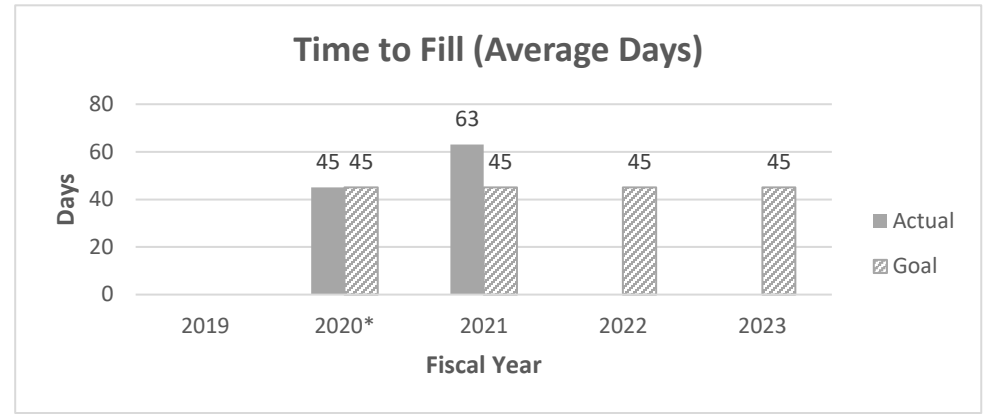

As seen by the dramatic increase of dashboard pages created by agencies, the analysis of their data is growing by leaps and bounds. The more agencies analyze their data the more insights they gain into their operations. This leads to better decision making and improved efficiency for the state.

*Current Year restricted amount is as of _____.

Reverted includes the statutory three percent reserve amount (when applicable).

Restricted includes any Governor's expenditure restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

Actual appropriation is the budget authority amount after all required flexibility transactions were processed. Flexibility is used to help manage priorities for all consolidated agencies as IT needs for each agency can change very rapidly throughout the year FY19 and FY20. Financial history also combines expenditures from budget unit 30599C which is now combined with this section beginning FY2021.

All GR supporting this section was erroneously changed to federal stimulus in FY22 budget cycle - there is a NDI request to accompany this core to get the GR back for DED.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

When budget bills were written in FY22 following budget conference for HB5, all of the GR supporting the Department of Economic Development's IT budget was written as being stimulus funding rather than GR in error. There is a supplemental request to correct this for DED in FY22; this request carries that correction into FY23.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The amount requested is to restore what was erroneously switched to stimulus funding. This includes all the GR for the ITSD-DED section which was intended to be approved in FY22.

5. BREAK DOWN THE REQUEST BY BUDGET OBJECT CLASS, JOB CLASS, AND FUND SOURCE. IDENTIFY ONE-TIME COSTS.

The Department of Labor and Industrial Relations (DOLIR) has applied for and is expecting to receive American Rescue Plan Act (ARPA) funds to assist with fraud detection and prevention, identify verification, and overpayment recovery activities in its Unemployment Insurance Program. These activities will require the assistance of Office of Administration, Information Services Technology Division (ITSD) and their contractors.

Additional grants may be offered to ensure equitable access to Unemployment Compensation Programs within the ARPA, which will require ITSD assistance.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The DOLIR has estimated that completing the work related to these grants will require OA-ITSD staff performing the following functions: Business Analyst, Tester, and Infrastructure Support. In addition, OA ITSD staff will need to supervise and monitor work performed by contractors. DOLIR based these estimates on previous technology projects. The project is expected to operate between April 2022 and September 2023. Additional grant opportunities may arise during that time, which DOLIR and OA-ITSD will evaluate.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an activity measure(s) for the program.

For FY 2021, there were 969 claimants determined to have fraudulently received benefits out of 139,596 claimants receiving benefits.

DOLIR expects new technology and enhanced identify-proofing processes will reduce fraudulent claims from being paid.

6b. Provide a measure(s) of the program's quality.

In FY 2021, the percentage of unemployment claims that were improperly paid was 10.8%. In FY 2020, it was 5.1% and Missouri ranked 14th out of 52 jurisdictions (states and territories). The large number of claims filed in FY 2021, created backlogs that prevented the agency from having the necessary time to make a proper determination.

DOLIR expects new technology and enhanced identify-proofing processes will reduce the amount of overpayments.

6c. Provide a measure(s) of the program's impact.

A reduction in fraudulent payments and the improved collection of overpayments will reduce the cost of the Unemployment Insurance program to employers.

6d. Provide a measure(s) of the program's efficiency.

The DOLIR expects to see a reduction in fraudulent payments and improvement in overpayment collection.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The Department of Public Safety, Office for Victims Crime (DPS-OVC), assigned to the Director's Office, administers the state's Crime Victims' Compensation Program (CVC) that includes the Sexual Assault Forensic Examination Program (SAFE) and the Child Physical Abuse Forensic Examination (CPAFE). CVC serves victims and families experiencing life-altering, traumatic situations by providing financial assistance as a payer of last resort. Payments may include payment of bills for medical, behavioral health, funeral costs, lost wages and loss of support up to \$25,000/crime. CPAFE and SAFE are payers of first resort, per statute no victim shall be charged for a forensic examination. DPS-OVC is seeking to procure a system that will allow for the digital submission of applications and digital correspondence with victims of violent crimes and related service providers. This solution will allow for a quicker response from DPS-OVC, which will in turn provide quicker response times for victims, families and service providers. Currently, DPS-OVC receives applications for CVC/SAFE/CPAFE in paper format with substantial supporting documentation. CVC staff spend time manually entering the application into the current CVC system, manually scan the required supporting documentation, and are only able to correspond with victims, advocates and service providers via snail (paper) mail, email or phone.

To check the status of a claim or application, victims, advocates and providers must call or email CVC to request information related to their application, claim or eligibility. This is an undue burden as it often requires victims to repeat their story. Further, due to the complexity of the internal processes accurate data collection is extremely difficult. Verifiable data is critical in maintaining and securing state and federal program funding. The solution DPS-OVC is seeking would not only improve the victim experience with CVC it would enhance the program accounting practices, reporting and accessibility to the program participants.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

In consultation with ITSD, the DPS-OVC completed significant research about what other states using for their programs, including off-shelf and customized systems available with the required functionality. The overarching theme was customization; as each state has identical federal reporting requirements their laws and statutes differ significantly. The research led to the Texas system. The functionality and components of the Texas system are nearly identical to the needs CVC. The Texas system was the best solution to meet the identified needs and requirements. The estimated implementation cost is \$1,068,707. Of this, \$1,008,707 is vendor cost to implement the new solution, and \$60,000 is the estimate for ITSD and DPS-OVC hours needed to assist with the implementation. It also has an estimated return on investment of \$358,750 - \$373,750 over a 5 year period, once the program goes live.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an activity measure(s) for the program.

The goal of this new electronic system is that 90% of communication with constituents about application status is resolved digitally.

6b. Provide a measure(s) of the program's quality.

Improved security, efficiency and cost reduction. The goal is a 10% initial adoption rate and 80% adoption rate by the end of FY 2025.

6c. Provide a measure(s) of the program's impact.

Monitor adoption rate. 80% adoption of digital application submittal process by the end of FY 2025 (means that 80% of all program applications are digital). Victims will be able to check the status of their claim online and there will be a must faster turnaround time for victims.

6d. Provide a measure(s) of the program's efficiency.

Initial processing time of 100 days will decrease to 30 calendar days by the end of FY 2025. This improves customer satisfaction and faster processing times.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

The DPS-OVC is planning the following strategies to achieve the performance measurement targets:

1. Targeted education, outreach and promotion to key stakeholders, including advocates who assist victims and families, funeral service providers, medical/behavioral health providers, law enforcement, prosecutors and other partner agencies.

2. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Survivors, victims, and other concerned citizens of Missouri deserve access to timely and accurate information about offenders in the criminal justice systems, jails, and prisons. The newly proposed MO Victims of Crime Alert Portal (MO-VAP) is expected to expand an existing data pathway between local law enforcement, state corrections, state mental health facilities, and state courts to provide reliable notifications to victims in a timely manner. The MO-VAP aims alleviate the burden the current system puts on victims to manage multiple registrations.

3. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The new process for Data submissions and handling shall be National Information Exchange Model (NIEM) conformant and use the Global Justice XML Model (GJXDM) standards. The data will be processed through an Enterprise Service Bus, IBM Integration Bus (IIB) which will be located and maintained by the State's Criminal Justice Information Systems (CJIS) System Agency, the Missouri State Highway Patrol (MSHP), in either real-time and/or as a batch process. The code is coming from Nebraska, which will be starting the foundation to communicate between states and ability to start cross state line victim notification. The team worked with Nebraska and the OA-ITSD development to help determine an estimate and level of effort.

5. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)		

5a. Provide an activity measure(s) for the program.

Having direct control of a new system would allow DPS-OVC to work more closely with key data partners and be more responsive to opportunities to foster innovation in victim services specifically centered on victims.

5b. Provide a measure(s) of the program's quality.

Reduce the amount of time it takes to collect victim notification data with a more efficient and streamlined process.

5c. Provide a measure(s) of the program's impact.

Victims/survivors will be safer having offender information faster and more readably available.

5d. Provide a measure(s) of the program's efficiency.

This project will ensure that DPS and their partner agencies are in compliance with RSMo 595 and RSMo 650.310.

6. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

The following strategies will be used to achieve the performance measurement targets:

1. Project Manager will work to ensure data is gathered, organized, and communicated
2. ITSD will work closely with all ITSD Functional Areas and Nebraska to ensure there is a clear understanding of the code and what is needed
3. Evaluate priorities and staff availability to determine the best course for implementation
4. Robust implementation plan, having a list of all systems (downstream and upstream) and a strong communication plan

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: Various	DEPARTMENT: Office of Administration
BUDGET UNIT NAME: ITSD Department IT Core	
HOUSE BILL SECTION: 5.030	DIVISION: Information Technology Services Division

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

DEPARTMENT REQUEST

ITSD is requesting 25% flex between PS & EE within section 5.30 and 25% flex between section 5.025 and section 5.030. This is the same level of flexibility that was approved in FY22. This flexibility is requested to help manage priorities for all consolidated agencies. ITSD serves departments with constantly changing needs, which requires some flexibility of funding so that proper spending from the appropriations is maintained. It is critical for ITSD to retain key technical staff that continue to optimize the IT systems and maintain technical support so that E&E operating costs are contained and managed. This flexibility allows ITSD to provide services in the most efficient and reliable manner across departments. 10% Flexibility is also requested between sections 5.005, 5.015, 5.020, 5.025, 5.030, 5.055, 5.065, 5.080 5.095, 5.155, 5.160, 5.165, 5.170, 5.175, and 5.180.

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$8,649,117	Unknown	Unknown

3. Please explain how flexibility was used in the prior and/or current years.

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
To adjust funding sources for PS and EE for various ITSD appropriations in order to optimize ITSD efficiencies and maintain critical IT infrastructure for all agencies	Flexibility will be used as necessary to optimize ITSD efficiencies and maintain critical IT infrastructure for agencies. Flexibility between divisions would better enable OA to break down silos and work effectively as a team.

2a. Provide an activity measure(s) for the program.

- CICS (Customer Information Control System) is one of the major sub-systems running on the Enterprise Server (Mainframe). It is an application server that processes transactions to provide services for running mixed-language programs and manages a large volume of submitted requests to run the same applications, using the same files and programs. CICS manages the sharing of resources, the integrity of data and prioritization of execution, with fast response times as well as providing high availability and scalability at a low cost per transaction. CICS authorizes users, allocates resources, and passes on database requests by the application to the appropriate database manager. The chart below shows the number of monthly CICS transactions executed indicating the level of reliance of this service to deliver critical services (for some agencies).

2b. Provide a measure(s) of the program’s quality.

- Core network availability is critical to the enterprise operations of all consolidated and non-consolidated agencies. The core network consists of larger network devices capable of large bandwidth loads and placed in strategic locations throughout the state. Uptime is measured by data transfer continuity. This is monitored primarily by the Orion Network Monitoring system. The goal for core network uptime is 99.995% (this allows for equipment replacement and upgrades). We are currently at 99.992% for timeframe 9/1/2019 – 8/31/2020. The data for KC, STL, and Springfield State office buildings includes telco provider outages.

2c. Provide a measure(s) of the program’s impact.

- Wireless access is becoming a more common and essential service each year. ITSD/Networking has been expanding the Wireless footprint throughout the state via requests and initiatives led by State agencies. Wireless access use cases range from electronic medication distribution in care facilities to mobile staff device use. The wireless access points (APs) will present at least three network IDs: mo.gov (the State’s private internal network, same as the wired network), mo.gov.guest (internet connectivity for guests conducting business with the State) and mo.gov.devices (IoT – Internet of Things devices that need access to the State’s network and/or internet).

The NOC is the hub for all IT internal and external communications for all IT incidents, status updates and incident reporting. The purpose of the NOC is to provide a central location (command and control) for all IT staff to communicate and coordinate production incidents. The NOC will receive an alert, assess impact, assign classification, alert appropriate personnel, establish communication channels, document, and provide incident reports and status updates.

2d. Provide a measure(s) of the program’s efficiency.

- Analog phone lines are being phased out throughout the country. Large phone companies are installing fiber circuits to allow more traffic and greater control in routing those calls. Support costs for the analog lines are therefore increasing each year. ITSD/Networking-Telecom has been working with agencies to convert these lines to digital circuits for several years. Phone lines are being converted to UC (VoIP) and fax lines are being converted to the state’s enterprise eFax server Biscom. These conversions have lowered costs for the circuits, reduced long distance costs and made faxing more secure. The goal is to convert a minimum of 1,200 lines per year. 590 were converted in 2020 with a slow down due to COVID. The average cost of an analog line is \$27.46/month. The cost of a UC phone line is \$12.11/month. The graph below shows new annual savings as a piece of the total annual savings through 2020.

2. CORE DESCRIPTION

Under Chapter 34, RSMo, OA is responsible for the procurement of supplies, equipment, and services for state departments. OA is currently implementing a statewide eProcurement system. New statewide contracts now include language that requires a one percent administrative fee on all transactions under those contracts. Contractors are required to report transaction totals for the given quarter and submit a check/electronic payment to the State of Missouri. This practice is consistent with the other states which have implemented e-procurement systems. The revenue generated by the one percent fee is to be deposited into its own fund to improve transparency and tracking. The revenue collected into this fund will be used for licensing, maintenance, support and activities related to the eProcurement system.

2. CORE DESCRIPTION

This funding is necessary to replace SAM II, the State's legacy Enterprise Resource Planning (ERP) system that was implemented in 2000.

The system is critical and supportive to all segments of State government. All payments from the State Treasury touch SAMII. Critical components with statewide impact include: Employee payroll processing, vendor payment processing, statewide budgeting, budget and cash controls, annual tax reporting (W2s and 1099s) capital asset tracking, data warehouse capabilities, and federal grant tracking. SAM II is written in COBOL, the staff with knowledge to support the system are dwindling both at the State and at the Contractor. Few changes are possible with the exception of required annual patches to produce year-end tax forms. Maintenance payments are increasing annually while the support is continuing to decline from the Contractor as their knowledgeable retire. The risk of key State staff retiring continues to increase. It is possible that the legacy system will not be able to be certified with each new

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

This funding is necessary to replace SAM II, the State's legacy Enterprise Resource Planning (ERP) system that was implemented in 2000. The system is critical and supportive to all segments of State government. All payments from the State Treasury touch SAMII. Critical components with statewide impact include: Employee payroll processing, vendor payment processing, statewide budgeting, budget and cash controls, annual tax reporting (W2s and 1099s) capital asset tracking, data warehouse capabilities, and federal grant tracking. A new ERP is critical to support basic data analysis and fact-based decision making on topics such as workforce strategy, program budgeting, and procurement. Our current SAM II system poses a significant operational risk to the functioning of the government. SAM II is written in COBOL, the staff with knowledge to support the system are dwindling both at the State and at the Contractor. Few changes are possible with the exception of required annual patches to produce yearend tax forms. Maintenance payments are increasing annually while the support is continuing to decline from the Contractor as their knowledgeable retire. The risk of key State staff retiring continues to increase. Coding techniques have changed and there are components of the core modules that can only be assembled in a compiler that is 2 versions behind today's standard.

Enterprise Resource Planning (ERP) Replacement <u>DI# 1300023</u>	HB Section <u>5.045</u>

This adds significant future risk of not being able to essentially modify this code even if statutory or other necessary changes are required. SAM II is a critical enterprise-wide system for bonds, vendors, payroll and payment controls. The ERP software is currently in the review of bid proposals procurement stage, but it is anticipated that the implementation design and configuration will begin in FY2023. During this phase of the project, there will be additional costs for a contracted project management team and independent verification and validation services.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The contract for the ERP replacement software is expected to be awarded around January 2022. The contract with a consultant to implement the software is expected to be awarded in the spring of 2022. Estimates of the cost of the software, implementation services and independent validation and verification oversight are expected to be approximately \$26 million in FY23. Implementation of the new Budget module is estimated to begin July 2022, with a 13 month planned implementation timeframe. The Finance/Procurement/Grants/Cash Management/Asset Management modules are estimated to begin July 2022 with a 24 month estimated implementation timeframe. It is anticipated that the RFP for the system Implementer will be sent out in late 2021 with selection in the spring of 2022. Given that we have not received bid responses with cost figures specific to the state's size and scope of project, we are estimating the cost for FY2023 based on other state ERP projects of similar size and scope. Additional funding of \$5-10 million will likely be needed in FY24 as that is estimated to be the peak cost year for the project.

5. BREAK DOWN THE REQUEST BY BUDGET OBJECT CLASS, JOB CLASS, AND FUND SOURCE. IDENTIFY ONE-TIME COSTS.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an effectiveness measure.

The goal with a new system is real-time information for management of cash balances, journals and ledgers. A table-driven system would allow documents, events and business rules to be easily customized for journal postings, document cloning, security and workflow.

The new system could encompass grants management capabilities, allowing some agencies to retire other systems in order to use a single system. More than four disparate systems exist, while some agencies use Microsoft Access and Excel for tracking. A new system will also provide performance budgeting capabilities, and allow the capture of justification, goals, objectives, performance measures, and dashboard features.

NEW DECISION ITEM

RANK: _____

Department: Office of Administration	Budget Unit 30640C

Enterprise Resource Planning (ERP) Replacement DI# 1300023	HB Section 5.045

6b. Provide an efficiency measure.

SaaS is a web-based architecture that would eliminate the need to support the desktop software version. This system will be vendor supported, which would allow ITSD to redirect the five current COBOL developers to modernization of other legacy systems supported by ITSD. Technology risks could be mitigated by increased security.

A new, robust system could eliminate agency specific systems for grants management, more detailed budgeting, etc. Based on information provided by other agencies, a new system could result in cost avoidance of over \$10 million for new or replacement of disparate systems for tracking grants, training, timekeeping, employment applications, inventory, professional development, etc.

6b. Provide an efficiency measure.

* Due to the current vendor maximizing allowable increases on the contract, the State discontinued vendor maintenance for the budgeting module of SAMII (BRASS) in 2017. This eliminated \$161K in support costs and if this had not been done, the vendor maintenance for FY2017 would have exceeded \$800K. The State must continue paying vendor maintenance for the other portions of the ERP system due to annual system updates to vital tax information.

6c. Provide the number of clients/individuals served, if applicable.

SAM II has 2900 financial users, 1653 HR users and processes payroll statewide. Additionally, our vendor community is tied to SAM II as well as Missouri BUYS.

6d. Provide a customer satisfaction measure, if available.

Customer satisfaction would primarily come from the end-users of the system. We do not have a metric at this time, but would perform a survey after migration to the new system. System implementation goals would include a seamless transition for vendors and state employees who receive payments from the State's ERP.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

Finish selecting professionals to assist the State, and start the implementation phase of the project.

2b. Provide a measure(s) of the program's quality.

- ITSD conducts a survey after the completion of each project. Overall scores are averaged for each quarter. The scale is from 1 to 4 with 4 being the highest. Our projects were an area identified that need improvement. We have developed an impactful training program for both IT and our business partners to address this needed improvement. This program started in the fall of 2019 and we are starting to see the positive results.

- Security Scans are conducted at least quarterly for an application. Our targets are higher than industry security standard recommendations. This chart depicts our average security score each calendar quarter as well as the recommend target score for a low impact and high impact application. Impact is based on the business criticality of the application. The goal is to remain above 90 for our average scores regardless of impact.

2d. Provide a measure(s) of the program's efficiency.

- ITSD scans applications to address any potential cyber security vulnerabilities. The chart below shows how often the very first scan of an application is passing. When an application passes the first scan, there is no rework that must be done to comply with our security standards. The practice of scanning applications and training developers on mitigating cyber security risks keeps citizen data as secure as possible from the inception of an application. Applications are routinely scanned to ensure any new threats are addressed timely.

1a. What strategic priority does this program address?

The strategic priority of this program is to build the State of Missouri workforce for the future.

1b. What does this program do?

- Modernizes our approach to state-wide recruitment by partnering with State agencies to help fill critical roles. Our goal is to hire the right people, in the right places, at the right time by leveraging new technologies, approaches and outside partnerships.
- Coordinates State-wide performance management and learning solutions to build a better and more effective State of Missouri workforce. Our goal is to pursue and implement opportunities that enable "best in class" training content to be consistently distributed across State government in the most efficient way possible. We are focused on increasing "training hours completed" (volume), serving a higher percentage of the workforce, improving content quality, while reducing administrative costs.
- Supports State employees and executive departments through maintenance of the classification structure, position/job analysis, compensation administration, and examining turnover trends. Provide quality assurance for agency transactional human resources.
- Provides statewide Human Resources (HR) data analysis and visualizations to stakeholders at all phases of the employee lifecycle on a routine and ad hoc basis. Supports SAMII HR maintenance, administers workforce surveys, and provides customer support for the talent management technologies.
- In addition to all statewide talent responsibilities, the Division of Personnel administers human resource functions for 1,700 state employees of the Office of Administration.

2a. Provide an activity measure(s) for the program.

Attracting more applicants increases the candidate pool from which to select new hires. It is also an indication of how many users we are driving to the applicant tracking system. Pipeline requisitions are a tool used to keep constantly open positions visible at all times without having to repost; they are excluded from this measure. *Fiscal year 2020 data is for a partial year. MOCareers launched January 1, 2020; no prior year data is available.

The Statewide new employee onboarding survey launched July 1, 2020. This optional survey is distributed to new team members when they reach certain key milestones in their employment (30, 90, 180 and 365 days). The data help target specific improvements in the hiring and onboarding process to ensure that all team members feel part of the team and have the tools they need to be successful in their role.

Office of Administration Exit Survey Response Rate

Exit interviews are distributed to State employees voluntarily separating from State service to understand why they decided to leave. The collection of this data is in an effort to improve retention.

*Fiscal year 2020 includes partial data, because the exit interview initiative began during Fiscal Year 2020 when a pilot began in the Office of Administration. It was expanded to additional agencies in Fiscal Year 2021.

Percent of New Hires Completed in MOCareers vs. Total New Hires in SAM II

MOCareers, the States centralized application platform, has reduced the overall time needed to fill open positions across the state. This is accomplished by replacing individual agency application processes into one platform, streamlining steps, emphasizing key metrics and improving the job seeker experience. A handful of agencies outside of the executive branch joined MOCareers in Fiscal Year 2021. The goal is for 99% of candidates to be hired through MOCareers.

*Fiscal year 2021 data is for a partial year, because MOCareers launched in January 2020.

Statewide Onboarding Survey Positivity Rating

The statewide new employee onboarding survey launched July 1, 2020. This is a short survey that is sent to new employees at 30, 90, 180 and 365 days in their new position; participation is optional. Agencies have access to a dashboard that allows them to review their agency information, drilling down to division level. With this information, agencies can consider enhancements to their onboarding program that improves the new employee experience.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

With the passage of HB 381 in 2009, section 136.055 RSMo was modified to require the Director of Revenue to "award fee office contracts under this section through a competitive bidding process" in place of the historical appointment of fee agents by the director of revenue. Since 2009 the Division of Purchasing has conducted the competitive bidding processes for each of the 170+ fee offices on behalf of the Department of Revenue in accordance with Chapter 34, RSMo without any additional FTE or E&E. Instead, the Division of Purchasing has attempted to absorb this significant workload without requesting the resources actually needed to manage this volume of additional bids and resulting contracts. The workload volume and unique challenges of managing the license office procurements and contracts continue to significantly hinder the Division of Purchasing's ability to complete procurements for the other state agencies in a timely manner. The license office procurements are protested by the losing vendor(s) at a substantially higher frequency than other procurements and sometimes litigated which has had a compounding, detrimental impact to Purchasing's workload and turnaround times.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The Division of Purchasing is requesting three (3) FTE (one Procurement Supervisor and two Procurement Analysts) to manage the bidding and contract management of the fee office procurements throughout the state. This request also includes E&E costs for computer equipment and furniture for the three requested staff. In order to be able to realistically support competitively bidding of the 170 + fee offices throughout the state, the Division of Purchasing requires additional support of three FTE: (1) one Procurement Supervisor to oversee and manage the procurement of the fee office bids including any necessary contract management functions and (2) two Procurement Analysts to conduct the day-to-day functions of competitively bidding the fee offices. When the Division of Purchasing began bidding the fee offices, no additional FTE were provided to the Division to support the task. The Division of Purchasing has approximately 12 years of experience bidding these offices and has had to routinely divert the equivalent of two FTE's and one manager to support the workload associated with the fee offices. This will allow other staff in the Division to conduct bids for other state agencies in a more timely manner. The resources required to implement the outsourcing of fee offices in 2009 have never been provided. For this large volume of competitive bidding processes to be conducted and for resulting contracts to be managed, proportionate procurement resources must be provided as the timeliness of other procurements is currently being jeopardized by resource needs of the License Office bids and contracts. In FY21 license offices represented 8% of our contracts but 50% of our protests.

2. CORE DESCRIPTION

The core request is for funding to promptly refund the vendor's bid or performance security that was deposited into the State Treasury during the procurement process. Checks are received from vendors as bid or performance security and deposited into the State Treasury. Interest earned on these deposits goes directly into General Revenue. After the bids are awarded or the contractor has performed, these deposits must be promptly refunded to the vendor or contractor. These are refundable deposits and not payments to the State.
