Missouri is abounding with natural resource diversity like no other state in the nation. The Show-Me state's varied landscapes extend from the rolling farmlands in the north to the Ozark hills in the south to the Mississippi River bottoms in the east to the open prairies in the west. Our water resources are equally as diverse from the crystal clear spring-fed streams to the man-made recreational lakes to the major navigational waters of the Mississippi and Missouri rivers.

The quality of life for each Missourian can be closely tied to the health of our state's natural resources. Our air, land and water resources are essential not only to Missouri's environment and our health; they also contribute to the economic vitality of our state and help ensure future prosperity, which further improves our quality of life. For these reasons and more, the Missouri Department of Natural Resources has dedicated its mission since 1974 toward enhancing Missouri's natural resources – it's in our nature!

Passage of several significant federal environmental laws, including the National Environmental Policy Act, the Clean Air Act, and the Clean Water Act, helped build a foundation for a healthier America. Growing concern for protection of Missouri's natural and cultural resources led the Missouri Legislature to create the Missouri Department of Natural Resources, which became official on July 1 under the Omnibus State Reorganization Act of 1974 bringing together nearly 15 existing agencies with complementary missions.

The Missouri Department of Natural Resources protects, preserves and enhances Missouri's natural and cultural resources. The department helps develop mineral resources in an environmentally safe manner, protects Missouri's land, air and water resources and works to preserve the state's cultural and natural heritage through state parks, state historic sites and the state historic preservation office. The department enforces environmental rules and regulations related to air and water pollution, hazardous and solid waste, land reclamation, soil and water conservation, and safe public drinking water. The department's regional and satellite offices provide field inspections, complaint investigation and front-line troubleshooting, problem solving and technical and compliance assistance on environmental issues and emergencies.

The department has experienced many challenges and transformations since it was first created in 1974. The department will continue to work to provide an enhanced quality of life for its citizens and take the most sustainable path forward to protect, preserve and enhance Missouri's natural and cultural resources. These resources are also critically important to the economic wellbeing of the state, and protecting these resources helps ensure future prosperity.

The Department of Natural Resources looks forward to the next 40 years, as it continues to take care of Missouri's natural resources and provides all Missourians a healthy environment in which to live, work and enjoy the great outdoors. Enhancing Missouri's natural resources - it's in our nature!

For More Information...An important element in the successful completion of the Department of Natural Resources' mission is helping Missourians and visitors who seek our services. The department offers a number of compliance assistance and educational services designed to help individuals, groups and businesses better understand our natural resources and the rules that exist to protect them. The department also maintains a vast amount of information available to the public in the form of fact sheets, guidance documents, geologic maps, technical books and publications on a wide variety of issues.

Department of Natural Resources

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Natural Resources Protection Fund - Damages Subaccount (0555); Solid Waste Management Fund (0570); Underground Storage Tank Regulation Program Fund (0586); Environmental Radiation Monitoring Fund (0656); Hazardous Waste Fund (0676); Dry-Cleaning Environmental Response Trust Fund (0898)

Note: This core budget is facing fiscal challenges.

2. CORE DESCRIPTION

The goal of the Hazardous Waste Program is to protect human health and the environment from threats posed by hazardous waste and other contaminants. To accomplish this goal, the program encourages the reduction of hazardous waste generation; regulates the management of hazardous waste; oversees the cleanup of contamination thereby promoting property re-use for economic development and sustainable communities; regulates the management, closure and risk-based cleanup of petroleum storage tank sites; and ensures long term stewardship of sites where contamination remains.

Hazardous Waste and Substance Clean Up PSD: The Hazardous Waste Program exists in part to address environmental contamination caused by human activity at sites such as Brownfields, gas stations, major oil refineries, old mining sites, wood treaters, and other sites. In addition, the department conducts pesticide collection events to help ensure proper management of pesticide waste in the state and to provide educational outreach regarding pesticide waste. In most cases, the program sets standards and oversees other entities who perform the needed investigation and cleanup activities. These entities include responsible parties; voluntary businesses and developers; and federal, state and local governments. However, in some cases, the program takes direct control of the investigation or cleanup at a site using funds provided for that purpose from federal or state sources. The program uses these resources to engage consultants and contractors to perform fieldwork including preparing work plans and reports, as well as conducting chemical analysis and cleanup activities. Where appropriate, the department will perform operation and maintenance or long-term stewardship activities at sites where remedial action has occurred to help ensure the remedy remains protective of human health and the environment.

CORE DECISION ITEM

Department of Natural Resources

Budget Unit 78870C, 79445C

Division of Environmental Quality

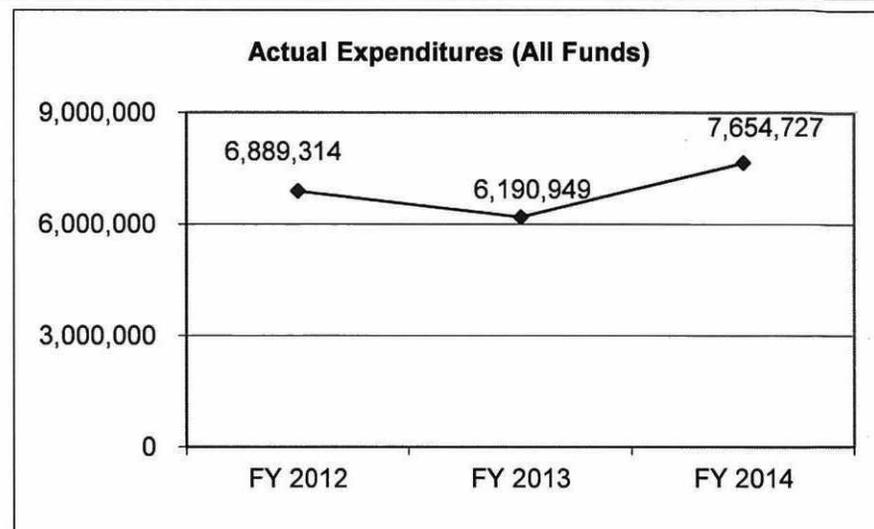

Hazardous Waste Program Core

3. PROGRAM LISTING (list programs included in this core funding)

Hazardous Waste Program

4. FINANCIAL HISTORY

	FY 2012 Actual	FY 2013 Actual	FY 2014 Actual	FY 2015 Current Yr.
Appropriation (All Funds) (1)	8,085,192	8,155,334	11,017,877	11,168,304
Less Reverted (All Funds)	0	0	0	N/A
Less Restricted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	8,085,192	8,155,334	11,017,877	N/A
Actual Expenditures (All Funds)	6,889,314	6,190,949	7,654,727	N/A
Unexpended (All Funds)	1,195,878	1,964,385	3,363,150	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	889,056	1,621,004	1,272,309	N/A
Other	306,822	343,381	2,090,841	N/A
	(2)	(2)	(2)	(2, 3)

Reverted includes Governor's standard 3 percent reserve (when applicable).

Restricted includes any extraordinary expenditure restrictions (when applicable).

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) In many cases, pass-through appropriations are set at a level to encumber and pay our commitments, which often span multiple fiscal years. This may often cause high unexpended appropriation balances.

(3) FY 2015 PSD appropriations include: Leaking Underground Storage Tanks \$420,000; Drycleaner Cleanups \$350,000, and Hazardous Substances Cleanups \$3,778,944.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

1. What does this program do?

The three major functions of the Hazardous Waste Program are:

Pollution Prevention – The program is responsible for ensuring that regulated parties comply with the laws and regulations designed to prevent pollution. The program works with businesses that generate, transport, treat, store, and dispose of hazardous wastes to ensure safe operation, waste handling and disposal by issuing identification numbers, certifications and permits, inspecting sites for compliance with laws and regulations and taking appropriate enforcement action to ensure the correction of violations. In reporting year 2013, Missouri companies generated about 290,651 tons of hazardous waste. Approximately 77% of this was treated or disposed of in Missouri; the remainder was shipped out of state or out of country. During this same period, Missouri received approximately 165,402 tons of hazardous waste from outside the state. About 92% of this imported waste was burned by Missouri cement making operations as a substitute for coal. The program is also responsible for tracking information, conducting inspections to ensure safe operation, and performing enforcement actions to ensure violations are corrected on approximately 3,500 underground storage tank sites with approximately 9,100 tanks.

Remediation – The program is responsible for ensuring corrective action of contamination that is not caused by nature. The program implements laws that require responsible parties to be accountable for the contamination they cause. The program also works with parties seeking to voluntarily clean up contamination. In all cases, the program provides oversight for investigating and remediating contamination to bring these sites back into beneficial reuse for economic benefit and sustainable communities. Where appropriate, the program performs operation and maintenance activities to ensure remedial actions taken at sites continue to be protective of human health and the environment. Examples include but are not limited to: Brownfields, gas stations, major oil refineries, abandoned lead mine sites, major industrial areas, wood treaters, Superfund sites, drycleaners, and federally owned sites.

Long-Term Stewardship – Because most corrective actions leave some residual contamination, the program implements long-term stewardship measures to ensure that remediation decisions result in safe and productive reuse of properties for future generations. Examples of long-term stewardship tools include: engineered controls to isolate contamination, property controls to limit activities, governmental controls such as zoning or permits, informational devices and regular inspections.

Hazardous Sites PSD

Leaking Underground Storage Tanks: The federal government provides resources to states to address contamination from underground tank releases in situations where there is a threat to human health and the environment but no willing or viable responsible party can be found. The federal government also allows the state to use these funds to assist cities where abandoned underground tanks are an impediment to revitalization efforts. At times federal funds are also available to expedite remediation oversight and provide contractual support for department tank related activities.

The department implements a Risk Based Corrective Action (RBCA) process at sites where petroleum releases have occurred. By employing tools such as exposure assessment and risk assessment, the use of risk-based decision making can consider the current and potential risks posed by an underground storage tank release. This knowledge is used to make decisions about corrective action processes and site management. The final tanks RBCA rule was implemented in February 2014.

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

1. What does this program do (continued)?

Drycleaner Environmental Cleanups: Senate Bill 577 (2000), created the Dry-cleaning Environmental Response Trust (DERT) Fund to assist in the cleanup of contaminated drycleaner sites. Cleanup of contaminated properties provides an opportunity for reuse and economic development. The program reimburses eligible parties for qualifying investigation and cleanup expenses over the \$25,000 deductible. The first four years of the program were dedicated to collecting fees as required by statute and developing the program rules. The Joint Committee on Administrative Rules disapproved the rulemaking on September 16, 2004. Senate Bill 170 and Senate Bill 225 (2005) reauthorized the DERT Fund with changes. The DERT Fund Rules became effective on May 30, 2006. Senate Bill 135 (2011) extended the sunset date on the program and the DERT Fund to August 28, 2017. State regulations require that reimbursement of the DERT Fund monies be accomplished based on site prioritization. DERT Funds are allocated to prioritized sites in the following proportions: high priority 60%, medium priority 30%, and low priority 10%.

To date, 42 sites have been accepted into the DERT program, however being accepted into the program does not guarantee that a site will receive complete reimbursement of their cleanup costs. Sites in the program receive oversight of their cleanups and a certificate of completion in addition to potential reimbursement of eligible costs. The department estimates there are approximately 866 potentially contaminated drycleaner sites in Missouri. With the extension of the sunset date, based on current revenues, expenditures and average cleanup costs, the fund could support reimbursement of cleanup costs for 15 sites over the life of the fund. Reimbursement is a complex process and is dependent on receiving all appropriate documentation and responses from owners and consultants, sometimes spanning multiple fiscal years. Based on a fiscal analysis of the DERT Fund in 2012 no new applications into the DERT Fund have been accepted. The Department notified all active dry cleaners, DERT Fund participants/their consultants, and the original stakeholder group that due to declining revenues, the fund would not accept new applications after September 2012 and reimbursement of costs for future work plans may not be guaranteed.

Hazardous Substance Cleanup: Pollution and public health problems have resulted from the mismanagement of waste at abandoned or uncontrolled hazardous waste sites and federal facility sites in Missouri. The department, in coordination with EPA, may remediate these sites solely or they may be remediated by the responsible party with state oversight. The federal government and the state provide resources to address hazardous substance sites in Missouri where there is no willing viable responsible party. The state also pursues cleanups independently of the federal government when EPA has not ranked a site as a priority. This PSD is used to hire contractors to perform cleanup, monitoring or assessment work, manage data or to perform relevant environmental studies at these sites.

This appropriation is also used to pay EPA for the State of Missouri's 10% match obligation for remedial action conducted at Superfund sites. Funds have also been used to investigate several radiological contaminated sites. The program will continue to utilize federal Brownfield resources to conduct assessment and cleanup activities at eligible Brownfields sites which are inclusive of, but not limited to brownfields sites contaminated with hazardous and/or petroleum substances, lead-based-paint, asbestos, controlled substances and mine-scarred lands, thereby promoting property re-use for economic development and sustainable communities. In addition, the department is conducting pesticide collection events to help ensure proper management of pesticide waste in the state and to provide educational outreach regarding pesticide waste.

Voluntary Remediation including Brownfields

Drycleaner Remediation

Petroleum Storage Tanks

Environmental Radiation Monitoring

Missouri Environmental Covenants Act

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

3. Are there federal matching requirements? If yes, please explain.

Performance Partnership Grant - RCRA	25% State (EPA)
Performance Partnership Grant - Toxic Substances Control Act (TSCA) PCB	25% State (EPA)
Brownfields 104 (k)	100% Federal (EPA)
Brownfields 128 (a)	100% Federal (EPA)
Defense/State Memorandum of Agreement (DSMOA)	100% Federal (DOD)
Ellisville Superfund Cooperative Agreement	100% Federal (EPA)
Formerly Utilized Sites Remedial Action Project (FUSRAP)	100% Federal (Army Corp of Engineers)
United States Department of Agriculture - Grain Bin Sites	100% Federal (USDA)
U.S. Department of Energy - Kansas City Plant Grant	100% Federal (DOE)
Valley Park Remedial Activities	100% Federal (EPA)
Superfund Agreement	10% State (EPA)
(Support Agency Cooperative Agreement and Pre-Remedial Response Cooperative Agreement are 100% federally funded)	
Weldon Spring Long-Term Surveillance and Maintenance Project	100% Federal (DOE)
Leaking Underground Storage Tank-Preventative	25% State (EPA)
Leaking Underground Storage Tank Trust Fund-Corrective Action	10% State (EPA)
Minuteman II Longterm Stewardship	100% Federal (DOD)
General Services Administration (GSA) - Environmental Project Assistance	100% Federal (GSA)
United States Department of Agriculture - Mark Twain Forrest Agreement	100% Federal (USDA)
Various State Superfund Contracts	10% State (this covers our 10% state Superfund obligation)

4. Is this a federally mandated program? If yes, please explain.

Through delegation from, and agreements with, the federal Environmental Protection Agency, the Hazardous Waste Program supports the federal Resource Conservation and Recovery Act (RCRA), as well as Section 9004 of the Solid Waste Disposal Act as amended by RCRA, the Superfund Amendments and Reauthorization Act of 1986, and 40 CFR Part 281. In addition, work performed under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), as well as cleanup oversight at Federal Facilities sites, is mandated by the federal government.

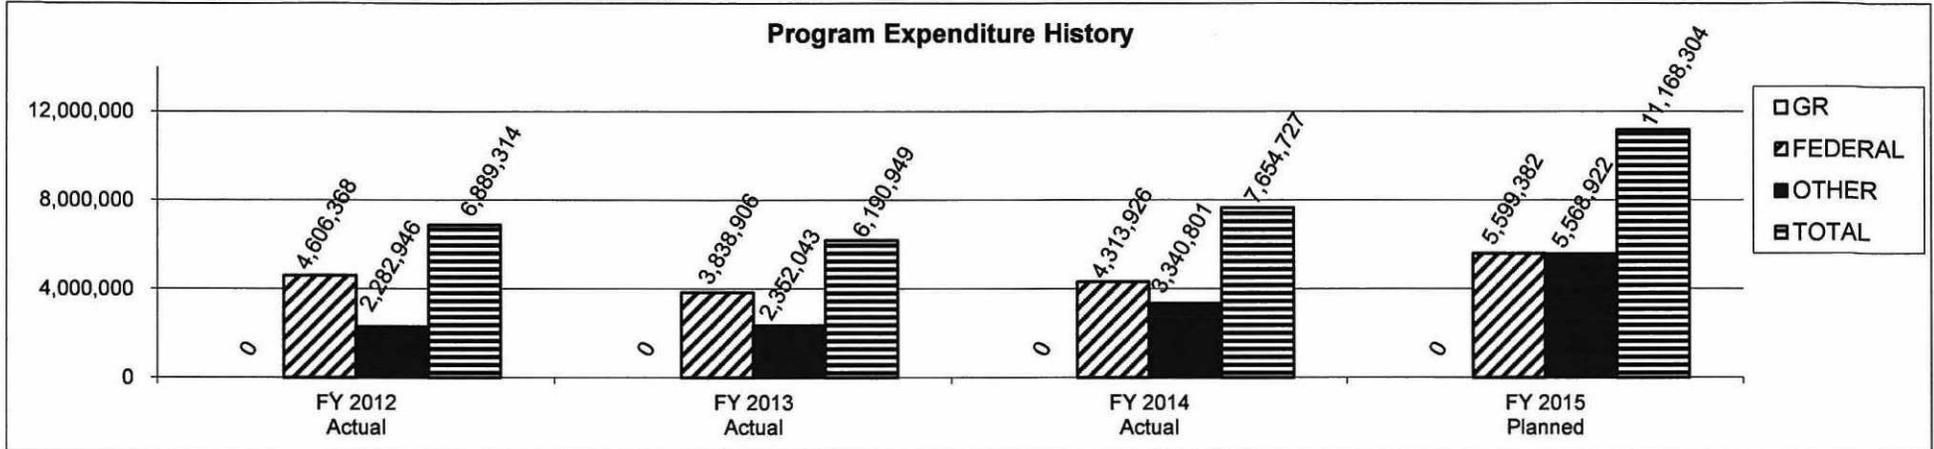

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. Beginning in FY 2013, core pass-through appropriations were set at a level to encumber and pay our commitments, which often span multiple fiscal years. FY 2015 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Natural Resources Protection Fund - Damages Subaccount (0555); Solid Waste Management Fund (0570); Underground Storage Tank Regulation Program Fund (0586); Environmental Radiation Monitoring Fund (0656); Hazardous Waste Fund (0676); and Dry-Cleaning Environmental Response Trust Fund (0898)

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7a. Provide an effectiveness measure.

UST- Inspections are counted in the fiscal year for the day of inspection. Numbers are reviewed annually to reflect LOWs and NOVs issued in subsequent fiscal years for previous year's inspections. NOVs include all financial assurance and fee-related NOVs. Due to compliance outreach efforts, LOWs and NOVs are often not issued in the same year the inspection is conducted. True percentages of inspections not resulting in NOV issuance cannot be determined until all inspection follow-ups are completed. UST inspections were higher in FY 2012 to conform with EPA's definition of the three year inspection cycle. Inspection numbers for FY 2013 - FY 2016 are set to ensure inspection of each facility every three years.

PCB- MDNR conducts inspections of PCB facilities, but LOWs and NOVs are issued by EPA.

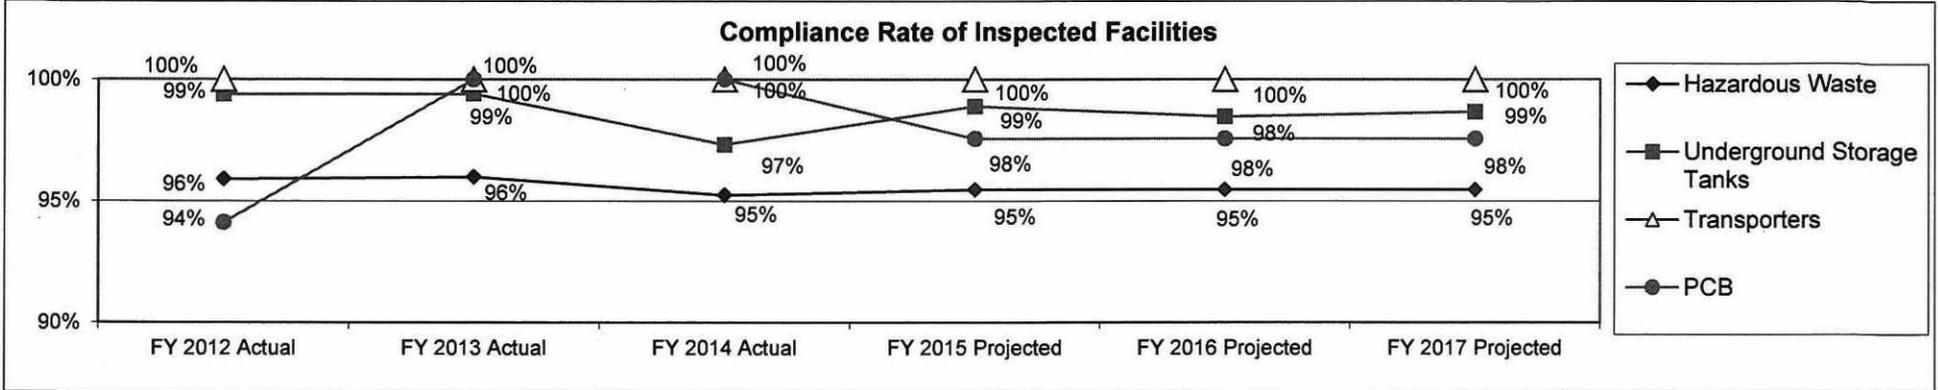

PROGRAM DESCRIPTION

Department of Natural Resources

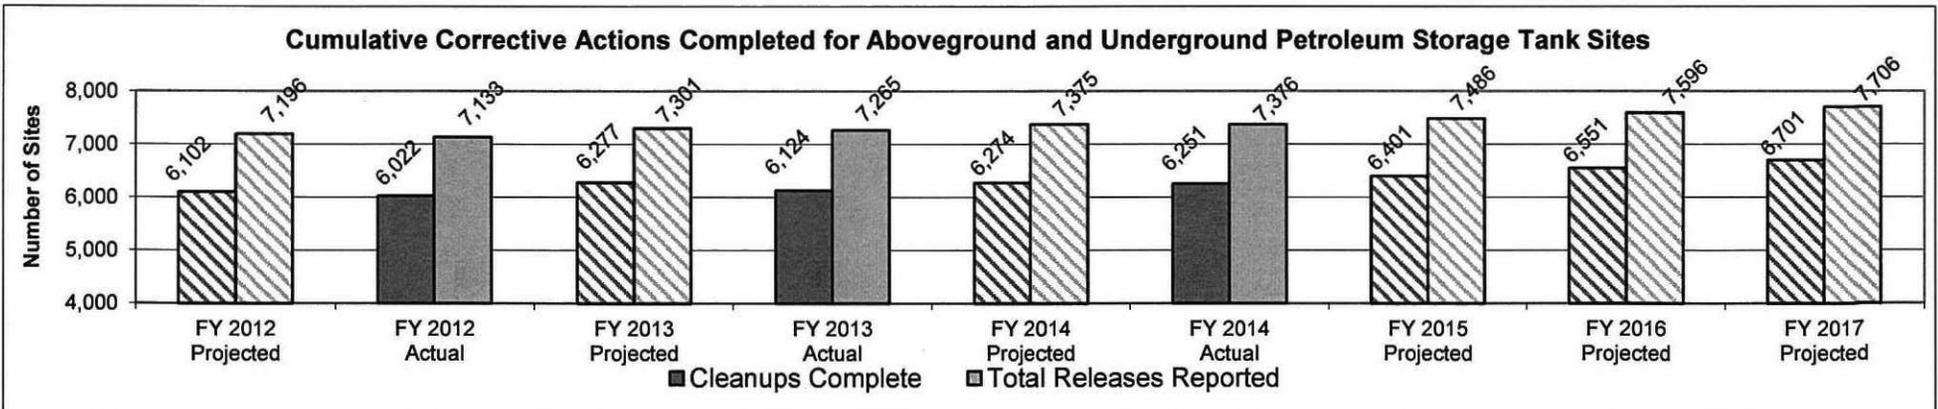

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7a. Provide an effectiveness measure (continued).

All numbers are reviewed and updated as necessary annually. True percentage of inspections not resulting in NOV issuance cannot be determined until all inspection reviews are completed. Facilities are only reflected as not in compliance if an NOV is issued based on the facility inspection. Please note the transporters have a 100% compliance rate of inspected facilities from FY 2012 Actual through FY 2017 Projected.

"Corrective action" includes sites where contamination remains in place with appropriate engineering or institutional controls. Some measures are re-calculated each month for all previous months to reflect items added, deleted, or edited after the end of the previous reporting period.

PROGRAM DESCRIPTION

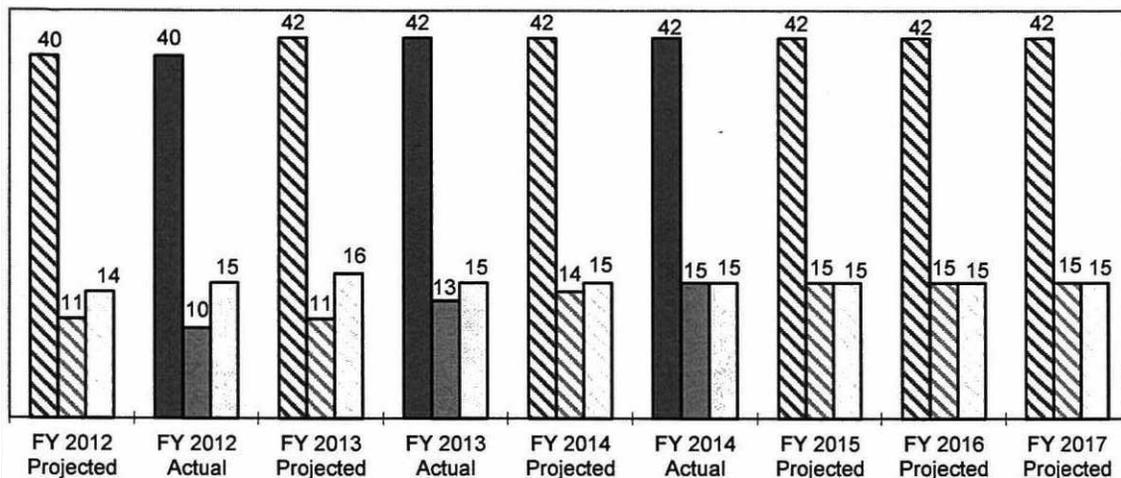

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7a. Provide an effectiveness measure (continued).

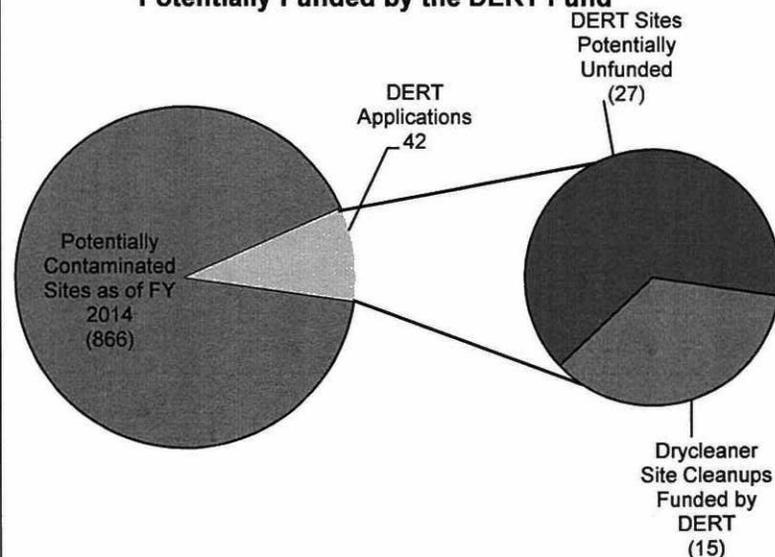

Projected Drycleaner Sites Cleaned Up and Cost Reimbursed Over Life of Program

Total Potentially Contaminated Sites as of FY 2014= 866

- Applications Received - Cumulative
- DERT Cleanups Completed - Cumulative
- Reimbursements Completed from Fund - Cumulative (including those closed under BVCP)

Drycleaner Site Cleanup Reimbursements Potentially Funded by the DERT Fund

Total Known Drycleaner Universe = 1,154

The State Coalition for Remediation of Drycleaners estimates that 75% of drycleaners are potentially contaminated. At the end of FY 2014, the known universe of abandoned and active drycleaners in Missouri was 1,154. Five sites that had been cleaned up through Voluntary Cleanup applied for reimbursement only. Completion of reimbursement lags behind cleanup due to site prioritization and is based on receipt of completed claim requests. Based on claims filed thus far, the total average assessment/cleanup reimbursement per site is \$144,182. Over the life of the fund, we could potentially support reimbursement of cleanup costs for 15 sites. Even if the average cleanup cost per site were to decline over time, the fund cannot support reimbursement of cleanup costs for the estimated 866 potentially contaminated dry cleaning sites in Missouri. *The fund sunsets in 2017 (FY 2018).

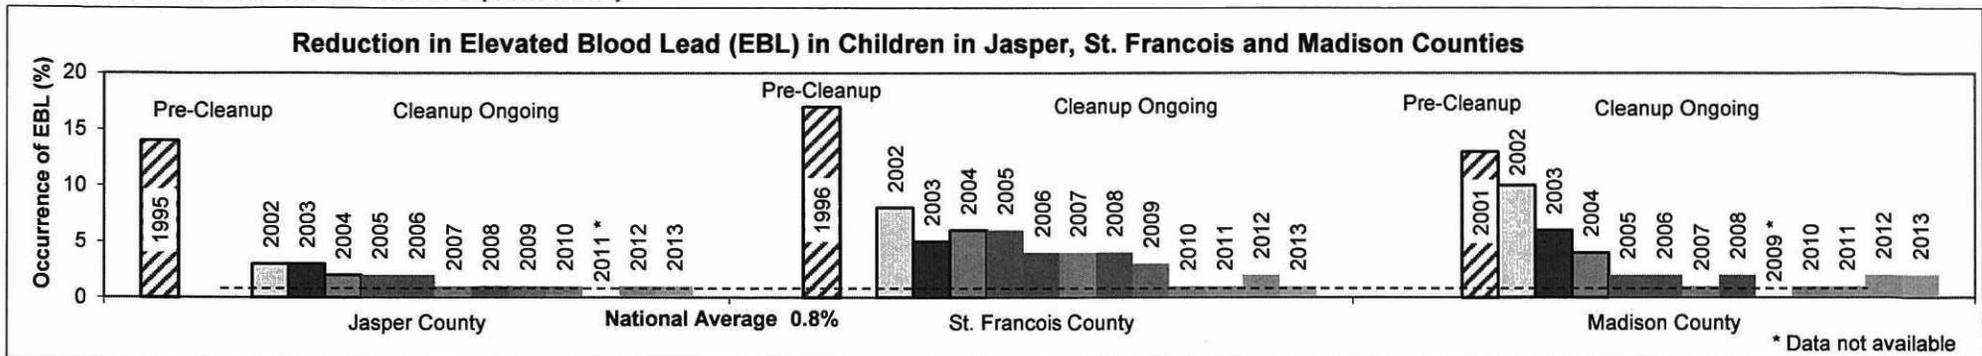

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

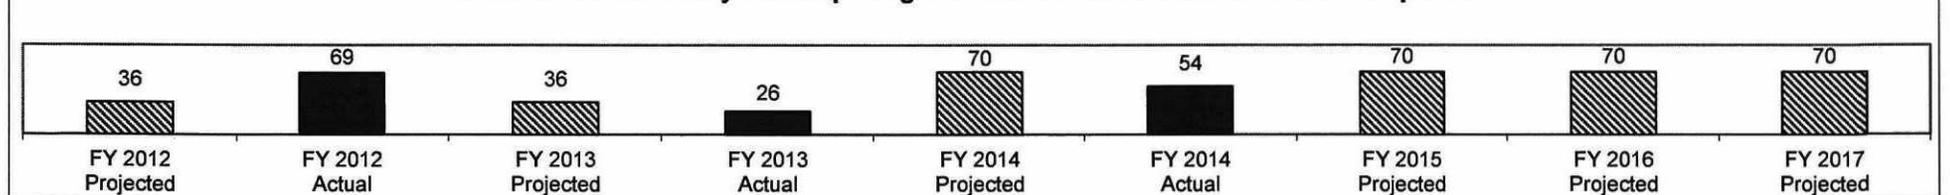

Program is found in the following core budget(s): Hazardous Waste Program

7a. Provide an effectiveness measure (continued).

Jasper, St. Francois and Madison Counties are located in areas of widespread lead mining, which currently encompass several formerly lead mined Superfund sites. In the early to mid-1990's Department of Health and Senior Services (DHSS) conducted EBL sampling to determine the environmental effect living in and around lead mined areas has on children. County-wide EBL data has been collected by DHSS. The accompanying chart is based on an assumption of direct correlation between the removal of lead from the environment (remediation of Superfund lead site) and the reduction of blood levels in resident populations. Jasper County yard cleanups have been reinitiated due to impacts from recent natural disasters. Cleanups in other areas of Jasper County are also ongoing.

Brownfields Voluntary Cleanup Program Environmental Assessments Completed

The Brownfields Voluntary Cleanup Program provides resources to local communities to perform environmental assessments on selected sites. Through an application process, sites are selected for a Phase I/Phase II environmental site assessment to be performed by an independent contractor. These activities provide communities the assistance to begin redevelopment efforts. Federal Brownfields 128(a) funding through the U. S. Environmental Protection Agency is limited to \$50 million per year. For the past 5 years, Missouri's share of funding has fared well compared to other states, averaging \$1 million per year. However, as more states and tribes are applying for these funds each year, available funding is allocated over a broader base of applicants and Missouri's award amount is beginning to decline. In FY 2014, Missouri received additional funding for assessments under Brownfields 104(k) funding. This funding will help offset any decreases in 128(a) funding in the near future.

PROGRAM DESCRIPTION

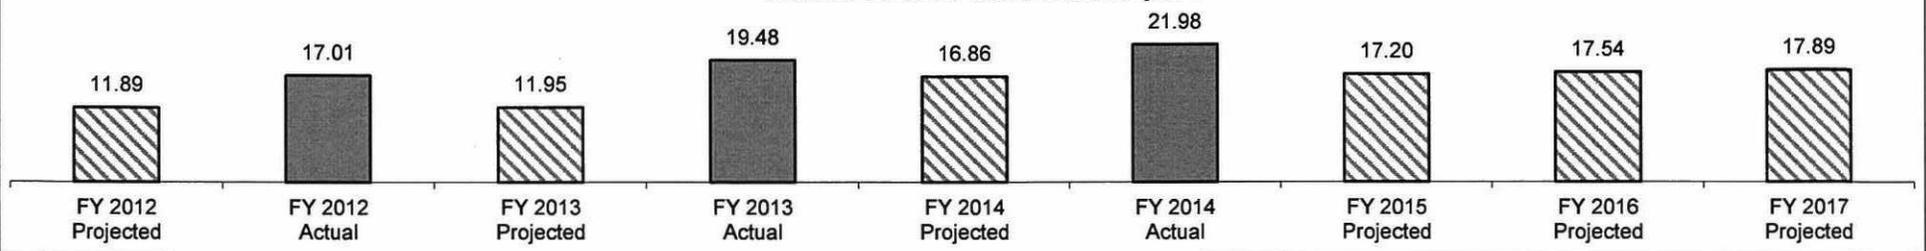

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

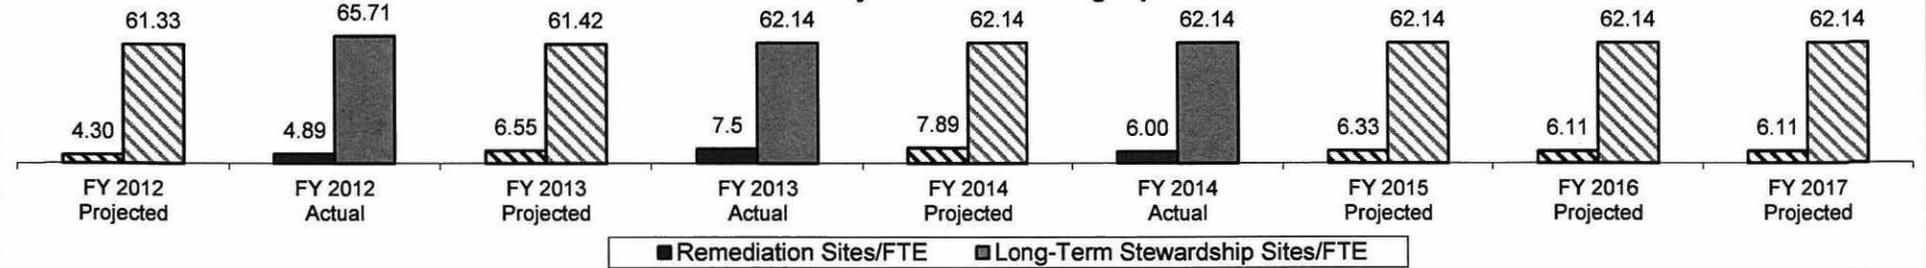

7b. Provide an efficiency measure.

Annual RCRA Permit Actions per FTE

The department and EPA must carefully review every detail of the permit application submitted by the facility. This technical review almost always requires lengthy technical comments from the permit writer, revisions by the facility and always involves public involvement at various stages of the process. As a result, to be protective of human health and the environment, adequate review and revision of an application may take years and requires a great deal of coordination between the department, EPA and the facility. If approved by both the department and EPA, the permit is good for up to 10 years. For more information on the RCRA permitting process see the department's website at <http://dnr.mo.gov/env/hwp/permits/types.htm>. The FY 2014 actual total shows a continued increase in actions per FTE over previous years. This increase is primarily attributable to the Section's on-going efforts to further refine its tracking of new incoming (and previously untracked) documents and associated project tasks. At this time, it is unknown to what degree these refinements will affect future annual "actual" totals. Until this trend is established, the noted future projections are based on a slow and steady efficiency increase relative to the FY 2012 projected, as opposed to actual numbers.

Federal Facility Sites with Oversight per FTE

The total universe of Federal Facility Sites is 306. The total universe of Federal Facility Sites with Oversight total 285.

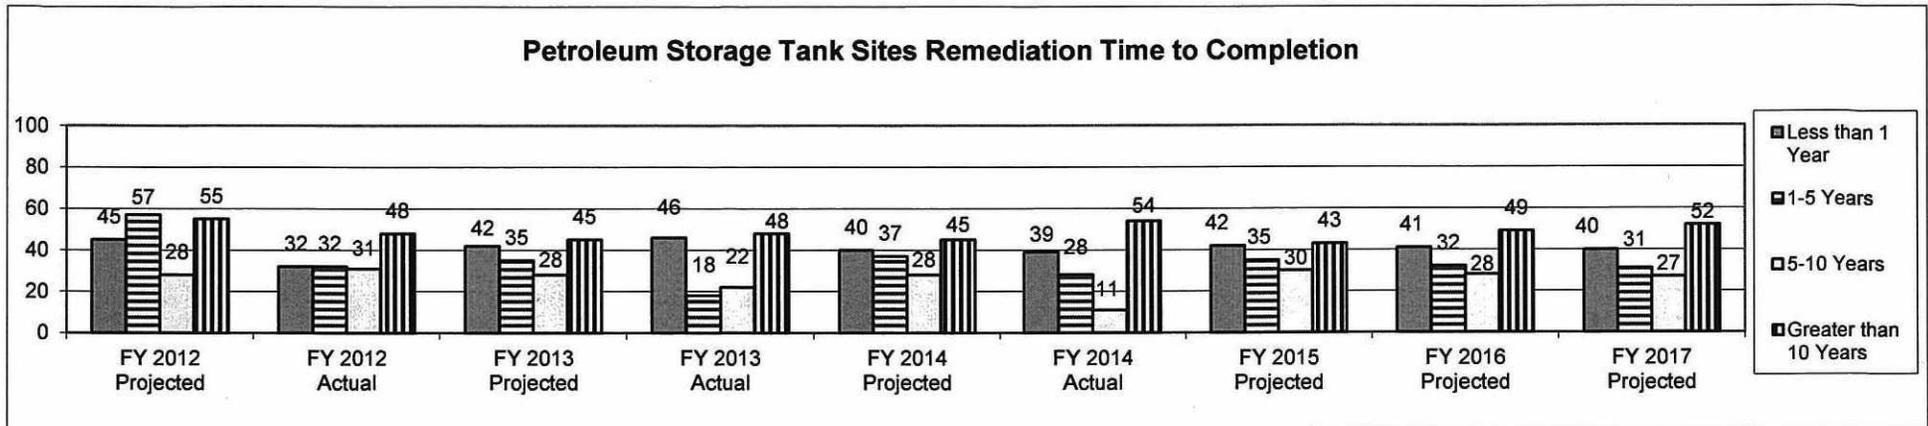

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7b. Provide an efficiency measure (continued).

The department implemented the risk based corrective action guidance standards in February 2004. The department has been developing the Tanks RBCA guidelines. Working on these guidelines and subsequent regulation development has slowed the final clean up of tank sites seeking a clean or no further action letter. This is a result of a number of factors that include: work to finalize the guidance and regulation documents; educating DNR staff, tank owners and consultants of the best and proper way to work with the Tanks RBCA requirements; and that RBCA takes more effort in the initial stages of the clean up (site characterization and sampling) efforts. The final tanks RBCA rule was implemented in February 2014.

Average Drycleaner Site Cleanup Cost at End of FY 2014	
	Cost Per Cleanup
Other States	\$216,900
Missouri	\$169,182

There are currently 21 sites enrolled in the fund. Due to the conservativeness of the state's reimbursement structure and standardized cleanup levels implemented by the state's risk based cleanup levels, Missouri's cleanup cost per site is lower than in other states in the State Coalition for Remediation of Drycleaners (based on an August 2007 SCRD paper). The total average cleanup cost for the 11 sites that have received reimbursement under the Missouri program is \$169,182. The average reimbursement excludes the \$25,000 deductible. The average cleanup cost per site for other state dry-cleaning programs is \$216,900. Reimbursements to drycleaners for cleanup costs can span multiple fiscal years.

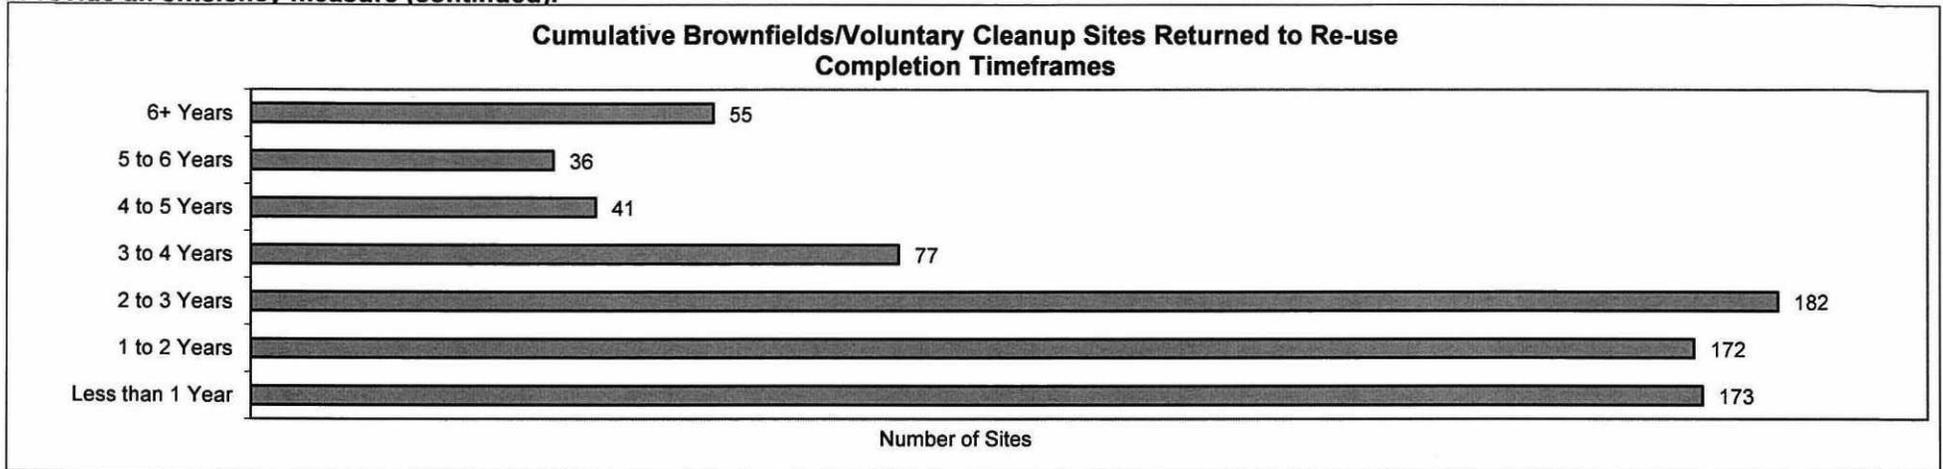

PROGRAM DESCRIPTION

7c. Provide the number of clients/individuals served (if applicable)(continued).

This map represents the number of ongoing petroleum storage tank remediations as of June 2014.

Total active facilities with underground storage tanks = 3,486

On-going tank cleanups = 1,099

Total cleanups completed = 6,251

Total Releases Reported = 7,376

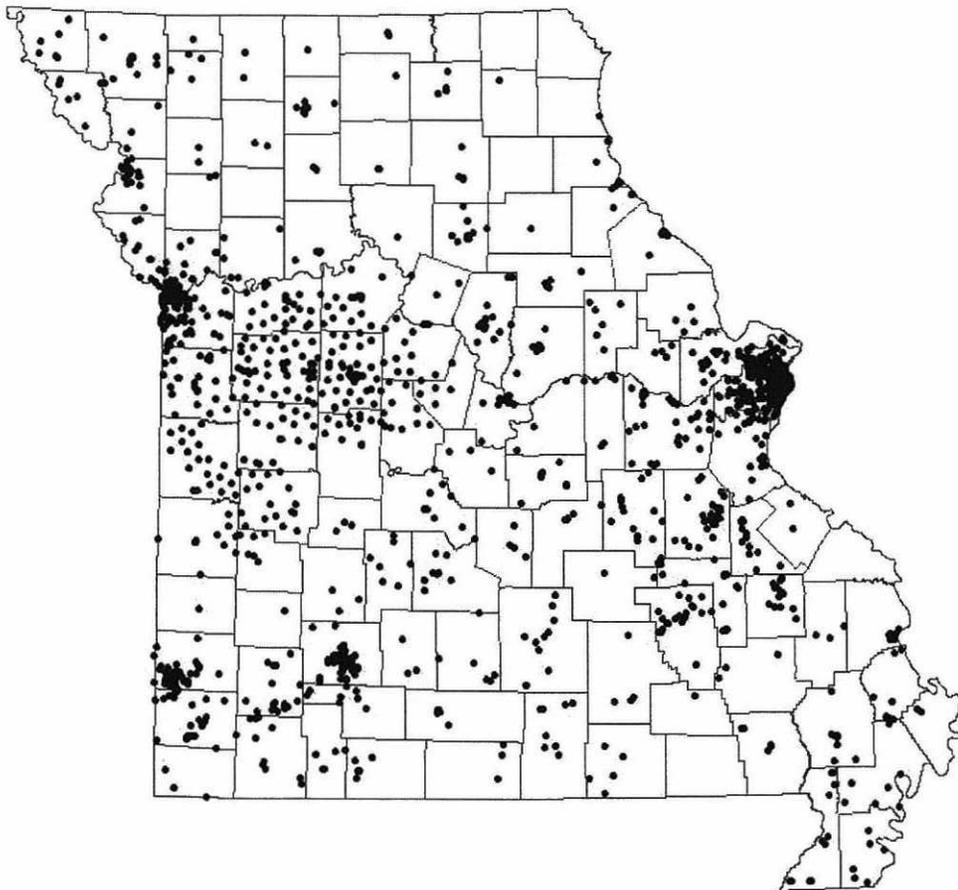

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7c. Provide the number of clients/individuals served (if applicable)(continued).

Each dot represents one site in Missouri where cleanup is occurring and where the Hazardous Substance PSD appropriation might be used (Superfund, BVCP, and Federal Facilities sites); each site impacts many Missourians.

The Missouri Department of Natural Resources, under a Cooperative Agreement with the U.S. Environmental Protection Agency (EPA), conducts Brownfields Site-Specific Assessments (BSSA) of properties for public entities such as cities, counties and quasi governmental entities, as well as properties owned by not-for-profit organizations across the state. Often, local governments acquire contaminated properties through foreclosure for back taxes, land donations, or may own property they would like to sell for redevelopment purposes.

These entities sometimes have difficulty finding adequate funding to pay for environmental assessments (all appropriate inquiries, Phase I and Phase II Assessments) prior to redevelopment. The Brownfields Site-Specific Assessment program provides funding and technical assistance to help communities in assessing properties. Often, it is the unknown environmental condition of the property that dissuades developers. Brownfields Site-Specific Assessment provides valuable information that can aid in making decisions regarding the future of the property.

The Department works cooperatively with EPA to cleanup contamination at Superfund sites where there are limited responsible parties. The state is obligated to pay for 10% of the EPA total cleanup costs and 100% of on-going operation and maintenance of the remedy at these sites. At present the Department is obligated to pay 10% of the cleanup cost on 11 sites.

7d. Provide a customer satisfaction measure, if available.

CORE DECISION ITEM

Department of Natural Resources

Budget Unit 79240C

Division of Environmental Quality

Superfund Obligations Core GR Transfer

2. CORE DESCRIPTION

The department's Superfund program assesses contaminated sites and oversees the clean-up of contamination at sites subject to Federal Superfund Law and other applicable laws. Superfund obligations represent the state's share of costs for clean-ups or remedial action currently underway or already completed in Missouri. These are clean-ups where the party responsible for the contamination is either unknown, uncooperative, or insolvent. Under these circumstances, the U.S. Environmental Protection Agency (EPA) uses federal Superfund dollars to pay for the clean-up as long as: 1) the state agrees to pay 10% of the total clean-up costs, and 2) the state funds and performs 100% of future operation and maintenance (O&M) for the expected life of remedial actions where contamination is contained in place or remedial action systems must be operated, monitored, and maintained for a period of time to achieve cleanup objectives. The state concurs with the EPA decision on the site and commits to pay 10% of remedial action costs and 100% of O&M through Superfund State Contracts.

In 2004, a Legislative Interim Committee examined the funding shortfalls of the Hazardous Waste Program and concluded it was unfair to ask presently-operating hazardous waste generators to pay the state share of Superfund cleanups. Senate Bill 225 passed during the 2005 legislative session directs that "...the department shall request an annual appropriation of general revenue equal to any state match obligation to the U.S. Environmental Protection Agency for cleanup performed pursuant to the authority of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA)." (RSMo 260.391.7). EPA-funded remedial actions may entail containing contamination in place or remedial action systems requiring operation, monitoring, and maintenance for a period of time after the EPA-funded remedial action is constructed and before remedial action objectives are achieved. The core General Revenue is used toward meeting this obligation.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The department's Superfund program assesses contaminated sites and oversees the clean-up of contamination at sites subject to Federal Superfund Law and other applicable laws. Superfund obligations represent the state's share of costs for clean-ups or remedial action currently underway or already completed in Missouri. These are clean-ups where the party responsible for the contamination is either unknown, uncooperative, or insolvent. Under these circumstances, the U.S. Environmental Protection Agency (EPA) uses federal Superfund dollars to pay for the clean-up as long as: 1) the state agrees to pay 10% of the total clean-up costs, and 2) the state funds and performs 100% of future operation and maintenance (O&M) for the expected life of remedial actions where contamination is contained in place or remedial action systems must be operated, monitored, and maintained for a period of time to achieve cleanup objectives. The state concurs with the EPA decision on the site and commits to pay 10% of remedial action costs and 100% of O&M through Superfund State Contracts.

In 2004, a Legislative Interim Committee examined the funding shortfalls of the Hazardous Waste Program and concluded it was unfair to ask presently-operating hazardous waste generators to pay the state share of Superfund cleanups. Senate Bill 225 passed during the 2005 legislative session directs that "...the department shall request an annual appropriation of general revenue equal to any state match obligation to the U.S. Environmental Protection Agency for cleanup performed pursuant to the authority of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA)." (RSMo 260.391.7). EPA-funded remedial actions may entail containing contamination in place or remedial action systems requiring operation, monitoring, and maintenance for a period of time after the EPA-funded remedial action is constructed and before remedial action objectives are achieved. The General Revenue transfer appropriation requested here meets this obligation.

NEW DECISION ITEM
RANK: 006 OF 008

Department of Natural Resources	Budget Unit 79240C
Division of Environmental Quality	
Superfund Obligations	DI#: 1780002

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The EPA sent letters to the department outlining the current balance of the 10% cost-share obligations for current EPA remedial action expenditures for four Superfund sites based on federal expenditures at these sites through December 31, 2013. In addition, the state is required to perform and fund the O&M activities for sites where remedial actions have been completed and on-going oversight is required by the site-specific Superfund State Contract. The General Revenue transfer request is (rounded to the nearest dollar):

Jasper County OU1	\$1,031,131*	
Riverfront OU1	\$ 68,332	
Riverfront OU4	\$ 49,980	
Valley Park TCE OU2	\$ 31,847	
Operation & Maintenance	\$ 19,000**	(for Times Beach; Jasper County OU2; Bee Cee; Annapolis; and Quality Plating)
Total	\$1,200,290	
Less: Core GR Transfer	(\$ 22,000)	
Total GR Transfer Request	\$1,178,290	

*The overall anticipated final match obligation based on the current Superfund State Contract for the Jasper County OU1 site is \$10,250,000. To date, the EPA has credited the state for \$2,454,989 in state cost share payments. The state has planned a project (West Ken Coal) that utilizes in-kind activities that will be counted as match to current and future EPA expenditures for this site. The General Assembly approved an initial GR transfer for the West Ken Coal project in the FY 2014 budget to be used as match for the Jasper County OU1 obligation. The amount requested for FY 2016 will also be used for the in-kind project and brings the total transfers for West Ken Coal to the current project cost estimate.

**State-funded O&M at EPA-funded remedial action sites may entail such tasks as conducting at least annual inspections and monitoring of groundwater and/or other environmental media; repair, maintenance, or replacement of engineered structures or mechanical systems such as earthen caps or groundwater pump and treat systems; and maintenance and compliance activities related to institutional controls governing property uses; and other routine activities such as interagency coordination, site visits and technical meetings, and participation in five-year reviews of remedial actions. The amount of funding needed for O&M at any given site depends on the anticipated O&M activities, the complexity of the remedial action system, and the extent of potential failure of any components of the remedial actions.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an effectiveness measure.

*data not available

Jasper, St. Francois and Madison Counties are located in areas of widespread lead mining, which currently encompass several formerly lead mined Superfund sites. In the early to mid-1990's Department of Health and Senior Services (DHSS) conducted EBL sampling to determine the environmental effect living in and around lead mined areas has on children. County-wide EBL data has been collected by DHSS. The accompanying chart is based on an assumption of direct correlation between the removal of lead from the environment (remediation of Superfund lead site) and the reduction of blood levels in resident populations. Operations and maintenance efforts at sites such as Oronogo-Duenweg in Jasper County help ensure remedies stay in place, protecting Missouri citizens.

6b. Provide an efficiency measure.

The State of Missouri's oversight and commitment to pay 10% of the cost of clean-up of these sites leverages a large amount of federal funding. So far, 12 sites totaling \$40.6 million in federal funds have been completed with the state paying approximately \$4.06 million for its share.

2. CORE DESCRIPTION									
The goal of the department's Underground Storage Tank (UST) efforts is to protect human health and the environment through the regulation of underground storage tank systems. This mission is accomplished by registering USTs, implementing a tank inspection program including the oversight of contract inspections, ensuring compliance with state and federal UST laws, overseeing the investigation and risk based cleanup of contamination from leaking tanks, and overseeing the closure of out of use tanks. In many situations, the risk based cleanup of underground storage tank sites is key to the transfer, sale, or reuse of the property, thereby promoting economic stimulus and sustainable communities.									
3. PROGRAM LISTING (list programs included in this core funding)									
Petroleum Related Activities									

CORE DECISION ITEM

Department of Natural Resources	Budget Unit 78116C
Agency Wide Operations	
Agency Wide Operations - Petroleum Related Activities	

4. FINANCIAL HISTORY

	FY 2012 Actual	FY 2013 Actual	FY 2014 Actual	FY 2015 Current Yr.
Appropriation (All Funds) (1)	1,089,688	658,839	768,272	775,549
Less Reverted (All Funds)	0	0	0	N/A
Less Restricted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	1,089,688	658,839	768,272	N/A
Actual Expenditures (All Funds)	631,261	630,815	764,258	N/A
Unexpended (All Funds)	458,427	28,024	4,014	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	0	0	0	N/A
Other	458,427	28,024	4,014	N/A

Reverted includes Governor's standard 3 percent reserve (when applicable).

Restricted includes any extraordinary expenditure restrictions (when applicable).

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) In FY 2006, funding for petroleum tank related activities and environmental emergency response was consolidated at the department level and was limited to \$1,000,000. Since the \$1,000,000 included related fringe benefit costs, the actual Personal Services and Expense and Equipment expenditures were lower than the budgeted appropriation authority. The PSTIF Board approved \$1,111,884 in spending in FY 2007, \$1,156,539 in FY 2008, \$1,203,148 in FY 2009, \$1,219,445 in FY 2010, and \$1,244,677 for FY 2011, each including any cost of living adjustments and increased fringe costs from the previous year's personal services approved amount. The expenditure amounts above do not reflect the transfers related to fringe benefits, ITSD, building rental charges, or department administration costs. The total of all of these expenditures in addition to the operating charges reflected above was required to be within the Board-approved budget. In FY 2012 and FY 2013 the Board approved funding totaling \$939,333 each year for salaries and expenses, plus actual fringe benefits and any cost of living adjustments added by the Legislature and Governor. An FY 2013 core reduction more closely aligned the budget with planned spending. In FY 2014, the Board approved funding totaling \$1,051,174 for salaries and expenses, plus actual fringe benefits and cost of living adjustments. This amount also included \$105,000 to help offset reductions to Tank's federal grant funding. In FY 2015, the Board approved funding totaling \$1,059,765 plus actual fringe benefits and cost of living adjustments.

PROGRAM DESCRIPTION

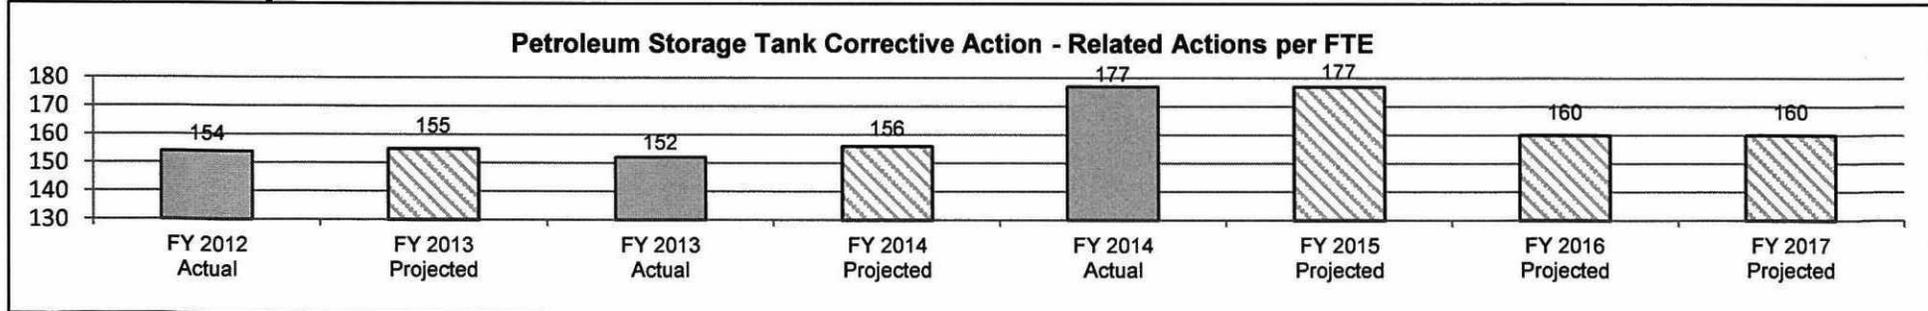

Department of Natural Resources
AWO - Petroleum Related Activities
Agency Wide Operations - Petroleum Related Activities

7a. Provide an effectiveness measure.

The financial responsibility (FR) requirement is a vital component of state regulations which assures that money will be available for cleanup if a UST leak occurs. Financial responsibility is required for all regulated tanks currently in use. One owner may own several facilities; financial responsibility is required for each facility with active tanks. A gradual decline in the number of active UST facilities has been occurring since FY 2009. As long as the economy remains stable the number of facilities is projected to remain relatively constant.

7b. Provide an efficiency measure.

The Department is responsible for implementation of timely investigation and corrective action of petroleum releases once discovered and confirmed. Efforts by the Department to protect human health and the environment require various activities and the collection of specific data sets. Data is required on the nature and estimated quantity of released product, surrounding populations, wells, sewers and soil conditions. The Department continues to review documentation on a timely basis to ensure corrective action goals have been established and a proper corrective action plan is in place when needed. We were able to emphasize this area in FY 2014 to address an additional number of reviews. We anticipate that effort continuing into 2015.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Petroleum Related Activities

Agency Wide Operations - Petroleum Related Activities

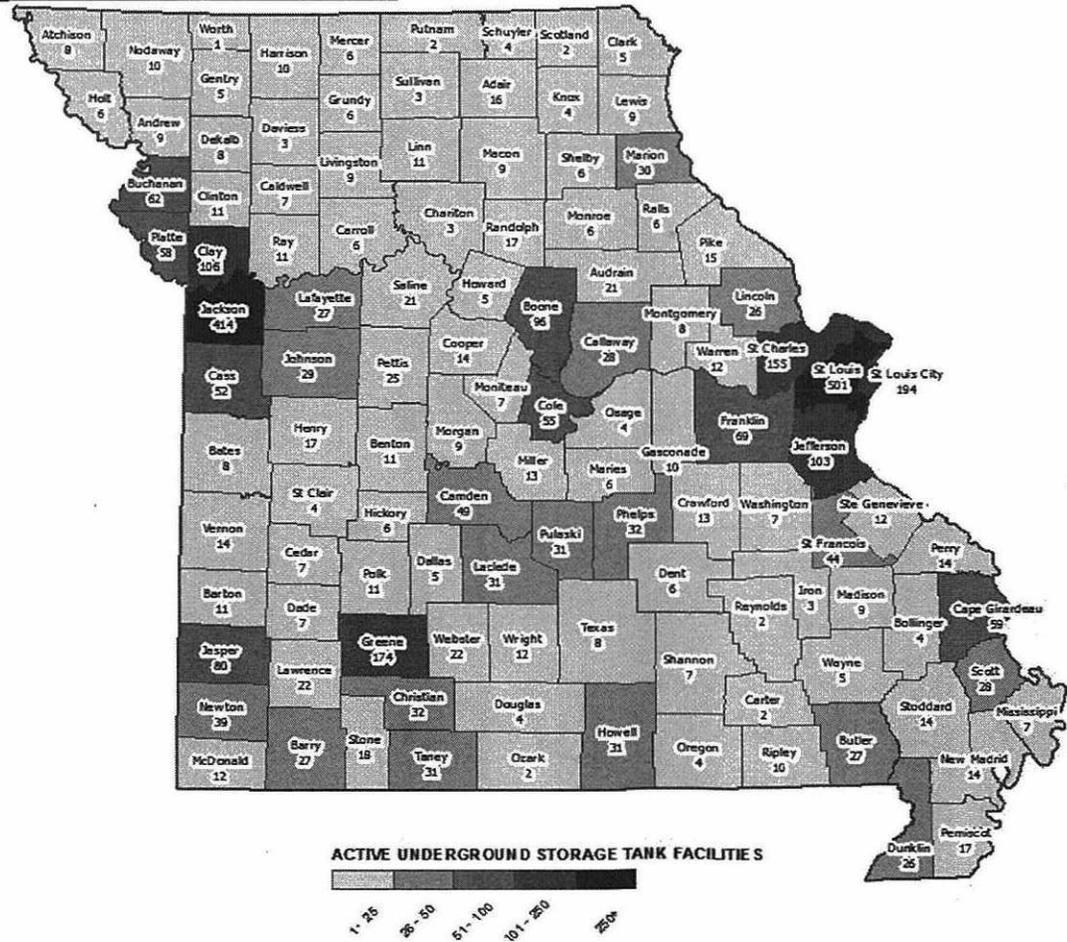

7c. Provide the number of clients/individuals served, if applicable.

	FY 2012	FY 2013	FY 2014
Underground Storage Tank (UST) Facilities	3,558	3,530	3,486

This map represents, by county, the number of active facilities with underground petroleum storage tanks through June 2014.

Total active facilities = 3,486

Active facilities are sites that are either currently in use, or out of use tanks, or a combination of both.

7d. Provide a customer satisfaction measure, if available.

Est. Fringe	442	0	846,508	846,950
--------------------	-----	---	---------	---------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Postclosure Fund (0198); Solid Waste Management Fund - Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570)

The department requests retention of the estimated appropriations for General Revenue to allow for expenditures related to needed maintenance on landfills where financial assurance instruments have been forfeited and deposited in General Revenue Fund.

Note: This core budget is facing fiscal challenges due to changes in solid waste management.

2. CORE DESCRIPTION

The Solid Waste Management Program operates a federally authorized regulatory program pursuant to 40 CFR Part 258, Subpart D that permits, enforces, and oversees sanitary landfills. These same types of activities are performed by the program for construction and demolition, special waste and utility waste landfills, solid waste processing facilities, such as transfer stations, infectious waste, and material recovery facilities, as set forth in the Solid Waste Management Law. Also, program staff conducts civil investigations of illegal dumping; investigates possible migration of methane gas from solid waste disposal areas and seepage of leachate and methane gas into groundwater and offers landfill operator certification and re-certification training. The Scrap Tire Unit plans and oversees scrap tire dump cleanup activities; awards scrap tire material resurfacing and market development grants; conducts scrap tire dump investigations; reviews scrap tire hauler, processor, and site permits; and provides technical assistance for beneficial use determinations. The program, working with a statewide network of partners, strives to protect the environment and public health by minimizing solid waste generated by Missouri citizens, businesses, and institutions through effective and efficient materials management. This is accomplished through oversight of the twenty (20) solid waste management districts and the district grant program.

Division of Environmental Quality	
Solid Waste Management Program Core	

2. CORE DESCRIPTION (continued)

Solid Waste Management PSD: The program provides approximately \$6.5 million per year to the solid waste management districts for administration and funding of community-based reduce, reuse, and recycle grants. This grant program builds solid waste management infrastructure to better use materials that otherwise would have been disposed of in landfills or illegally dumped. Through projects funded by the district grant program, opportunities are provided to communities throughout Missouri to create and/or retain "green jobs" in the recycling sector of the Missouri economy. These grants encourage waste reduction, reuse, recycling, energy recovery and efficient processing of Missouri's solid wastes. Local governments, small and large businesses, schools, sheltered workshops and individuals seek and receive grants to support activities to remove materials from the waste stream and return the materials for beneficial reuse or energy recovery. The program also supports the removal of illegally dumped scrap tires from the environment by directly providing funds for tire dump roundups and other cleanup activities, as well as funding scrap tire material surfacing grants.

Financial assurance instruments (FAIs) PSD: FAIs are collateral provided to the state by landfill and scrap tire site owners/operators to properly implement closure and/or postclosure activities should the owner/operator fail to do so or is no longer capable of doing so. Sufficient financial assurance is needed to ensure closure and/or postclosure activities for solid waste facilities are conducted when needed to protect public health and the environment. This involves activities required to ensure closed landfills have adequate funding and controls in place to ensure environmental protection for at least 30 years after the landfill closes. Such activities include: maintenance or replacement of the landfill cover, which costs several thousands of dollars per acre; an adequate soil/vegetative cap to prevent water infiltration; methane gas monitoring to protect public safety; monitoring for potential groundwater and surface water impacts; erosion control, and groundskeeping (i.e., mowing and removal of trees).

3. PROGRAM LISTING (list programs included in this core funding)

Solid Waste Management Program

4. FINANCIAL HISTORY

	FY 2012 Actual	FY 2013 Actual	FY 2014 Actual	FY 2015 Current Yr.
Appropriation (All Funds) (1)	22,243,550	29,298,941	15,728,910	22,246,201
Less Reverted (All Funds)	0	0	0	N/A
Less Restricted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	22,243,550	29,298,941	15,728,910	N/A
Actual Expenditures (All Funds)	11,719,040	13,408,912	9,013,668	N/A
Unexpended (All Funds)	10,524,510	15,890,029	6,715,242	N/A
Unexpended, by Fund:				
General Revenue	1,048,165	0	14,606	N/A
Federal	22,221	200	200	N/A
Other	9,454,124	15,889,829	6,700,436	N/A
	(2 & 3)	(2 & 3)	(2 & 3)	(4)

Reverted includes Governor's standard 3 percent reserve (when applicable).

Restricted includes any extraordinary expenditure restrictions (when applicable).

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) The vast majority of other fund lapse is related to pass-through appropriations. Appropriations were increased throughout each fiscal year as solid waste management districts' allocation amounts became known and remittable; scrap tire activities were awarded and completed; and work was awarded and completed on landfills where the program had forfeited financial assurance instrument funds available for payment. Funds obligated for multi-year projects rolled over to the next fiscal year's core appropriation, resulting in large unexpended balances.

(3) General Revenue lapses and a portion of the other funds lapses are due to the multi-year nature and timing of forfeiture encumbrances and expenditures. During postclosure maintenance, extraordinary expenses may periodically occur and require immediate attention (i.e., methane gas system repairs, erosion control, cap failures, and leachate collection system repairs). However, if those expenses do not occur, the appropriation balance may lapse. During FY 2013, a new large project was completed at Peerless Demolition Landfill with finish work (vegetation) completed in the fall (FY 2014).

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

1. What does this program do?

The Solid Waste Management Program, through oversight of solid waste facilities, ensures groundwater remains safe and clean and that land is restored to a community friendly state. To assist in producing these desired outcomes, the program operates a federally authorized regulatory program (40 CFR Part 258, Subpart D) overseeing solid waste facilities and their operations and administers the solid waste management district grant program and scrap tire program.

The Solid Waste Management Program:

- Permits, inspects, and provides technical assistance to solid waste facilities (e.g., landfills, transfer stations including infectious waste and material recovery facilities, and scrap tire facilities) to help ensure they are designed and operated to protect public health, safety, and the environment, and takes action to enforce solid waste laws and regulations.
- Reviews and acts upon requests for beneficial use of waste materials, permit exemptions, and composting facilities.
- Encourages use of scrap tire materials and expansion of end markets for such materials and products.
- Investigates and pursues the cleanup of illegal dumps.
- Consults with the community on solid waste decisions.
- Plans and oversees scrap tire dump cleanup activities; awards scrap tire playground resurfacing grants; conducts scrap tire dump investigations; reviews scrap tire hauler, processor, and site permits; and provides technical assistance
- Provides landfill operator certification and recertification training.
- Provides grant funding to solid waste management districts to fund their operations and community-based materials reuse, reduction and recycling projects.
- Reviews, evaluates, and approves district grants and provides training for the solid waste district executive board and staff, as needed.
- Monitors progress of grant projects and provides technical assistance to districts or district subgrantees, as needed.
- Conducts performance audits (via independent contractors) for each of the solid waste districts every three years, subject to the availability of resources, to ensure compliance with laws and regulations.
- Promotes recycling and alternatives to disposal by developing guidance materials, conducting outreach efforts, and providing technical assistance.
- Develops, maintains and updates a statewide solid waste plan, including data on types of wastes and information on innovative technologies.

During 2013, Missourians generated over 13.7 million tons of waste. Since 1990, the diversion percentage has increased from 10% to 57%, due in part to a greater number of recycling and yard waste services being available and continued development of markets for recovered materials. More Missourians now have recycling and composting services in their communities, providing the public a convenient and affordable alternative to disposal.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

1. What does this program do (continued)?

Solid Waste Management PSD: The program directly funds a number of scrap tire surface material grants, provides grants to individuals and businesses investing in market development for scrap tire end uses, and administers and pays for disposal of scrap tires cleaned up from the environment. The program provides grant funding to Missouri's twenty (20) solid waste management districts to fund their operations and community-based materials reuse, reduction, composting, market development, and recycling projects. Additionally, this appropriation funds the Environmental Improvement and Energy Resources Authority's (EIERA's) Market Development Program, which provides financial and technical assistance grants for development of markets for recovered materials.

Forfeited Financial Assurance Instruments (FAIs) PSD: The program receives forfeited FAI resources to perform closure/postclosure maintenance and repair activities at landfills and scrap tire sites where owners/operators have failed or are no longer capable of meeting their obligations. The dollar value accessible by the state (and not currently forfeited) is approximately \$400 million. Types of FAIs subject to forfeiture are irrevocable escrow accounts, trust funds, performance or financial surety bonds, letters of credit, contracts of obligation/ordinances/resolutions, financial tests, corporate guarantees or a combination. Forfeited funds are deposited into the General Revenue Fund pursuant to 260.228 RSMo and may be appropriated and expended by the program to implement closure and/or postclosure maintenance care plans. A Consent Judgment and Order of the Circuit Court of Warren County decreed specific facilities forfeited FAIs were to be placed in an interest-bearing account identified as the "Postclosure Fund" (0198). Only the expenses relating to closure and postclosure at these specific facilities are paid from these funds. Upon conclusion of the postclosure period, any funds remaining in the Postclosure Fund (0198) and, so designated, are to be paid to the "Treasurer of Warren County as Custodian of the Warren County School Fund."

The program knows of approximately 250 closed and/or abandoned landfills in Missouri that do not have FAIs since they were in operation prior to the effective date of the requirement. The total universe of these landfills is unknown. Any current or potential negative environmental impacts from these old landfills, such as gas migration presenting a threat to public safety or groundwater contamination, are unknown. During State Fiscal Years 2011 and 2012 the program, through a USDA Rural Development Utilities Program Grant, assessed the condition of old, closed and abandoned solid waste disposal areas, or landfills in rural Missouri and has been working with landfill owners and counties to better manage these facilities.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number if applicable.)

42 U.S.C. 6901-6991k	Solid Waste Disposal/Resource Conservation and Recovery Act and Major Amendments
40 CFR Part 258	Criteria for Municipal Solid Waste Landfills
40 CFR Part 258, Subpart G	Financial Assurance Criteria
260.200 through 260.345 RSMo	Solid Waste Management Law
260.226 - 260.228, RSMo	Landfill Closure/Postclosure Plan
260.275 RSMo	Scrap Tire Site Closure Plan

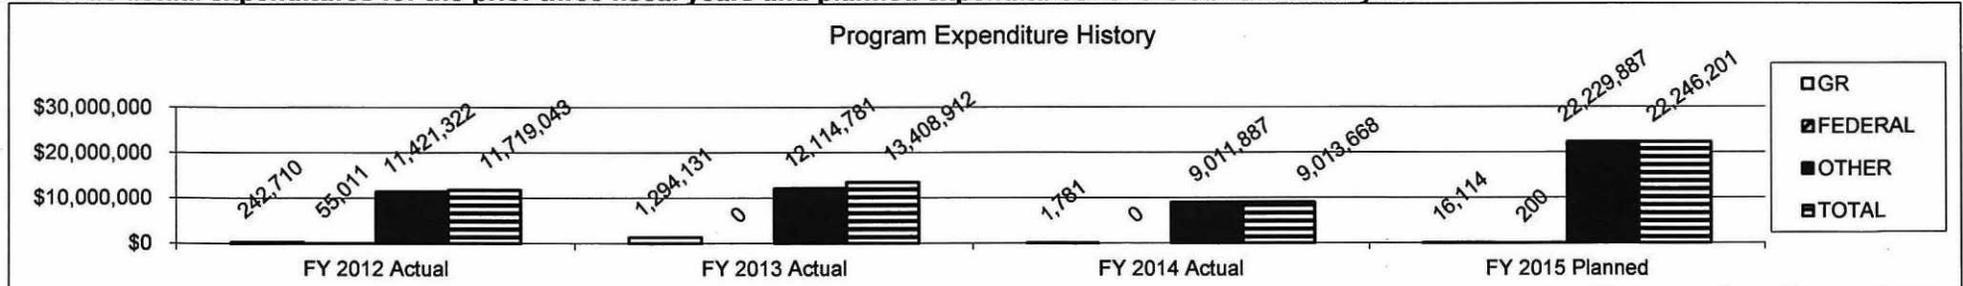

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

Although not mandated, federal regulations strongly encourage each state to adopt Resource Conservation and Recovery Act (RCRA), Subtitle D. The program currently has EPA approval to implement Subtitle D landfill regulations under the federal RCRA, thereby having the authority to approve new landfills and expansion of existing landfills.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. FY 2015 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Postclosure Fund (0198); Solid Waste Management Fund - Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570)

* Non permitted entities include illegal dumps, scrap tire retailers/haulers, etc.

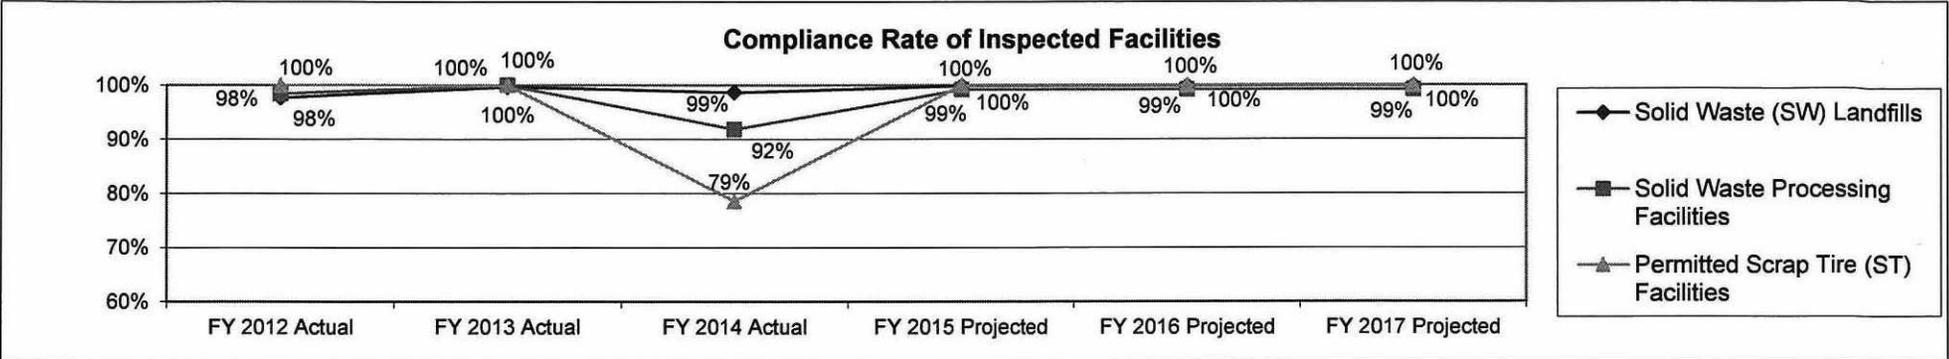

Inspections are done by the regional offices and program staff. Inspections of non permitted entities are primarily compliance driven, thus the fluctuation from one year to the next. The number of inspections were significantly increased in FY 2014 and it is anticipated this will continue into future periods, as a result of environmental concerns from a subsurface smoldering event at an inactive solid waste disposal area, Bridgeton Sanitary Landfill.

PROGRAM DESCRIPTION

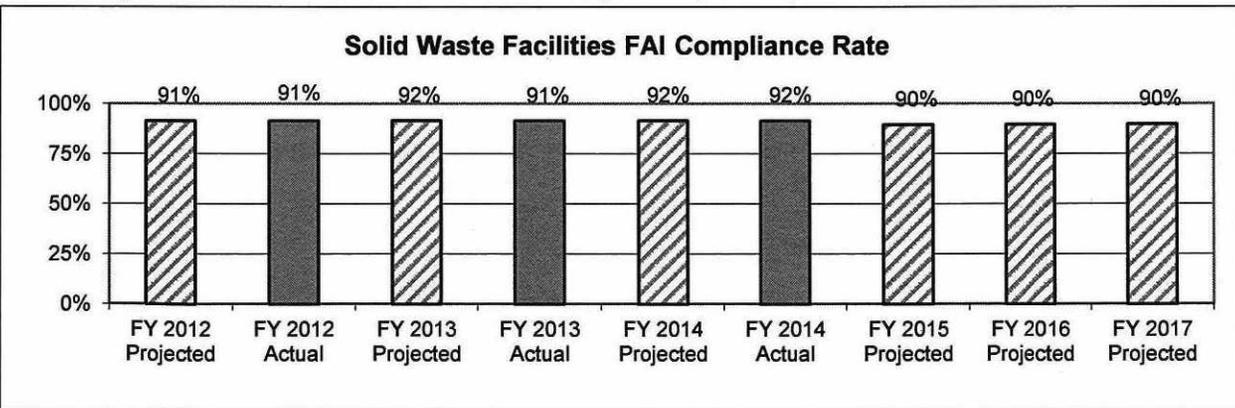

Department of Natural Resources
DEQ - Solid Waste Management Program
Program is found in the following core budget(s): Solid Waste Management Program

7a. Provide an effectiveness measure (continued).

Compliance Monitoring Activities

Percentage of Solid Waste Facilities with FAI's [in Compliance] That Have Not Been Forfeited

	Number of facilities that have forfeited Financial Assurance Instruments	
	Projected	Actual
FY 2012	12	12
FY 2013	12	12
FY 2014	15	13
FY 2015	15	N/A
FY 2016	15	N/A
FY 2017	15	N/A

Number of facilities includes scrap tire processing facilities, sanitary and demolition landfills, and scrap tire facilities. Solid waste transfer stations are not required to have FAI's. The postclosure period for sanitary landfills is a minimum of 30 years.

PROGRAM DESCRIPTION

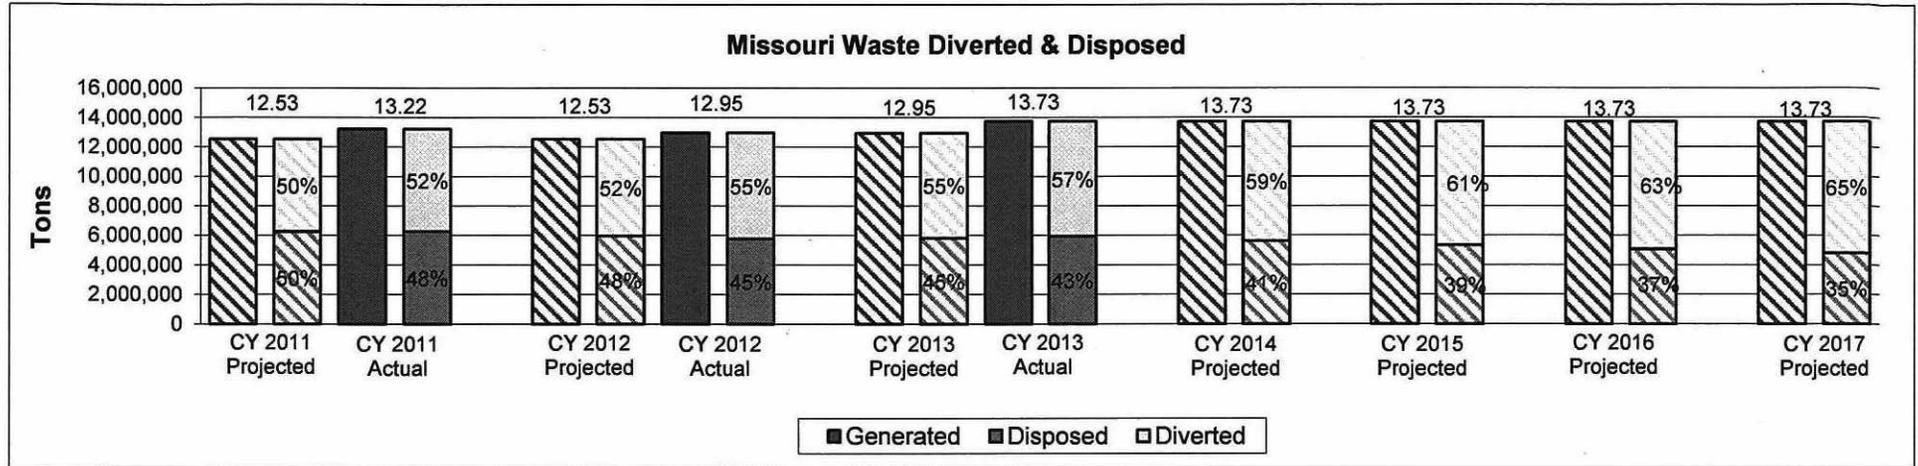

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7a. Provide an effectiveness measure (continued).

Percentage of solid waste generated by Missourians that is reused, recycled or composted

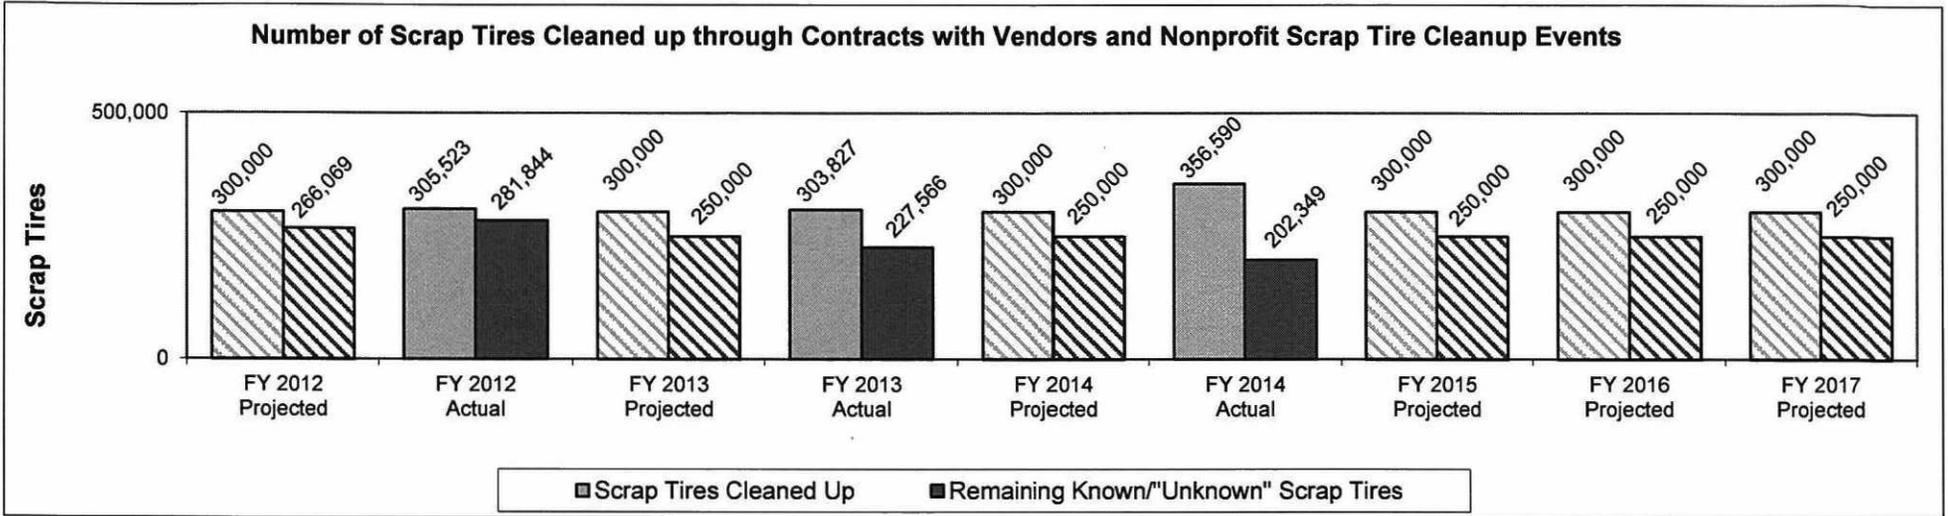

In 1990, with the passage of SB 530, Section 260.225.2(1), set a Department goal to achieve by January 1998 a reduction of 40% in solid waste disposed by weight. This goal has been surpassed. The 2013 diversion rate was 57%. The Department has assumed the total waste generated will remain relatively constant.

The Department tracks the annual diversion rate of all waste disposed of in Missouri landfills or transported to landfills in adjacent states. It is estimated that about 58% of the waste stream is composed of Municipal Solid Waste (MSW), waste generated by residences, schools, small businesses and other commercial activities. The U.S. Environmental Protection Agency (EPA) set a national MSW recycling goal of 35% by 2008. However, Missouri's waste diversion rate does not directly correlate with an MSW recycling rate since it measures all waste diverted, not just MSW.

PROGRAM DESCRIPTION

Department of Natural Resources
DEQ - Solid Waste Management Program
Program is found in the following core budget(s): Solid Waste Management Program

7a. Provide an effectiveness measure (continued).

Notes:

- (1) The Department of Corrections, Missouri Vocational Enterprises (MVE) works with the Solid Waste Management Program to dispose of scrap tires by providing labor and transportation services. The Department reimburses MVE for the cost of their services through this pass-through appropriation.
- (2) The fee on new tires sold at retail, commonly referred to as the Scrap Tire Fee, is set to expire on January 1, 2020.

Since 1990, the Scrap Tire Program has removed 17,208,714 tires from Missouri's landscape. Scrap tires yet to be removed from the environment are an estimate of the projected number of scrap tires at both known sites and sites yet to be identified. As of June 2014, approximately 202,349 tires are known to remain in 175 scrap tire sites. The Department estimates in excess of 250,000 scrap tires will be discovered in currently unknown locations during each fiscal period. Based on these estimates, we believe approximately 300,000 tires will continue to be cleaned up each fiscal year.

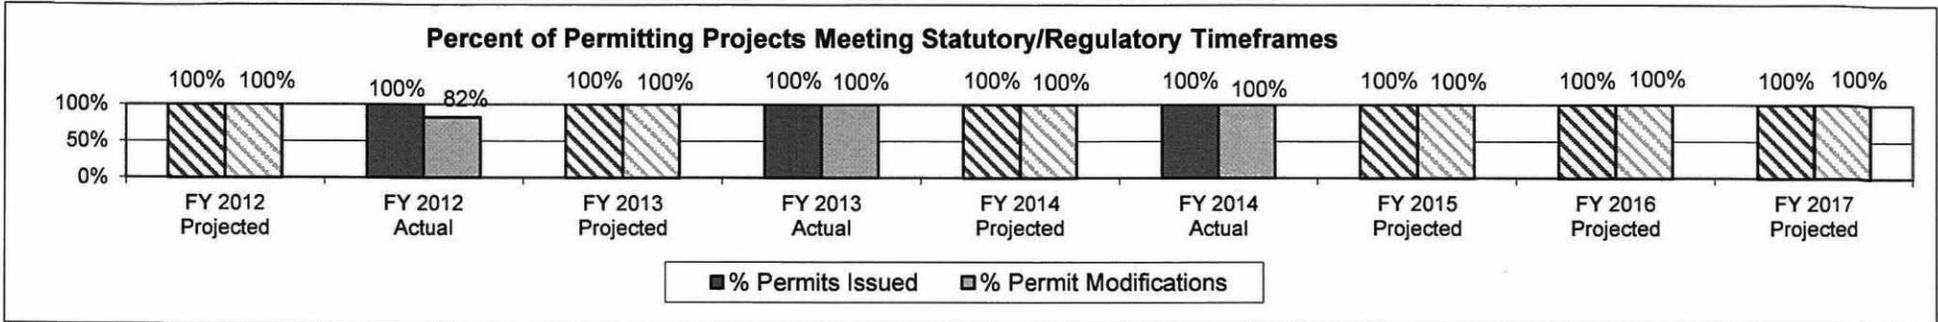

PROGRAM DESCRIPTION

Department of Natural Resources

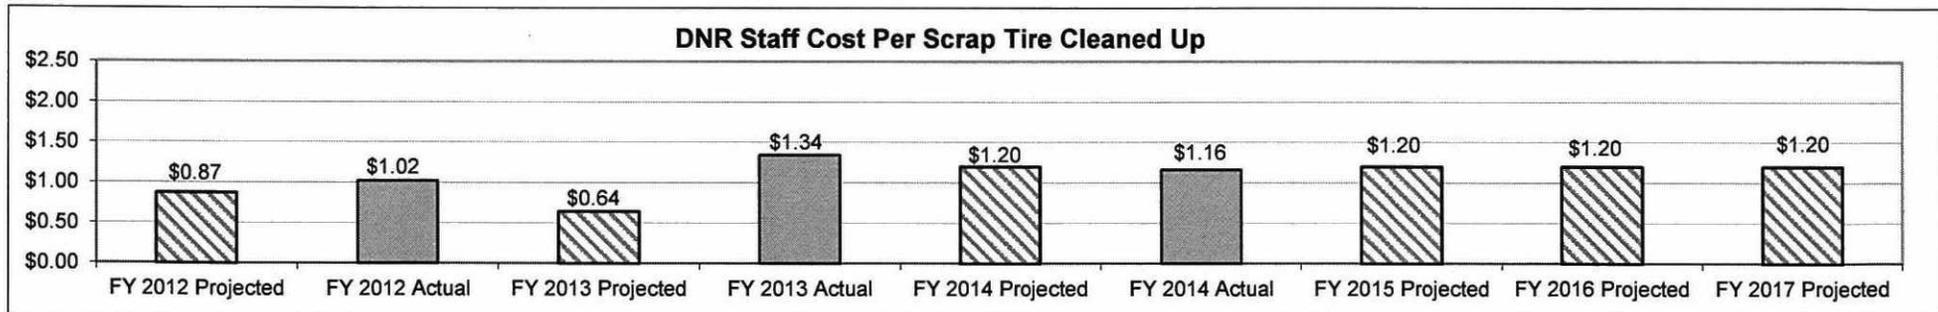

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7b. Provide an efficiency measure.

This measure only includes the number of solid waste permits issued and the number of permit modifications. It does not include other permitting activities that do not have statutory timeframes. Individual projects can take as little as a few hours, or as much as a year or more depending upon the nature of the request.

Notes: Sites having larger numbers of scrap tires are less costly per tire cleaned up than sites with fewer scrap tires, or smaller sites that are spread across larger areas. Projections are based on estimates of newly located (although not investigated) tire dumps, unknown tire dumps and the historical underestimation of the number of tires at known sites. As of June 2014, approximately 202,349 tires are known to remain in 175 scrap tire sites. The Department estimates in excess of 250,000 scrap tires will be discovered in currently unknown locations during each fiscal period. Of the 452,349 scrap tires anticipated to exist within the state and taking into account the estimated number of scrap tires that will be identified in currently unknown illegal dumps each year, we believe approximately 300,000 tires will continue to be cleaned up each fiscal year.

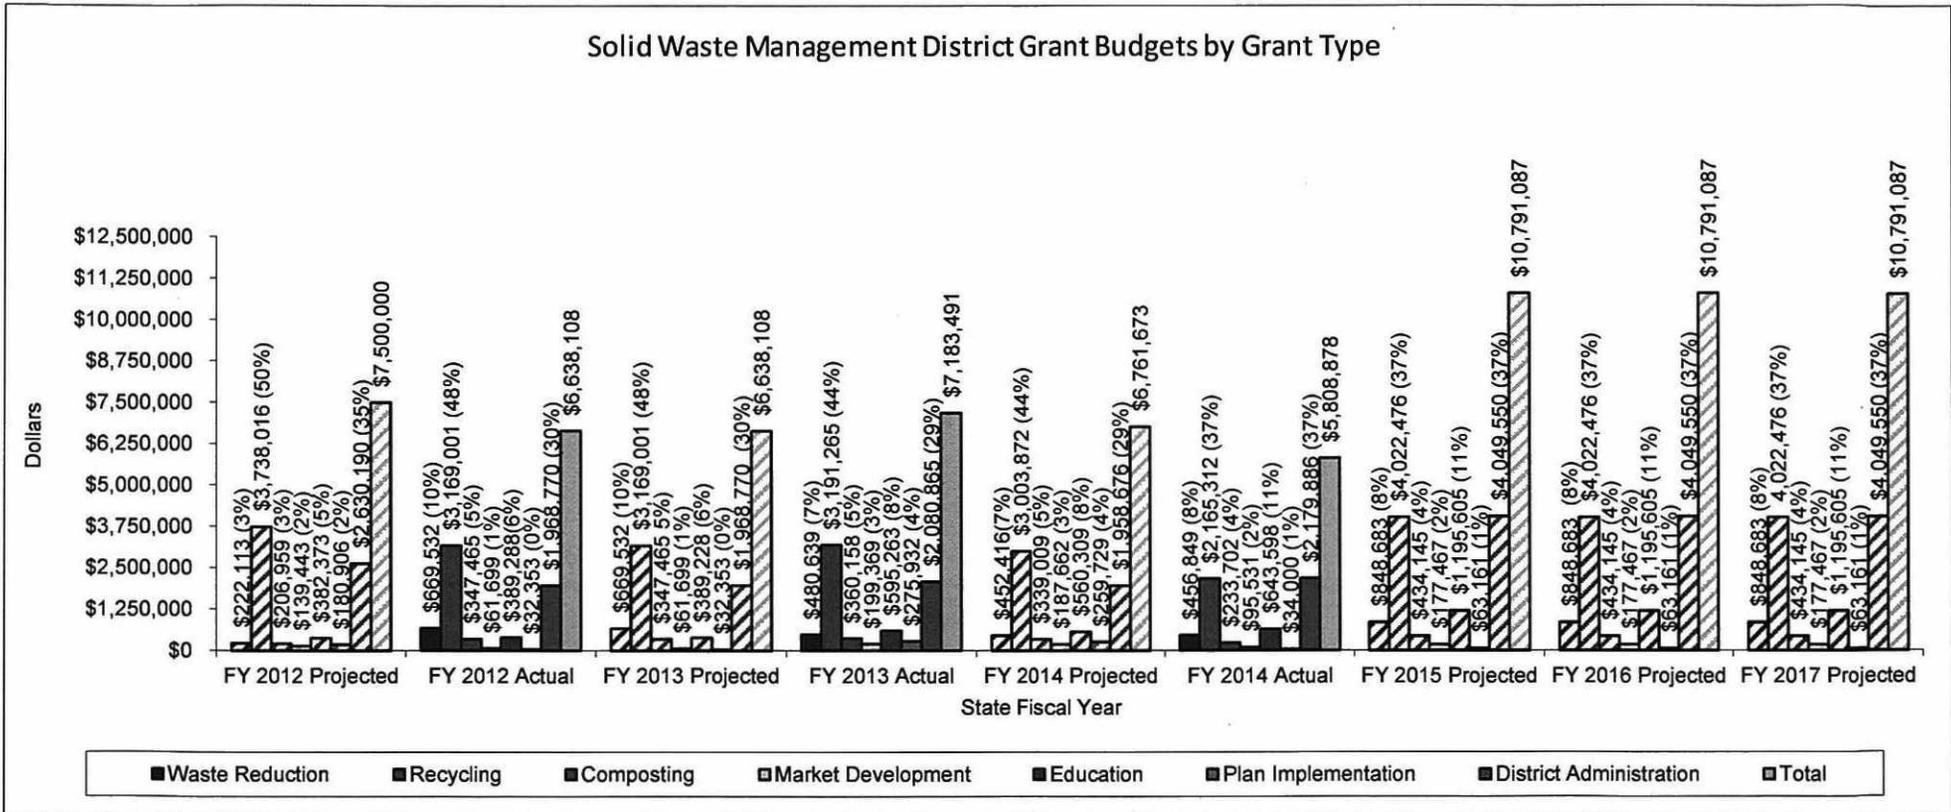

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7b. Provide an efficiency measure (continued).

The Department provides grant funding to Missouri's twenty (20) solid waste management districts to fund their operations and community-based waste reuse, reduction, composting, and recycling projects. Local governments, small and large businesses, schools, sheltered workshops, and individuals seek and receive grants to support activities to remove materials from the waste stream and return them for beneficial reuse.

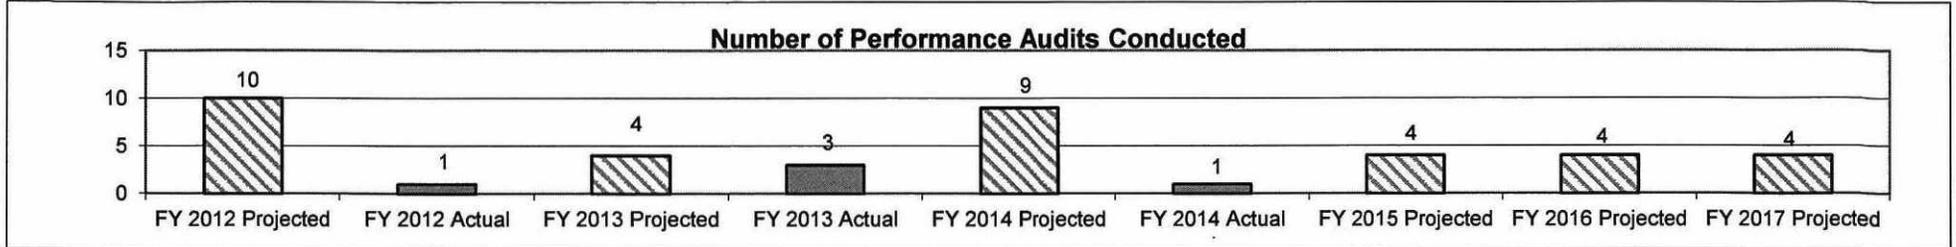

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7b. Provide an efficiency measure (continued).

Chapter 260 RSMo, commonly referred to as the Solid Waste Management Law, provides the Solid Waste Management Program with the authority to have performance audits of the twenty Solid Waste Management Districts completed at least every three years as funding allows. The purpose of the audits is to determine whether the solid waste management districts exercise adequate control over district grant funds and comply with state regulations governing the use of such funds. All twenty districts have had a performance audit completed. The performance audits identified \$838,443 in questioned costs and a total of 338 findings. The program has been working closely with the districts as they take corrective action related to these findings. A new performance audit cycle began with one audit conducted in FY 2012 and four audits conducted during FY 2013 (one final report has yet to be issued). The program is planning for 4 audits in FY 2015 and continues to work with the districts on corrective action measures.

Missouri's Solid Waste Stream

Waste characterization studies are key planning tools, particularly for determining areas of the waste stream which need additional focus to reduce the amount of a specific sector of waste being disposed. The Solid Waste Management Program (SWMP) funded several waste characterization studies, the most recent of which was conducted in 2008. This study visually observed waste being disposed at 15 landfills and transfer stations across Missouri. Based on the most recent study, approximately 58% of Missouri's solid waste is created by homes and businesses, 11% from industry, 15% from construction and demolition, and 16% from other sources. The waste characterization study assists the Department and the Solid Waste Management Districts in determining what sectors of the waste stream they can apply resources to most effectively in order to reduce the waste stream and increase diversion.

Components of Missouri's Solid Waste Stream

Municipal Solid Waste

Inorganics	4%

**Completed Scrap Tire Clean-Up Sites by County
Cumulative (1990-Present)**

1,258 scrap tire dump cleanups have been completed since the beginning of the program in 1990. 17,208,714 tires have been removed from the state's environment as of June 30, 2014.

The U.S. Environmental Protection Agency estimates that one tire per individual is generated each year. Therefore, we estimate approximately 5.9 million tires are generated in Missouri each year.

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Metallic Minerals Waste Management Fund (0575); Mined Land Reclamation Fund (0906)

2. CORE DESCRIPTION

The Land Reclamation Program regulates surface mining of coal and industrial minerals, regulates and administers reclamation of coal mine and industrial mineral lands on which bonds were forfeited, regulates and administers reclamation of coal mine lands abandoned prior to 1977, and regulates the metallic mineral waste disposal areas of mining operations.

Land Reclamation PSD: The program oversees the reclamation of abandoned mine sites in Missouri. This includes sites abandoned prior to the law (1977) and sites where permits were revoked and reclamation bonds were collected.

For coal sites abandoned prior to 1977, the program has access to federal funds to directly contract for the reclamation activities at these sites. This program is known as the Abandoned Mine Lands (AML) program. The Office of Surface Mining, US Department of Interior provides the grant for the AML program.

Where bonds have been forfeited on permit-revoked mine sites, the Mined Land Reclamation Fund (MLRF) PSD provides the appropriation authority for reclamation of these bond forfeited sites. Reclamation involves work to restore mined lands to productive uses such as agriculture, wildlife or development. The program may collect the reclamation bonds and directly contract for the reclamation activities, or the program may allow the surety bond holder to perform the reclamation in the place of the original permit holder.

Division of Environmental Quality	
Land Reclamation Program Core	

3. PROGRAM LISTING (list programs included in this core funding)

Land Reclamation Program

4. FINANCIAL HISTORY

	<u>FY 2012</u> Actual	<u>FY 2013</u> Actual	<u>FY 2014</u> Actual	<u>FY 2015</u> Current Yr.
Appropriation (All Funds) (1)	5,441,264	5,887,214	5,686,320	5,834,069
Less Reverted (All Funds)	0	0	0	N/A
Less Restricted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	5,441,264	5,887,214	5,686,320	N/A
Actual Expenditures (All Funds)	2,975,961	2,596,857	3,025,507	N/A
Unexpended (All Funds)	2,465,303	3,290,357	2,660,813	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	1,087,812	1,955,521	2,014,934	N/A
Other	1,377,491	1,334,836	645,879	N/A
	(2)	(2)	(2)	(3)

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.
 Reverted includes Governor's standard 3 percent reserve (when applicable).
 Restricted includes any extraordinary expenditure restrictions (when applicable).

NOTES:
(1) Financial data includes operating and pass-through appropriations.
(2) The vast majority of federal and other funds lapses are attributed to the PSD appropriations. Abandoned Mine Land grants are three year grants. Appropriations are set to allow the department to encumber all contracts in place at any one time even though expenditures could occur over a three year period. Lapse occurs due to timing of payments.
(3) FY 2015 appropriations include: \$700,000 for Land Reclamation Bond Forfeitures, \$3,732,500 for AML Reclamation and \$10,000 for the Small Operator Assistance Program.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

1. What does this program do?

For coal and industrial minerals (barite, tar sands, clay, limestone, sand and gravel, granite, trap rock, etc.), the Land Reclamation Program ensures that all exploration and surface mining operations are conducted in a manner that will not be detrimental to public health or safety, or cause environmental pollution. Quarries and coal mines create concern related to blasting and truck traffic, noise, hours of operation, and water runoff. Gravel mines create concern due to the impacts to Missouri streams and farmlands. Many of these concerns can be addressed through public meetings allowing an exchange of information, public hearings, or permit conditions. The program issues permits and conducts inspections for all surface mining operations, regulates and administers reclamation of coal mine and industrial mineral lands including the sites where bonds were forfeited, and regulates and administers reclamation of coal mine lands abandoned prior to 1977.

To receive a land reclamation permit, mining companies are required to obtain bonds to ensure land is restored to safe and productive use. Companies that cannot complete reclamation themselves must forfeit their bonds, making these bonds available to Missouri to pay for reclamation. Bond forfeitures occur when inspections revealing violations result in various actions depending on the degree of danger to public health and safety or the environment. These actions generally begin with informal compliance assistance efforts but may lead to formal enforcement and permit revocation and bond forfeiture by the Land Reclamation Commission. The program reclaims lands where the mining company has defaulted their responsibility with the company's forfeited reclamation bonds. Currently all coal forfeited bond sites have been reclaimed. There are 19 sites that have industrial mineral forfeited bonds with 242 acres remaining to be reclaimed. The program may collect the reclamation bonds and directly contract for the reclamation activities, or the program may allow the surety bond provider to perform the reclamation in the place of the original permittee. When the surety bond provider performs the reclamation, the program provides inspection and oversight to ensure the work is properly completed. All reclamation work must follow state and federal laws and regulations.

The abandoned mined land (AML) staff oversee the reclamation of abandoned mine sites in Missouri and has restored 4,912 acres of formerly mined lands to productive use. This includes closing dangerous mine shafts, removing trash dumps, extinguishing mine fires, eliminating dangerous high walls, improving stream miles, and stabilizing subsiding ground beneath homes and roads. The program is required to reclaim the highest priority abandoned coal mine sites before addressing problems created by other mining commodities. The program also administers an AML Emergency Program to reduce or control emergency situations in which adverse effects of past coal mining pose an immediate danger to public health (e.g. an improperly closed mine shaft subsiding and creating a dangerous vertical opening in a residential area).

Metallic minerals staff implement the Metallic Minerals Waste Management Act (lead, iron, zinc, copper, gold and silver), which only regulates the metallic mineral waste disposal areas of mining operations. Missouri has the largest lead mining district in the U.S. The key issue for our state is to ensure that these areas are properly reclaimed. The program confers with other environmental programs to ensure that all appropriate environmental laws are met in the construction and reclamation of these waste disposal areas.

Land Reclamation PSD: Allows the program to contract with engineering, excavating, and construction companies to reclaim AML and bond forfeiture sites. There are still over 100 eligible AML problem areas consisting of 9,752 acres with public health, safety and environmental problems that must be addressed. The estimated cost for reclamation at these sites is \$50.5 million. Problem areas are added to the inventory as identified.

PROGRAM DESCRIPTION

Department of Natural Resources
DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

1. What does this program do (continued)?

Land Reclamation Program - Reconciliation					
	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
	Actual	Actual	Actual	Current	Gov Rec
Land Reclamation Operations (78880C)	1,095,363	1,120,013	1,107,669	1,391,569	1,391,569
Land Reclamation PSD (79465C)	1,880,598	1,476,844	1,917,838	4,442,500	4,442,500
Total	2,975,961	2,596,857	3,025,507	5,834,069	5,834,069

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 444.350 through 444.380	Metallic Minerals
RSMo 444.500 through 444.755	Strip Mining
RSMo 444.760 through 444.790	Industrial Minerals
RSMo 444.800 through 444.970 and 30 CFR Part 700.01 through 955.17	Coal, Bond Forfeiture and Abandoned Mine Lands

3. Are there federal matching requirements? If yes, please explain.

Coal Administration and Enforcement Grant	50% Federal (OSM)
Abandoned Mine Lands Grant	100% Federal (OSM)

4. Is this a federally mandated program? If yes, please explain.

The state has federal delegation to operate the coal regulatory, abandoned mine lands and coal bond forfeiture programs.

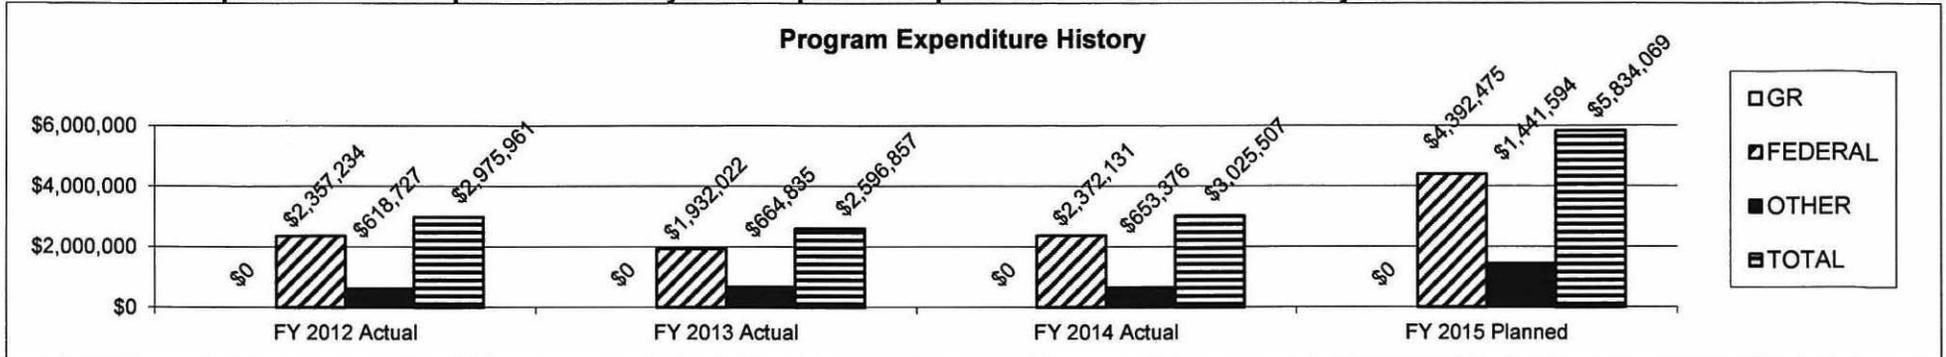

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

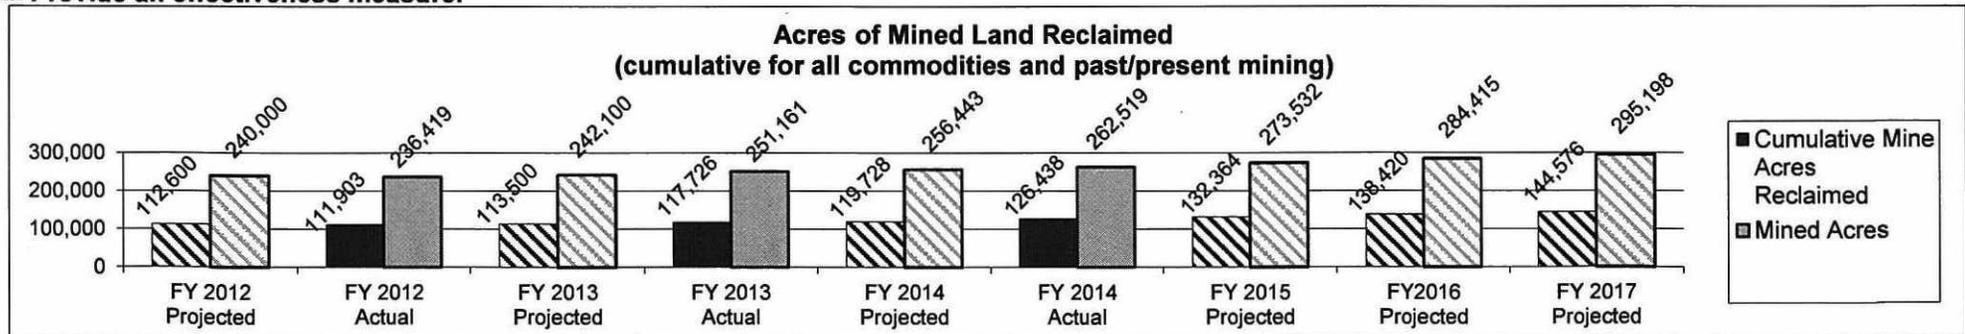

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. FY 2015 Planned is shown at full appropriation. The Abandoned Mine Land and Bond Forfeiture PSD appropriations are used to allow the department to encumber, obligate and pay multi-year mined land reclamation projects.

6. What are the sources of the "Other" funds?

Metallic Minerals Waste Management Fund (0575); Coal Mine Land Reclamation Fund (0684); Mined Land Reclamation Fund (0906)

7a. Provide an effectiveness measure.

Most of the mined acres were affected prior to regulation. Of these, about 67,000 coal mining acres remain and could be reclaimed through the federal Abandoned Mine Lands (AML) program. Coal mined areas are prioritized using the Office of Surface Mining priority ranking which considers health, public safety and environmental impacts of a site.

PROGRAM DESCRIPTION

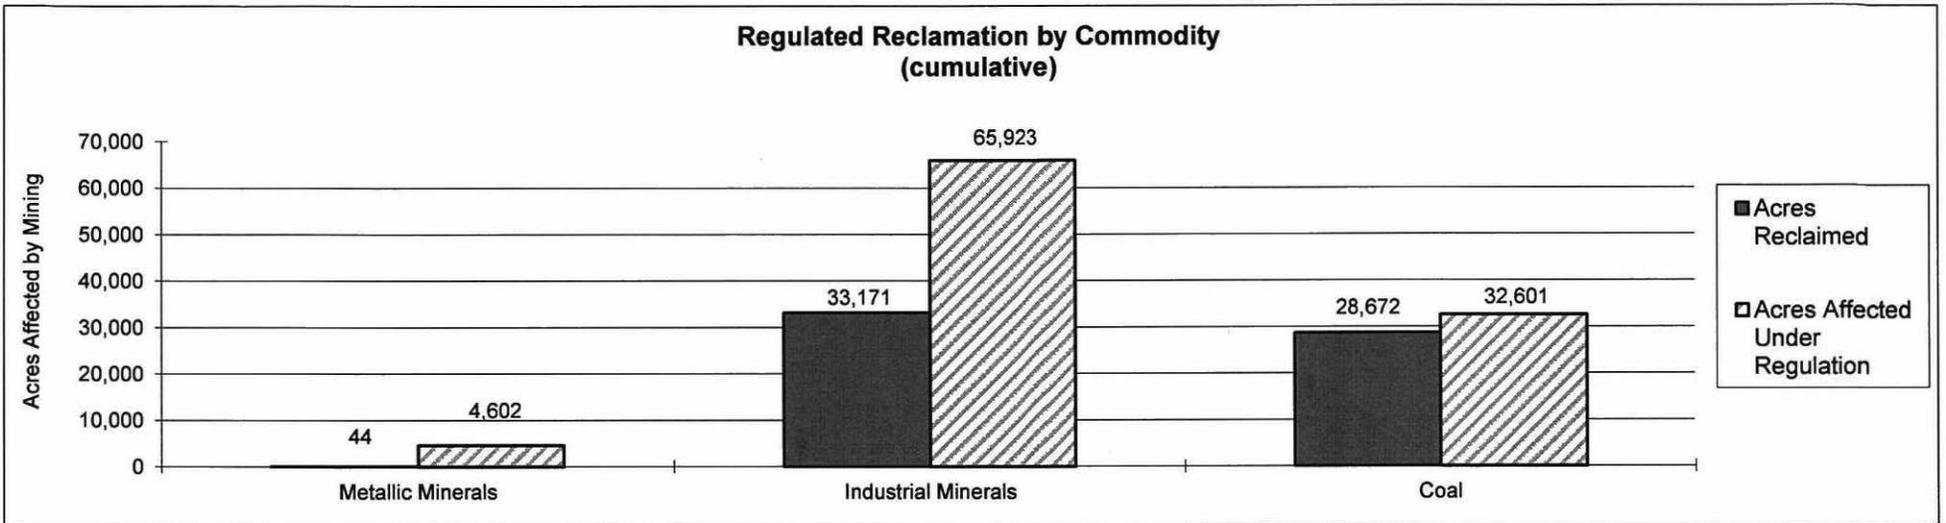

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7a. Provide an effectiveness measure (continued).

Acres of mined land reclaimed since the passage of mining laws (industrial minerals and coal began in 1972; metallic minerals in 1991)

Metallic minerals permits are issued for the life of the operation. Since most of these sites are still operating, a limited amount of reclamation has occurred. About 63% of all industrial minerals and coal acres have already been reclaimed. This chart only shows the acres impacted since the passage of mining laws and reflects the reclamation by type of mining activity.

PROGRAM DESCRIPTION

Department of Natural Resources
DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7a. Provide an effectiveness measure (continued).

Compliance Monitoring Activities

	FY 2012 Actual			FY 2013 Actual			FY 2014 Actual		
	IM	MM	Coal	IM	MM	Coal	IM	MM	Coal

Settlements	1	0	0	1	0	0	1	0	0
Referrals	2	0	0	2	0	0	2	0	0

IM = Industrial Minerals
MM = Metallic Minerals

Inspections are done by the Land Reclamation Program. FY 2013 inspections were lower than the previous year due to the program not being fully staffed with certified inspectors; we expect future inspections to level out.

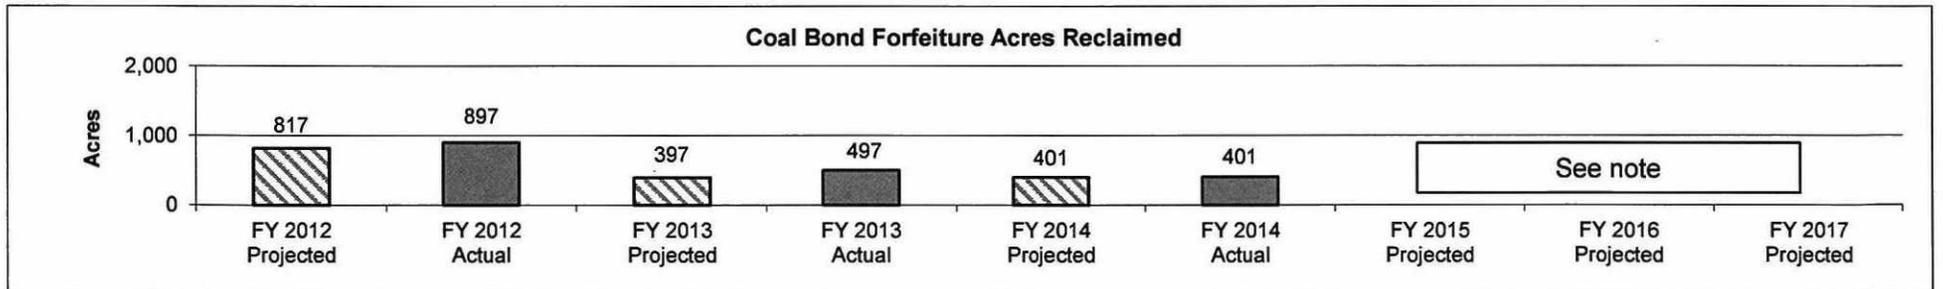

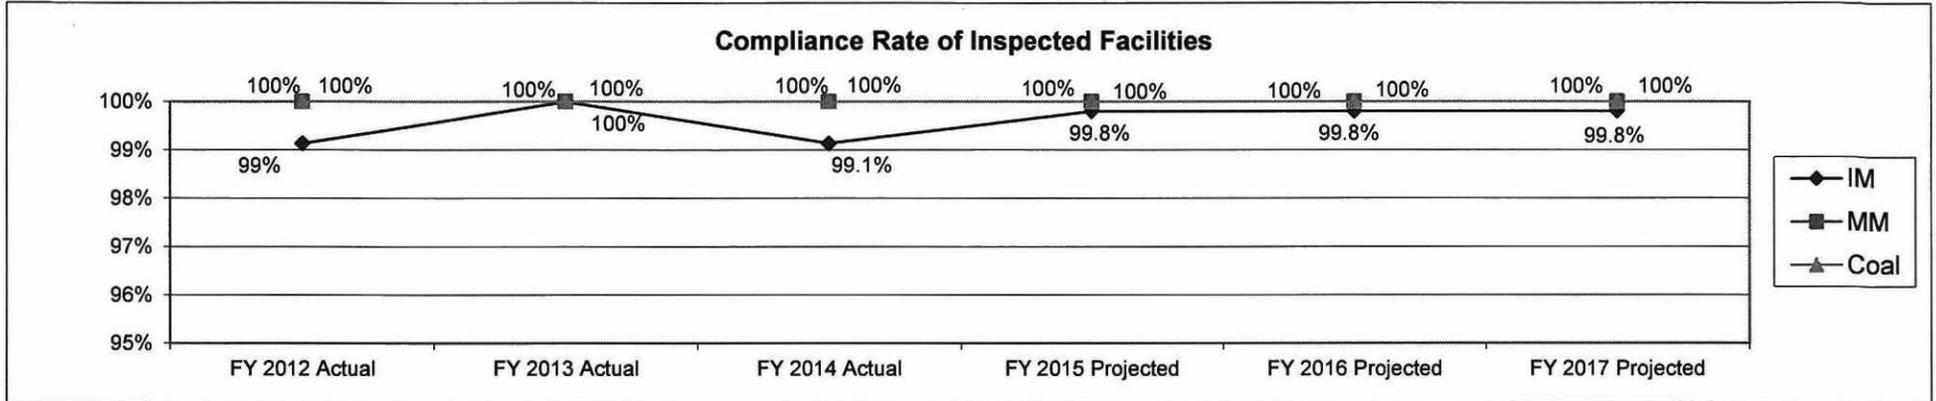

There are no formal letters of warning issued by the Land Reclamation Program. The program follows conference, conciliation and persuasion (CC&P) protocol to obtain compliance. For consistency and ease in comparisons, the department considers CC&Ps to be equivalent to letters of warning in this measure.

The Coal program is anticipating a new permit application in FY 2015. This will increase the number of inspections once the review process is completed and the permit is issued.

PROGRAM DESCRIPTION

Department of Natural Resources
DEQ - Land Reclamation Program
Program is found in the following core budget(s): Land Reclamation Program

7a. Provide an effectiveness measure (continued).

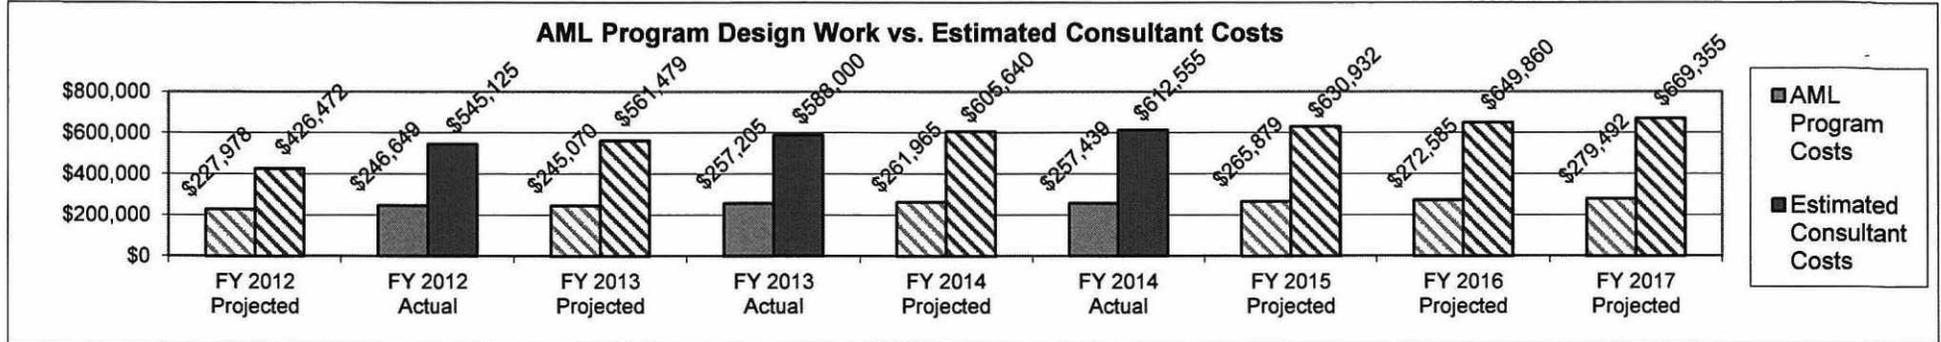

All identified coal bond forfeiture acres have been reclaimed.

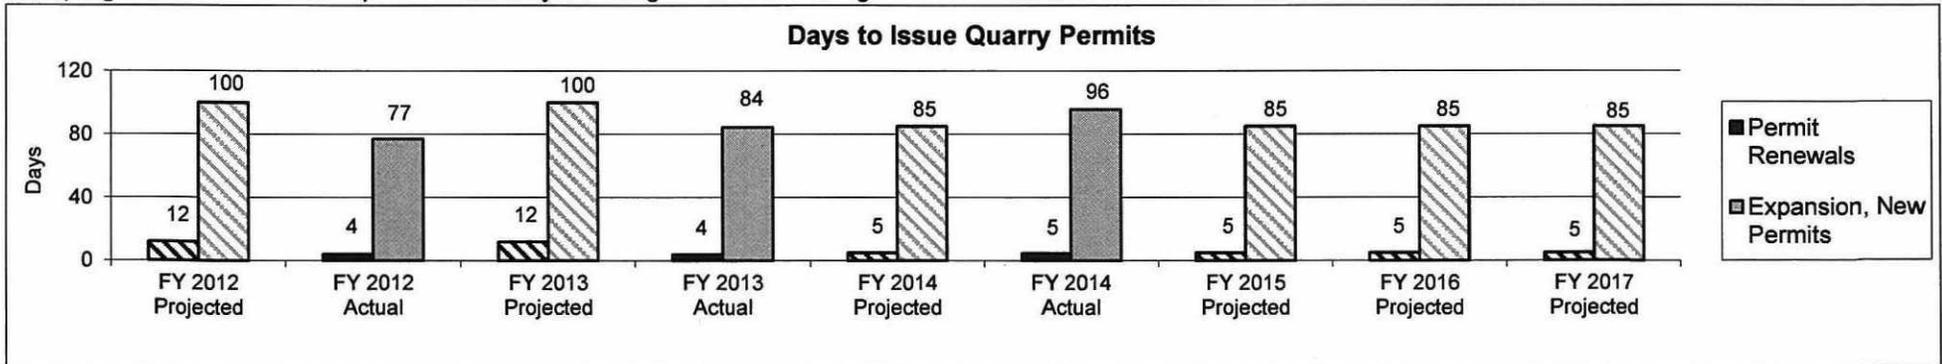

PROGRAM DESCRIPTION

Department of Natural Resources
DEQ - Land Reclamation Program
Program is found in the following core budget(s): Land Reclamation Program

7b. Provide an efficiency measure.

The program issues over 300 permits annually covering about 800 mining sites.

RSMo 444.772 to 444.773 requires a minimum 60 day public comment period for new permits and expansions. If public meetings and hearings are held, substantially more than 60 days are needed to satisfy the law and the rights of those requesting the meetings. Therefore new permits and expansions will always be a lengthy process under this law; this time frame is beyond the control of the agency. Permit renewals are issued when the operator has filed a complete application.

PROGRAM DESCRIPTION

Department of Natural Resources
DEQ - Land Reclamation Program
Program is found in the following core budget(s): Land Reclamation Program

7c. Provide the number of clients/individuals served (if applicable)

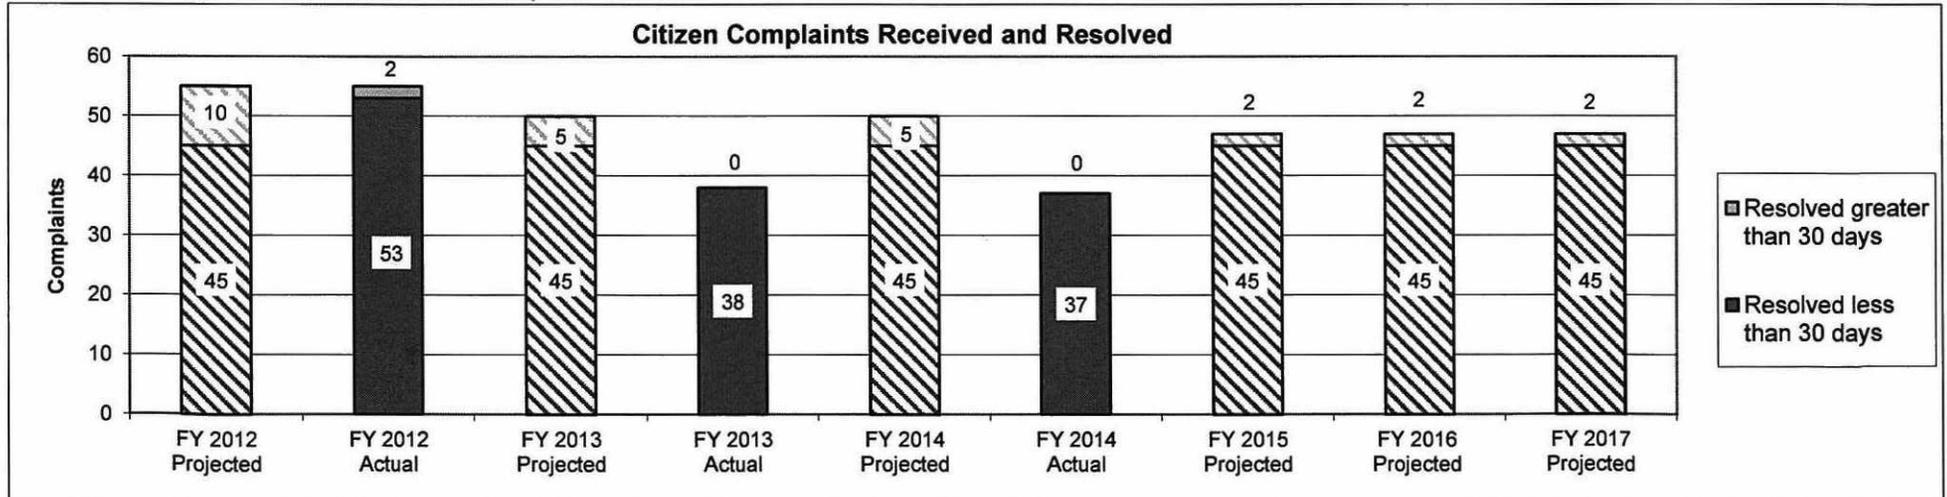

Industrial Minerals (Quarries and Gravel Mines)	
782 Sites @ an estimated 45 people per site	35,190
333 Permits @ 1 company per permit	333
Total Clients Served	35,523

Coal (Active and Bond Forfeiture Sites)	
12 Sites @ an estimated 45 people per site	540
Total Clients Served	540

Metallic Minerals (Lead Mines)	
The residents of four counties in Southeast Missouri: Iron, Jefferson, Reynolds and Washington.	
Missourians in those four counties	263,511
Companies that hold permits	3
Total Clients Served	263,514

The Industrial Minerals chart reflects estimates of the public protected from the effects of rock mining. We conduct about six public meetings per year, each with 10 to 80 people present. There are quarries in every county of the state; some are rural populations and some are urban.

7d. Provide a customer satisfaction measure, if available.

Historically, the program receives between 30 and 55 complaints per year. Most complaints can be resolved quickly, but depending on the complexity of the issue some complaints may take more time to resolve.

This page was intentionally left blank.

Other Funds: Missouri Air Emission Reduction Fund (0267); Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund – Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570); Natural Resources Protection Fund - Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund – Air Pollution Permit Fee Subaccount (0594); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679)

Note: This core budget is facing fiscal challenges.

2. CORE DESCRIPTION

The Regional Offices are located throughout the state of Missouri and work in partnership with the environmental programs in order to protect the state's air, land and water resources, which are important to the state's citizens and economy. The program provides consistent, efficient delivery of services closest to where Missourians live and work. This is accomplished through timely compliance assistance, inspection, on-site visits to permitted facilities, wastewater and air burn permit issuance, and investigating reported environmental concerns. Regional and satellite offices are located throughout the state to provide better access for compliance and informational purposes.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Regional Offices

Program is found in the following core budget(s): Regional Offices

1. What does this program do?

The Regional Offices consist of five offices (St. Louis Regional Office, Kansas City Regional Office, Northeast Regional Office, Southeast Regional Office, and Southwest Regional Office) and 7 satellite offices. The Regional Offices represent the department and provide interaction with regulated facilities and citizens at the local level. Staff of the Regional Offices conduct environmental inspections, investigate citizen concerns, provide technical assistance, issue water pollution and open burning permits, and are responsive to inquiries and requests for assistance from multiple sources including the public, legislators, other department entities, various federal and state agencies, various media outlets, and other DNR staff.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Federal Clean Water Act as amended
Federal Safe Drinking Water Act as amended
Federal Clean Air Act, with amendments, 1990
Federal Comprehensive Environmental Response,
Compensation, and Liability Act of 1980, as amended, Public Law 96-510
Federal Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499
Federal Resource Conservation and Recovery Act of 1976; as amended, Public Law 94-580
Federal Solid Waste Disposal Act of 1976, as amended
RSMo 640.040 Cleanup of Controlled Substance
RSMo 260.500 through 260.552 Hazardous Substance Emergency Response

Also see program authorization in the core operating budgets for the Division of Environmental Quality's Water Protection Program, Air Pollution Control Program, Hazardous Waste Program, and Solid Waste Management Program.

3. Are there federal matching requirements? If yes, please explain.

Performance Partnership Grant	Match varies by component
Drinking Water State Revolving Fund	20% State
Clean Water State Revolving Fund	20% State

4. Is this a federally mandated program? If yes, please explain.

The Regional Offices provide support to implement the Clean Water Act; the Safe Drinking Water Act; the Clean Air Act; the Resource Conservation and Recovery Act; the Comprehensive Environmental Response, Compensation, and Liability Act; and the Superfund Amendments and Reauthorization Act.

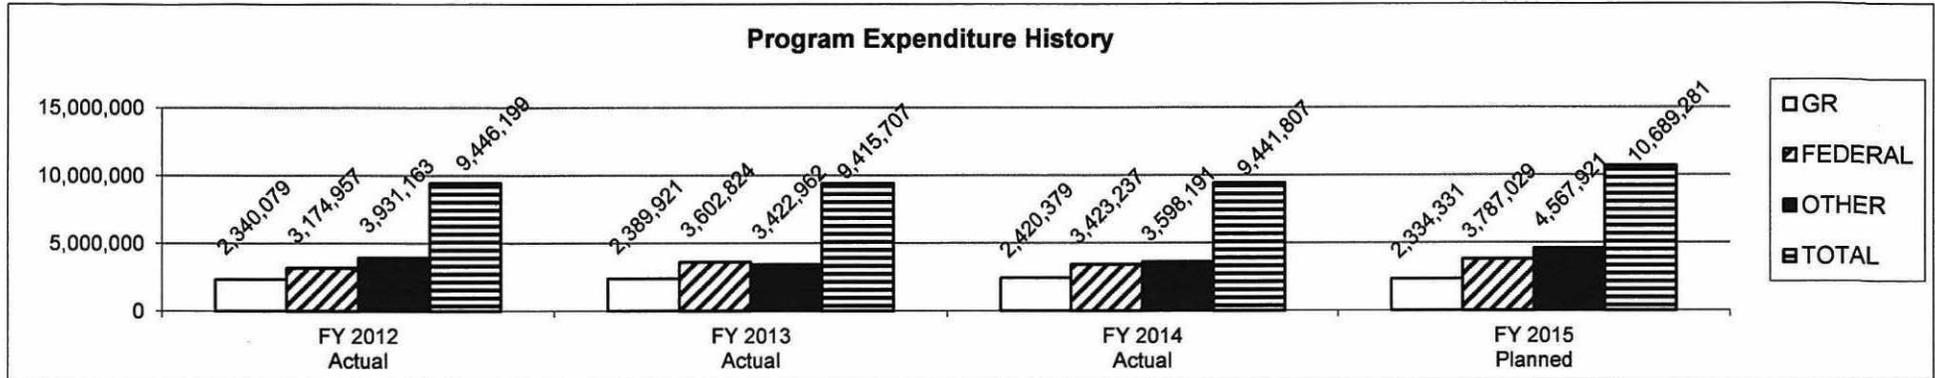

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Regional Offices

Program is found in the following core budget(s): Regional Offices

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

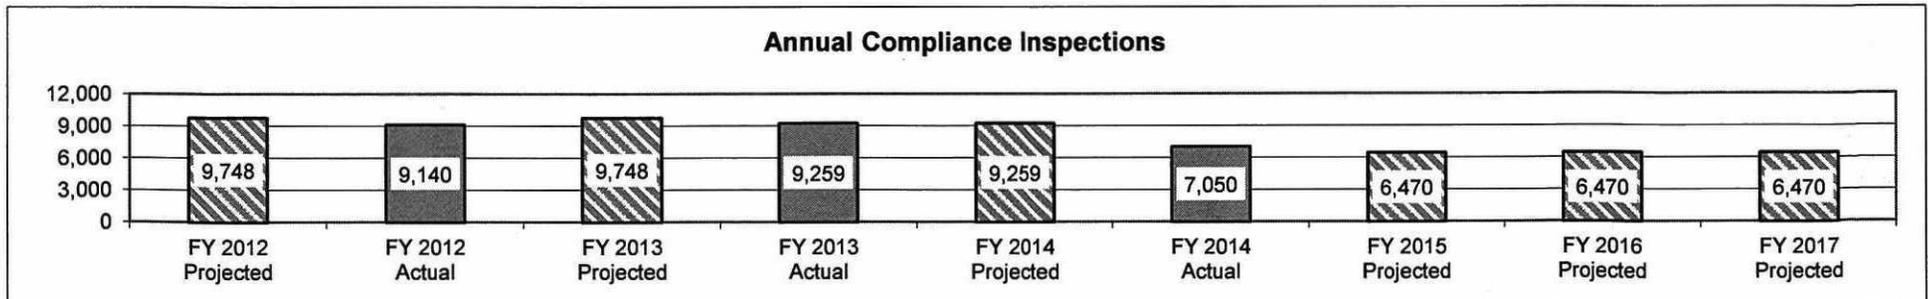

Notes: FY 2013 Actual data includes lapse period corrections. FY 2015 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Missouri Air Emission Reduction Fund (0267); Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund - Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570); Natural Resources Protection Fund - Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679).

7a. Provide an effectiveness measure.

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund (0570); Natural Resources Protection Fund – Air Pollution Permit Fee Subaccount (0594); Environmental Radiation Monitoring Fund (0656); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679).

Note: This core budget is facing fiscal challenges.

2. CORE DESCRIPTION

The Environmental Services Program (ESP) provides field support and monitoring functions throughout Missouri. ESP is home to the state's environmental laboratory. The laboratory is accredited by the U.S. Environmental Protection Agency (EPA) and performs chemical analysis of public drinking water supplies throughout the state. The lab also analyzes air, water, and soil samples. ESP is also home to the Environmental Emergency Response Section which maintains a 24 hour/day, 7 day/week support and response capability that encompasses hazardous substance releases, radiological incidents, homeland security events, weapons of mass destruction, and natural disasters. Local fire departments, haz mat teams, law enforcement, and first responders throughout Missouri rely upon these services. This section also provides support and economical disposal options to law enforcement dealing with hazardous wastes as a result of clandestine drug lab seizures (predominately methamphetamine (meth) related). In addition, ESP has sections specializing in field monitoring of air and water quality.

Hazardous Substances Analysis & Emergency Response: The department coordinates state, federal and local efforts during an environmental emergency, including the coordination of controlled substance cleanup, and ensures that the emergency is brought to a safe and environmentally sound conclusion. In FY 2014, approximately 2,200 hazardous substance spills, leaks and other chemical-related incidents were reported through the emergency response system. Many of these incidents required an on-scene response to assess the situation, provide technical assistance to on-site responders and ensure that the hazardous substance release was properly cleaned up.

3. PROGRAM LISTING (list programs included in this core funding)

Environmental Services Program

4. FINANCIAL HISTORY

	FY 2012 Actual	FY 2013 Actual	FY 2014 Actual	FY 2015 Current Yr.
Appropriation (All Funds)	6,333,746	11,735,788	6,145,409	6,218,347
Less Reverted (All Funds)	(42,477)	(41,432)	(43,132)	N/A
Less Restricted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	6,291,269	11,694,356	6,102,277	N/A
Actual Expenditures (All Funds)	4,940,771	10,595,453	5,383,242	N/A
Unexpended (All Funds)	1,350,498	1,098,903	719,035	N/A
Unexpended, by Fund:				
General Revenue	2	64	1,100	N/A
Federal	713,610	490,367	469,333	N/A
Other	636,886	608,472	248,602	N/A
	(1)	(1)	(1)	(1,2)

Reverted includes Governor's standard 3 percent reserve (when applicable).
 Restricted includes any extraordinary expenditure restrictions (when applicable).
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

CORE DECISION ITEM

Department of Natural Resources	Budget Unit 78885C, 79475C
Division of Environmental Quality	
Environmental Services Program Core	

4. FINANCIAL HISTORY (continued)

NOTES:

(1) The Cleanup of Controlled Substances pass through appropriation was estimated through Fiscal Year 2012. The Environmental Emergency Response pass through appropriation was estimated through Fiscal Year 2013. These appropriations are used for a varying number and size of meth cleanups and emergencies, making the appropriation needs unpredictable from year to year. For example, the Fiscal Year 2013 Actual Expenditures include one-time disbursements of \$5,027,438 for the emergency Drought Cost-Share Assistance Program. Beginning with the Fiscal Year 2014 budget, however, the appropriations are not estimated.

(2) The FY 2015 pass through appropriations are: Controlled Substance Cleanup \$150,000; Environmental Emergency Response \$200,000.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

1. What does this program do?

The Environmental Services Program (ESP) provides field support and monitoring functions throughout Missouri. These activities play a critical role in the overall delivery of services in our various environmental programs (air, water, drinking water, and solid and hazardous waste). These activities are part of the requirements in each of these areas and allow the department to maintain delegation from the U.S. Environmental Protection Agency (EPA). In addition, ESP provides direct assistance to local emergency response agencies and communities.

ESP is home to the state's environmental laboratory. The lab is uniquely equipped to perform chemical analysis and is accredited by EPA to perform chemical analysis of public drinking water supplies throughout the state. The lab also analyzes air, water, and soil samples. ESP is also home to the Environmental Emergency Response Section (EER) which maintains a 24 hour/day, 7 day/week support and response capability that encompasses hazardous substance releases, radiological incidents, homeland security events, weapons of mass destruction, and natural disasters. Local fire departments, haz mat teams, law enforcement, and first responders throughout Missouri rely upon these services. This section also provides support and economical disposal options to law enforcement dealing with hazardous wastes as a result of clandestine drug lab seizures (predominately methamphetamine (meth) related).

ESP also has sections specializing in field monitoring of air and water quality. The Air Quality Monitoring Section (AQM) operates approximately 190 monitoring instruments at 51 locations around Missouri as part of a network to monitor air pollutants known to affect people's health. This network generates approximately five million measurements annually. This data may be used to determine whether an area meets the National Ambient Air Quality Standards, to identify air pollution trends, to investigate citizen complaints, to determine the source of air pollution problems, and to inform people of the current air quality in real time for major metropolitan areas within Missouri. The AQM Section works in support of the Air Pollution Control Program. The Water Quality Monitoring Section (WQM) is responsible for assessing the biological health of lakes, rivers and streams and monitoring water and sediment quality throughout the State of Missouri. The WQM Section works in support of the Water Protection Program.

Hazardous Substances Analysis & Emergency Response: The department coordinates state, federal and local efforts during environmental emergencies, and ensures that the emergency is brought to a safe and environmentally sound conclusion. In FY 2014, nearly 2,200 hazardous substance spills, leaks and other incidents were reported to the department through the statewide emergency response phone line 1-573-634-CHEM (2436). Many of these incidents required an on-site response to assess the situation, provide technical assistance to on-site responders and ensure that the release was properly cleaned up. On-site response may require a contractor to be called in to eliminate a threat to public health and environment if a responsible party cannot be located or fails to take timely action to clean up the release. Controlled substance (primarily meth) use and production continues to be a major problem in the state. Law enforcement has found that dealing with the by-products of controlled substance production is an environmental and public health hazard beyond their expertise. The ingredients used to produce meth are very volatile and can cause the meth labs to be highly explosive. Many of the materials used in the meth production process, as well as the by-products from that production, are toxic and create a hazardous substance cleanup problem. The department assists local law enforcement with the environmental challenges posed by illegal drug production.

PROGRAM DESCRIPTION

Department of Natural Resources

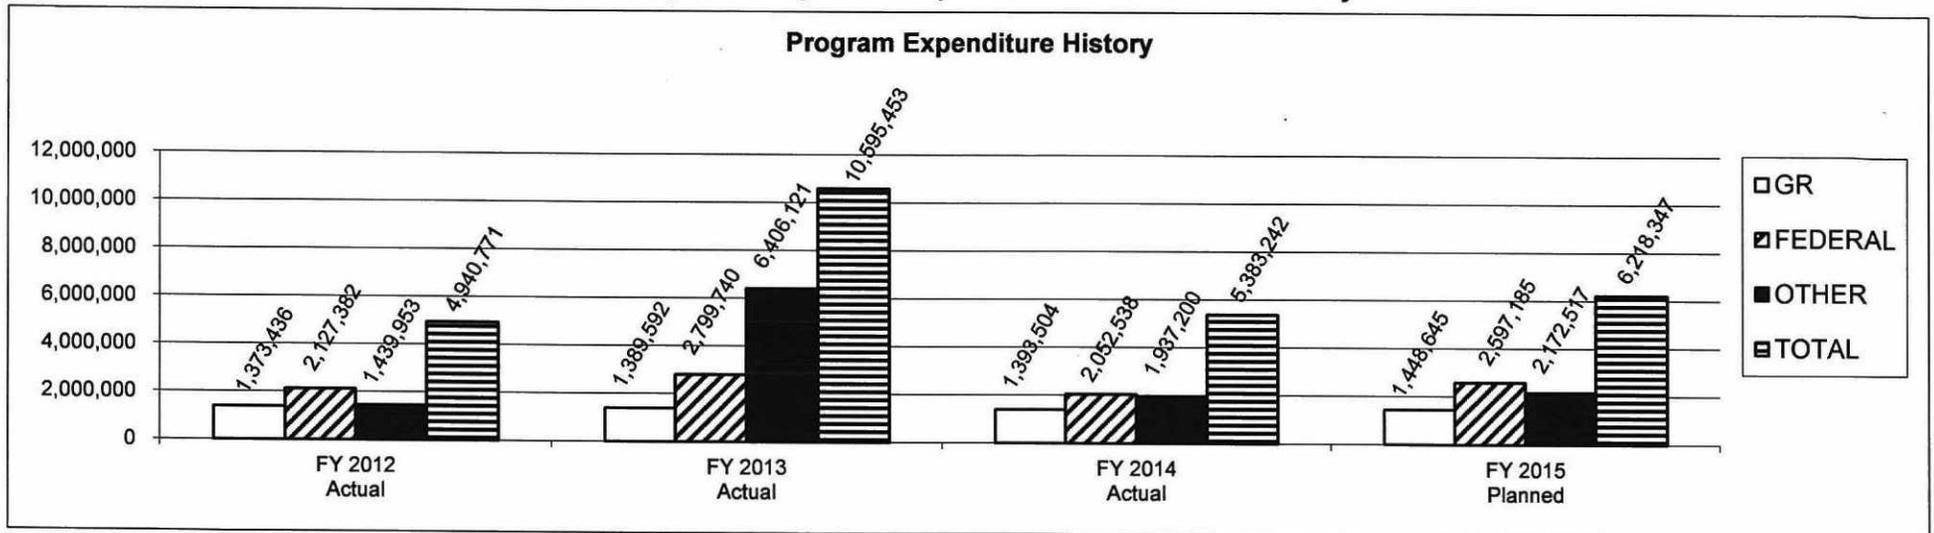

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

4. Is this a federally mandated program? If yes, please explain.

The Environmental Services Program provides support to implement the Clean Water Act; the Safe Drinking Water Act; the Clean Air Act; the Resource Conservation and Recovery Act; the Comprehensive Environmental Response, Compensation, and Liability Act; and the Superfund Amendments and Reauthorization Act.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: The Fiscal Year 2013 Actual Expenditures include one-time disbursements of \$5,027,438 for the emergency Drought Cost-Share Assistance Program. FY 2015 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Cost Allocation Fund (0500); Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund (0570); Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594); Environmental Radiation Monitoring Fund (0656); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679)

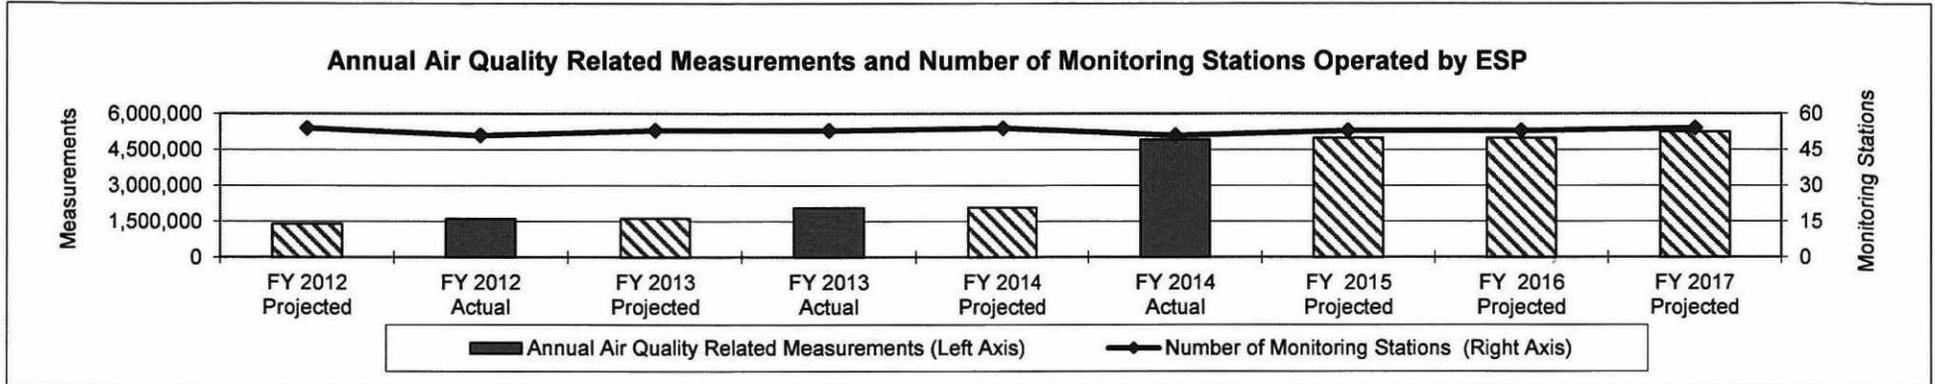

PROGRAM DESCRIPTION

Department of Natural Resources

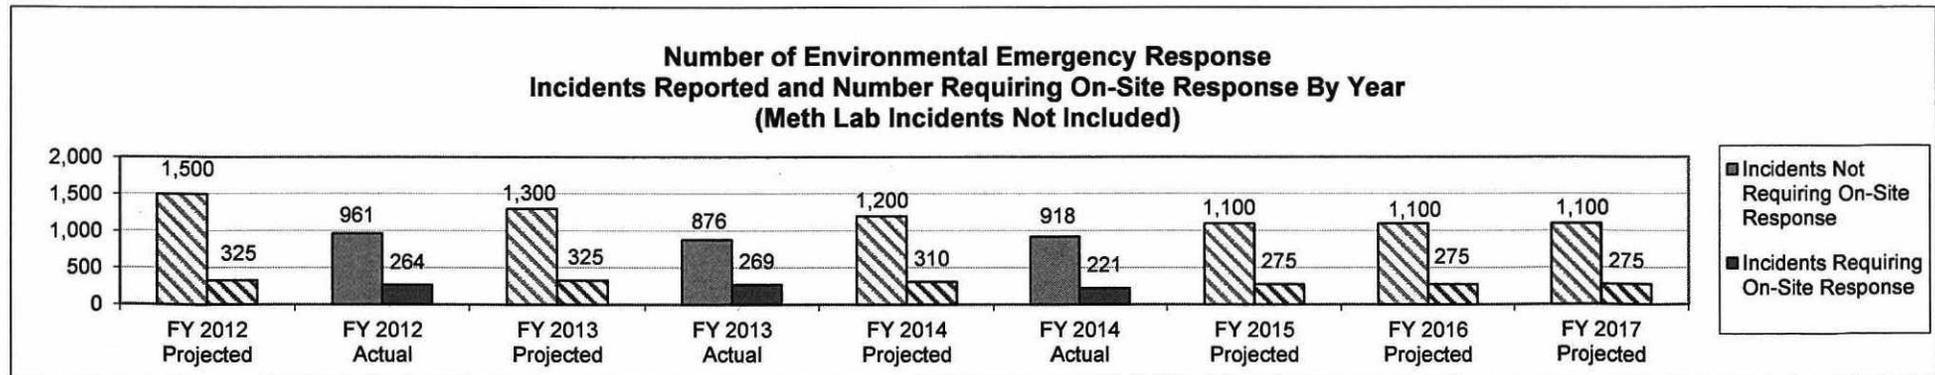

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7a. Provide an effectiveness measure.

The number of air related measurements significantly increased in FY 2014 due to improved technology and automation in data collection. Most of the data is now electronically delivered to a centralized database.

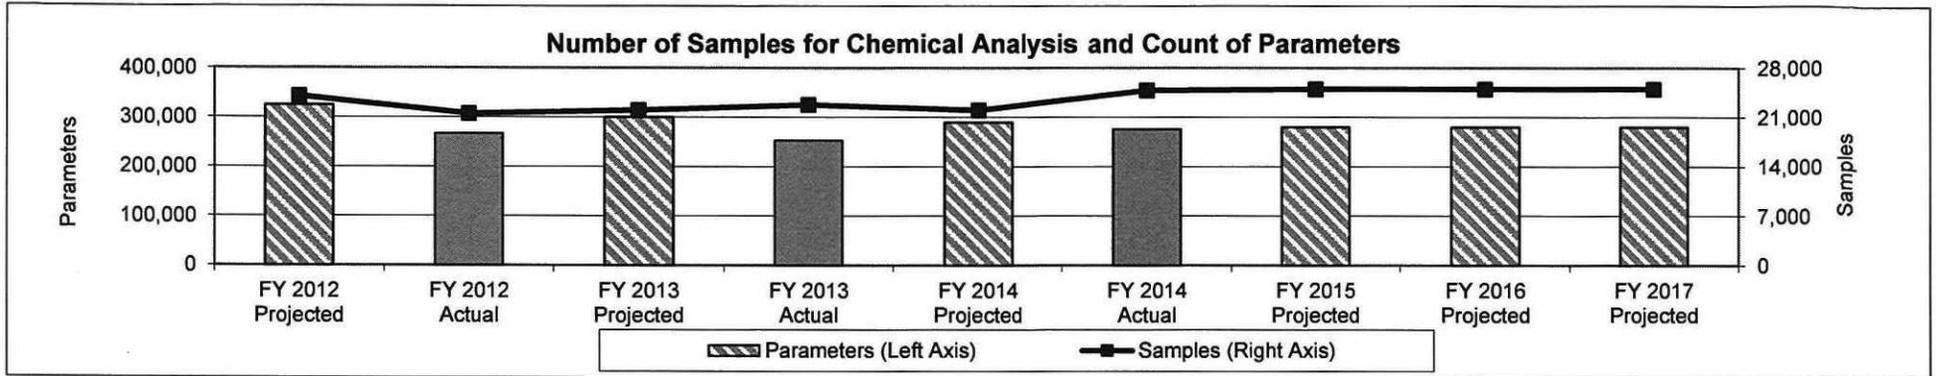

PROGRAM DESCRIPTION

Department of Natural Resources

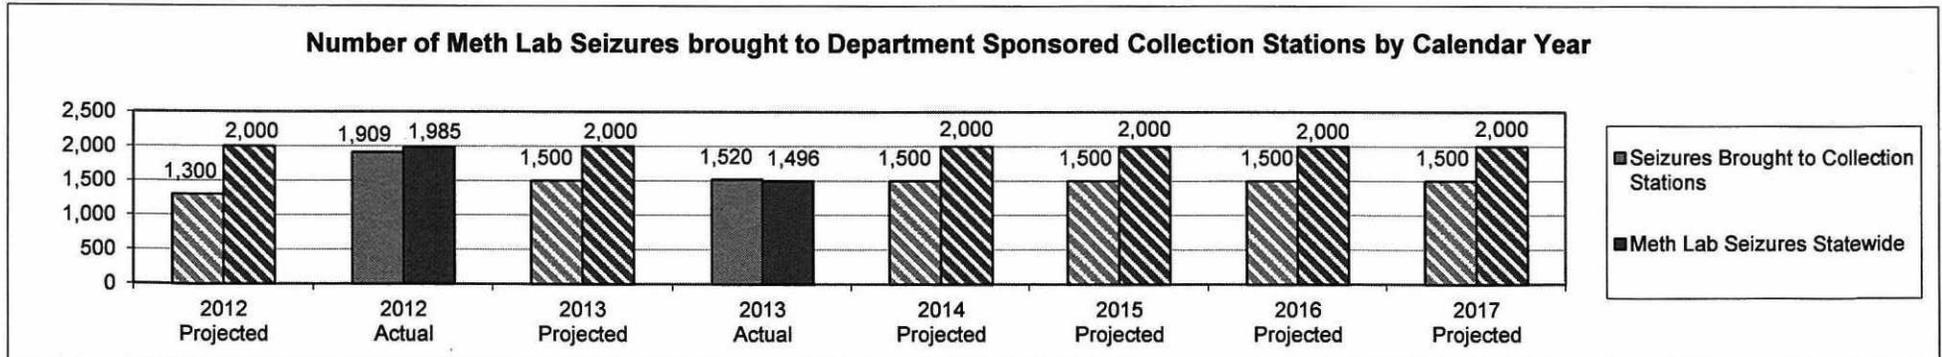

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7a. Provide an effectiveness measure (continued).

One sample may be tested for multiple parameters. For example, a specific drinking water sample may be tested for parameters such as lead, copper, and turbidity.

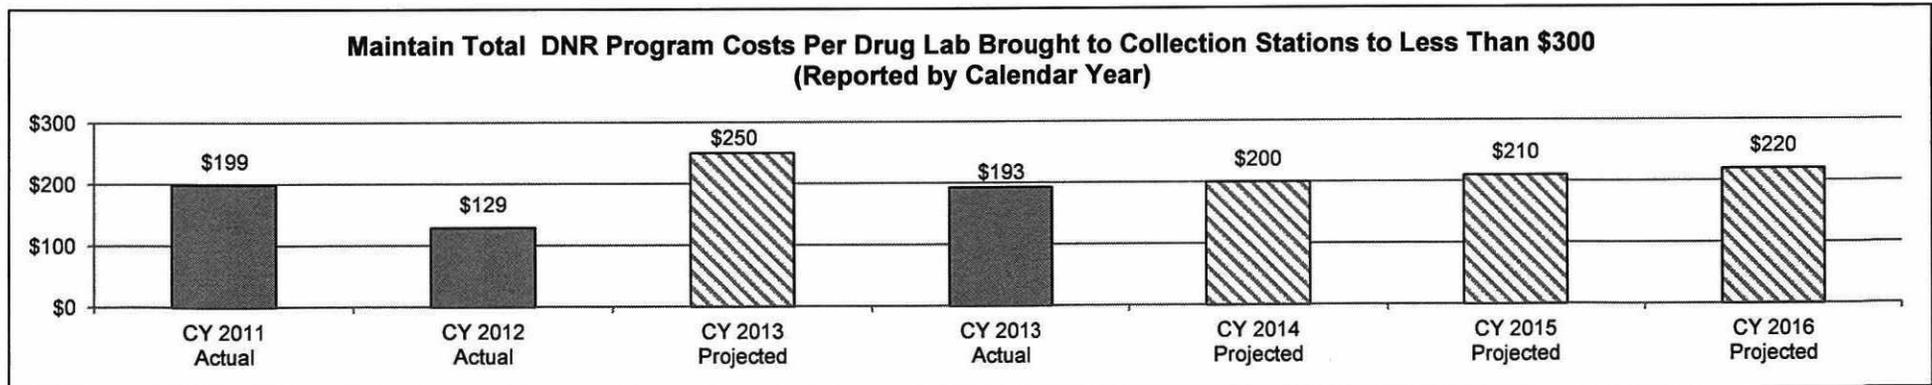

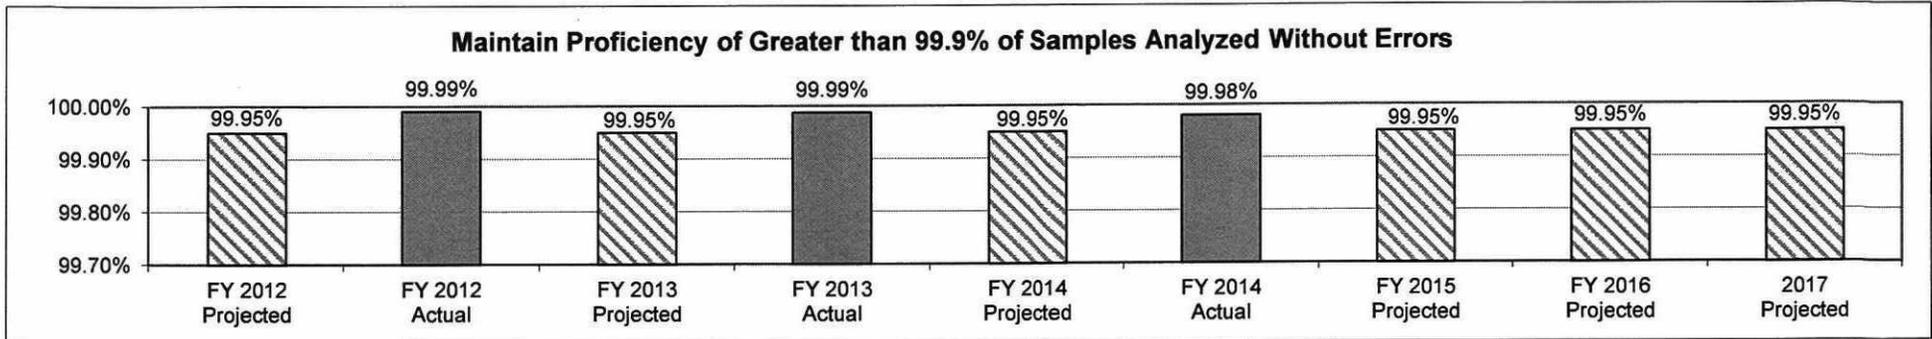

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7b. Provide an efficiency measure.

Notes:

- * Historically, costs of managing wastes for one lab through the USDEA have been reported in the range of \$2,000 to \$3,000. More recently USDEA has worked with some states to implement a program similar to Missouri's and report costs in the range of \$500 per lab.
- * DNR cost is based on actual direct expenditures reported from SAM II.
- * This measure was new for the FY 2015 budget. Projections are not available for 2011 and 2012.

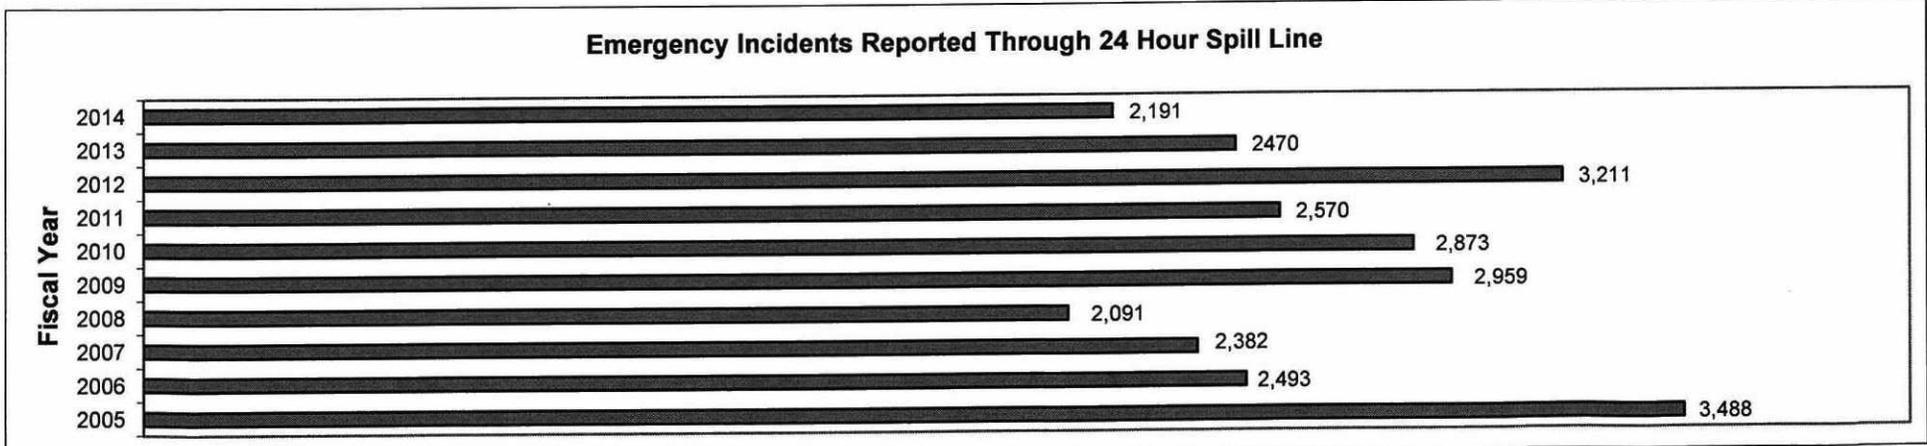

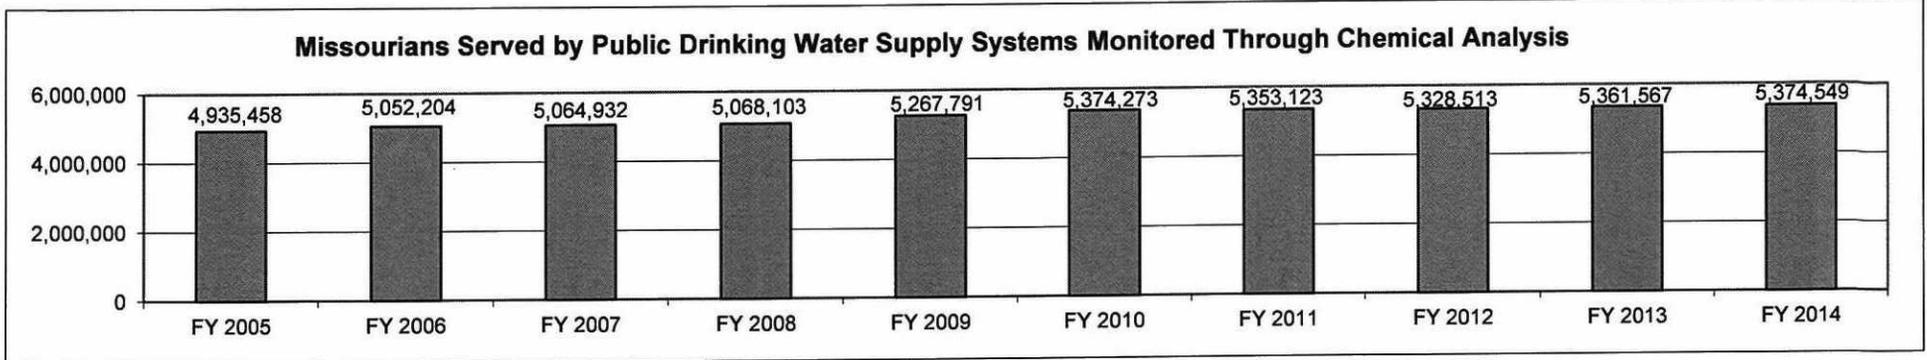

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7c. Provide the number of clients/individuals served, if applicable.

The Environmental Services Program provides assistance to fire services; hazardous materials teams; homeland security teams; law enforcement; local emergency management committees; local, state, and federal agencies; private business and industry, and the citizens of Missouri.

PROGRAM DESCRIPTION

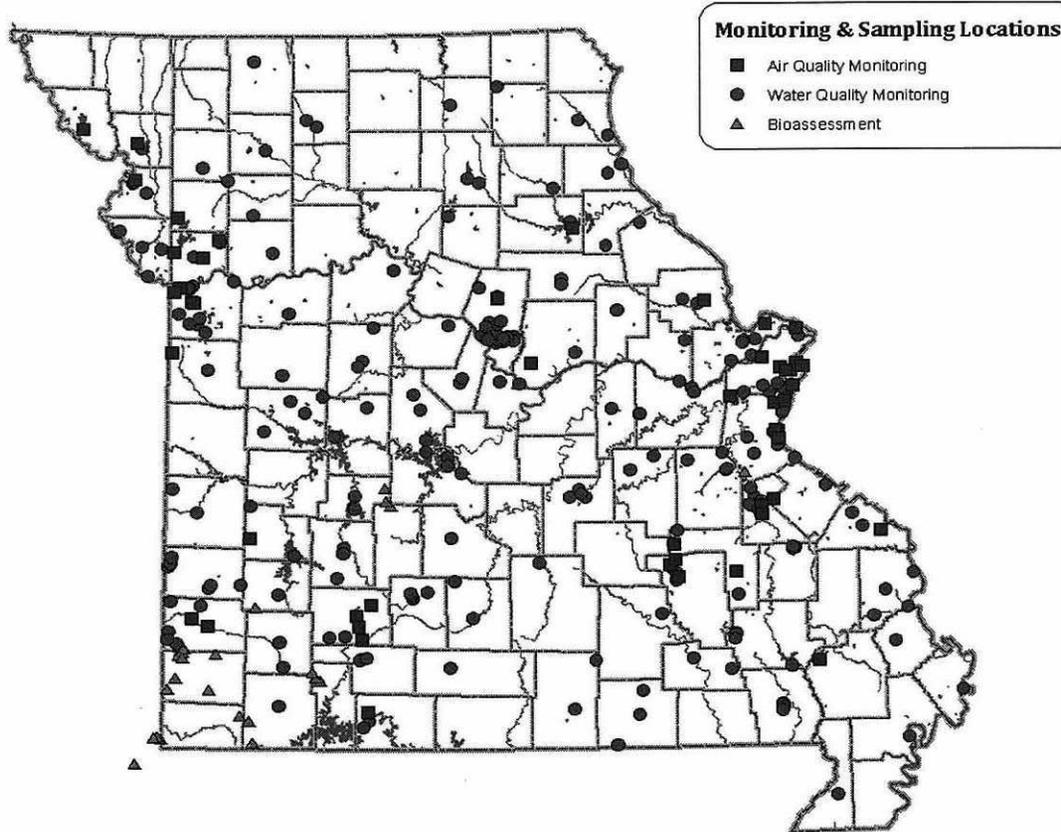

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7c. Provide the number of clients/individuals served, if applicable (continued).

Environmental Services Program - FY 2014 Selected Environmental Monitoring Points

Note: A biological assessment was completed for Cave Springs Branch, an effluent dominated stream in southwest Missouri. The facility producing the effluent is located within close proximity of the state line. In order to meet minimum sampling requirements, sampling on Cave Springs Branch extended into Delaware County, Oklahoma.

PROGRAM DESCRIPTION

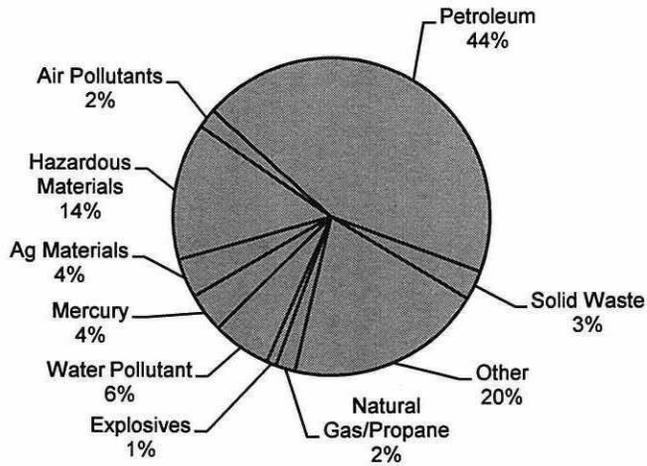

Department of Natural Resources

DEQ - Environmental Services Program

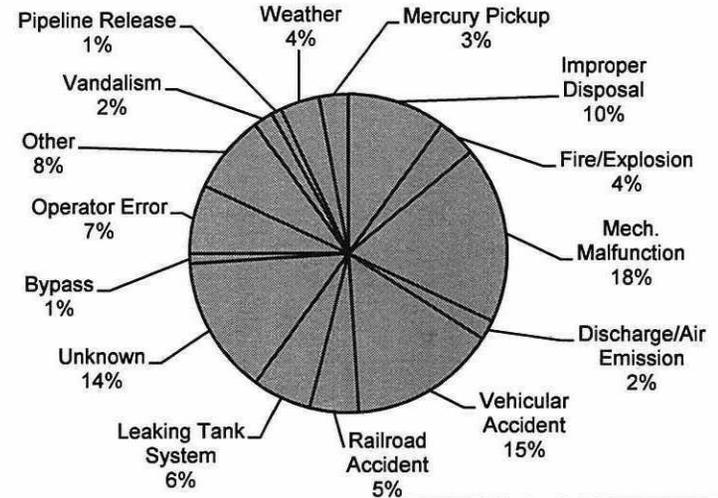

Program is found in the following core budget(s): Environmental Services Program

7c. Provide the number of clients/individuals served, if applicable (continued).

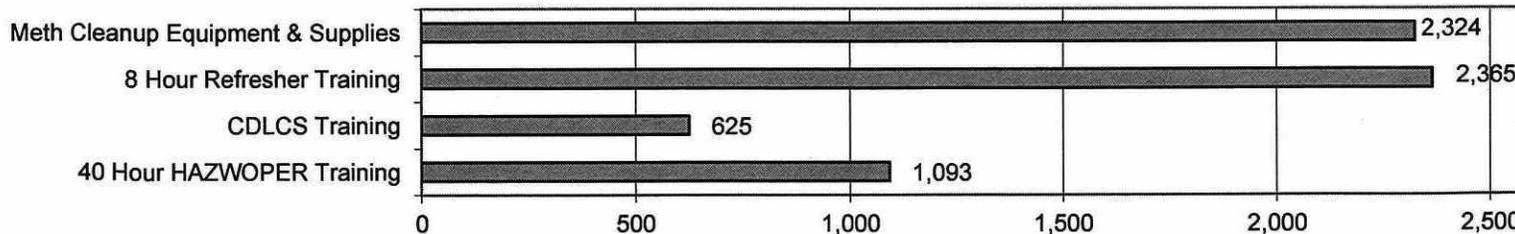

**Environmental Emergency Response
FY 2014 Materials Released**

**Environmental Emergency Response
FY 2014 Incident Causes**

**Officials from Local Agencies Served by Receiving Training, Equipment, and Supplies
through Clandestine Drug Lab Cleanup Program FY 2000 - FY 2014**

CDLCS = Clandestine Drug Lab Collection System
HAZWOPER = Hazardous Waste Operations and Emergency Response

7d. Provide a customer satisfaction measure, if available.

--------------------	---	---------	---------	---------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568)

2. CORE DESCRIPTION

This decision item funds the administration of the Division of Environmental Quality (DEQ), which includes the Water Protection Program (WPP), Air Pollution Control Program (APCP), Hazardous Waste Program (HWP), Solid Waste Management Program (SWMP), Land Reclamation Program (LRP), Regional Offices (St. Louis Regional Office, Kansas City Regional Office, Northeast Regional Office, Southeast Regional Office, and Southwest Regional Office) and the Environmental Services Program (ESP). The division administration is responsible for long-range planning to implement policies to protect public health and the environment. These responsibilities include the integration, direction, coordination and other management functions for the direct programs' statutory mandates. In addition, the division's Environmental Investigation Unit investigates criminal violations of environmental laws.

Technical Assistance Grants: This core appropriation provides authority to fund expenses and to pass through funds for technical assistance grants, environmental studies, environmental education projects, and demonstration and pilot projects. The department also provides financial and administrative training to the managing boards and councils of wastewater and drinking water systems. In addition, this appropriation allows the department to develop partnerships and pursue federal funds that often have a competitive application process.

3. PROGRAM LISTING (list programs included in this core funding)

Division of Environmental Quality - Administration

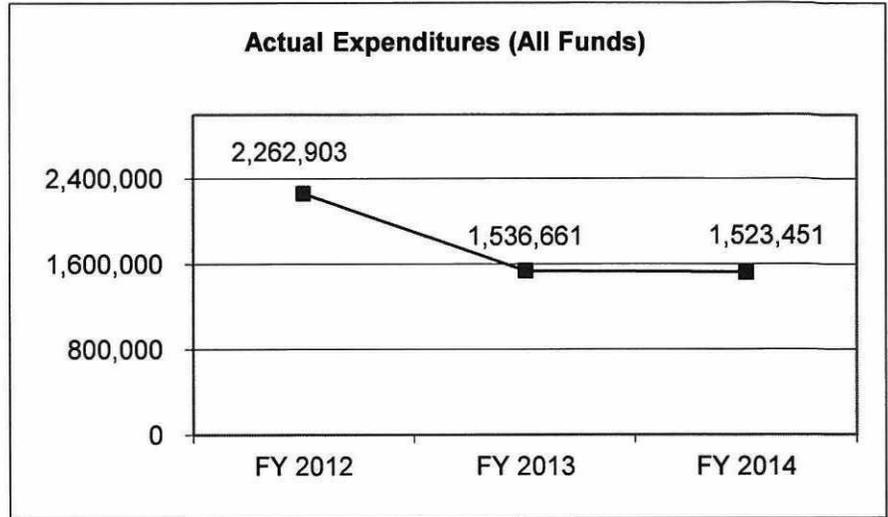

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Division of Environmental Quality - Administration

Budget Unit 78117C, 79360C

4. FINANCIAL HISTORY

	FY 2012 Actual	FY 2013 Actual	FY 2014 Actual	FY 2015 Current Yr.
Appropriation (All Funds) (1)	2,734,966	3,456,453	3,418,195	3,429,378
Less Reverted (All Funds)	0	0	0	N/A
Less Restricted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	2,734,966	3,456,453	3,418,195	N/A
Actual Expenditures (All Funds)	2,262,903	1,536,661	1,523,451	N/A
Unexpended (All Funds)	472,063	1,919,792	1,894,744	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	219,962	968,426	995,442	N/A
Other	252,101	951,366	899,302	N/A
	(2), (3)	(2), (3)	(2), (3)	

Reverted includes Governor's standard 3 percent reserve (when applicable).
 Restricted includes any extraordinary expenditure restrictions (when applicable).
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

- (1) Financial data includes operating and pass-through appropriations.
- (2) In many cases, pass-through appropriations are set at a level to encumber and pay our commitments, which often span multiple fiscal years. This often causes high unexpended appropriation balances.
- (3) Federal operating E&E appropriations have historically been set at a level to take advantage of potential federal funding opportunities.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

1. What does this program do?

The Division of Environmental Quality (DEQ) Administration is responsible for long-range planning to implement policies to protect public health and the environment. These responsibilities include the integration, direction, coordination and other management functions for the direct programs' statutory mandates. In addition, administration provides coordination with other DNR divisions and external stakeholders including the general public, community organizations and regulated businesses. Division staff also represent programs and the department in negotiations with federal and state agencies. Staff are committed to the continuous improvement of the effectiveness of the programs through administrative support, policy direction, fiscal management and legal reviews. Division staff communicate with citizens, business, media and legislators to provide information and respond to specific inquiries on environmental issues. Staff also provide policy direction and coordination for several activities including: permitting for major facility siting, rulemakings, environmental management systems and enforcement, risk-based corrective action, quality assurance and strategic plans. The division's Environmental Investigation Unit investigates criminal violations of environmental laws. They coordinate with federal enforcement agencies such as EPA criminal investigators, the FBI and local law enforcement agencies on major criminal case investigations. In addition, they work with federal, state, county and city attorneys in prosecuting violators. The Division of Environmental Quality includes the Water Protection Program (WPP), Air Pollution Control Program (APCP), Hazardous Waste Program (HWP), Solid Waste Management Program (SWMP), Land Reclamation Program (LRP), Regional Offices (St. Louis Regional Office, Kansas City Regional Office, Northeast Regional Office, Southeast Regional Office, and Southwest Regional Office) and the Environmental Services Program (ESP).

Technical Assistance Grants: This program helps people, businesses and local governments understand natural resource concepts and issues, comply with statutes and regulations, use pollution prevention strategies, complete environmental studies, test pilot projects and certify operators of public water supply systems. To more effectively accomplish these activities, the department pursues federal grant monies that may be available for pass through to the public, local governments, other agencies and other partners.

Educational activities, training, information dissemination and technology transfer methods, such as demonstration and pilot projects, are among the most effective ways to promote pollution prevention practices and develop an organization's technical, managerial, and financial capabilities. Funding this decision item enhances the ability to accomplish these goals for Missouri through demonstration and pilot projects, workshops, and educational and training activities by enabling available monies to be passed through to public and private partners.

In addition, this appropriation will be used to provide financial and administrative training to the managing boards and councils of wastewater treatment facilities and public water systems through the use of a contract.

The department provides federal funds to help train and certify drinking water operators employed by community and non-transient, non-community public water systems serving a population of 3,300 or less. To distribute funds to qualifying public water supply systems, the department is using a voucher program. Vouchers are used by the public water supply systems to pay for approved training courses, as well as exam fees and certification renewal fees. These small public water supply systems are better able to meet the federal requirements of having, and maintaining, trained and certified operators for their systems through the use of the voucher program. In FY 2014 the department implemented a similar Operator Certification program through other funds to help train and certify wastewater operators.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

1. What does this program do (continued)?

DEQ Administration - Reconciliation					
	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
	Actual	Actual	Actual	Current	Gov Rec
DEQ Admin Operations (78117C)	1,283,209	1,284,261	1,221,739	1,679,566	1,679,566
Technical Assistance Grants (79360C)	979,694	252,400	301,712	1,749,812	1,749,812
Total	2,262,903	1,536,661	1,523,451	3,429,378	3,429,378

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

The Division of Environmental Quality administers programs that protect human health, public welfare and the environment. These programs are authorized by state and federal laws as noted in each of their program descriptions. These laws deal with air quality, solid and hazardous wastes, mining and reclamation, voluntary cleanup, petroleum storage tanks, clean water and drinking water.

Federal Clean Air Act, with amendments (1990)
 RSMo 640.010 – 640.758
 RSMo 640.100
 RSMo 643.173 and 643.175
 RSMo 643.060 (2)
 RSMo 644.006 through 644.096

Department of Natural Resources - Duties associated with environmental assistance on behalf of the department
 Drinking Water Operator Certification; Safe Drinking Water Act
 Small Business Technical Assistance Program
 Prevention, Abatement, and Control of Air Pollution
 Water Pollution Planning, Permitting, Inspection, Remediation, Technical Assistance

3. Are there federal matching requirements? If yes, please explain.

The division receives several federal grants. The matching requirements for these are listed in each of the applicable program descriptions.

Drinking Water SRF Capitalization Grant - Local & Other Set-Aside	100% Federal (EPA)
Other competitive grants may require various matching ratios	varies

4. Is this a federally mandated program? If yes, please explain.

The Division Administration oversees and coordinates programmatic responsibilities for which the state has elected, through environmental statutes, to seek delegation of federal programs. As it relates to Technical Assistance Grants, federal law mandates that operators of public drinking water systems be certified.

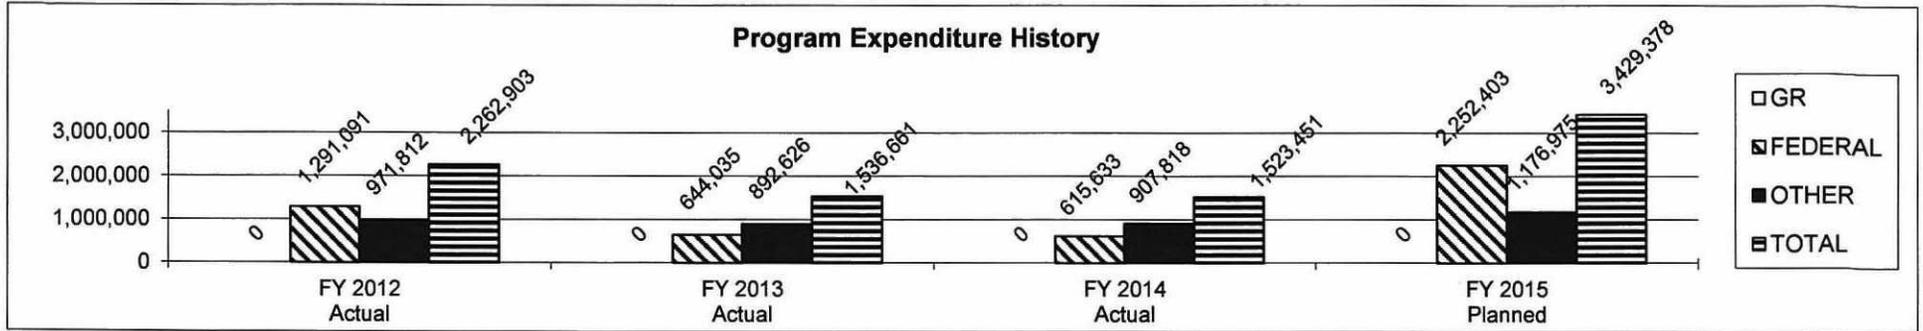

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

5. Provide actual expenditures for the prior three fiscal years.

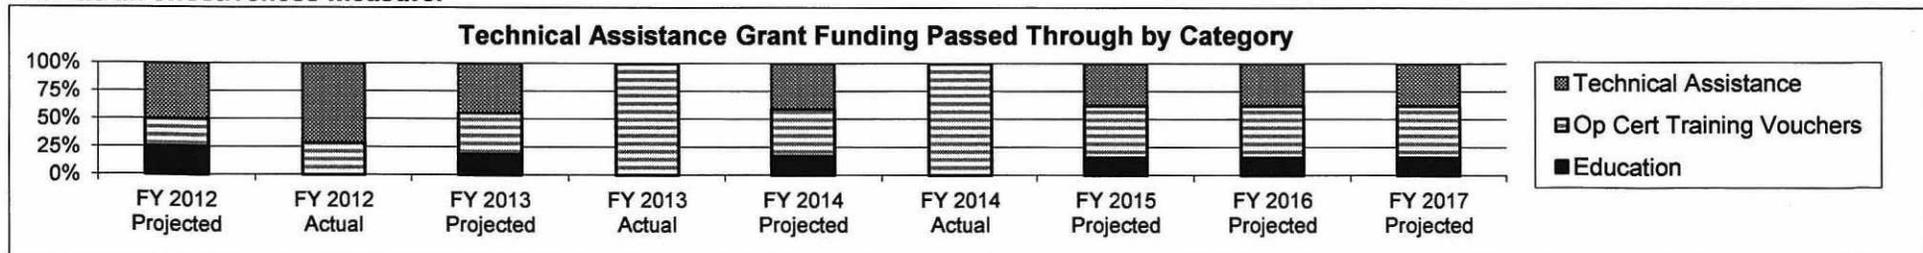

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. Core pass-through appropriations are set at a level to encumber and pay our commitments, which often span multiple fiscal years. FY 2015 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568)

7a. Provide an effectiveness measure.

In FY 2012, grants were provided to small communities to assist with recovery from the tornado that struck southwest Missouri in May, 2012. Education includes training for the managing boards and councils of wastewater treatment facilities and public water systems. The department developed this training program in late FY 2014.

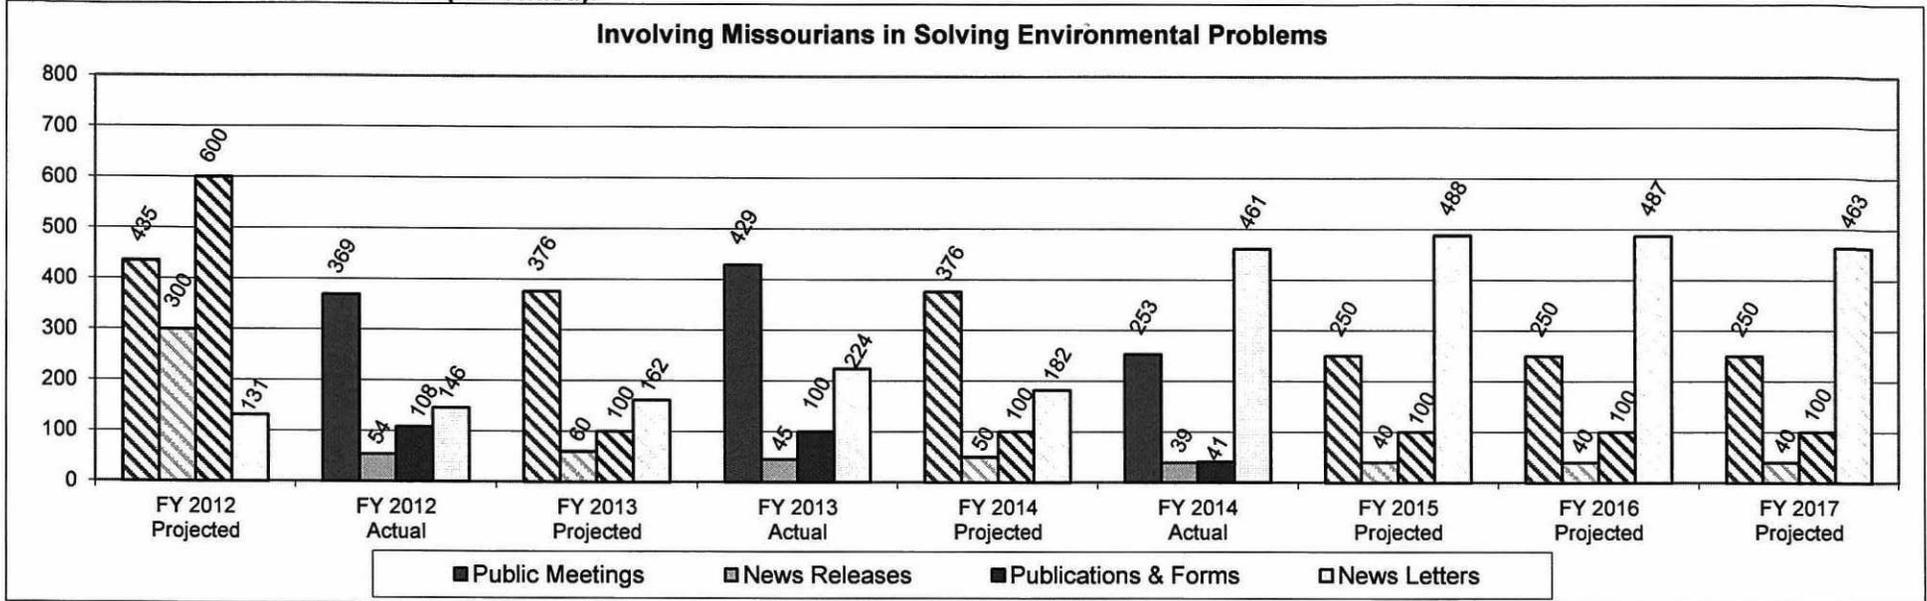

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7a. Provide an effectiveness measure (continued).

The division strives to maintain public awareness and involvement in the issues affecting Missourians' environment. We include the number of broadcast e-mails in the News Letters category. The following are some of the existing committees that benefit from broadcast e-mails: Air Forum, Air Conservation Commission, Business Assistance, Clean Water Commission, Clean Water Forum, E-Scrap Stakeholder Workgroup, Enforcement and Compliance Assistance for Hazardous Waste Generators, Hazardous Waste Generator Reporting, Hazardous Waste Forum, Hazardous Waste Management Commission Quarterly Report Newsletter, Redevelopment and Brownfields Cleanup, Stage I and Stage II Vapor Recovery, and Water Quality Coordinating Committee. In FY 2014 we redefined public meetings, thus the decline beginning in FY 2014.

PROGRAM DESCRIPTION

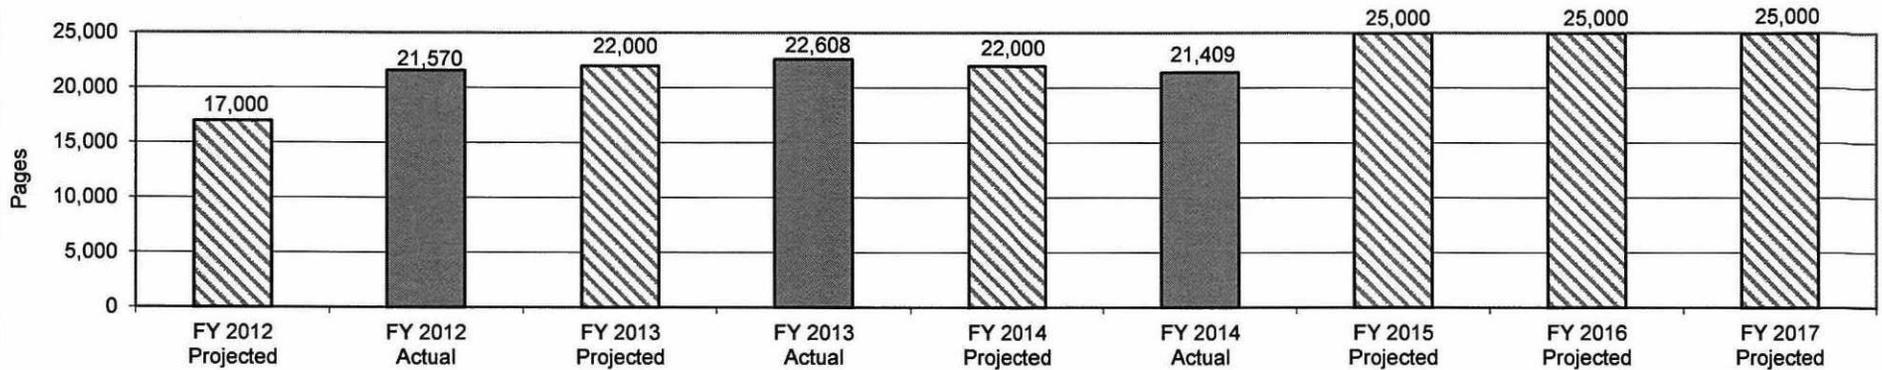

Department of Natural Resources

DEQ - Administration

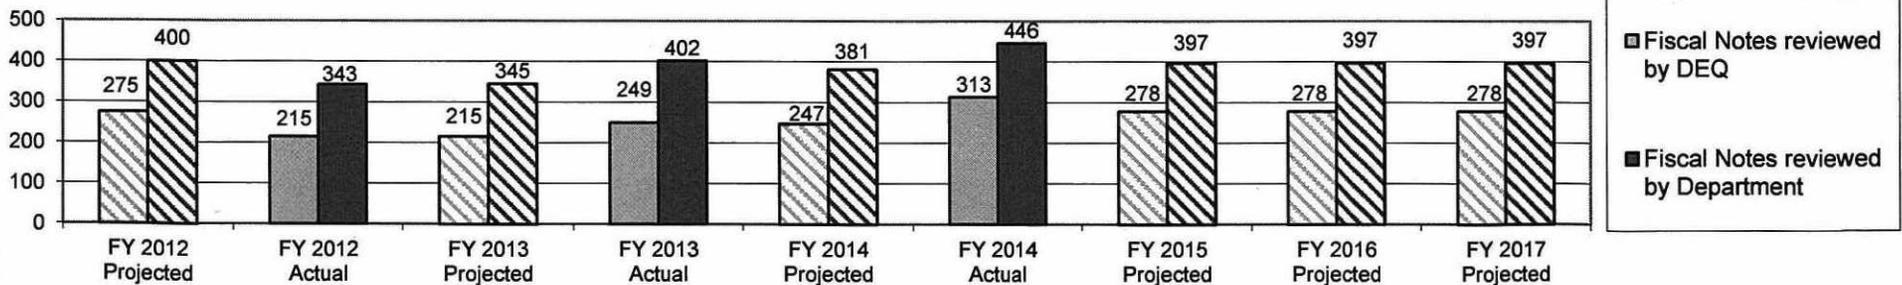

Program is found in the following core budget(s): Division of Environmental Quality Administration

7a. Provide an effectiveness measure (continued).

DEQ Web Pages

Fiscal Note Reviews Provided for Proposed Legislation

Division administration is responsible for projecting impacts of proposed legislation involving the division's programmatic functions. The division adds valuable input on the effects of potential legislation or amended regulations through a process allowing each program to provide comments on technical aspects of legislation, cost impacts and feasibility. The division then provides information in a consolidated format to the department.

PROGRAM DESCRIPTION

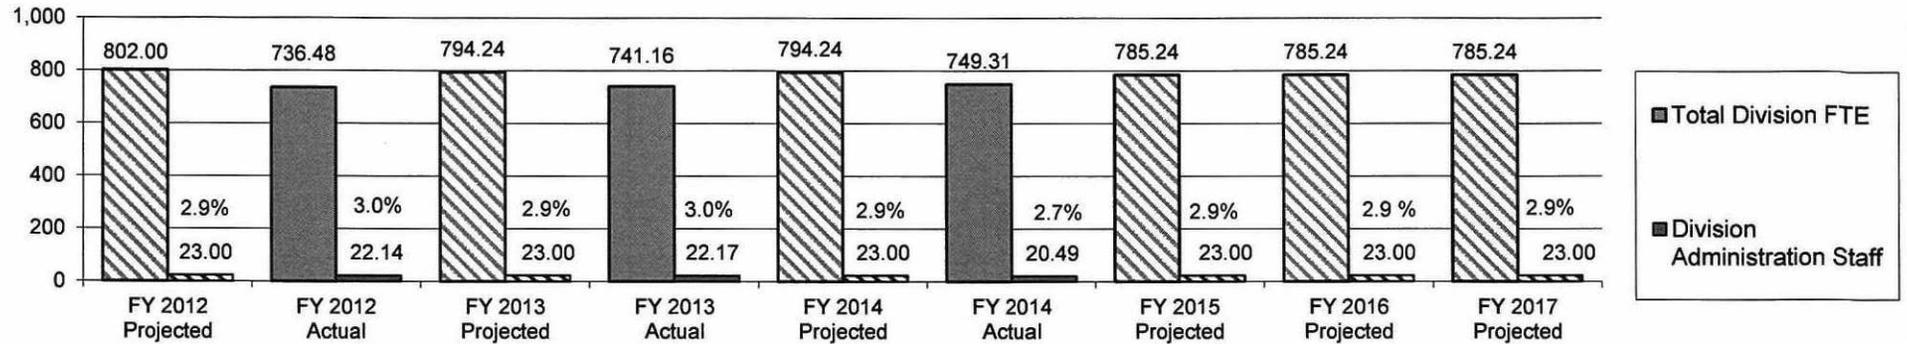

Department of Natural Resources

DEQ - Administration

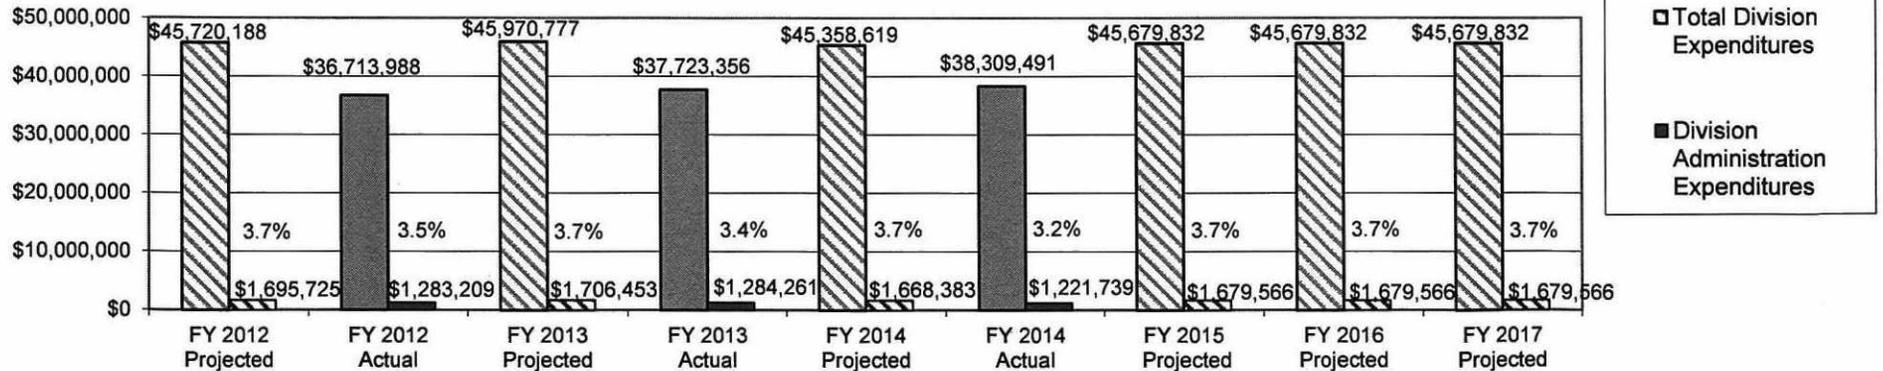

Program is found in the following core budget(s): Division of Environmental Quality Administration

7b. Provide an efficiency measure.

Division Administration FTE in Relation to Core Division FTE

Division Administration Expenditures in Relation to Core Division Operating Expenditures

Projections are based on full appropriation spending. These projections only include operating appropriations; pass through appropriations are not included.

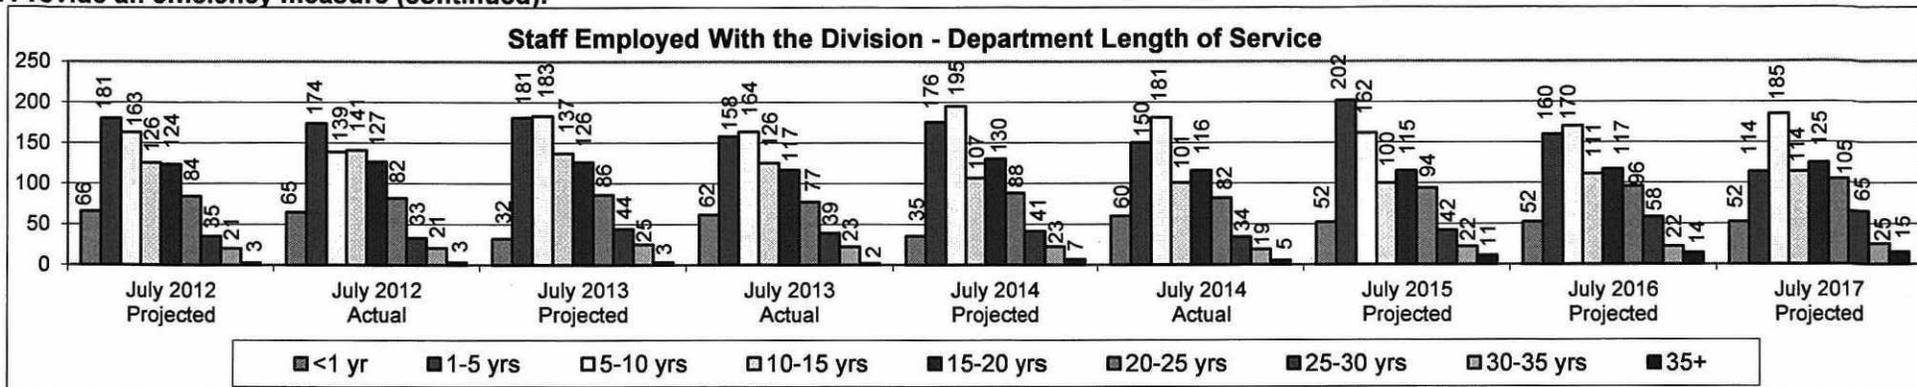

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

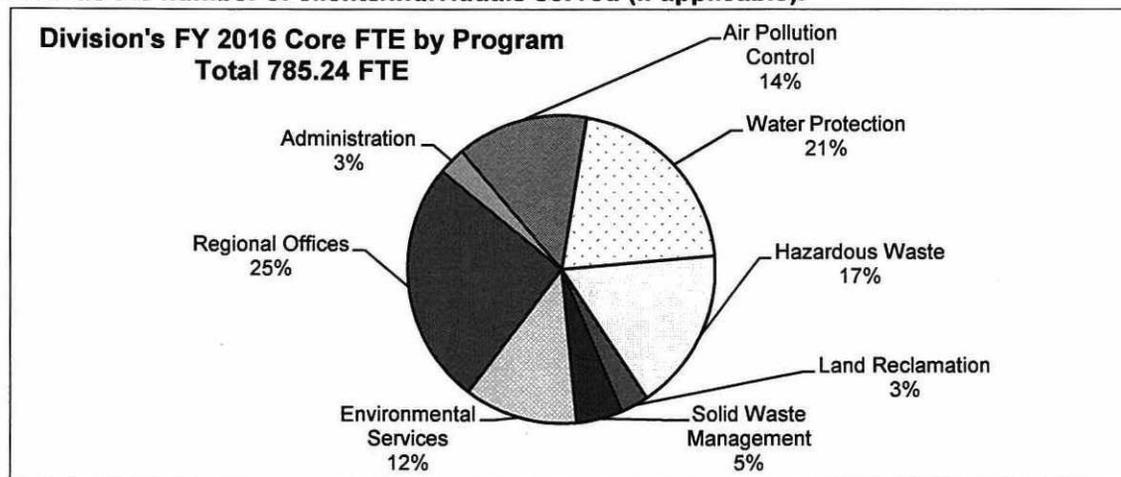

Program is found in the following core budget(s): Division of Environmental Quality Administration

7b. Provide an efficiency measure (continued).

The goal of the division is to recruit and retain the best employees by providing staff with the communication, training, infrastructure and resources to continue to do their jobs in an effective way and in a professional working environment.

7c. Provide the number of clients/individuals served (if applicable).

The Division serves the line programs by aiding in resource maximization:

Water Protection, Air Pollution Control, Hazardous Waste Management, Solid Waste Management, Land Reclamation, Regional Offices and Environmental Services.

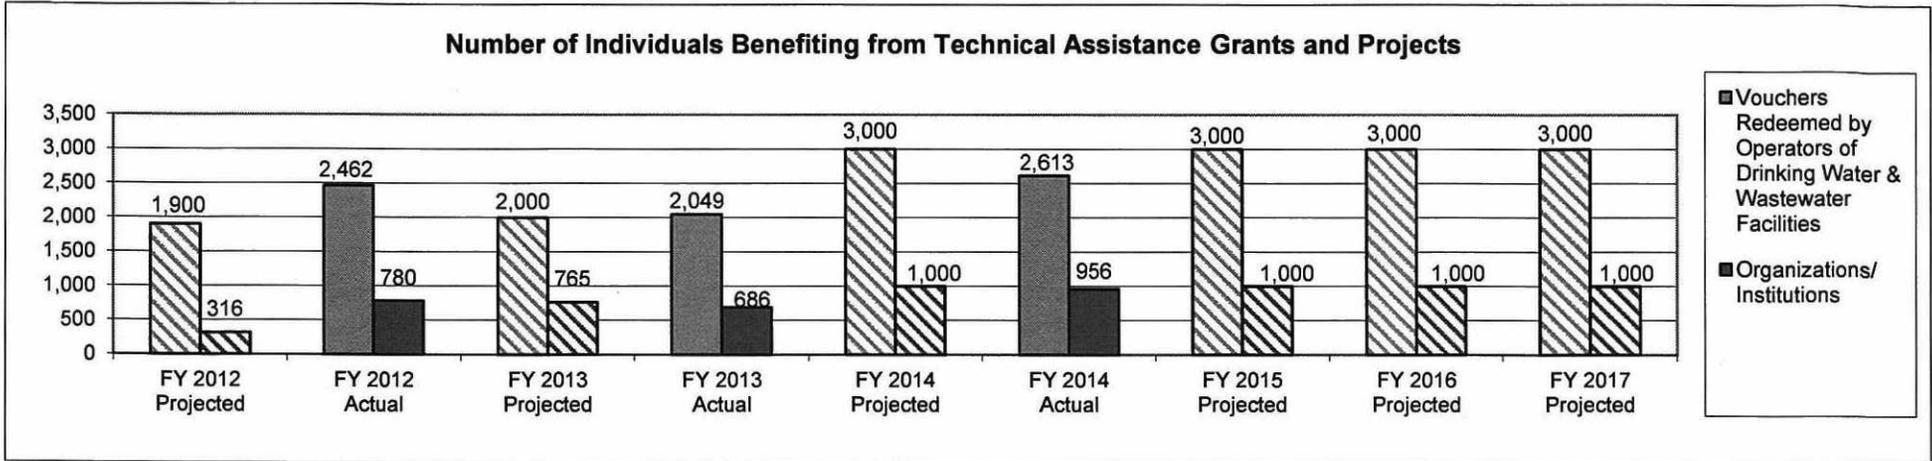

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7c. Provide the number of clients/individuals served (if applicable) continued.

In FY 2012 grants were provided to small communities to assist with recovery from the tornado that struck southwest Missouri in May, 2012. The number of organizations/institutions reflect the number of public water systems utilizing the operator certification training voucher program. In FY 2014 the department developed a training program for the managing boards and councils of wastewater treatment facilities and public water systems, as well as a program for wastewater operator certification. Projections beginning in FY 2013 include the number of water and wastewater system boards and councils that are expected to receive training and public water systems that will utilize the drinking water operator certification training voucher program; FY 2014 through FY 2017 projections also include wastewater systems that are expected to begin redeeming vouchers in FY 2014.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7c. Provide the number of clients/individuals served (if applicable) continued.

DNR Boards and Commission Served:

Air Conservation Commission

Clean Water Commission

Environmental Improvement and Energy Resources Authority

Hazardous Waste Management Commission

Interstate Mining Compact Commission

Industrial Minerals Advisory Council

Land Reclamation Commission

Petroleum Storage Tank Insurance Fund

Safe Drinking Water Commission

Small Business Compliance Advisory Committee

Solid Waste Advisory Board

7d. Provide a customer satisfaction measure, if available.

Not available
