Missouri Department of Agriculture Department Overview

The Missouri Department of Agriculture (MDA) provides leadership for Missouri's agricultural community through programs that build economic opportunity. Our mission is to be the leading state agency in the marketing of all food and agricultural products. This continues to complement our regulatory functions. We value agricultural innovation and success. Through agricultural business development and market information, we maximize the return on today's agricultural products while implementing strategies to generate opportunities for the future. Concurrently, through animal and plant health, grain storage auditing and inspection, weights and measures testing, and milk inspections, MDA provides the framework for food safety and helps ensure the integrity of the marketplace. MDA also builds partnerships with industry, universities, and all levels of government to ensure that producers and agribusinesses have the tools necessary to reach their full potential.

Department strategic overview: FY22 Budget

DEPARTMENT:	Agriculture
DIRECTOR:	Chris Chinn
DEPARTMENT ASPIRATION:	We will protect and promote Missouri's agriculture industry by doing MORE
HIGHLIGHTS FROM FY20-21	feedMore: During FY20 & FY21, the Department provided 3,843 low income senior households in the Kansas City, St. Louis, Springfield and mid-Missouri area with 38,430 vouchers with a total value of \$192,150. The vouchers allowed each household to purchase \$50 of eligible foods from authorized farmers at a Missouri farmers' market. There were 365 farmers and 114 farmers markets that participated in the program.
	feedMore: The Department awarded 12 organizations a total of \$193,999 in grants to address food insecurity in the state. The grants were awarded in a competitive grant process to help fund projects that address food insecurity within food deserts in rural and urban areas throughout the state.
	feedMore: The Department has awarded \$17.6 million in federal grant funding to 159 small Missouri meat and poultry processors who employ fewer than 200 people. These grants will increase the state's food supply resilience by increasing livestock and poultry processing capacity.
	connectMore: The Broadband Development Grant was successfully deployed in collaboration with the Department of Economic Development, awarding nearly \$5 million to unserved and underserved areas of the state for broadband development.
	empowerMore: The Department funded a study conducted by the Missouri Agriculture Foundation and the University of Missouri Extension to assess workforce needs in the state's number one industry -- Agriculture. The study will help industry leaders, educators and policy makers with the data-driven decisions and investments necessary to strengthen Missouri's food, agriculture, and forestry workforce.
	reachMore: The Department is working with OA/ITSD to build the AgStop website application that will provide a centralized citizen portal, streamlined payments and self-service applications. We are currently 90% through Phase I of the multi-phase project that is funded with a USDA grant.
FY22 PRIORITIES	feedMore: Provide consumers more local food choices and stimulate local economies through the Missouri Meat and Poultry Inspection Program and farmers markets.
	connectMore: Continue telling the story of agriculture from a producer's perspective in ways that are meaningful to urban and suburban citizens.
	empowerMore: Develop and implement a modern educational and training framework for the certification and training of pesticide applicators.
	reachMore: Continue to streamline work processes to ensure accessibility and improve citizen experience.
FY23 PREVIEW	empowerMore: Continue to support the Department of Higher Education and other organizations in the prioritization and development of a skilled workforce in agriculture.
	empowerMore: Continue to modernize and streamline the Department's programs and laboratories to improve service delivery and efficiency.
	reachMore: Launch a fully operational AgStop citizen portal that will provide streamlined payment services and self-service applications for both regulatory and marketing purposes.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The Governor's Fiscal Year 2022 budget includes appropriation authority for Above and Beyond performance incentives beginning January 1, 2022. The ability to provide a link between compensation, "above and beyond" performance, and accountability is a proven best practice for employee reward and recognition programs used in other state governments and the private sector. The Division of Personnel partnered with all executive branch departments and a consulting firm to develop a new, top quality evaluation process, with supporting training for all supervisors and tools, to enable department leadership to identify those team members who are delivering exceptional performance. The program is designed to incentivize these individuals to continue this high level of performance and others to raise their game. With the goal of retaining those identified as top performers and the anticipation that these top performers will continue to deliver exceptional results, the request is for funding to be appropriated which provides top performers with a temporary salary increase for the services to be performed over the next year.

3. WHY IS THIS FUNDING NEEDED? (Continued)

This request is essential to the state government's transformation of its approach to compensation and incentive practices to be in line with proven best practices in high performing organizations. Along with other rewards and recognition, such monetary incentives help sustain and motivate performance. Other state governments have adopted similar approaches to incentivize individuals to continue truly exceptional performance. Such approaches can incentivize not only continued excellent performance in current roles but also a commitment to continuous improvement and additional professional development.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The appropriated amount is based on departments providing performance incentives of 5% for the top 10% of employees with incentives capped at \$2,500 per employee.

5. BREAK DOWN THE REQUEST BY BUDGET OBJECT CLASS, JOB CLASS, AND FUND SOURCE. IDENTIFY ONE-TIME COSTS.

PROGRAM DESCRIPTION

Department: Agriculture

HB Section(s): 6.020

Program Name: Market News

Program is found in the following core budget(s): Division of Ag Business Development

1a. What strategic priority does this program address?

Empower More Farmers, Ranchers and Agribusinesses

1b. What does this program do?

- The program is designed to provide customers with accurate market information on price, quantity and quality of livestock, grain and hay sold in Missouri. This unbiased market news information is made available to the public, including bankers, economists and producers, on a daily and weekly basis.
- Markets are reported from 24 livestock auctions. In addition, reporters also report the Missouri Direct Slaughter Cattle, Missouri Daily Cash Grain, a Weekly Hay Summary, and prices from local Farmers' Markets statewide.
- Market News is disseminated and available to the public daily through the internet, media (including radio, newspaper and television), market news hotline and the Weekly Market Summary. In addition, the website provides a wide variety of market news information, links to market reports, podcasts of regional and statewide reports.
- The Chicago Mercantile Exchange utilizes the market news information to establish the national daily weighted average feeder cattle index. This information is used as a base for feeder cattle futures contract settlements. All the data collected is archived for future use and reference. In addition, market reporters are also approved USDA graders. Missouri graders are requested throughout the year to assign grades to different classes of livestock including, replacement heifers, feeder cattle, feeder lambs, market lambs, slaughter ewes and goats. These services help Missouri maintain its status as a leader in agricultural production.

2a. Provide an activity measure(s) for the program.

Note 1: Number of head reported is the number marketed through sale barns in the state where staff are assigned.

Note 2: Number of head reported is significantly affected by industry cycles which are both weather dependent and demand driven.

2. CORE DESCRIPTION

In FY13, \$200,000 of one-time funding was appropriated to facilitate the development and implementation of an abattoir on the University of Missouri - Columbia's east campus. Due to the extended time required for project approval, the same \$200,000 was appropriated again in FY14. In FY16 - FY19, \$10,000 GR was appropriated to continue the project. This request continues the \$1 appropriation that began in FY20.

The project would result in the construction of a harvest and processing plant to serve as an industry model for education, training, technical support, and research in meat animal discovery, production, and information transfer. The facility will accommodate the research and development of many smaller meat processors. The 13,500 sq. ft. facility will be an industry standard building fitted with classrooms and conference meeting space to meet the growing education and technical support demands of the undergraduate students, graduate students, processors, and regulatory agencies in Missouri.

2. CORE DESCRIPTION

The Missouri Wine and Grape Board was created by the Missouri General Assembly in 2004 as an independent political and corporate body of the State of Missouri (Missouri statute 262.820). Prior to this date, the Board existed in an advisory form, with members appointed by the Director of Agriculture in the early 1980's. The purpose of the Board is to further the growth and economic development of the grape growing industry in the State of Missouri.

Moneys deposited into the Wine and Grape fund are to be expended for agricultural marketing development purposes. RSMo 311 states "...there shall be paid to and collected by the director of revenue for the privilege of selling wine, an additional charge of twelve cents per gallon or fraction thereof...The revenue derived from the additional charge imposed shall be deposited by the State Treasurer to the credit of a the Missouri Wine & Grape fund (RSMo 261.035). Monies credited to the fund develop programs for growing, selling, and marketing grapes and grape products grown in Missouri, including all necessary funding for employment of experts in the fields of viticulture and enology as deemed necessary, and programs aimed at improving marketing of all varieties of grapes grown in Missouri; and shall be appropriated and used for no other purpose." The Board is funded by the collection at the rate of 12 cents per gallon. The additional six cents must be used in funding research and advisement of grapes and grape products.

 Livestock Feed Crop & Loan Program (0978)

2. CORE DESCRIPTION

The Missouri Agricultural and Small Business Development Authority (MASBDA) was created by the Missouri General Assembly in 1981 as an independent political and corporate body of the state of Missouri (RSMo 348). MASBDA's purpose is to promote the development of agriculture and small business and to reduce, control, and prevent environmental damage in Missouri by providing additional sources of financing. The authority accomplishes this by issuing agricultural development bonds, guarantees on loans to livestock producers, direct loans for animal waste treatment systems, and down payment loans for producers and farmers. Additionally, the authority administers grant programs, tax credit programs, and loan guarantees related to new generation cooperatives and value-added agricultural projects. Also, MASBDA administers tax credit programs for beef producers and meat processing facilities. MASBDA provides fiscal management of a rural development finance program, the Agriculture Development Fund (ADF). MASBDA also administers three of the programs funded through ADF -- the Crop and Livestock Loan Guaranty

2. CORE DESCRIPTION

Livestock and poultry account for \$3 billion of the state's agricultural cash receipts. As directed by the state veterinarian, the division administers disease control/herd certification programs under the Diseased Animal Law, including brucellosis, pseudorabies, tuberculosis, EIA, Pullorum-Typhoid, Avian Influenza, Vesicular Stomatitis, Johne's, BLV, Transmissible Spongiform Encephalopathies (TSEs), and Trichomoniasis. These programs are designed to control and eradicate the most economically damaging diseases to Missouri Producers.

The division coordinates state and federal resources in prevention, preparedness, response, and recovery during an animal health emergency. Continuous surveillance by this division for livestock and poultry diseases and other possible emerging pathogens helps prevent outbreaks of infectious animal diseases that could jeopardize the sale and export of Missouri animals and animals products. In some cases, human health may also be directly threatened because many diseases (i.e. Tuberculosis, Brucellosis, Rabies, some forms of influenza and food-borne disease organisms) can also be transmitted directly from animals to humans, increasing consumer concern about food safety and quality assurance. This division works directly with the U.S. Department of Agriculture, Department of Public Safety, Department of Homeland Security, State Emergency Management Agency, and the Regional Homeland Security Oversight Committees, and multiple other state and federal agencies to ensure the most effective planning, training, and equipment is in place to respond to an animal emergency. Recent food born disease outbreaks have raised the need for expansion of the agri-security and food safety programs. The need for expanded surveillance and response capability is a top priority at all levels.

The Division of Animal Health administers the National Poultry Improvement Program (NPIP) through a Memorandum of Understanding with USDA. The NPIP is an industry/state/federal program designed to control hatchery disseminated diseases and provide basic provisions for disease control and certification of poultry breeding flocks and hatcheries. Diseases included in the NPIP are Pullorum-typhoid, Salmonella enteritidis, Mycoplasmosis, and Avian Influenza.

2. CORE DESCRIPTION (continued)

The Missouri Meat and Poultry Inspection Program (MMPIP) provides consumers with confidence in the safety and wholesomeness of Missouri processed meat and poultry products. The MMPIP provides inspection services to licensed state establishments and conducts frequent sanitation reviews of custom exempt slaughter and meat processing facilities. Warehouses, wholesale distribution, rendering and retail product safety are monitored by MMPIP compliance officers.

The companion animal industry is a source of revenue for Missouri. To protect and promote this industry, the Animal Care Facility Act Program (ACFA) ensures companion animals receive adequate care, proper shelter, and veterinary care.

Since the onset of COVID-19 there has been a dramatic increase in requests for state meat & poultry inspection services. Over thirty (30) new entities have requested state inspection. These facilities are located in NW, SW, SE, Central, and West Central Missouri. In addition, three (3) facilities are working to qualify for Cooperative Interstate Shipment (CIS), which allows state inspected facilities to sell and ship their products in interstate commerce. The \$20M of federal funding appropriated to address supply chain disruptions in meat production has also increased demand for state inspection services. In addition to staffing and normal E&E needs, this request includes \$190,000 needed to upgrade the program's computer programming and software capabilities.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

Current staffing assignments exceed the USDA's recommended inspector maximums and require the help of relief staff to ensure that state inspection capacity keeps up with production facilities' capacity. With the expectation of adding 30 new establishments, staffing needs in any circuit may increase by over 200%. The addition of four new inspectors will help reduce the time spent traveling between establishments and will also help satisfy the inspection needs of different establishments on the same days and times. (Note: Although the Governor has recommended funding for 13.00 FTE, only 8.50 new FTE are recommended. The department has identified 4.50 unfunded FTE that will also be utilized for this ND).

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

As long as MDA's MPIP remains fully staffed and funded it will continue to provide inspection service and outreach to Missouri's very small meat and poultry processing facilities. If this New Decision Item is not approved, the program will be forced to turn down establishments' requests for inspection service. If this occurs, they may contact the USDA Food Safety Inspection Services (FSIS) for inspection service. However, USDA-FSIS typically utilizes state inspection programs to provide inspection service and outreach to very small establishments, often in rural communities, which are underserved by USDA staff.

2. CORE DESCRIPTION

The Indemnity Program provides funding to control and eradicate animal diseases by removal and depopulation of disease-infected or toxin exposed animals. Rapid detection, containment, and elimination of disease-infected animals is the surest method to guard against further spread of disease as well as depopulation of animals with toxins above acceptable levels to enter the food supply safely. This funding also helps to minimize economic losses to producers whose livestock have been destroyed.

2. CORE DESCRIPTION

The Grain Regulatory Services Program (GRS) is a statutorily mandated program that provides regulatory oversight to the grain warehouse and grain merchandising industry, which annually generates over \$4.5 billion in economic activity. This oversight ensures 60,000 Missouri grain farmers of a financially stable grain marketing system where they can both store and merchandise their grain production. In addition, the GRS program conducts commodity check off audits to verify collection of assessments for the corn, soybean, beef and sheep councils. GRS also administers the Missouri Agricultural Mediation Program (MAMP) which provides dispute resolution services to Missouri farmers who utilize USDA programs or are extended credit for any agricultural function of business. The MAMP is funded by a grant provided through the Farm Service Agency of the USDA.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 35660C	DEPARTMENT: Agriculture	
BUDGET UNIT NAME: Grain Regulatory Services	DIVISION: Grain Regulatory Services	
1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.		
DEPARTMENT REQUEST		
We are requesting 50% flexibility between Federal and Other funds and 5% flexibility between PS and EE in all funds, including General Revenue (GR). This flexibility is needed to maximize the efficiency of available financial resources and to meet the department's statutory responsibilities.		
2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.		
PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$26,000	The Grain Regulatory Services' program believes that it may need to flex up to 5% of its Personal Services and/or Expense and Equipment appropriation from all funds and up to 25% of its appropriation between Federal and Other funds.	The Grain Regulatory Services' program believes that it may need to flex up to 5% of its Personal Services and/or Expense and Equipment appropriation from all funds and up to 50% of its appropriation between Federal and Other funds.
3. Was flexibility approved in the Prior Year Budget or the Current Year Budget? If so, how was the flexibility used during those years?		
PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE	
Flexed \$26,000 GR from PS to EE for EE needs.	The requested flexibility will most likely be used for essential Expense and Equipment expenditures (e.g. maintenance, repair, or replacement of equipment; supply purchases; etc.) that would impair the department's operation if not made.

PROGRAM DESCRIPTION

Department: Agriculture

HB Section(s): 6.090

Program Name: Grain Regulatory Services

Program is found in the following core budget(s): Grain Regulatory Services

1a. What strategic priority does this program address?

Empower Missouri Farmers Through A Strong Grain Industry.

1b. What does this program do?

- The Grain Regulatory Services (GRS) Program licenses and regulates grain warehouses and dealers, ensuring licensees meet minimum financial standards and post security in case of an insolvency. Missouri produced over 747 million bushels of grain valued at more than \$4.13 billion in 2019, making grain production one of the state's top industries.
- The program audits grain warehouses and dealers and investigates unlicensed grain entities to confirm that they are in compliance with Missouri statutes. The program provides protection for Missouri farmers and ensures a strong and stable Missouri grain industry.
- The program conducts commodity checkoff audits to verify that assessments collected from farmers are paid correctly. Missouri farmers provide commodity checkoff assessments in excess of \$20 million to nine individual commodity councils for the promotion and development of their products.
- The program administers the Missouri Agricultural Mediation Program (MAMP) which provides dispute resolution services to Missouri farmers. The MAMP is funded by a grant provided through the Farm Service Agency of USDA.

2a. Provide an activity measure(s) for the program.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Funding is needed to replace the current Grain Regulatory Services software program (Ezam) since it is no longer supported by ITSD. This software and database system houses grain dealer and warehouse licensee financial records, security and stock insurance files, tracks audit assignments, and performs numerous other tasks required to ensure the financial integrity of the Missouri grain industry. This request includes one-time GR funding (\$54,000) to migrate the system to a cloud based platform that will be faster and more secure. It also includes ongoing APF funding (\$48,000) to pay the annual maintenance fees required to house the data in a cloud based system.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

One-time programming costs associated with a move from VFP to Out Systems was estimated based on the time needed to write and test all the code given the scope of EzamHQ and is estimated at \$54,000.

Miller & Associates evaluated OutSystems as a replacement platform for EzamHQ. The annual maintenance costs of moving EzamHQ to OutSystems is estimated to be \$48,000 per year.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

This decision item is not a new initiative but rather an enhancement to the existing software program utilized by GRS since 2012. The goal is to migrate this program to more stable and secure cloud based system. GRS already has several performance measures in place to measure and track the program's activities, quality, impact and efficiency. These measures are noted in 6.a through 6.d above and have been tracked for multiple years.

2. CORE DESCRIPTION

The Grain Inspection Services Program provides unbiased third-party inspections to determine the quantity, quality, and condition of grain. Inspections are not mandatory except for grain destined for export. Grain producers, buyers, sellers, shippers, and other interested parties request inspection services to facilitate the trading and marketing of grain. Inspection services are provided state-wide through regional inspection offices located in Marshall, New Madrid and St. Joseph. The program is entirely self-supporting as it charges fees for performing inspections and all costs are paid from revenue earned.

The core request provides sufficient spending authority to operate regional inspection offices and provide "official" grain inspection services throughout Missouri.

This pay differential became effective July 1, 2020. Grain Inspection staff make themselves available to Missouri's grain industry 24 hours a day, seven days a week to provide sampling and analysis service when needed.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

MDA has received approval from OA and the PAB to provide a \$2 per hour pay differential to staff who are required to work outside 8:00 A.M. to 5:00 P.M. Monday through Friday. This pay differential became effective July 1, 2020. Additional spending authority is needed to pay this differential to approximately 25 full-time staff and 40 part-time staff. The NDI amount was calculated by taking half the average number of hours worked in a calendar year by full-time and part-time staff and multiplying by \$2. (FT: 1040 x 25 = 26,000 x \$2 = \$52,000.) (PT: 20,312 x \$2 = \$40,624.) The total number of non-traditional hours requested equals the average of the previous 3 years.

1a. What strategic priority does this program address? Empower more Missouri consumers and agribusinesses.

Empower more Missourians.

1b. What does this program do?

This program is designed to facilitate trade and prevent the introduction and spread of economic plant pests. This is accomplished by:

- Facilitating interstate and international trade of plant based commodities while preventing the introduction and spread of harmful plant pests within the state of Missouri and to areas outside our borders.
- Providing plant regulatory services (i.e., inspections, certifications, etc.) necessary for the movement of agricultural products in domestic and international markets.
- Providing consumer/industry protection and education in the areas of pest prevention and control.
- Preventing harm to agricultural and forest resources by inspection of nursery stock, a major pathway into Missouri for exotic pests (such as gypsy moth, emerald ash borer, sudden oak death, Asian longhorned beetle, thousand cankers disease of walnut).

2a. Provide an activity measure(s) for the program.

PROGRAM DESCRIPTION

Department: Agriculture

HB Section(s): 6.100

Program Name: Plant Pest Control

Program is found in the following core budget(s): Plant Industries

NOTE 1: The majority of nursery stock sold at dealers is from out of state and is a pathway for pests and diseases that could cause serious economic damage to Missouri agricultural and forest resources. Dealer inspections are not mandated but are an important pest preventative measure.

NOTE 2: Most dealer inspections are conducted in the spring. Due to COVID-19 precautions, inspectors avoided busy retail nurseries in spring of 2020. Fewer dealer inspections were also conducted due to time spent in response to two federally regulated plant diseases in FY20.

NOTE 1: Both MDA and USDA issue federal export certificates to meet import requirements of receiving countries. MDA also issues state export certificates to meet receiving state's requirements. This program function facilitates interstate and international trade of Missouri ag products.

PROGRAM DESCRIPTION

NOTE 1: These field inspections are required by importing countries. This program function helps facilitate international export of Missouri grown research crop seed.

NOTE 1: Certification is required for interstate shipment and to protect Missouri consumers of nursery stock and our agricultural and forest resources.
 NOTE 2: Nursery stock is a primary pathway for invasive pests that can impact agricultural and forest resources.

PROGRAM DESCRIPTION

Department: Agriculture

HB Section(s): 6.100

Program Name: Plant Pest Control

2c. Provide a measure(s) of the program's impact.

NOTE 1: Rejection notices are issued in cases when harmful pests are detected and notice sent to the Missouri nursery, origin nursery and origin department of ag. Nursery stock inspected at dealers has primarily been grown out of state and presents a higher risk of pest introductions.

NOTE 2: Fewer dealer inspections were conducted in spring 2020 due to COVID-19 precautions. Nursery dealers are where most rejection notices are issued.

State	Number Licensed Dealers	Number Inspections	Percent Inspected
Indiana	3606	259	7%
Iowa	891	144	16%
Michigan	3911	1040	27%
Minnesota	2158	286	13%
Missouri	2014	271	14%
North Dakota	238	45	19%
Wisconsin	2558	547	21%

NOTE 1: Dealer inspections are not mandated by the Missouri Plant Law. Dealers are a significant source of pest introductions that can impact Missouri's agricultural and forest resources.

NOTE 2: Missouri percent of dealer inspections conducted is down from 20% in FY19 due to COVID-19 precautions in spring of 2020 and time spent on response to introductions of federally regulated plant diseases, Sudden Oak Death and *Ralstonia solanacearum* in FY20.

2d. Provide a measure(s) of the program's efficiency.

NOTE 1: This measure shows cost per acre of nursery stock certified based on program staff time spent on nursery inspection and certification. It does not include office staff time spent processing inspection reports, database entry, and processing license renewals.

NOTE 2: Number of licensed acres declined in FY20, however, staff time spent at nurseries increased due to traceforward inspections due to introductions of federally regulated plant diseases including Sudden Oak Death and *Ralstonia solanacearum*.

NOTE 1: This is a new measure for FY19.

NOTE 2: Calculation uses percent of time spent by inspectors on these inspections multiplied by total ag protection fund expenditures for the program, divided by number of these inspections conducted. Some inspections take multiple staff several days to complete (large nursery growers).

NOTE 3: Fewer dealer inspections were conducted in FY20 due to COVID-19 and extra time spent on response to a federally regulated plant diseases.

PROGRAM DESCRIPTION

Department: Agriculture

HB Section(s): 6.100

Program Name: Plant Pest Control

Program is found in the following core budget(s): Plant Industries

NOTE 1: This measure shows cost per certificate issued based on field staff time spent on export certification. It does not include office staff time spent researching requirements, communicating with exporters and field staff, and issuing certificates.

NOTE 2: Number of certificates issued in FY20 increased significantly, due in part to addition of new clients.

NOTE 1: This was a new measure in FY19.

NOTE 2: USDA allows states to review/approve federal applications for the movement of regulated, genetically modified seed/plant material, live plant pests, soil and other plant-related, federally regulated items. There were 410 permits reviewed by the State Entomologist in FY20.

PROGRAM DESCRIPTION

Department: Agriculture

HB Section(s): 6.100

Program Name: Produce Safety

Program is found in the following core budget(s): Plant Industries

1a. What strategic priority does this program address?

Empower More Agricultural Producers

1b. What does this program do?

The USDA National Agriculture Statistics Service (NASS) estimates Missouri has 2,289 farms growing fruits and vegetables. The majority of Missouri produce farms covered under the Food Safety Modernization Act (FSMA) will need to be in compliance in 2021 even though inspections began in 2019. The Department's Produce Safety Program is providing food safety trainings, outreach, and individual farm visits to prepare growers for future regulatory food safety inspection. Additional travel efforts are being made to meet with Amish and Mennonite farmers.

The Department and Extension are working collectively to provide outreach and education to growers throughout the state. Produce Safety Alliance trainings, which are a requirement of FSMA, are being offered throughout the state. Individual farm visits are being made to assess a farm's preparedness for the future inspection. In addition to these visits, the Department has developed resources to help growers be compliant with the federal law. For example, producers had difficulty understanding the type of records they needed to keep to meet the provisions of FSMA so the Department developed a record template booklet containing examples.

2a. Provide an activity measure for the program.

Note: FSMA Produce Safety Regulations require growers to attend this training.

Note: Pre-inspection farm visits are voluntary assessments designed to help farms prepare for future official inspections.

Note 1: FSMA Produce Safety Program is a new program so had no inspections prior to FY20 following FDA guidance.

Note 2: Inspection schedules are based on total produce sales: >\$500,000 were inspected in FY20, \$250,000-\$500,000 in FY21, and \$25,000-\$250,000 in FY22.

2d. Provide a measure of the program's efficiency.

Note 1: Fruit and produce sales for Missouri in 2016 totaled \$105.2 million according to the University of Missouri's "Economic Contributions of Missouri Agriculture and Forestry" report.

Note 1: The inspection timeline is set by FDA. The program began inspections in FY20 on farms that sell more than \$500,000 worth of produce annually. Those with \$250,000-\$500,000 will be inspected in FY21 and finally those with \$25,000-\$250,000 in annual sales will be inspected in FY22.

Note 2: Program costs include substantial funding for outreach (approx. 84% of total funding in FY20) done by MDA as well as sub-awarded to the University of Missouri and Lincoln University.

4. What are the sources of the "Other " funds?

The Produce Safety Program is entirely funded with federal funds through the FDA Cooperative Agreement Program (CAP).

5. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Federal Section 117.475(c)(13) published September 17, 2015 (80 FR 55908)

6. Are there federal matching requirements? If yes, please explain.

There are no federal matching requirements for the Produce Safety Program.

7. Is this a federally mandated program? If yes, please explain.

The Produce Safety Rule is a federally mandated program that Missouri is implementing on behalf of FDA. The Missouri Department of Agriculture is administering the program because growers prefer to have State rather than Federal officials inspecting farms.

The Plant Industries laboratory is housed in a state owned building that needs modification and repair. One-time funding is requested for a new, dedicated room and equipment to conduct polymerase chain reaction (PCR) molecular diagnostic testing for plant diseases. The PCR is the standard diagnostic test for a wide range of plant diseases and we do not currently have this capability. This requires a dedicated room that is free of contamination that may affect test results. The current plant diagnostic lab room is full of equipment with no additional space, and has multiple activities ongoing that would contaminate this type of molecular diagnostic testing. We currently outsource this PCR test work at additional expense. Outsourcing costs a minimum of \$100 - \$200 per sample plus shipping costs and has a turnaround time of up to two weeks. This slows down the results that are needed quickly for regulatory or export certification decisions. The lab is at the center of all of the program's work including timely export certification, invasive pest response, and interstate shipment of Missouri grown plant products. This PCR capability could also be used by the Feed and Seed Program which is housed in the same lab building.

Replacement flooring is also needed in the lab to repair 30 years of chemical spills and use.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

Increased diagnostic capabilities at the Plant Pathology Diagnostic Lab will provide quicker results and cost savings since fewer samples will be outsourced. Results of our lab diagnostics also drive the rejection notices issued by Plant Pest Control Program staff. Safe, durable flooring in the Feed Lab will provide for a safer, more efficient work environment.

This request is to purchase essential equipment in the Feed Laboratory. The High Performance Liquid Chromatography (HPLC) unit (\$60,000) is the oldest HPLC in the lab and was purchased in 2011. The HPLC is needed to report vitamin A levels in feeds and feed ingredients. Vitamin A is a required nutrient and is routinely added to feeds so that it is not a limiting nutrient for the animals to meet their growth and reproductive potential. A Fiber Analyzer (\$20,000) is needed to meet recent horse feed labeling requirements for crude fiber and acid detergent fiber analysis. The current perchloric acid fume hood (\$17,000) needs to be replaced since the frame and metal components are deteriorating from the harsh acids that are boiled off in the fume hood for mineral analysis. These equipment purchases will help ensure that the laboratory is able to continue to report accurate and timely results.

The Feed Control Laboratory provides regulatory oversight of the feed industry under the authority of sections 266.152-266.220 RSMo. The Feed Control Laboratory analyzes over 4,400 feed samples annually. The laboratory is capable of performing 33 different chemical analysis on feed samples. The laboratory achieved ISO/IEC 17025:2017 accreditation in December of 2019. During calendar year 2019, the laboratory performed over 35,000 assays. These assays help ensure that individual ingredients and feed products meet their label guarantees.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The Plant Industries division has received additional federal funding and needs additional personal service appropriations to improve program implementation. The additional funding gives the division a greater role and more flexibility in the enforcement of applicable state and federal laws.

The Feed and Seed Program has received a grant from the U.S. Food and Drug Administration to identify risks to high-quality feed manufacturing and promote risk prevention strategies in collaboration with feed producers. This grant funding allows staff to provide additional training and educational assistance to small and mid-sized feed companies. The request is for \$50,000 additional PS authority to implement the program.

The Pesticide Control Program received additional funding from the U.S. Environmental Protection Agency (EPA) to compensate the program for its large number of dicamba herbicide related cases in recent years. The grant provides \$82,111 additional PS funding so that three (3) Pesticide Use Investigators will be 100% federally funded.

The Feed and Seed Program will utilize an existing vacant FTE as the Compliance Program Coordinator responsible for managing the FDA Animal Food Preventive Control inspections under state and federal authorities, thereby giving MDA a greater role and more flexibility in the enforcement of applicable state and federal laws. The program will need \$50,000 of federal appropriation to pay the salary of the new Compliance Program Coordinator (\$41,000) and portions of the salaries of five (5) existing Feed and Seed Inspectors (\$5,000), the Animal Feed Regulatory Program Coordinator (\$2,000), and the Inspectors' Supervisor (\$2,000). 2. CORE DESCRIPTION

The primary purpose of the Invasive Pest Control Program is to prevent or delay the establishment of gypsy moth and thousand cankers in Missouri. Establishment of these pests would be devastating to Missouri's \$7 billion forest products industry and its nursery and landscape industry. It would also have a severe impact on the tourism industry and our native forest habitats. Of Missouri's 14.6 million acres of forest land, 12.5 million acres is oak, the gypsy moth's preferred host and the primary component of our forest products industry. The introduction of thousand cankers disease of walnut would cause an estimated \$850 million loss to our state's economy. Missouri is the nation's leader in black walnut trees and nut production. Prevention is accomplished through a comprehensive, cooperative annual survey for both of these major forest and agricultural pests. This program also works with emerald ash borer, imported fire ant and other exotic pest response efforts. The program is directed by the State Entomologist (Program Manager) and operates within the Bureau of Plant Pest Control.

2. CORE DESCRIPTION

The Boll Weevil Eradication Program is a national effort to eradicate boll weevil from the United States. Boll weevil infestations in Missouri historically have cost cotton growers over eight million dollars annually in lost yield and treatment costs. The program was voted in by referendum in 2000, was implemented in 2001, and continued in the eradication phase up to the end of calendar year 2007. Missouri cotton growers elected to participate in a post-eradication program which began in calendar year 2008. In February 2019, the Missouri cotton growers passed via referendum a measure to continue the post-eradication program for the next 10 years. To fund the post-eradication program, Missouri cotton growers also voted to pay a small annual per acre assessment fee which will be collected by the department.

Grain Moisture Meter

HB Section(s): 6.105

1a. What strategic priority does this program address?

Reach more producers and consumers.

1b. What does this program do?

The Grain Moisture Meter Program assures the accuracy of commercial grain moisture meters used to buy or sell grain commodities in the state. According to the Missouri Agricultural Statistical Services the estimated value of grains produced in Missouri is almost \$5 billion annually. If all devices are inaccurate by 1% moisture, the price of grain is affected by \$100 million annually. The program objective:

- Ensure the accuracy of commercial grain moisture meters used to buy or sell grain commodities in the state;
- Provide accurate grain samples for use as field reference standards to test and inspect grain moisture meters;
- Implement a field inspection program for grain moisture meters;
- Implement and maintain current USDA/GIPSA approved procedures for determining grain moisture content;
- Maintain the integrity of grain samples according to USDA/GIPSA approved handling and storage methods;
- Protect laboratory measurement and test equipment from damage and exposure to harmful environmental effects;
- Assure the quality of the grain samples through continuous training and participation in inter-laboratory comparison.

2a. Provide an activity measure for the program.

Grain Moisture Meter Program FY2020 Activities:

- Annually issue some 365 moisture meter registration renewal notices to device owner/operators then mail out registration certificates after payment;
- Maintain the moisture meter registration and inspection database;
- Clean bulk grain stores and sort by moisture content then catalog, label, and store them in the cooler for use until next harvest;
- Prepare grain samples each month for use as field reference standards to inspect commercial moisture meters (estimate: 240 samples annually).

Metrology Laboratory

1a. What strategic priority does this program address?

Reach more consumers to promote and protect agriculture

1b. What does this program do?

The Metrology Laboratory is the custodian of the State Weights and Measures Standards. These precision standards provide the traceable link to the standard international system (SI) through the National Institute of Standards and Technology (NIST) by an unbroken chain of comparisons. These calibrations ensure equity in commerce for each weighed or measured commodity bought or sold here in Missouri. The program objective:

- Ensure traceability of the state reference standards and measurement system to the international system of units (SI);
- Maintain laboratory accreditation with the National Institute of Standards and Technology (NIST);
- Establish a documented quality management system compliant to the ISO/IEC 17025 international standard;
- Provide traceable measurement service of field standards for the weights and measures division and industry;
- Protect laboratory standards and measurement and test equipment from damage, theft or vandalism, and exposure to harmful environmental effects;
- Develop and implement policies and procedures to assure the quality and accuracy of laboratory measurement results;
- Assure the quality of the laboratory measurement system through annual NIST audits, continuous training, and inter-laboratory comparison.

'Note: In addition to the standards calibrated in support of our W & M program we also annually calibrate all the volumetric field standards for the Iowa W & M program and every two years we calibrate all the large volumetric field standards for the Arkansas W & M program. We also calibrate volumetric standards for some out of state industry customers.

2a. Provide an activity measure for the program.

- Internal standards include laboratory primary working standards, secondary working standards, and process control standards.
- W & M field standards include all the mass and volumetric standards used by W & M inspectors to certify commercial weighing and measuring devices.
- Industry standards include everything not in the first two categories.

<https://www.nist.gov/sites/default/files/documents/2017/11/29/2016-slp-workload-survey.pdf>

Metrology laboratory workload ranking is listed below by calibration type according to the NIST 2016 and 2018 State Laboratory Program Workload Survey. This survey is published every two years and it is based on a calendar year. The lab has ranked in the upper one third since the survey began.

2016 Survey

- Mass Echelon II: 11 of 27
- Mass Echelon III: 12 of 48
- Vehicle scale test carts: 10 of 31
- Glassware Gravimetric: 1 of 9
- Gravimetric (5 gal lab standards): 0 of 18
- Test Measures <= 5 gallons: 9 of 46
- Provers > 5 gallons <= 100 gallons: 12 of 39
- Provers > 100 gallons: 21 of 30
- LPG Provers: 10 of 25

2018 Survey

- Mass Echelon II: 13 of 27
- Mass Echelon III: 14 of 45
- Vehicle scale test carts: 16 of 30
- Glassware Gravimetric: None calibrated in 2018
- Gravimetric (5 gal lab standards): 4 of 16
- Test Measures <= 5 gallons: 10 of 44
- Provers > 5 gallons <= 100 gallons: 15 of 38
- Provers > 100 gallons: 24 of 28
- LPG Provers: 9 of 29

The metrology program efficiency goal is to perform as many laboratory standard calibrations as possible in-house to reduce outsource calibration expense. This will also provide the laboratory a greater level of measurement quality control confidence.

Average Cost per Standard Calibrated

Cost fluctuations are a result of equipment purchases and/or facility upgrades.

FY2019 cost increase is from the purchase of four mass comparators. (Mass comparators are replaced every 20 years).

This request is for on-going Petroleum Inspection funding needed to replace equipment in the Fuel Quality Lab to meet OA/ITSD standards for efficiency, security, and Windows 10 compatibility. Current instruments are obsolete and unable to interface with the laboratory information management system (LIMS) that is scheduled to be phased-in during in FY21 and FY22. The LIMS and this new equipment will eliminate the need for manual data entry and reduce the error rate when recording test results. Instruments to be replaced in FY22 are two gas chromatographs (one for determining alcohols and ethers in gasoline and one for measuring the glycerin content in biodiesel), a high frequency reciprocating rig with microscope and camera that measures the lubricity of diesel fuel, an octane blending cabinet for accurately blending reference fuels used to determine the anti-knock index of gasoline, and a Fourier-transform infrared spectrometer that predicts specific properties of gasoline and measures the biodiesel content in diesel fuel. Equipment to be replaced in FY23 and FY24 is itemized in section 4 below.

The Fuel Quality Program's statutory authority is found in RSMo Chapter 414.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an activity measure(s) for the program.

Consumer Protections Technicians (formerly Fuel Device Safety Inspectors) perform inspections and sample all Missouri fueling sites at a minimum of 49% annually and a minimum of 95% during a 3-year period. There are currently 3,673 fueling sites in Missouri.

6b. Provide a measure(s) of the program's quality.

Approximately 97% of all fuels analyzed meet Missouri's minimum requirements.

6c. Provide a measure(s) of the program's impact.

The Fuel Quality Program ensures consumers of petroleum products and biofuels (ethanol, biodiesel) receive quality fuels and lubricants through a rigorous program of sampling and testing.

6d. Provide a measure(s) of the program's efficiency.

The Fuel Quality Program is supported by inspection fees generated through the Petroleum Inspection Fund (PIF). The fee is based upon 3.5 cents per 50-gallon barrel and costs Missouri citizens on average 10 cents per year to fund the Fuel Quality Program.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

The Fuel Quality Program will continue to perform inspections and analyze fuels and lubricants which will reduce the amount of substandard products sold in Missouri.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Funding is needed to replace a large scale truck, weight carts, and weight kits in the Scales Program. The condition of one of the 2008 Freightliner large scale trucks is poor. Replacing the most problematic truck will move the program closer to meeting its mandate. The loss of a truck in our fleet would reduce inspector performance by 16-20%. Large scale inspectors average 97 device inspections per month generating approximately \$8,838 in revenue. The loss of a truck for an extended period of time could result in significant loss of revenue. This request also provides funding to purchase a 5,000 lb. weight cart used to move weights from the truck to the scales and assist in performing inspections. Additionally, three ASTM Class 3 test weight kits for checking higher accuracy class scales used for medical marijuana and jewelry scales will be purchased. This will supplement the single kit currently shared by 14 inspectors.

Chapter 413 RSMo requires all large and small commercial scales to be tested annually to ensure marketplace integrity and consumer protection.

The 2008 Freightliner has become very problematic, costing nearly \$10,000 annually in repairs above the normal wear and tear items such as brakes, tires and normal maintenance. There were 114 hours of lost inspection time on this specific truck. Replacing this truck will significantly improve the program's efficiency.

2. CORE DESCRIPTION

The State Land Survey's primary responsibility is to maintain the United States Public Land Survey System (USPLSS). The corners of the USPLSS are the framework from which all surveyors and property owners must rely for the determination of all land boundaries. In the early 1960s, land owners, title companies and land surveyors saw an alarming trend in the inability to accurately and economically locate land boundaries. The corners, physical monumentation on which land surveys were based, had been either accidentally or intentionally destroyed. In many instances, land survey records were not preserved, maintained or recorded. Since 1971, an effort has been put forth to reverse the trends of high loss of land corners. As funding allows, contracts between the Land Survey Program, county surveyors and private surveyors are used to re-establish or restore the corners, survey and monument county boundaries and survey and monument state boundaries.

PROGRAM DESCRIPTION

Agriculture

HB Section(s): 6.110

Weights, Measures & Consumer Protection

Missouri Land Survey Program

1a. What strategic priority does this program address?

Empower more surveyors, engineers, real estate professionals, GIS professionals, and the general public.

1b. What does this program do?

- Develops and provides information for the accurate and economical location of property boundaries for land survey professionals and property owners.
- Receives and processes land survey documents from all Missouri counties and surveyors into a record management system for preservation and accessibility for professionals and the general public.
- Restores and maintains the United States Public Land Survey System (USPLSS). These corners serve as the framework from which all surveyors and property owners must rely on for the determination of all land boundaries since the early 1800s.
- Contracts with county and private surveyors to restore USPLSS corners and to perform county and state boundary surveys.

2a. Provide an activity measure for the program.

Note 1: The number of orders received is affected by housing market trends.

PROGRAM DESCRIPTION

Agriculture

HB Section(s): 6.110

Weights, Measures & Consumer Protection

Missouri Land Survey Program

Note 1: Survey documents include documents received from county recorders, land surveyors, private individuals, and other state agencies. These documents are scanned and indexed into a centralized repository for preservation and convenient retrieval.

Note 2: In the event where county maintained documents have been destroyed by water, fire and contamination, the Land Survey Repository can restore these records, providing security and avoiding economic loss to the citizens of those counties and the state.

Note 1: Certified Land Corner Documents are filed to perpetuate the corners of the United States Public Land Survey System.

Note 2: Documents are received from staff surveyors, other state and federal agency surveyors, private surveyors, and from contracting with county and private surveyors.

Weights, Measures & Consumer Protection

Missouri Land Survey Program

Note 1: In FY17 the County Surveyor COOP Program & Private Surveyor COOP Program were not offered. Both programs were updated and several regional training sessions were performed throughout the state.

2b. Provide a measure of the program's quality.

Note 1: The customer satisfaction survey requests a rating on the professionalism and responsiveness of the staff and the overall quality of the program.

Note 2: The rating depicted for FY20 is based on 18 surveys submitted. The number of surveys are down this year due to the COVID-19 Pandemic and not attending the typical meetings where we distribute and collect the surveys.

2d. Provide a measure of the program's efficiency.

Note 1: In comparison, in FY11 (prior to online store, est. Oct. 2012), 2,329 orders were received and processed utilizing 3,950 employee hours.

Note 2: In FY19 and FY20 employee hours increased due to the hours depicted include not only the online order assistance hours, but also hours for system maintenance.

2. CORE DESCRIPTION

The Missouri State Fair provides an opportunity to communicate the story of Missouri's agriculture in ways that appeal to the state's citizens. This event improves the public's understanding of and appreciation of the role of agriculture. The Missouri State Fair is to showcase and inspire the best in Missouri agriculture, agri-business, domestic arts, and fine arts through competition and educational experiences and to offer quality entertainment. Missouri's agri-businesses add over \$17.5 billion to the state's economy. A prosperous agricultural economy is critical to the overall health of the state's economy. The Missouri State Fairgrounds provide space and facilities for the display of livestock, agricultural products, commercial exhibits, and other agricultural and industrial displays. The 396 acres contain a total of 105 buildings and 20 structures. In addition to their use during the annual State Fair, the fairgrounds host other types of exhibits, entertainment and sales events throughout the year, including livestock shows, group meetings, private functions and camper rallies.

2. CORE DESCRIPTION

This request provides funding for the replacement of existing equipment and the addition of needed equipment. The equipment is required to service and maintain the grounds and facilities.

The Missouri State Fair is host to many events throughout the year. These events require additional inputs of labor and equipment. Whether it is moving dirt into or out of the Mathewson Exhibition Center, grading and watering the half-mile track or mowing the grass in preparation for a camper rally, picnic, car show or other revenue-producing event. By providing continued service and maintaining an attractive grounds, our off-season revenue and attendance should continue to increase. If the grounds become unpleasant or we fail to satisfy our customers, off-season and fair attendance and the resulting revenue will fall.

2. CORE DESCRIPTION

Core funding is needed to ensure safety and quality of milk products to consumers. State law requires the State Milk Board to inspect, sample, and test milk from dairy farms, milk transportation vehicles, and milk processing plants for pathogens, toxins, inhibitors and adulterants, thereby enforcing standards that ensure sanitation and quality in production, processing and handling of milk and milk products. Inspection and analysis oversight is provided by FDA and USDA.

3. PROGRAM LISTING (list programs included in this core funding)

- Grade "A" Milk Dairy Farm, Transportation, Processing Plant, and Product Inspection and Rating Program (example: fluid milk, yogurt, Grade "A" powders)
- Manufacturing Grade Milk Dairy Farm, Transportation, Processing Plant, and Product Inspection Program (example: cheese, butter, sports shakes)

Program: Grade A Milk Inspection and Rating	
Program is found in the following core budget(s): State Milk Board	

1a. What strategic priority does this program address? Empower More Dairy Farmers and Agribusinesses

1b. What does this program do?

This program is designed to ensure that Grade A milk produced or processed in Missouri is safe and wholesome. The Milk Board does this by inspecting grade A dairy farms, dairy processing facilities, and processed products utilizing federal guidelines to assure safe and high quality milk products and interstate trade. The U. S. Food and Drug Administration/Milk Safety Division provides oversight and guidelines to assure the free marketing of Missouri dairy farmers' raw milk for pasteurization as well as Grade A Missouri dairy processors' products. Consumers are safeguarded by strict adherence to federal Pasteurized Milk Ordinance standards. Labeling, product quality and integrity are assured by State Milk Board (SMB) oversight of National Labeling act requirements. SMB is the administrator of the milk inspection fee fund that finances the Grade A program. SMB performs FDA ratings that evaluate dairy farm and plant inspection programs and performs an additional FDA required regulatory evaluation that ensures state inspection services are performing at

2a. Provide an activity measure for the program.

In addition to the public health and safety of Missouri milk consumers, both in-state and out-of-state, the program serves:

Program: Manufacturing Grade Milk Inspection
Program is found in the following core budget(s): State Milk Board

1a. What strategic priority does this program address? Empower More Dairy Farmers & Agribusinesses

1b. What does this program do?

Inspects and tests Missouri manufacturing grade milk, milk processing plants and laboratories, and aseptic milk processing plants. Manufacturing grade dairy processing plants produce cheese, butter, retorted drinks, and infant formulas that are distributed and sold throughout the world. Manufacturing grade dairy farms and dairy processing plants must meet sanitation requirements in Title 21 Code of Federal Regulations (CFR). The State Milk Board tests and licenses bulk milk haulers and samplers, milk testers, dairy marketing personnel and solicitors of manufacturing grade milk to ensure precision and accuracy at all levels of milk handling. Sanitation inspections, equipment testing and processing equipment sealing is performed in manufacturing grade processing plants to ensure food safety to consumers. Every bulk milk tank is sampled and tested before milk leaves the farm. Every co-mingled load of milk is tested prior to unloading at a manufacturing grade dairy processing facility. State Milk Board inspects and licenses milk truck wash stations to ensure food safety standards are met and that producer's milk is transported in a clean and sanitary transport carrier.

2a. Provide an activity measure for the program.

The State Milk Board ensures manufacturing grade milk quality and safety by testing and timing pasteurizers and providing inspection services at the following locations:
