Federal Funds: DNR Federal Fund (0140); Abandoned Mine Reclamation Fund (0697)

Other Funds: DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Oil and Gas Resources Fund (0543); Coal Combustion Residuals Subaccount (0551); Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fees (0568); Solid Waste Management Fund (0570); Metallic Minerals Waste Management Fund (0575); Soil and Water Sales Tax Fund (0614); Groundwater Protection Fund (0660); Hazardous Waste Fund (0676); Oil and Gas Remedial Fund (0699); Geologic Resources Fund (0801); Multipurpose Water Resource Program Fund (0815); Mined Land Reclamation Fund (0906)

<u>Core Reallocation</u>: The FY 2024 Budget Request includes a core reallocation of \$1,557,828 and 24.16 FTE from the Division of Environmental Quality, Soil and Water Conservation Program to the Missouri Geological Survey as a result of the March 2022 realignment within the Department.

Core Reduction: The FY 2024 Budget Request includes a core reduction of \$332,387 one-time authority from the FY 2023 budget.

Department of Natural Resources

Budget Unit 78510C, 78520C

Missouri Geological Survey

Missouri Geological Survey Operations Core

HB Section 6.300, 6.305

2. CORE DESCRIPTION

The Missouri Geological Survey (MGS) includes the Geological Survey Program, Land Reclamation Program, Dam and Reservoir Safety Program, Water Resources Center, and Soil and Water Conservation Program.

The Geological Survey Program investigates the state's geology and provides geologic and hydrologic information to assist with decisions relating to economic development, site remediation, contaminant migration, subsurface investigations, and geologic hazards. The program also determines the character and availability of the state's energy and mineral resources. Staff implement the Water Well Drillers' Act by establishing standards for domestic water wells, monitoring wells, and geothermal ground source heat pump wells.

The Land Reclamation Program regulates surface mining of coal and industrial minerals, regulates and administers reclamation of coal mine and industrial mine lands on which bonds were forfeited, regulates and administers reclamation of coal mine lands abandoned prior to 1977, and regulates the metallic mineral waste disposal areas of mining operations.

The Dam and Reservoir Safety Program administers the provisions of the Missouri Dam and Reservoir Safety Law. The Missouri Department of Natural Resources regulates nonfederal, nonagricultural dams 35 feet and higher through inspections, registration, and issuance of construction permits. Dams are a critical part of our state's infrastructure, providing many benefits including water supply, flood protection, hydropower, irrigation, and recreation. There are approximately 728 regulated dams. The program works with citizens, dam owners, engineers, and emergency managers to ensure dams in Missouri are constructed, maintained, and operated in a safe manner.

Water Resources Center staff provide information for Missouri's comprehensive water needs by examining both surface and groundwater use and availability. Staff investigate water supply issues; maintain and update Missouri's Public Water Supply database for groundwater wells; collect, analyze and distribute groundwater-level data from a statewide network of observation wells; evaluate public water supply wells; and provide casing and total depth specifications. Water Resources Center staff provide guidance and technical expertise for planning and development of regional water supply projects throughout Missouri. Staff defend the state's vital water resources interests, including those related to navigation, flood control, and other uses of the Missouri and Mississippi rivers before numerous interstate and interagency river basin associations.

The Soil and Water Conservation Program (SWCP) provides guidance and support to the Soil and Water Districts Commission and the 114 local soil and water conservation districts throughout the state. SWCP administers the Cost-Share, Conservation Monitoring, and District Grants programs, as well as various research and planning projects. Staff administer the conservation programs through the soil and water conservation districts for the control and reduction of soil erosion on agricultural land and protection of water resources. Missouri's SWCP and soil and water conservation districts are recognized, locally and nationally, for their successful efforts to

The division's pass-through authority is located in a separate core decision item form.

Department of Natural Resources Budget Unit 78510C, 78520C Missouri Geological Survey Missouri Geological Survey Operations Core HB Section 6.300, 6.305 3. PROGRAM LISTING (list programs included in this core funding) Missouri Geological Survey 4. FINANCIAL HISTORY FY 2020 FY 2021 FY 2022 FY 2023 Actual Expenditures (All Funds) Actual Actual Actual Current Yr. Appropriation (All Funds) 7.781.959 7.776.059 7.909.747 9.208.510 9,000,000 (133,093) Less Reverted (All Funds) (107, 211)(108,787)(113, 301)Less Restricted (All Funds)* (48.500)0 0 0 6.543.735 Budget Authority (All Funds) 7,667,272 7,796,446 9,075,417 6.065.433 7,626,248 5,820,735 6,000,000 Actual Expenditures (All Funds) 5,820,735 6,065,433 6,543,735 N/A Unexpended (All Funds) 1.805.513 1.601.839 1.252.711 N/A 3,000,000 Unexpended, by Fund: General Revenue 253,207 202,698 N/A 310,461 Federal 638.872 406.363 300.178 N/A 0 Other 856,180 942,269 749.835 N/A FY 2020 FY 2021 FY 2022 (2) (1) (1) (1)

Reverted includes the statutory three-percent reserve amount (when applicable).

Restricted includes any Governor's Expenditure Restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

(1) The division continuously looks for federal funding opportunities or partnerships to maximize these appropriations to fulfill our mission. Unexpended in Other Funds appropriation is usually the result of fee fund availability or staff turnover.

(2) In March 2022, the Soil and Water Conservation Program within the Division of Environmental Quality (DEQ) was realigned and shifted to the Missouri Geological Survey. Prior year actual (FY 2020 – FY 2022) and current year budget (FY 2023) data is included in the DEQ Soil and Water Conservation Program Operations Core. These changes are reflected in the FY 2024 budget request as this is the first opportunity to adjust the budget.

FTE

<u>Core Reallocation</u>: The FY 2024 Budget Request includes a core reallocation of \$56,480,570 from the Division of Environmental Quality, Soil and Water Conservation Program to the Missouri Geological Survey as a result of the March 2022 realignment within the Department.

2. CORE DESCRIPTION

The Missouri Geological Survey (MGS) includes the Geological Survey Program, Land Reclamation Program, Dam and Reservoir Safety Program, Water Resources Center, and Soil and Water Conservation Program which provide management and oversight of the following pass-through programs:

<u>Multipurpose Water Resource Program PSD</u>: The Multipurpose Water Resource Program fund is intended to support development of public water supply, flood control storage, and treatment and transmission facilities. The Multipurpose Water Resource Act authorizes the Department to administer moneys appropriated to the fund through provision of grants or other financial assistance and allows for the state to participate with a sponsor in the development, construction, or renovation of a water resource project providing a long-term solution to water supply needs.

<u>State Water Plan</u>: This appropriation is used for professional services to implement the State Water Plan and advance the Department's efforts and responsibilities to ensure that the availability of water resources supports Missouri's current and future beneficial uses and is not a limiting factor in economic growth. The primary areas of this effort include water supply availability, drought response, watershed feasibility studies, and addressing interstate water needs.

<u>Oil and Gas Remedial Fund</u>: This appropriation is used to plug abandoned oil and gas wells that have the potential to impact surface and groundwater resources and may pose a threat to human health. The fund is also used to handle emergency situations, such as a leaking gas well.

Land Reclamation PSDs: The Abandoned Mine Land (AML) unit oversees the reclamation of abandoned mine sites in Missouri including sites abandoned prior to the Surface Mining Control and Reclamation Act of 1977. For coal sites abandoned prior to 1977, the program uses federal funds to directly contract for the reclamation activities at these sites.

The Mined Land Reclamation Fund PSDs provide appropriation authority for reclamation of sites where bonds have been forfeited on permit-revoked mine sites. Reclamation involves work to restore mined lands to productive uses such as agricultural, wildlife habitat, water impoundment, or development. The program may collect reclamation bonds and directly contract for the reclamation activities, or the program may allow the surety bond holder to perform the reclamation in place of the original permit holder.

Soil and Water Conservation PSD: The Soil and Water Conservation Program (SWCP) provides management and oversight of the following pass-through financial assistance programs: Cost-Share, District Grants, Conservation Monitoring Program, and Research for soil and water conservation. Appropriation authority allows for federal funding of demonstration and technical assistance projects. Through these activities, nearly \$56 million is available for the installation of soil and water conservation practices on agricultural land and to support the operation of the 114 local soil and water conservation districts. Missouri's SWCP and the districts are recognized, locally and nationally, for their successful efforts to reduce soil erosion and address water quality on agricultural land.

| | (1) | (1) | (1) | (2) | | | | |

Reverted includes the statutory three-percent reserve amount (when applicable).

Restricted includes any Governor's Expenditure Restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

(1) The majority of lapses are attributed to the Land Reclamation PSD (Federal) and Multipurpose Water Resource Program (Other). Appropriations are set to allow the Department to encumber all contracts in place at any one time even though expenditures could occur over multiple years. In addition, the division continuously looks for federal funding opportunities or partnerships to maximize these appropriations to fulfill our mission.

(2) FY 2023 PSD appropriations are aligned to deliver results to citizens and are: Multipurpose Water Resource Program \$32,687,310 (and related \$31.9 million transfer); State Water Plan \$924,920; Land Reclamation Bond Forfeitures \$350,000; AML Reclamation \$9,232,500; Small Operator Assistance \$1,000; and Oil and Gas Remedial Fund \$150,000.

Department of Natural Resources HB Section(s): 6.300, 6.305, 6.310, 6.315, 6.320, 6.322, 6.323 Missouri Geological Survey Program is found in the following core budget(s): Missouri Geological Survey 1a. What strategic priority does this program address? The Missouri Geological Survey Division helps Missouri citizens thrive by managing natural resources to promote a healthy environment and economy by: • Promoting environmental responsibility and resource stewardship. • Enhancing services, information, and communication to improve customer experience.

- Modernizing community infrastructure, strengthening workforce, and supporting economic development.
- Improving internal processes to better serve our customers.

1b. What does this program do?

The Missouri Geological Survey (MGS) includes the Geological Survey Program, Land Reclamation Program, Dam and Reservoir Safety Program, Water Resources Center, and Soil and Water Conservation Program. MGS assists citizens, industry, and government in increasing the knowledge of Missouri's natural resources to achieve economic growth and provide for a healthy environment. MGS leadership provides management, fiscal direction, priority development, and support services. The division coordinates and integrates scientific information and services for efficient state and national distribution of technical information.

Geological Survey Program (GSP): Applies Geoscience for Critical Resource Needs

- Performs detailed geoscience investigations for exploration, identification, development, and understanding Missouri's energy, mineral, and water resources and potential hazards to human health and safety, such as sinkholes and earthquakes. The value of a geologic map is estimated to be 25 to 39 times the cost to produce the map, and developers and engineers save about \$50,000 per project when modern geologic maps are available. As of FY 2022, the program has produced 332 geologic maps with an estimated economic value of \$470 million.
- Serves the public, industry, academia, and other entities by providing geologic and groundwater information necessary to address environmental concerns and make economic decisions such as siting landfills and characterizing valuable mineral resources.
- Collects, interprets, and maintains geologic data on Missouri's energy, mineral, and water resources and provides services for professional, technical, and educational use.
- Provides technical and field assistance to determine potential or existing environmental hazards posed by waste disposal practices and spills of hazardous materials.
- Protects Missouri's valuable fresh groundwater resources by establishing standards for the construction and proper plugging of wells and licensing qualified well installation contractors.
- Serves as the official Missouri Mine Map Repository and maintains the McCracken Core Library and Research Center, housing nearly 8 million feet of geologic rock core and cuttings.

Department of Natural Resources

HB Section(s): 6.300, 6.305, 6.310, 6.315, 6.320, 6.322, 6.323

Missouri Geological Survey

Program is found in the following core budget(s): Missouri Geological Survey

1b. What does this program do? (continued)

Dam and Reservoir Safety Program (DRSP): Ensures Public Safety Against Dam Failure

- Provides public safety for downstream populations and property associated with 728 regulated dams by administering the provisions of the Missouri Dam and Reservoir Safety Law. Dam failures can cause loss of life and serious damage to buildings, critical infrastructure, industries, and local economies.
- Regulates nonfederal, nonagricultural dams 35 feet and higher through inspections, and issuance of registration, safety, and construction permits.
- Ensures critical dam infrastructure continues to be operated and maintained in accordance with state law.
- Performs emergency response to dams in distress and provides engineering evaluation of conditions during natural disasters to protect life and property.
- Provides technical assistance to regulated and non-regulated dams.

Water Resources Center: Defends, Monitors, and Develops Water Resources

- Defends Missouri's interests and claims to water in the Missouri and Mississippi Rivers.
- Develops, maintains, and periodically updates the Missouri Water Resources Plan to assess current water use in the state, future needs, and water availability.
- Monitors surface and groundwater levels by operating and maintaining a network of groundwater observation wells and participating in the stream gage network administered by USGS.
- Collects annual water use data from individuals or businesses that have the capacity to withdraw more than 100,000 gallons of water per day, in accordance with the Major Water Users Law.
- Provides technical expertise for the development or expansion of water distribution systems, water storage capabilities, and water supply sources to help regional water supply projects minimize the impacts of stress on their water systems.
- Performs groundwater studies to evaluate the quantity and quality of Missouri's springs and determine safe groundwater yields from the state's aquifers.
- Provides planning and resources for local partners on flood resiliency projects throughout the state.

Land Reclamation Program: Ensures Mining Compliance and Reclamation

- Permits and inspects industrial mineral mining sites to ensure compliance with The Land Reclamation Act.
- Implements the Metallic Minerals Waste Management Act which covers the metallic mineral waste disposal areas to ensure these areas are properly reclaimed.
- Utilizes funding provided by Department of Interior Office of Surface Mining to enable the Abandoned Mine Land unit to oversee reclamation of coal mine sites abandoned prior to 1977. Reclamation includes closing dangerous mine shafts, eliminating dangerous high walls, improving severely impacted land, and stabilizing subsiding ground beneath homes and roads.
- Permits and inspects active coal sites and oversees reclamation of coal mine land.
- Serves as the regulatory authority for coal mine permitting, inspection, enforcement, and maintains certification for blasters at coal mines in compliance with the federal Surface Mining Control and Reclamation Act (SMCRA).

Department of Natural Resources

HB Section(s): 6.300, 6.305, 6.310, 6.315, 6.320, 6.322, 6.323

Missouri Geological Survey

Program is found in the following core budget(s): Missouri Geological Survey

1b. What does this program do? (continued)

Soil and Water Conservation Program: Implements Soil and Water Conservation Practices

- Provides education, conservation, technical and administrative support, and financial incentives for the purpose of conserving soil and water resources through the Parks, Soil and Water Sales Tax.
- Administers agricultural practice policies developed by the Soil and Water Districts Commission to assist agricultural landowners and farmers.

<u>Multipurpose Water Resource Program PSD</u>: The Multipurpose Water Resource Program fund is intended to support development of public water supply, flood control storage, and treatment and transmission facilities. The Multipurpose Water Resource Act (Sections 256.435 - 256.445, RSMo) authorizes the Department to administer moneys appropriated to the fund through provision of grants or other financial assistance and allows for the state to participate with a sponsor in the development, construction, or renovation of a water resource project providing a long-term solution to water supply needs.

<u>State Water Plan</u>: This appropriation is used for professional services to implement the State Water Plan and advance the Department's efforts and responsibilities to ensure that the availability of water resources supports Missouri's current and future beneficial uses and is not a limiting factor in economic growth. The primary areas of this effort include water supply availability, drought response and watershed feasibility studies, and addressing interstate water needs.

<u>Oil and Gas Remedial Fund</u>: This appropriation is used to plug abandoned oil and gas wells that have the potential to impact surface and groundwater resources and may pose a threat to human health. The fund is also used to handle emergency situations such as a leaking natural gas well.

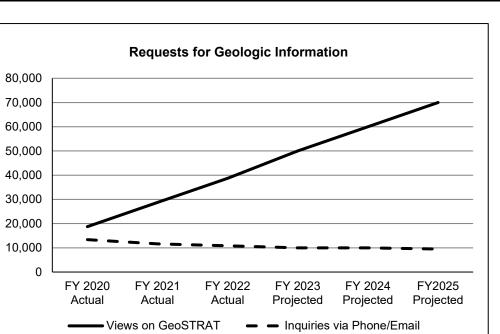

Land Reclamation PSD: Allows the program to contract with surety bond holders, engineering, excavating, and construction companies to reclaim abandoned and bond forfeiture sites. Over 107 eligible Abandoned Mine Land (AML) areas exist consisting of 10,834 acres with public health, safety, and environmental issues and an estimated reclamation cost of \$123.2 million. Reclamation costs of eligible lands increased from \$107 million to \$123 million due to the federal law change allowing states to fund "Priority 3" stand alone projects.

<u>Soil and Water Conservation PSD</u>: Provides partial reimbursement to landowners for the installation of soil and water conservation practices that prevent or control excessive erosion and improve water quality. Soil and water conservation districts in each of Missouri's 114 counties are supported by district grant funds to allow local district boards to provide technical assistance to landowners and deliver information and educational programs. Also, funded are research and monitoring necessary to understand the effectiveness of conservation practices and to inform future practice implementation.

Department of Natural Resources Missouri Geological Survey Program is found in the following core budget(s): Missouri Geological Survey 2a. Provide an activity measure(s) for the program. Every year the Geological Survey Program responds to thousands of requests for geologic information from our customers including businesses, farmers. and citizens. A few examples include: Businesses such as well drillers, oil and gas operators, and mining and 80.000 quarry operations. 70,000 Farmers who own land with known or potential geologic resources and/or geologic hazards. 60,000 Landowners and potential landowners needing geologic information such as private water wells, oil and gas leases, and potential for geologic 50.000 resources and/or hazards. 40.000 Citizens inquiring about the geologic resources of Missouri. 30,000 The Geological Survey Program is committed to making geologic information 20,000 more accessible to the public. In FY 2018, the Department's online Geosciences Technical Resource Assessment Tool (GeoSTRAT) was 10,000 upgraded to an ArcGIS Online platform. This web-based, interactive tool 0 provides geologic and geotechnical data on a variety of platforms including mobile devices. Beginning in FY 2020, the number of views on GeoSTRAT exceeded the number of phone and email inquiries received for geologic information demonstrating our customers are accessing geologic information online for data assessments in disciplines such as hazards assessment, environmental consulting and engineering, local and regional planning, insurance assessment and others. We expect this trend to continue as we

insurance assessment and others. We expect this trend to continue as we expand our efforts to provide geologic maps and information that have been produced and collected for over 165 years at the Missouri Geological Survey more accessible online. In FY 2020, we launched the new Geologic Map Index, as one of six additional ArcGIS Online applications. The map index serves nearly 3,400 scanned geologic maps that can be viewed and downloaded.

HB Section(s): <u>6.300, 6.305, 6.310, 6.315, 6.320, 6.322, 6.323</u>

Due to COVID-19 disruptions, impacting USDA office access, turnover in District staff, and ongoing economic impacts, program delivery was limited, therefore FY 2020 through FY 2022 resulted in reduced cost share utilization. The Department projects spending full appropriation in FY 2023 through FY 2025 based on projected available funds.

The goal is to maximize funding available to landowners.

Department of Natural Resources

Missouri Geological Survey

Program is found in the following core budget(s): Missouri Geological Survey

2b. Provide a measure(s) of the program's quality.

Protecting the Missouri River

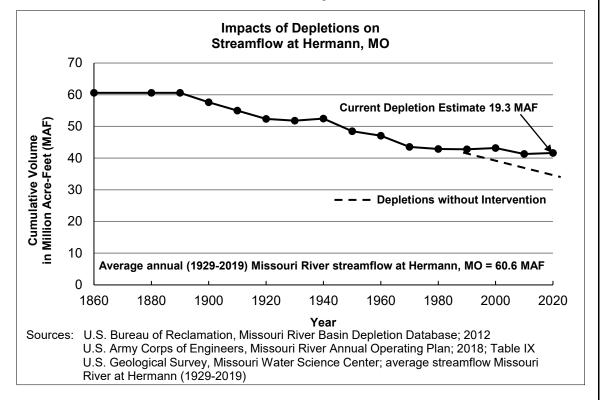

The Department serves Missourians by protecting the quantity of water in the Missouri River for water supply purposes. Approximately 45% of community water systems rely on the Missouri River as a source of drinking water. Other benefits of the program's work include ensuring Missouri River flows are adequate to support recreation, agriculture (irrigation and livestock), flood control, fish and wildlife, water-borne commerce, and industrial usage.

Missourians using Missouri River for drinking water:

| FY 2019 | FY 2020 | FY 2021 | FY 2022 |
|-----------|-----------|-----------|-----------|
| 2,465,508 | 2,512,106 | 2,440,038 | 2,453,581 |

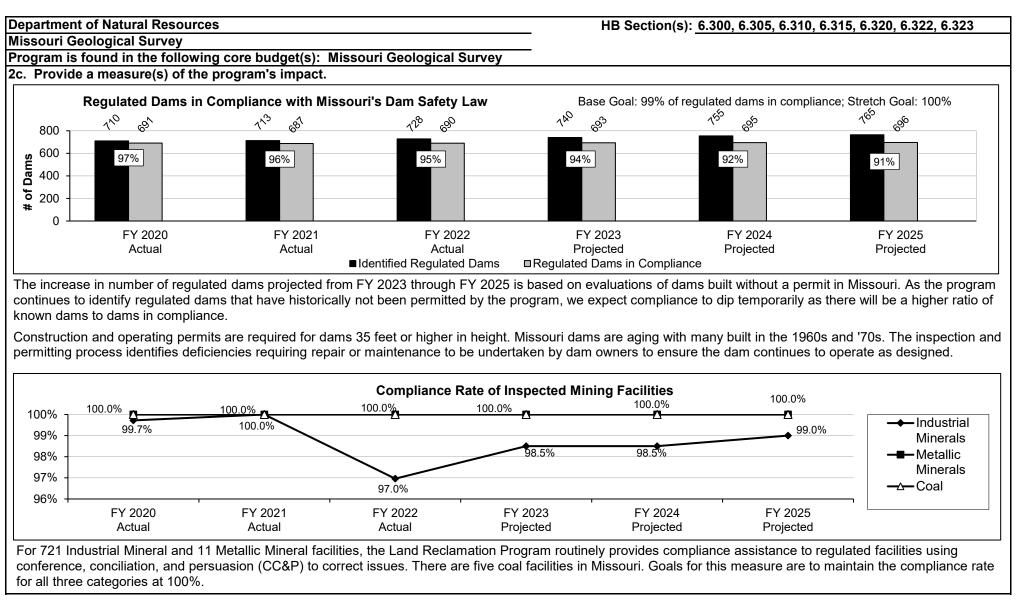

Missouri River Water Rights

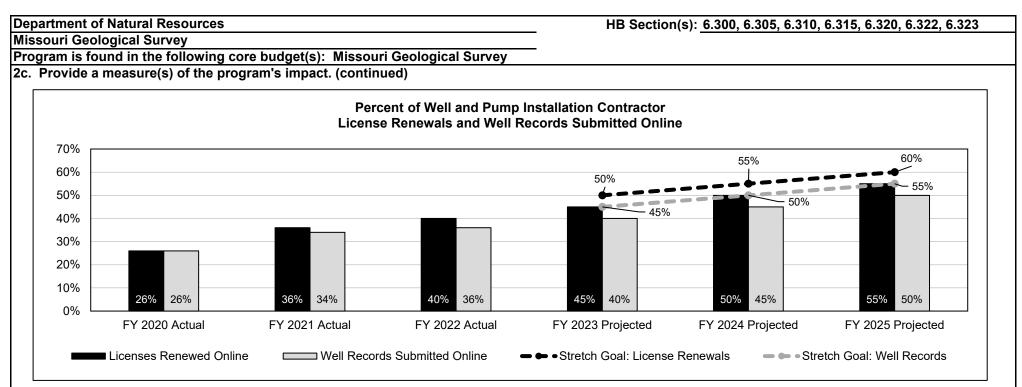

The Missouri River Master Manual is administered by the U.S. Corps of Engineers and is the primary document governing the operation of the Missouri River mainstem reservoirs. The Department engages with the Corps and other stakeholders to advocate for management outcomes that protect river uses Missourians need. During the Master Manual update and development of the Missouri River Ecosystem Restoration Plan, the Department prevented several proposed river operation changes that would have hampered Missourians' rights to navigate and use the Missouri River and likely would have increased flooding on Missouri property. The Department also successfully worked to establish a consensus-based Missouri River Recovery Implementation Committee (MRRIC) to ensure Missourians have a voice in Missouri River management. These efforts help ensure Missouri's interests in the river (such as drinking water, power generation, river commerce, recreation, and fish and wildlife) are protected and maintained.

The Department is instrumental in providing technical and legal assistance in challenging out-of-basin diversions of Missouri River water. The Department's work has prevented, delayed, or minimized the scope of several proposed diversions.

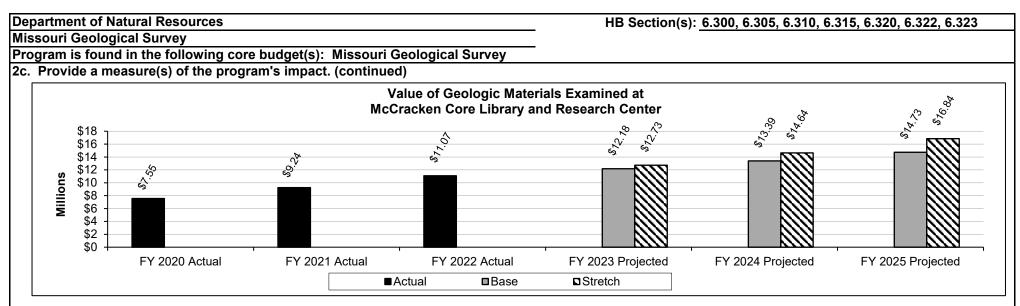

HB Section(s): 6.300, 6.305, 6.310, 6.315, 6.320, 6.322, 6.323

Base Goals are the Projected amounts.

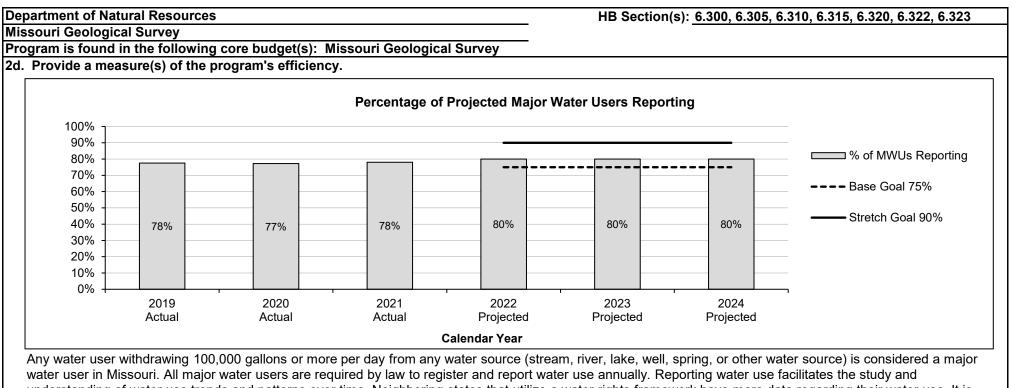

The Well Installation Section protects valuable groundwater resources by implementing the Water Well Drillers' Act (256.600-256.640, RSMo). Each year team members process and review approximately 10,000 forms with data on well construction and plugging. Well installation contractors have the ability to enter records online through the Well Information Management System (WIMS 2.0). WIMS 2.0, a new IT application for well installation contractors, was deployed in late FY 2022. As well contractors and team members learn the new system, the Department anticipates an increase in online submittal of well records and license submittals in future years saving time and resources for internal and external customers. The Well Installation Section continues to work proactively with contractors and the Office of Administration's ITSD team to make improvements to the system to continuously improve the customer experience.

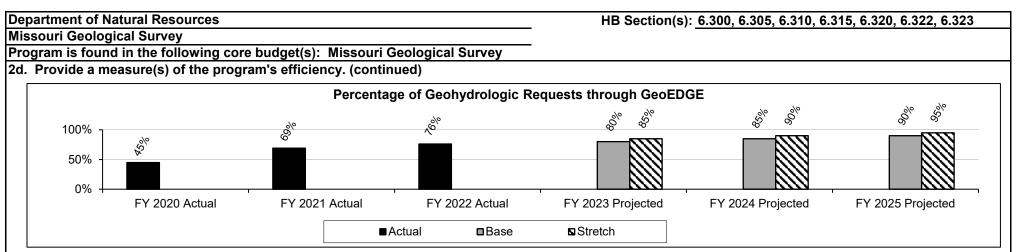

This performance measure is based on: the amount of core and cuttings accessed by customers; the depth of drilling required to obtain the samples; and by the current estimate of the average cost per foot of drilling. In FY 2022, 30,066 feet of core stored at this facility was examined by our customers. The majority of interest at this time is in core that encompasses Precambrian or "basement" bedrock. Assuming a cost of \$60 per foot to drill, the value of this core is equivalent to approximately \$1,800,000. When drill cuttings are also considered, the value of these materials to our customers in FY 2022 is approximately \$1,830,000 for an overall increase of 7% over FY 2021. A newly established hand sample archive contains samples from multiple sites now inaccessible, including closed mines. The archive includes samples collected by MGS staff as far back as the 1800s, and is continually being added to.

Of the total feet of geologic materials accessed, more than 8,400 linear feet was used by an exploration company for potential cobalt exploration in Missouri. Cobalt is recognized as a mineral critical to the United States. Data were also collected from multiple hand samples in the collection housed at McCracken. The cost savings for the company were more than \$504,000. A separate company evaluated more than 1,500 linear feet of core to evaluate potash potential in Missouri Precambrian-age rocks. Cost savings to this company were more than \$93,500.

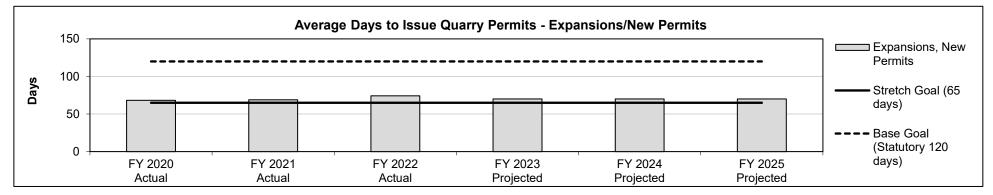

Base Goal: FY 2022 Actual with annual 10% increases. Stretch Goal: FY 2022 Actual with annual 15% increases.

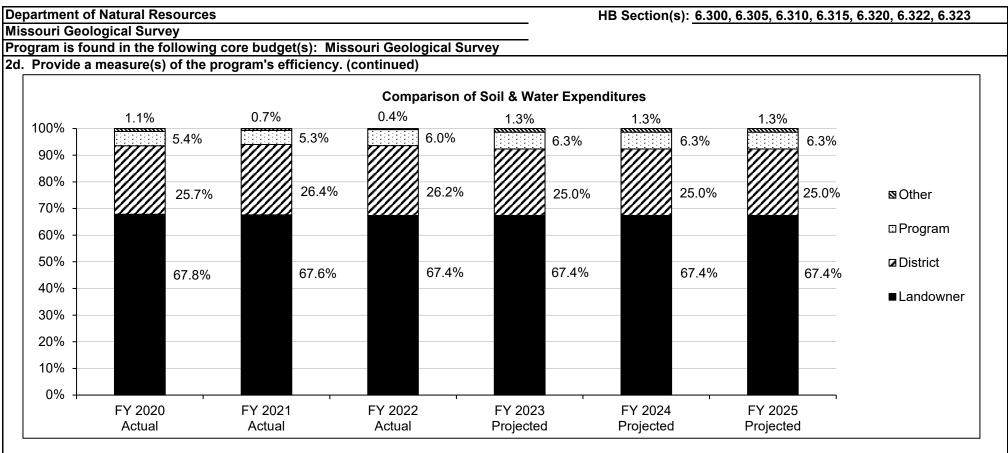

understanding of water use trends and patterns over time. Neighboring states that utilize a water rights framework have more data regarding their water use. It is important that Missouri have sufficient data to defend the needs of its users and the use of our water. The division is implementing a new reporting system in calendar 2022 and anticipates a slight decline in reporting initially as users learn the system.

The Geologic Evaluation Data Gateway Exchange (GeoEDGE) provides a convenient, paperless option for customers to submit requests for geohydrologic evaluations for liquid waste treatment, solid waste disposal, mining areas, and residential housing developments. These evaluations provide the requestor, property owner, and the permit writers with site specific information needed to design and install appropriate waste treatment or monitoring systems. The GeoEDGE web application reduces time and money the requestor or developer spends on completing and submitting paper forms. It also reduces team member's time entering requests and mailing out reports. Customers are now able to instantly track their requests and receive expedited results through an email.

Missouri law allows 120 days to issue a permit, which includes a minimum 45-day comment period for new industrial permits and expansions. When public meetings and hearings are held, however, substantially more than 45 days is needed. The Land Reclamation Program issued 390 industrial minerals permits in FY 2022 covering approximately 721 mining sites.

This chart represents full costs of the Soil and Water Sales Tax Fund (pass-through payments, personal services, fringe benefits, operating expenses, and other costs). Program expenditures from soil and water sales tax revenue are monitored to ensure the fund purpose of implementing conservation practices to preserve the productive power of Missouri agricultural land will continue to comprise the principal part of expenditures.

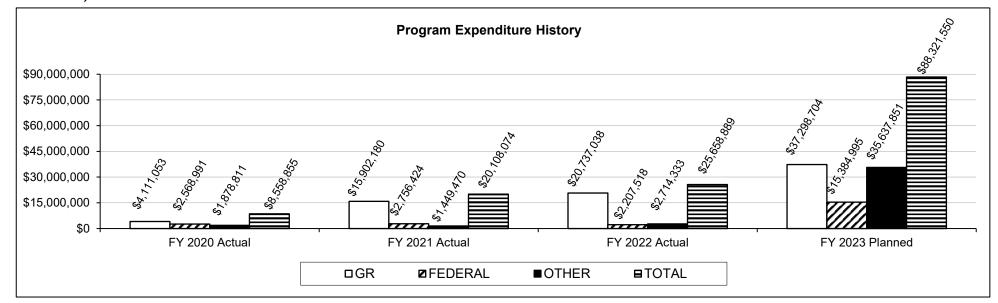

Department of Natural Resources

HB Section(s): 6.300, 6.305, 6.310, 6.315, 6.320, 6.322, 6.323

Missouri Geological Survey

Program is found in the following core budget(s): Missouri Geological Survey

3. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year. (Note: Amounts do not include fringe benefit costs.)

Financial data includes operating and pass-through appropriations. FY 2020 - FY 2023 Soil and Water Conservation Program data is not included in this form and can be found in the DEQ section of this budget request. 2023 Planned is shown at full appropriation and includes transfer and pass-through authority for the Multipurpose Water Resource Program.

4. What are the sources of the "Other " funds?

DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Oil and Gas Resources Fund (0543); Coal Combustion Residuals Subaccount (0551); Natural Resources Protection Fund-Water Pollution Permit Fees (0568); Solid Waste Management Fund (0570); Metallic Minerals Waste Management Fund (0575); Groundwater Protection Fund (0660); Hazardous Waste Fund (0676); Oil and Gas Remedial Fund (0699); Geologic Resources Fund (0801); Multipurpose Water Resource Program Fund (0815); Mined Land Reclamation Fund (0906)

The Missouri Geological Survey provides the technical geologic expertise for the state's federally-delegated environmental programs. In addition, the EPA has delegated authority to the Department to ensure compliance with the requirements of the Safe Drinking Water Act as it relates to underground injection control.

The state has primacy as approved by the Department of Interior, Office of Surface Mining to maintain and enforce coal mine regulations, abandoned mine land reclamation, coal bond forfeiture reclamation, and other associated programs.

NEW DECISION ITEM RANK: 012 OF 024 Department Natural Resources Budget Unit 79435C Missouri Geological Survey Soil & Water Conservation District Grants Increase DI# 1780008 HB Section 6.323 Provide a measure(s) of the program's impact. 6c. Soil Conserved Annually 2,000,000 1,500,000 ۲,000,000 ۲,000,000 500,000 0 FY 2020 FY 2021 FY 2022 FY 2023 FY 2024 FY 2025 Projected Projected Actual Actual Actual Projected ■ Tons Save No NDI ■Tons Saved With NDI

FY 2023-2025 Projected is based on a 3-year average of FY 2020-2022. The additional cost-share appropriation utilization made possible by this NDI will result in increased soil conserved.

6d. Provide a measure(s) of the program's efficiency.

Correcting identified issues relating to recruitment and retention of district employees will result in more efficient use of cost-share funding. As expertise is shared across county lines, opportunities for landowners will expand. Retaining qualified staff should eliminate delays in service and practice implementation issues that occur with vacancies.

Missouri Geological Survey

Securing a Critical Minerals Framework for Missouri Dl# 1780016

HB Section 6.300

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Critical minerals - such as cobalt, rare earth elements, and zinc - are the building blocks for modern life, found in products Missourians rely on every day, from cell phones to household appliances. As one of the top 10 mineral producing states in the nation and home to 29 of the 50 mineral commodities identified as critical to the U.S. economy and national security, Missouri is uniquely positioned to be a leader in developing domestic critical mineral supply chains.

This new decision item will leverage federal funding opportunities to help achieve a comprehensive critical minerals framework for Missouri. Increased funding in existing federal programs through the Bipartisan Infrastructure Law (BIL) coupled with matching state investments have the potential to provide a once-in-a-generation opportunity to advance our understanding of Missouri's critical mineral resources. Funding from this new decision item will be used to produce geologic mapping, geochemical analyses, state-of-the-art airborne geophysics, and analytical equipment to inform these products.

Geologic mapping, geochemistry and geophysical projects are adding to our understanding and knowledge of the location and quantities of these minerals. In addition, projects that improve discovery, preservation, and access to physical and digital geologic collections are helping customers in areas such as energy, critical minerals characterization, and infrastructure development. For example, a recently completed geologic map based in comprehensive geochemical analysis of the Fredericktown 7.5' quadrangle has revealed areas of high potential for discovery of critical minerals such as Cobalt, Rare Earth Elements (REEs), Zinc, and Manganese. Continued investments will accelerate these projects leading to job creation, economic development and a reduction in U.S. dependence on foreign supplies of minerals.

|---|---|
| Missouri Geological Survey | |
| Securing a Critical Minerals Framework for Missouri Dl# 1780016 | HB Section 6.300 |
| 4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPEC number of FTE were appropriate? From what source or standard did you outsourcing or automation considered? If based on new legislation, does the request are one-times and how those amounts were calculated.) | |
| This budget request consists of two main items: 1) Funding for one Environmental Specialist to match new federal funding for 2) One-time equipment funding to purchase an X-ray fluorescence spectrome Operating PS/EE X-ray fluorescense sp Other expenses & equ | eter for geochemical analyses. 80,406 pectrometer 225,000 |
| opportunity to expand knowledge of Missouri's mineral resources to inform eco preservation requires a 1:1 state match. Based upon current federal appropria accelerate these efforts by leveraging an additional \$140,000 - \$200,000 in fe mapping expertise is not easily replicated in the private sector and would prod | the United States and the role of critical minerals is unprecedented and presents a unique conomic development. Federal funding for geologic mapping, data discovery, and ations, we project that with the additional funding the department would be able to ederal grants for FY 2024. Contracting this work is not desirable because in-house duce challenges to ensure consistency in methods and geospatial standards for mapping ent using in-house resources and would be cost prohibitive to contract this effort. |

<u>X-ray fluorescence (XRF) Spectrometer</u>: The Department of Natural Resources' McCracken Core Library and Research Center houses rock core from more than 3,300 drill holes, nearly a quarter of these were drilled into materials with the potential to host critical minerals. Achieving a better understanding of these mineral resources requires geochemical analyses. Acquisition of an X-ray fluorescence (XRF) spectrometer will provide fast, simple, non-destructive chemical analysis of minerals, rocks and fluids. This equipment will provide crucial information on Missouri's surface and subsurface mineral resources. Recent technological advances in XRF spectrometers provide greater accuracy, precision, and detection of a wide range of elements. This equipment will advance our understanding of Missouri's mineral resources beyond critical mineral identification in areas such as industrial mineral assays to support infrastructure such as roads, bridges, and highways and understanding the potential for oil and gas resources. Analytical information from this equipment will be preserved and made easily accessible to the public online. Note: this is a one-time request, however, manufacturing and/or shipping delays as well as changes in pricing are likely, therefore, we have not shown this as a one-time expenditure in FY2024.

The Geological Survey Program is committed to making geologic information more accessible to the public. In FY 2018, the Department's online Geosciences Technical Resource Assessment Tool (GeoSTRAT) was upgraded to an ArcGIS Online platform. This web-based, interactive tool provides geologic and geotechnical data on a variety of platforms including mobile devices. Beginning in FY 2020, the number of views on GeoSTRAT exceeded the number of phone and email inquiries received for geologic information demonstrating our customers are accessing geologic information online for data assessments in disciplines such as hazards assessment, environmental consulting and engineering, local and regional planning, insurance assessment and others. We expect this trend to continue as we expand our efforts to provide geologic maps and information that have been produced and collected for over 165 years at the Missouri Geological Survey and make them more accessible online. In FY 2020 we launched the Geologic Map Index, a new ArcGIS Online application that serves nearly 3,400 scanned geologic maps that can be viewed and downloaded. New investment will allow for continued expansion of these services to include geochemical data assays collected from new analytical equipment.

024

Every year Missouri applies for competitive federal grants to conduct geologic mapping. This chart shows how Missouri ranks among nearby states and the national average in federal awards over the last 5 years. Missouri ranks comparably, if not higher, than most surrounding Midwestern states, and consistently above the national average in federal funding for geologic mapping. Missouri also consistently produces lower-cost geologic maps when compared to other states as shown in 6d. Continued investments in these projects will allow Missouri to maintain a competitive advantage when compared with other states in the nation in understanding critical mineral resources.

The Department of Natural Resources' McCracken Core Library and Research Center houses more than 8 million feet of subsurface geologic material and is one of the largest public collections of drilling core and cuttings in the nation. Each year, customers from industry, academia, government and the public view these materials. In FY2022, 30,006 feet of core stored at this facility was viewed by our customers. It is estimated based on current cost per foot to drill (~\$60/ft.) that the value of this core to our customers in total was approximately \$1,800,000.

Of the total feet of geologic materials accessed, more than 8,400 linear feet was used by an exploration company for potential cobalt exploration in Missouri. Data were also collected from multiple hand samples in the collection housed at McCracken. The cost savings for the company were more than \$504,000. A separate company evaluated more than 1,500 linear feet of core to evaluate potash potential in Missouri Precambrian-age rocks. Cost savings to this company were more than \$93,500.

New analytical equipment will expand our knowledge of the critical mineral potential of these subsurface materials, allowing for simple, fast and accurate data collection that will be publicly accessible.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

To achieve the performance measure targets, the Geological Survey Program will actively pursue partnerships with other states and federal agencies, strive to innovate technology such as high quality geophysics and geochemistry, and use information collected by the Missouri Geological Survey over the last 165 years to inform these mapping products.

Expanded 0.50 FTE would allow regular program activities in accordance with the grant, such as: completion of inundation maps, Emergency Action Plans, and public outreach workshops.

6b. **Provide a measure(s) of the program's quality.**

The increase in number of regulated dams projected from FY 2023 through FY 2025 is based on evaluations of dams built without a permit in Missouri. Construction and operating permits are required for dams 35 feet or higher in height. Missouri dams are aging with many built in the 1960s and '70s. The inspection and permitting process identifies deficiencies requiring repair or maintenance to be undertaken by dam owners to ensure the dam continues to operate as designed.

PROGRAM DESCRIPTION

Department of Natural Resources

HB Section(s): 6.325, 6.330

Missouri Geological Survey

Program is found in the following core budget(s): Clarence Cannon Dam Transfer and Payment

3. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year. (Note: Amounts do not include fringe benefit costs.)

FY 2023 Planned is shown at full appropriation.

4. What are the sources of the "Other " funds?

Water Development Fund (0174) Cash is transferred from General Revenue to the Water Development Fund for payment to the Corps of Engineers.

5. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Water Supply Act of 1958 (1958 WSA; P.L. 85-500; 72 Stat. 319; 43 U.S.C. 390b)Section 256.290, RSMoMissouri Water Development FundSections 393.700-770, RSMoClarence Cannon Wholesale Water Commission

6. Are there federal matching requirements? If yes, please explain.

No

7. Is this a federally mandated program? If yes, please explain.

The state has entered into a contract with U.S. Army Corps of Engineers to secure future water supply.

2. CORE DESCRIPTION

The Division of Energy advances the efficient use of diverse energy resources through financial and technical assistance and education. The Division operates as the designated State Energy Office, directing the use of federal State Energy Program funds to support state-led energy initiatives.

Division staff members support business and community development and the use of diverse in-state resources and energy efficiency through interaction with utility companies, Public Service Commission staff, the Department of Natural Resources' environmental programs, and the Department of Economic Development's business expansion and attraction operations. Division staff also support the increased use and innovative development of bioenergy solutions, as well as market research and demonstration projects that advance the use of reliable and affordable domestic energy resources and technologies.

The division's pass-through authority is located in a separate core decision item form.

2. CORE DESCRIPTION

The Division of Energy advances the efficient use of diverse energy resources to improve the affordability and reliability of energy services, achieve greater energy security for future generations, and balance a healthy environment with a healthy economy. Through the energy efficiency loans, grants, and services programs, the Division helps to ensure energy resilience and affordability for communities and residents by supporting local energy efficiency and renewable energy projects.

The Division's Energy Loan Program, a revolving loan fund capitalized through Petroleum Violation Escrow (PVE) funds, partners with DNR environmental programs and other governmental entities to achieve greater environmental quality and improve affordability and reliability through energy improvements. Staff also provides technical and financial assistance to state and local governments, school districts, businesses, industries, and citizens for energy improvements.

Designated as the State Weatherization Office, staff administers pass-through federal and other funds for energy efficiency and renewable energy activities. To deliver services, the Division collaborates with a broad network of subgrantees (18 local, community based agencies), utility service providers, vendors, and installers to deploy energy-efficiency programs to improve the health, safety, and comfort of income-eligible households. The program improves long-term energy affordability for client households and enables the more efficient use of public assistance dollars.

Reverted includes the statutory three-percent reserve amount (when applicable).

Restricted includes any Governor's Expenditure Restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

(1) In many cases, pass-through appropriation has been provided for encumbrance and payment of our commitments which often span multiple fiscal years causing high unexpended balances. Beginning in FY 2014, appropriations were provided for encumbrance purposes separate from expenditures. Both types of appropriations are included in the data above, therefore high unexpended balances will continue to be reflected. The FY 2023 PSD (expenditure only) appropriations are Energy Efficient Services \$37,874,476, and Low Income Weatherization Assistance \$20,332,635. The FY 2023 budget also includes \$18,000,000 encumbrance authority.

Department of Natural Resources

HB Section(s): 6.340, 6.345, 6.350

Division of Energy

Program is found in the following core budget(s): Energy

1a. What strategic priority does this program address?

The Division of Energy helps Missouri citizens thrive by managing natural resources to promote a healthy environment and economy by:

- · Promoting environmental responsibility and resource stewardship.
- Enhancing services, information, and communication to improve customer experience.
- · Modernizing community infrastructure, strengthening workforce, and supporting economic development.
- · Improving internal processes to better serve our customers.
- Planning for current and future energy needs by engaging stakeholders in the ongoing State Energy Plan process.

1b. What does this program do?

- The Division of Energy educates Missourians about cost-effective and efficient uses of energy resources, assists in finding funding for energy improvements, and provides opportunities to Missourians to advance the efficient use of energy resources to drive economic growth, provide for a healthy environment, and achieve a better Missouri for future generations.
- The Division offers a revolving loan program primarily to public K-12 schools, public universities and colleges, public and not-for-profit hospitals, and local
 governments to implement energy efficiency projects and renewable energy generation systems that lower utility bills while enhancing workplace or educational
 environmental quality and comfort, improving productivity, and encouraging job growth.
- The Division implements the Municipal Utility Emergency Loan Program (MUELP) which provided zero-interest loans, to be repaid within 5 years, to natural gas and electricity municipal utilities and municipal utilities' commissions for increased incurred costs due to the February 2021 extreme winter weather event. House Bill 15 was signed into law on May 13, 2021, the MUELP began accepting applications on June 2, 2021, and as of June 30, 2022, had loaned (expended) approximately \$43 million.
- The Division implements the federal Low-Income Weatherization Assistance Program, which provides funding and training to eighteen sub recipient agencies to
 weatherize residences of income-eligible Missourians. Weatherization measures increase energy efficiency and improve client safety and comfort while reducing
 their utility burden.
- Key Division activities also include:
 - Engaging with energy providers and stakeholders to determine Missouri's future energy needs;
 - o Researching and sharing information on grant and other funding opportunities for energy-related projects;
 - Working with state agencies to increase the energy efficiency of state facilities and fleets;
 - Participating in emergency response and recovery activities to prepare for energy emergencies and ease energy supply disruptions;
 - Appearing in energy-related regulatory cases to promote energy supply affordability, reliability, and diversity as well as in-state resource development; and,
 - o Certifying renewable energy resources, energy-efficient homes, and energy efficiency auditors.

HB Section(s): 6.340, 6.345, 6.350 Department of Natural Resources Division of Energy Program is found in the following core budget(s): Energy 2b. Provide a measure(s) of the program's quality. Energy Loan Program Satisfaction Survey Results 100.0% 100.0% 100% 100.0% 100.0% 100% 100% 99.0% 98.0% 98% 90% 80% 70% 60% 50% FY 2020 FY 2021 FY 2022 FY 2023 FY 2024 FY 2025 Actual Actual Actual Projected Projected Projected Ease of Application Process Ease of Application Process (Base) - Ease of Application Process (Stretch)

The Division of Energy sends a satisfaction survey to each loan recipient. Not all recipients respond. There have been no loan defaults since inception of the program in 1989.

The Division of Energy revamped the Satisfaction Survey for FY 2020 to obtain more meaningful and actionable feedback from loan recipients. This Division has consistently received extremely positive feedback on overall customer satisfaction, but one particular area of focus for the Division is to improve the ease with which potential clients can apply for loans.

The Division of Energy actively solicits survey participation: received two Satisfaction Survey responses in FY 2020, twenty-six responses in FY 2021, and two responses in FY 2022. Such responses are not mandatory.

PROGRAM DESCRIPTION

Utilization of the Energy Loan Program is a measurement of the actual loan amount awarded to borrowers compared to the amount of funds announced as available during the fiscal year. Available funds vary from year-to-year based on loan repayments and early payoffs.

Actual loan utilization decreased dramatically in FY 2020 and 2021 due to COVID-19.

Base Goal - Increased loan utilization is expected in the future due to enhanced marketing and outreach to potential borrowers.

Stretch Goal - Based on Energy Loan Program fully utilizing offered funds in FY 2023 - FY 2025. 100% utilization allows for the greatest investment in energy efficiency projects.

The Weatherization Assistance Program provides energy efficiency measures to eligible homes resulting in persistent energy savings for each client of approximately \$375.11 per year (based on computerized audits completed on each individual home weatherized in Missouri). The division encourages an increased number of cost-effective measures to be installed on each home to maximize energy savings. There were 1,450 residences weatherized in Missouri during FY 2022. Typical measures include, but are not limited to:

- Blower door test to identify sources of air infiltration
- · Sealing leaks identified by the blower door test
- · Installation of insulation in ceilings, walls, floors as indicated by testing
- · Clean and tune and/or replacement of furnaces when required
- Checks of all combustion appliances to detect gas leaks, drafting issues, etc.
- · Installation of ventilation fans as indicated by testing

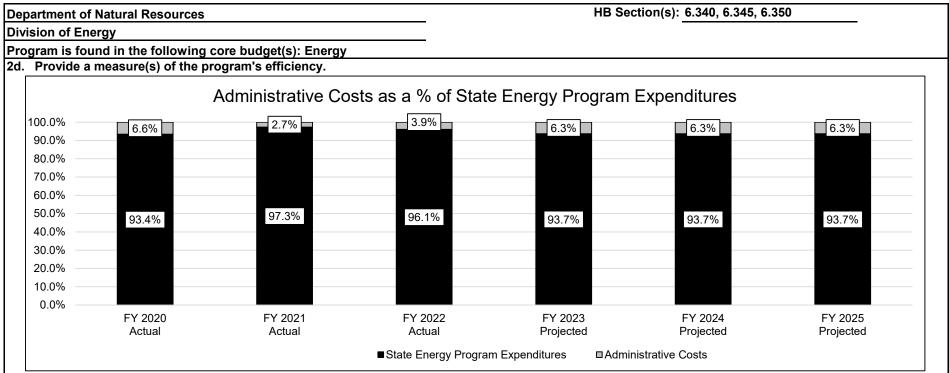

Base Goal is to increase the initial first year energy savings on homes by installing additional weatherization measures.

Stretch Goal is to increase the initial first year energy savings on homes by installing all viable weatherization measures.

This measure reflects engaging with energy providers and stakeholders to identify Missouri's future energy needs, collaboratively achieving grant milestones, supporting and improving stakeholder initiatives, streamlining the Division's regulatory processes, and identifying energy-savings opportunities. Stakeholder engagement includes one-on-one interactions as well as collaboration with private-sector and public-sector partners to better meet identified goals.

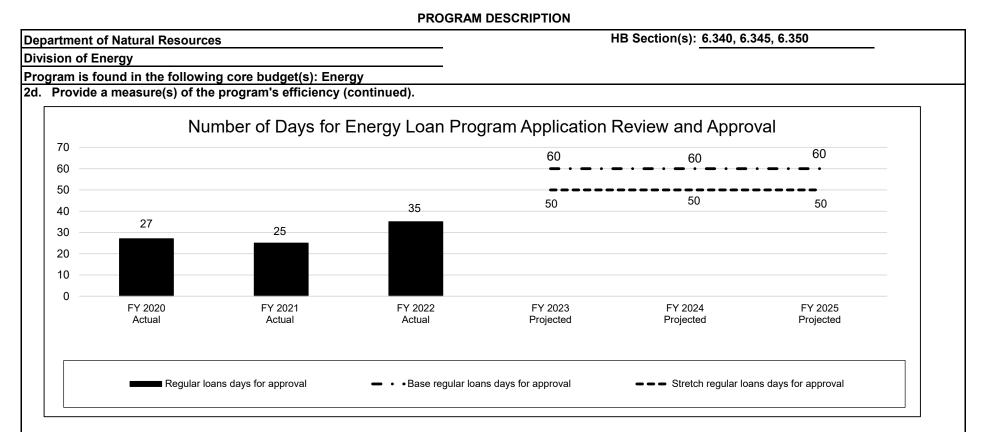

PROGRAM DESCRIPTION

The Division of Energy's fiscal staff provide administrative services to support programmatic activities of the State Energy Program. Services include, but are not limited to: grant applications, reporting and expenditure tracking; accounts payable and receivable processing; budgeting; and procurement.

The base goal of 6.3% and the stretch goal of 6.0% are based on steady funding levels and increased staff productivity due to software enhancements and skills gained through on-the-job training.

The actual rates in FY 2021 and FY 2022 are outliers caused by loans from prior years paying out during that year.

Per Energy Loan Program rules, the Division of Energy has 90 days after the application submission deadline to review and approve or disapprove loan requests. The deadline is extended if the Division of Energy requests additional information or clarification from the prospective borrower.

Energy Loan Program review includes receipt of a fully completed application with supporting documentation, evaluation by a Division of Energy Professional Engineer to ensure the estimates appear to be reasonable and the project feasible, and approval from the Department's chain of command to offer the loan.

There were no emergency loans in FY 2020 through FY 2022. However, the goal is to process these loans within 6-10 days.

HB Section(s): 6.340, 6.345, 6.350 Department of Natural Resources Division of Energy Program is found in the following core budget(s): Energy Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year. FY 2022 Actual

Financial data includes operating and pass-through appropriations. Pass-through appropriations have been provided to allow for encumbrance and payment of our commitments, which often span multiple fiscal years causing high unexpended balances. Not included in the data above is appropriation authority of \$18,000,000 in FY 2023 for encumbrance purposes only, which must lapse. Otherwise, FY 2023 Planned is shown at full appropriation.

Other Funds: Utility Revolving Fund (0874)

Core Reduction: The FY 2024 Budget Request includes a core reduction of \$9,040,068 one-time authority from the FY 2023 budget.

2. CORE DESCRIPTION

The General Assembly created the Municipal Utility Emergency Loan Program (MUELP) in House Bill 15 (2021) to provide \$50 million in zero-interest loans to natural gas and electricity municipal utilities and municipal utilities' commissions for increased costs incurred due to the February 2021 extreme winter weather event. The Division of Energy began accepting applications on June 2, 2021, and as of June 30, 2022, had loaned (expended) approximately \$43 million.

Loans are to be repaid within 5 years; repayments are deposited into the Utility Revolving Fund. This appropriation allows transfer of the repayments from the Utility Revolving Fund into the General Revenue Fund.

| Department of Natural Resources | | Budget Unit 78210C |
|---------------------------------|-------------|-------------------------|
| Division of Energy | | |
| Weatherization Training Center | DI# 1780017 | HB Section <u>6.340</u> |

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The Bipartisan Infrastructure Law (BIL) contains provisions allowing for a significant increase in funding for weatherization of low income households. The Division of Energy (DE) has historically assisted households with weatherization. In order to provide weatherization services, contractors must meet federal standards. In the past, DE contracted for accredited training and providers, making sure that when the weatherization occurs, it meets federal standards. The contract with the accredited organization is entering the last year, and the contracted training provider will no longer provide these services. The department is seeking a more cost-effective solution not dependent on contracted services.

The department sees the creation of an accredited training center with certified staff as an opportunity to fill a gap between current and projected demand for federally mandated training that will support DE's weatherization program. DE would become the training provider and test proctor with responsibility for scheduling and instruction, resulting in the provision of high quality training for Missouri providers. The training center will represent an important new workforce development tool. This will allow DE to respond to changes in the energy sector while providing affordable, reliable, Missouri-centered services. With the training center, training offerings could be diversified for other state and federal requirements.

Approximately 12,000 sq. ft. of combined warehouse and office/classroom space is needed for training and testing. Operational staffing, as well as furnishings and lab equipment are requested through this new decision item. There is a corresponding NDI in HB 13 for facility buildout costs, rent, utilities, and janitorial.

NEW DECISION ITEM

RANK: 021

OF 024

| Department of Natural Resources | | Budget Unit 78210C |
|---------------------------------|-------------|--------------------|
| Division of Energy | | |
| Weatherization Training Center | DI# 1780017 | HB Section 6.340 |

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

Cost: Facility buildout included in HB 13, to include classroom training space, rent, utilities, and janitorial is estimated at \$1,483,160. A portion of the training space within the facility will include the construction of a mini-home as well as the purchase of an older-model mobile home (included below in HB 6). Each of these building types have specific and different training protocols.

Funding: Initial funding is available through a portion of the federal BIL Weatherization Training and Technical Assistance funding (first five years), and ongoing funding available through annual federal Weatherization Formula award funding.

FTE: Initially, DE would staff with 3 FTE (instructors and administration combined, included in this request). As course offerings and provided services are expanded and client counts increase, an additional 2 FTE are expected as the center will be more often in use. Staff duties to include classroom training, hands-on training, mentoring, test proctoring, administrative duties, etc.

Of the initial 3 FTE, two FTEs are needed for Instruction/Proctoring. The Division of Energy anticipates scheduling three required courses (Energy Audit, Quality Control Inspector, Retrofit Installer), each 40 hours, each 11 times per year (1,320 classroom instruction hours). DE anticipates scheduling pre-apprenticeship course throughout the year (approximately another 600 classroom instruction hours). Instructor preparation, test proctoring, and post-instruction follow-up will add more than 1,200 staff hours per year. One instructor/proctor would be a supervisor and would need time for administrative/supervisory responsibilities. Also needed is one FTE Administrative Professional to provide customer service (in-person, phone, email, online), maintain the learning management system and online profile (website), keep records, complete reporting, process purchasing, etc.

Assumptions: Based upon similar facilities in other states, a building with approximately 12,000 square feet of space is needed to provide necessary and required training to weatherization workers in Missouri. Looking forward, it will be less costly to the Weatherization network of 18 providers for DE-Weatherization staff to provide trainings when compared with contract trainers. This training has been outsourced for several years. However, with that provider retiring, and additional federal funding now available that can be used to start the new facility, this is the ideal time to make the change to state-provided training.

One time costs: Stocking the facility with tables, chairs, computers, tablets, combustion appliances (for testing/training purposes), supplies, mini-home prop construction, and the purchase of an older-model mobile home are included in this request.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Funding provided under Sec. 40101(d) of the Bipartisan Infrastructure Law (BIL, Public Law 117-58) establishes a formula grant program for preventing outages and enhancing the resilience of the electric grid. Funds may be used for resilience-related investments such as grid hardening and modernization, microgrids, and advanced modeling technologies. Funding may also be used to train, recruit, retain, and reskill skilled and properly credentialed workers to perform the work associated with such measures. The Division plans to administer the funds by leveraging the "Roadmap to Resilience" created under a prior competitive award from the United States Department of Energy (USDOE). The program will also be designed with consideration of the State Energy Security Plan updated by MoDNR Division of Energy under State Energy Program formula funding from the USDOE.

Per the BIL, subawardees will need to provide a 100% match, although entities selling 4,000,000 megawatt-hours or less of electricity per year will only need to provide a one-third match. Further, states must set aside a proportionate share of funds for smaller entities equal to the share of customers that these smaller entities serve; this constitutes approximately 42.3% of Missouri's funds.

A 15% state match will be required (approximately \$2,083,804 for years one and two of a five year funding formula). This can take the form of cash match or in-kind match. Per guidance from USDOE, the Division may request applicants provide additional matching funds to cover the state's 15% match requirement.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

The initial estimated allocation of funds for years one and two is \$13,892,028. Of that, up to 5% can be kept for administrative costs and technical assistance with the balance being used for pass-through purposes. Future year amounts are unknown and subject to USDOE allocations. Expected workload for the corresponding job duties based upon the Division's historical experience equates to one FTE.

Reverted includes the statutory three-percent reserve amount (when applicable).

Restricted includes any Governor's Expenditure Restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

(1) Appropriation for Wood Energy decreased to \$740,000 in FY 2021, increased to \$1,500,000 in FY2022, and increased to \$3,000,000 in FY 2023. The tax credit expired June 30, 2020.

(2) Expenditures from this appropriation include tax credits issued <u>and</u> redeemed during the fiscal year.

Other Funds: State Park Earnings Fund (0415); Cost Allocation Fund (0500); Parks Sales Tax Fund (0613); Meramec-Onondaga State Parks Fund (0698); Rock Island Trail State Park Endowment Fund (0908); and Babler State Park Fund (0911)

Core Reduction: The FY 2024 Budget Request includes a voluntary core reduction of \$20,000 Expense and Equipment authority.

2. CORE DESCRIPTION

Missouri State Parks operates and/or maintains 92 state parks and historic sites plus the trails of Roger Pryor Pioneer Backcountry. The total acreage of the state parks and historic sites (approximately 160,000 acres) is less than one half of 1% of the total acres in Missouri. The mission of the division is to preserve and interpret the state's most outstanding natural features and cultural landmarks and to provide appropriate recreational opportunities in these areas. The program's pass-through authority is located in a separate core decision item form.

3. PROGRAM LISTING (list programs included in this core funding)

Other Funds: State Park Earnings Fund (0415); Parks Sales Tax Fund (0613)

The budget includes appropriation authority of \$27,400,000 to be used for encumbrance purposes only related to Outdoor Recreation Grants.

Core Reduction: The FY 2024 Budget Request includes a voluntary core reduction of \$100,000 parks resale pass-through authority.

2. CORE DESCRIPTION

Missouri State Parks provides management and oversight of the following pass-through programs: Bruce R. Watkins Cultural Heritage Center in Kansas City, Payment in Lieu of Taxes (PILT), Gifts to State Parks, State Parks Resale, Concession Default, State Park Grants, and Outdoor Recreation Grants. This authority is needed to honor contractual agreements as well as statutorily and constitutionally mandated obligations, and provides authority to spend donations/awarded grants, conduct resale operations in state parks and historic sites, administer federal pass-through grants, and for continuation of public services in the event of contracted concessionaire default.

3. PROGRAM LISTING (list programs included in this core funding)

| | (1) | (1) | (1) (2) | (1) (2) | | | | | |

Reverted includes the statutory three-percent reserve amount (when applicable).

Restricted includes any Governor's Expenditure Restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

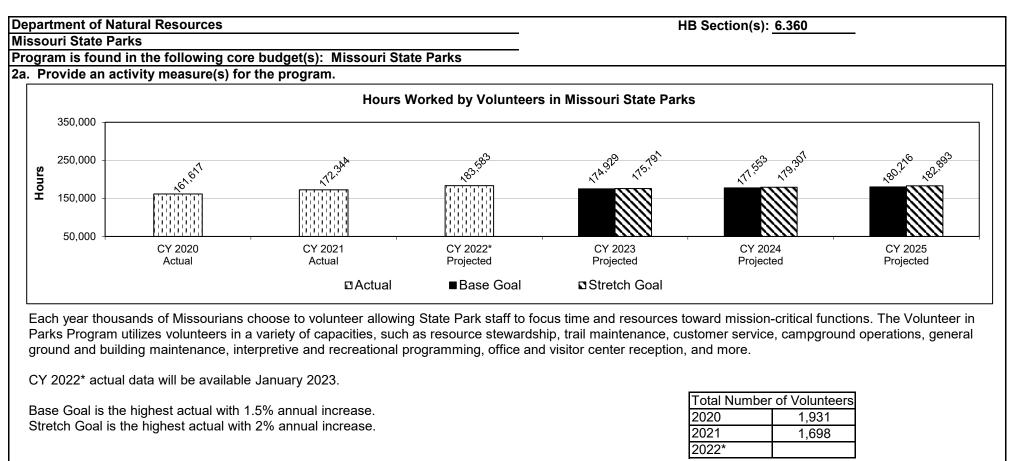

(1) In many cases, pass-through appropriation has been provided to allow for encumbrance and payment of our commitments, which often span multiple fiscal years, causing high unexpended balances. Included in the data is also appropriation authority to encumber outdoor recreation grant commitments which must lapse (\$17.8 million FY 2020 - FY 2022, and \$27.4 million FY 2023).

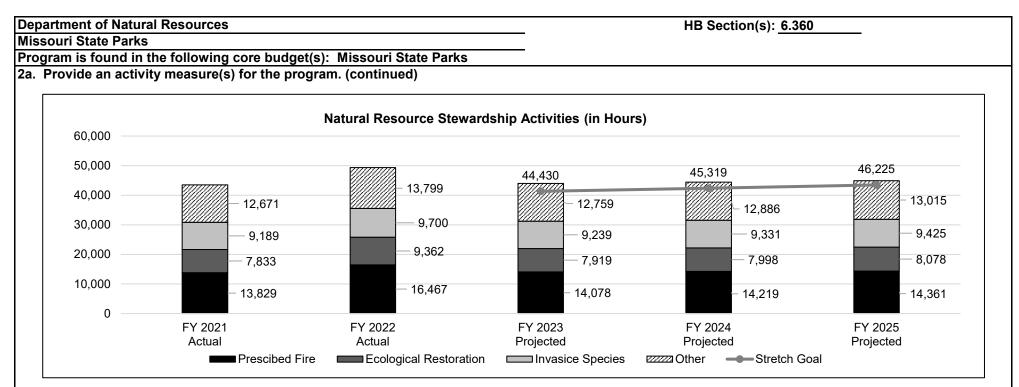

(2) FY 2022 and FY 2023 include \$150,000 for Bruce R. Watkins Strategic Plan & Programming.

| epartment of Natural Resources HB Section(s): 6.360 |
|---|
| ssouri State Parks |
| ogram is found in the following core budget(s): Missouri State Parks |
| . What strategic priority does this program address? The Missouri State Parks system preserves and interprets the state's most outstanding natural and cultural resources and provides family friendly outdoor recreational opportunities. |
| What does this program do? <u>Recreation Management and Law Enforcement</u> : Operate and/or maintain 92 State Parks and Historic Sites statewide with a wide variety of amenities such as camping, lodging, park stores, boat rentals, trail system, and other visitor services. State Park Rangers provide law enforcement services and protect park visitors, their property, and cultural and natural resources. |
| Maintenance, Repair, and Construction: Evaluate, design, and construct projects and major repairs to parks' facilities such as buildings, roads, bridges, trails, visitor centers, campgrounds, shower houses, historic properties, and water/wastewater systems. |
| Natural Resource Management: Preserve and manage native ecosystems and species, manage invasive species and conduct prescribed burns, secure research agreements, and maintain natural resource collections and databases. |
| Cultural Resource Management: Identify and preserve historic buildings and landscapes, archaeological sites, artifacts, and other cultural resources. |
| Resource Interpretation Management: Develop and review exhibits and interpretive panels; implement facility-specific interpretative plans; and develop and present interpretive programs and other educational material to help the public understand and appreciate the natural and cultural resources of Missouri. |
| Grants Management: Provide outdoor recreation grants to local communities from federal, state, or other sources. Identify grants for state park facilities, operations, and programs. |
| Program-Specific Funding: Includes authority for the Bruce R. Watkins Cultural Heritage Center, Payment in Lieu of Taxes (PILT), Gifts to State Parks, State Parks Resale, Concession Default, State Park Grants, and Outdoor Recreation Grants. This authority is needed to honor contractual agreements as well as statutorily and constitutionally mandated obligations, and provides authority to spend donations/awarded grants, conduct resale operations in state parks and historic sites, administer federal pass-through grants, and for continuation of public services in the event of contracted concessionaire default. |

| | | | (1) | | |

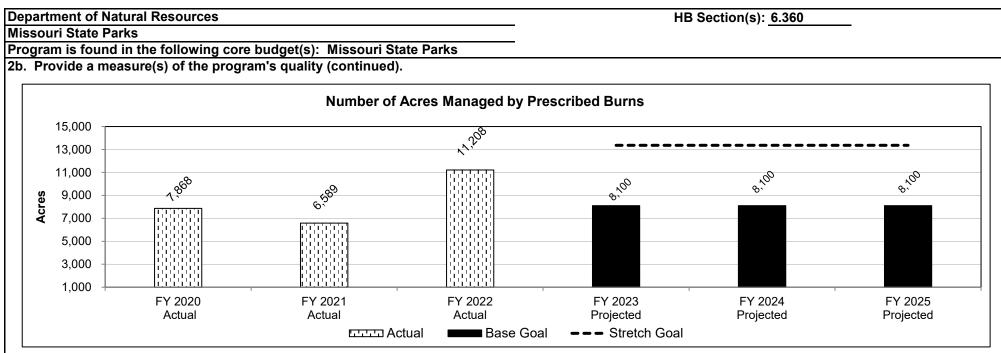

A Stewardship Tracking system was implemented July 1, 2020 and tracks hours worked doing natural resource stewardship activities. These hours are reported for employees, volunteers, AmeriCorps, contractors, and others and within nine categories: prescribed fire, fireline preparation, invasive species, ecological restoration, biological inventory and monitoring, stewardship training (provide and receive), feral hog control, deer management, and other.

Base Goal is the highest actual plus 1% annual increase. Stretch Goal is the highest actual plus 2% annual increase.

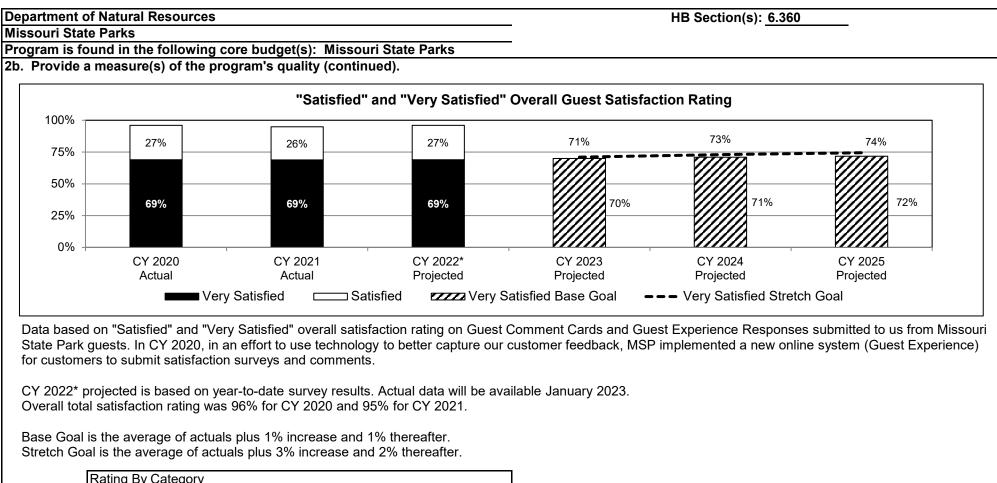

Prescribed fire is used to restore natural communities, preserve natural areas, manage native plants and wildlife, improve pollinator habitat, suppress invasive plants, and reduce wildfire potential. The prescribed burn management goal is to burn each unit on a 3-5 year cycle, ideally every three years. The fire season runs from October through March each year. Percentage of designated acreage burned are as follows: FY 2020 is 19%, FY 2021 is 17%, and FY 2022 is 28%.

Base Goal is 20% of the 40,500 acres currently designated for fire management. Stretch Goal is 33% of the 40,500 acres currently designated for fire management.

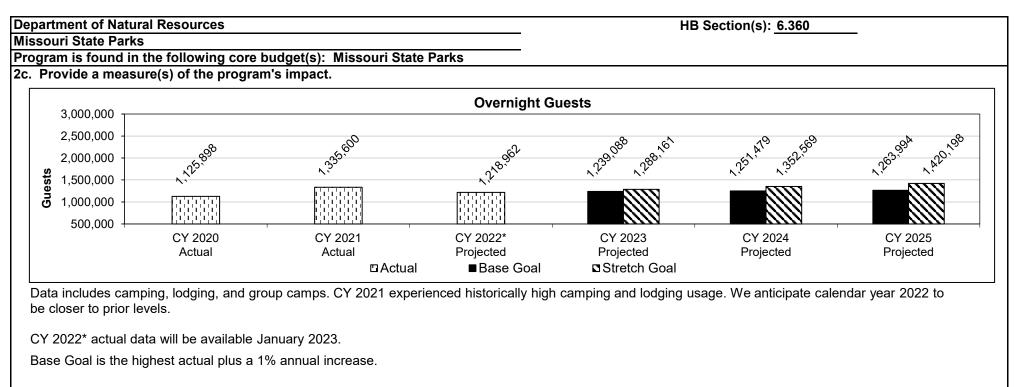

The number of acres managed annually is heavily dependent on weather conditions. Conditions during FY 2020 and FY 2021 limited the amount of fire management through the fall. Conditions during FY 2022 provided more opportunities to complete prescribed burns.

| | | | | | | |

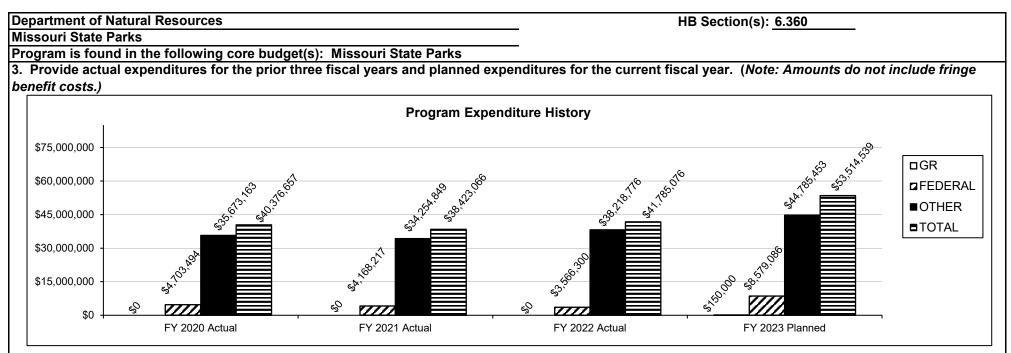

For the first time since 2003, MSP lowered their reservation fee. Beginning in 2022, web reservations are now \$6.50 and call center reservations are \$8.00, down from \$8.50.

The cost of a two-night stay for an electric site at Missouri State Parks is \$52.50, which includes electric camping rate and web reservation fee. The average cost of a two-night stay for an electric site in the surrounding states is \$58, which includes electric camping rate, entrance rate, and camping reservation fee.

Included above is \$68,723 actual FY 2022 Other Fund spending from the agency wide DNR PS budget unit related to FY 2022 supplemental pay plan.

Financial data includes operating and pass-through appropriations. In many cases, pass-through appropriation has been provided to allow for encumbrance and payment of our commitments, which often span multiple fiscal years causing high unexpended balances. Not included in the data above is appropriation authority of \$27,400,000 for Outdoor Recreation Grants encumbrance purposes only which must lapse. FY 2023 Planned is shown at full appropriation.

4. What are the sources of the "Other " funds?

State Park Earnings Fund (0415); Cost Allocation Fund (0500); Parks Sales Tax Fund (0613); Meramec-Onondaga State Parks Fund (0698); Rock Island Trail State Park Endowment Fund (0908); and Babler State Park Fund (0911)

| | FORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional |
| unding | 1.) |
| 6a. | Provide an activity measure(s) for the program. |
| | Activity measure for the funding requests will be the initial development, operations, and staffing of the Bryant Creek and Shepherd of the Hills State Parks. |
| 6b. | Provide a measure(s) of the program's quality. |
| | This request helps achieve the mission of Missouri State Parks by preserving and interpreting the states most outstanding natural landscapes and cultural landmarks, and to provide outstanding recreational opportunities compatible with those resources. |
| 6c. | Provide a measure(s) of the program's impact. |
| | This will increase the number of interpretive program participants, educating others by reaching new and expanded audiences. |
| 6d. | Provide a measure(s) of the program's efficiency. |
| | Monitor expenses to ensure they stay within the allocated budget while attaining all other goals. |
| | |
| 7. STR | ATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS: |
| | Progress of development and operational activities will be monitored regularly. |

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an activity measure(s) for the program.

Activity measure for this funding request will be ongoing operations and initial maintenance, such as fencing and securing crossings, bridges, and tunnels of the Rock Island Corridor project.

6b. Provide a measure(s) of the program's quality.

This project provides improved customer satisfaction by increasing available trails throughout the State of Missouri meeting the needs of visitors and overnight guests at state parks, historic sites, and campgrounds.

6c. Provide a measure(s) of the program's impact.

Program impact will be measured by completion of securing necessary personnel to maintain ongoing operations as well as complete initial maintenance projects including fencing, signage, and securing crossings, bridges, and tunnels.

6d. Provide a measure(s) of the program's efficiency.

Program efficiency based on ongoing operations and availability of trail usage to the public.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

Securing additional appropriation will safeguard the state's ability to take advantage of a unique opportunity to invest federal funding to enhance the development of additional public trails throughout the State.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

To ensure the department complies with the LWCF State Assistance Manual, additional resources are needed to fulfill the department's stewardship obligations. There are currently over 1,700 awarded LWCF grants. The NPS requires DNR to inspect each park every five years to ensure the parks are open and available for public use in accordance with the LWCF Act and 36 CFR 59.

Upon approval of the federal budget, the Department would need additional federal FTE authority and increased personal services appropriation. LWCF grants are 50/50 match. To be the best stewards of the state's funds as well as meet the requirements of the grant program, the department requests two FTE. The funding and responsibilities of existing positions would realign to meet the needs of the revised LWCF grant program.

In determining this request, DNR evaluated how much time it would take to inspect those parks and address any stewardship concerns, while also administering active grant projects.

The Department receives Land and Water Conservation Fund (LWCF) and Outdoor Recreation Legacy Partnership Program (ORLP) grants to help communities develop outdoor recreation opportunities. The total number of applications received far exceeds the funding available, thus the Department is able to fund less than half of the community grant requests each year. Additional staff would allow us to better serve these communities.

The Department receives Land and Water Conservation Fund (LWCF) and Outdoor Recreation Legacy Partnership Program (ORLP) funds to help communities develop outdoor recreation opportunities in their area.

* Park Amenities are a portion of most projects and may include projects like restrooms, parking, and water fountains.

**FFY 2022 Projected will be updated in October to actuals.

architectural, and archaeological resources. The SHPO coordinates nominations to the National Register of Historic Places, conducts Section 106 reviews (under Section 106 of the National Historic Preservation Act, SHPO must participate in the review of all federal agency actions when federal funding, permitting, or licensing is involved), reviews rehabilitation projects for state and federal income tax credits, and responds to archaeological issues such as unmarked human burials. The program's pass-through authority is located in a separate core decision item form.

| | | | | | | | | |

Reverted includes the statutory three-percent reserve amount (when applicable).

Restricted includes any Governor's Expenditure Restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

(1) In many cases, pass-through appropriations are set at a level to encumber and pay our commitments, which often span multiple fiscal years. This often causes high unexpended appropriation balance.

(2) FY 2020 and FY 2022 include voluntary core reductions in pass-through authority to align encumbrance and grant needs.

Department of Natural Resources MSP - State Historic Preservation

HB Section(s): 6.365

Program is found in the following core budget(s): State Historic Preservation 1a. What strategic priority does this program address?

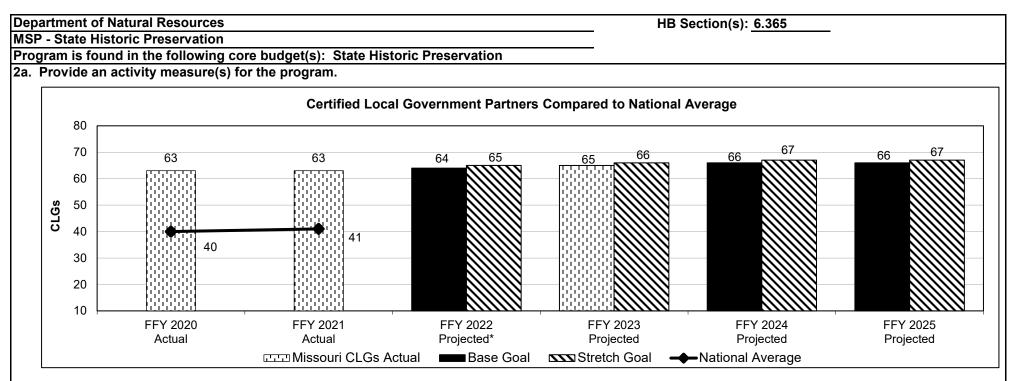

The State Historic Preservation Office provides knowledge and resources to our citizens to build stronger and more resilient communities.

1b. What does this program do?

The State Historic Preservation Office provides historic preservation services to the citizens of Missouri and is responsible for establishing, implementing, and administering federal and state programs or plans for historic preservation. The responsibilities of the State Historic Preservation Office include:

- Coordinating the National Register of Historic Places program for the state of Missouri, including the identification of eligible properties and processing of incoming nominations.
- Preparing and implementing a comprehensive statewide historic preservation plan, coordinating survey efforts of historic properties, and maintaining inventories of archaeological and architectural properties.
- Administering the state program of federal assistance for historic preservation within the state, including administration of historic preservation fund grants.
- · Cooperating with local governments in the development of local historic preservation programs.
- Consulting with federal agencies in accordance with the National Historic Preservation Act (NHPA) on federal undertakings that may affect historic properties.
- Providing advice and assistance in the evaluation of proposals for rehabilitation projects that may qualify for state or federal assistance (such as preservation tax incentives).
- Assuming responsibility for unmarked human burials or human skeletal remains and ensuring proper disposition in compliance with state and federal requirements.
- Providing public information, education and training, and technical assistance relating to the federal and state historic preservation programs.

The Certified Local Government (CLG) program is the official preservation partnership connecting local, state, and federal governments. Communities in this network receive technical and financial assistance to save local historic places for future generations. Since the program's creation in 1980, it has grown to include 2,073 CLGs with 64 in Missouri, ranking us 12th nationally for the most CLGs.

FFY 2022* data will be available December 2022.

Base Goal is the highest actual from prior 3 years plus a slight annual increase. Stretch Goal is one additional over the base goal.

Under Section 106 of the National Historic Preservation Act, SHPO reviews federal agency undertakings when federal funding, licenses, permits or projects that take place on federal land are involved to determine if the project has the potential to affect historic properties. The Department expects an increase of Section 106 reviews associated with the American Rescue Plan Act (ARPA), the Infrastructure Investment and Jobs Act, and any other stimulus funding; FFY 2022 to FFY 2024 average processing times may be impacted.

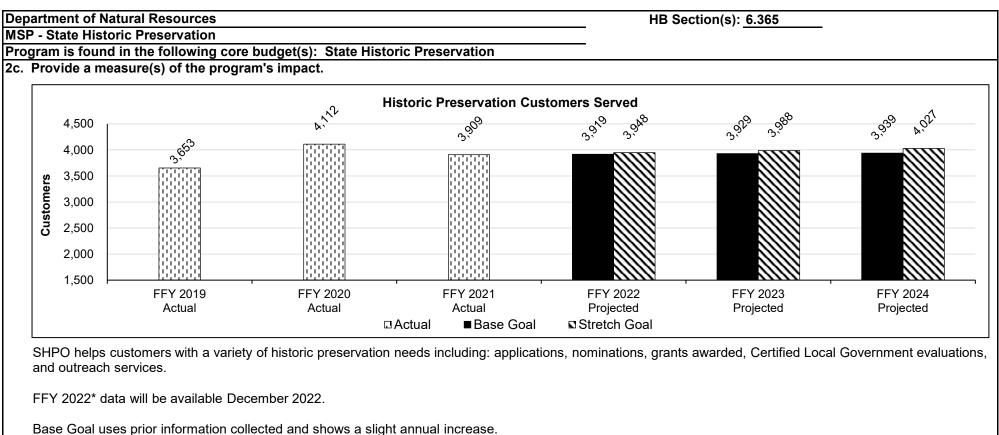

FFY 2022* data will be available December 2022.

Base Goal: Review applications in 18 days or less.

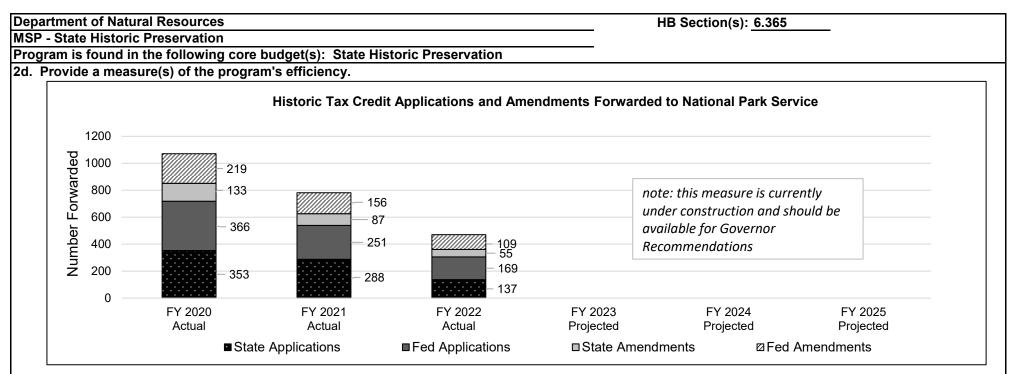

Stretch Goal: Decrease the number of days it takes to review Section 106 applications to 17 days or less.

| Number | of Project Ap | olications |
|--------|---------------|------------|
| FFY | Received | Reviewed** |
| 2020 | 3,473 | 3,895 |
| 2021 | 2,952 | 3,251 |
| 2022* | | |

**Some projects may require multiple reviews throughout the application process. Processing time averages include each review separately.

Stretch Goal assumes a 1% annual increase over prior stretch goal.

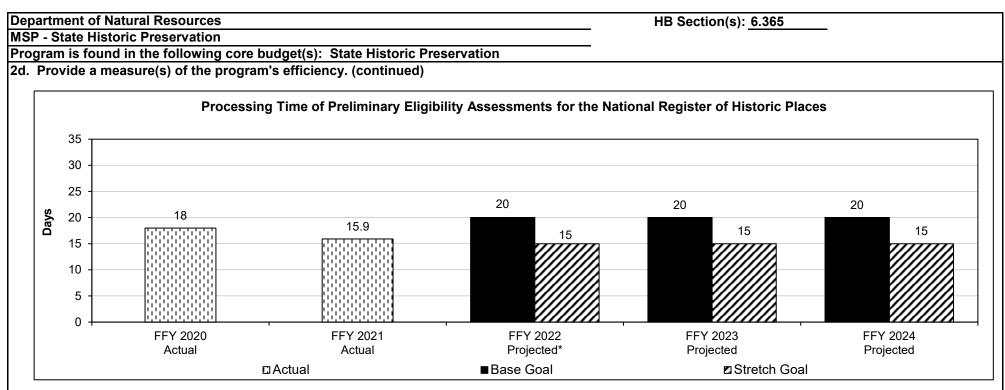

The State Historic Preservation Office (SHPO) is responsible for assisting the National Park Service and the Missouri Department of Economic Development in administering their historic tax credit programs by reviewing federal and state historic tax credit applications. SHPO's role is to determine whether the proposed and completed rehabilitation meets the Secretary of the U.S. Department of the Interior's rehabilitation standards. Processing time is a coordination between the SHPO, the applicant, and other agencies. Missouri is consistently ranked in the top 5 nationally for federal historic tax credit applications forwarded in an individual year.

Base Goal: Review and forward federal and state applications and minimize the number of applications pending review within the fiscal year.

Stretch Goal: Increase the number of federal and state historic tax credit applications reviewed each year and reduce the number of applications pending review each fiscal year.

| | Total Number of Applications | | | | | | | | | | |
|-------------|------------------------------|-----------|---------|--|--|--|--|--|--|--|--|
| Fiscal Year | Received | Processed | Pending | | | | | | | | |
| 2020 | 794 | 1,071 | 264 | | | | | | | | |
| 2021 | 636 | 782 | 118 | | | | | | | | |
| 2022 | | | | | | | | | | | |
| Total | 1,430 | 1,853 | | | | | | | | | |

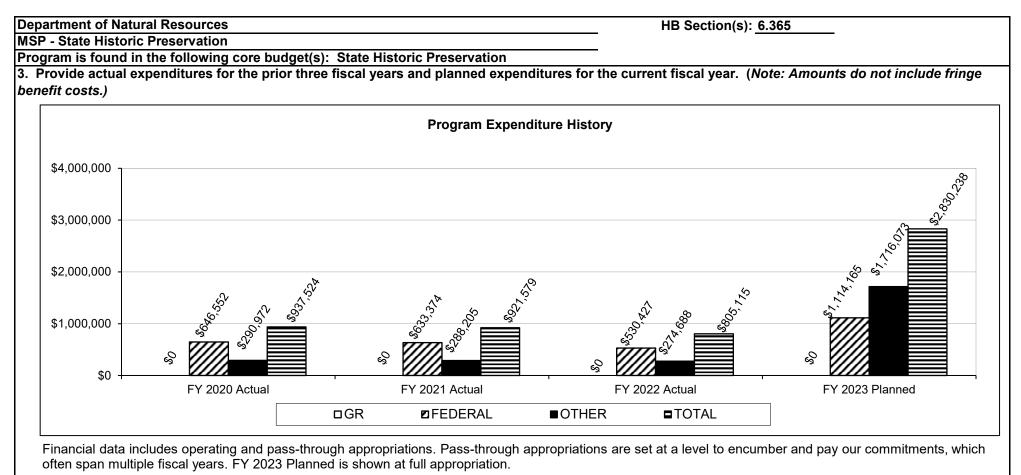

Eligibility assessments are a preliminary step that provides staff the opportunity to assist customers early in the process of writing a National Register of Historic Places nomination which makes the final review process more efficient. SHPO encourages members of the public to submit Eligibility Assessments as the first step in the National Register of Historic Places nomination process. Every assessment is reviewed within 30 days by SHPO staff.

FFY 2022* data will be available December 2022.

Base Goal: Review applications in 20 days or less.

Stretch Goal: Decrease the number of days it takes to review these assessments to 15 days or less.

2. CORE DESCRIPTION

As the designated trustee for natural resources for the State of Missouri for purposes of state and federal law, the Department assesses injuries to natural resources resulting from the release of hazardous substances or pollutants to the environment. Where appropriate, the Department recovers damages from parties who cause natural resource injuries. Such damages may include the cost of restoring the natural resources or the cost of the lost use of the resources. Additionally, the Department may recover reasonable costs incurred in assessing injuries. Damages recovered are then available to restore or replace the injured resources, as well as for future assessment, restoration, or rehabilitation of injured natural resources and related costs.

Recovered monies fund "on-the-ground" long-term restoration projects to benefit aquatic and terrestrial habitat, groundwater, and surface waters. The Department and, where federal law applies, the federal trustees issue Requests for Proposals (RFPs) for restoration, award project funds, and implement natural resource habitat restoration projects statewide. Restoration projects to restore areas impacted by mining are ongoing in Southwest Missouri and in the Big River and Viburnum Trend areas of the Southeast Missouri Lead Mining District. The Department is currently funding groundwater restoration projects in the Kansas City and Springfield areas.

| | (1) | (1) | (1) | | | | | | | |

Reverted includes the statutory three-percent reserve amount (when applicable).

Restricted includes any Governor's Expenditure Restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

(1) In recent years, the Department focused staff time on developing and implementing on-the-ground restoration projects to benefit local communities and the environment. Appropriations are set to allow for expenditures that will occur under the restoration plans for projects in current and future fiscal years. Higher appropriation amounts allow the Department to encumber and pay our restoration commitments, which often span multiple fiscal years and can result in unexpended appropriation balances. Significant spending of restoration funds is anticipated in FY 2023 and future fiscal years.

Department of Natural Resources AWO - Environmental Restoration

HB Section(s): 6.375

Program is found in the following core budget(s): Environmental Restoration

1a. What strategic priority does this program address?

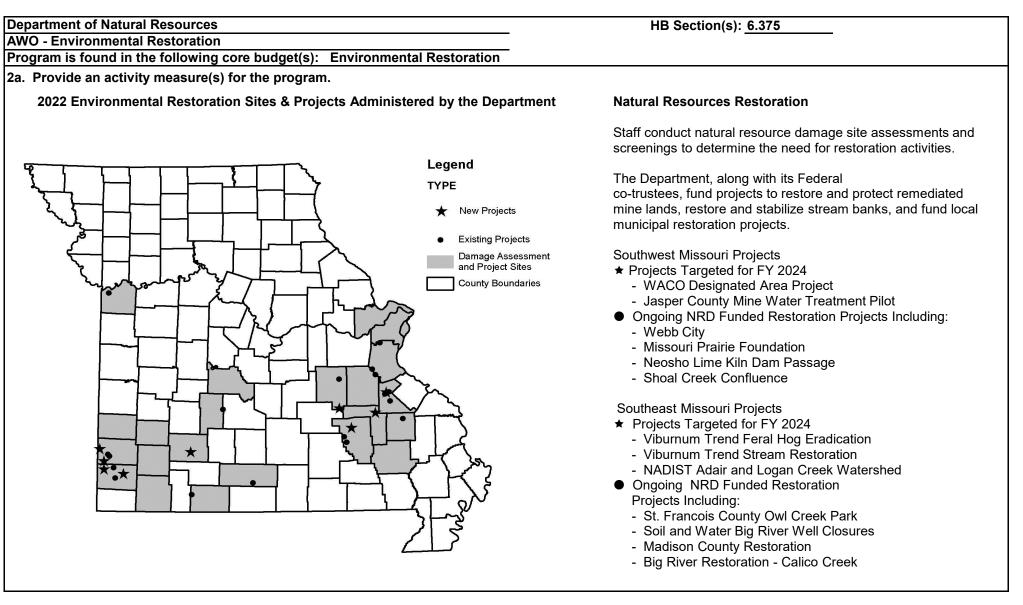

Environmental Restoration efforts help Missouri citizens thrive by managing natural resources to promote a healthy environment and economy by:

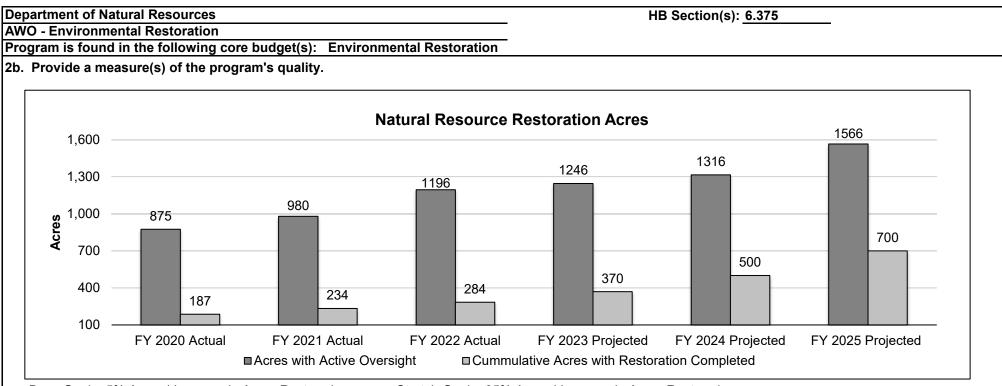

- Promoting environmental responsibility and resource stewardship.
- Enhancing services, information, and communication to improve customer experience.
- Supporting outdoor recreation and economic development.
- Modernizing community infrastructure, strengthening workforce, and supporting economic development.
- Improving internal processes to better serve our customers.

1b. What does this program do?

Violations of environmental laws can have a long-lasting effect on the state's natural resources and affect the quality of life of its citizens. Federal and state laws authorize the Department to recover damages from parties who cause injuries to natural resources. Recovered funds are then available to help replace or restore injured resources, provide improvements to offset the damage, or provide background data to help measure or mitigate similar future actions that may injure the environment.

Department staff work to determine the impacts of releases of pollutants and hazardous substances on the environment. Staff conduct natural resource damage (NRD) assessments at sites to determine the nature and extent of the impact of the release(s), seek monetary damages to compensate the public for injured or lost natural resources when appropriate, and implement on-the-ground restoration projects for injured natural resources in Missouri. Currently, there are ongoing restoration efforts in the Southeast, Southwest, and Kansas City areas of Missouri. These projects will continue for a number of years with recovered funds.

Base Goal = 5% Annual Increase in Acres Restored Stretch Goal = 35% Annual Increase in Acres Restored

Acres with active oversight and acres with active restoration completed will gradually increase over time as restoration projects are identified and initiated. Projects with active oversight will then begin to level out and decrease over time.

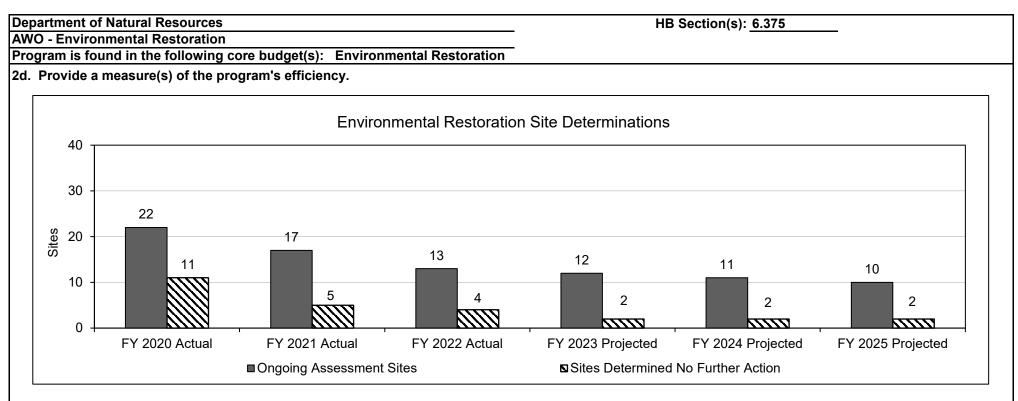

The Department and the Trustees fund on-site and compensatory projects to benefit habitat and allow for use of the restoration project areas. Projects include Webb City mine land restoration, prairie restoration, and soil and water stream bank stabilization projects. The goal of restoration projects is to compensate the public for the loss of natural resources.

| | Actual | Actual | Actual | Projected | Projected | Projected | |

Restoration projects frequently may span multiple years from initial funding to completion due to complexity and size. We anticipate focusing on existing projects during the next three years rather than bringing in a large amount of new projects.

Annual Base Goal = Complete one project

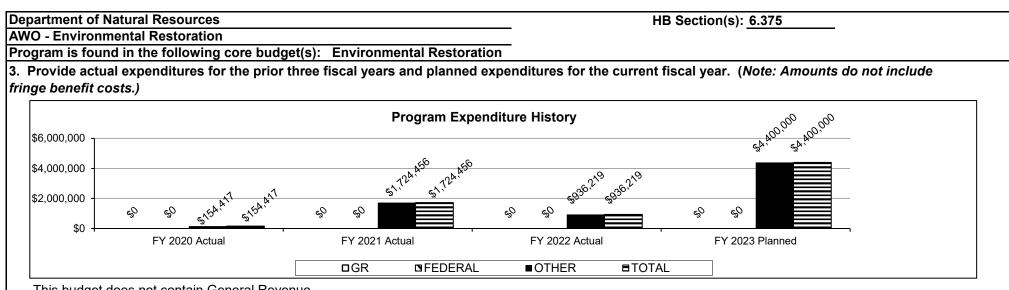

Annual Stretch Goal = Complete two projects

The chart represents the number of sites pending complete NRD assessments or actions and the number of sites that have been assessed and screened out with no further action required. Many legacy sites have been screened out and we anticipate screening in a minimal number of new sites in the future years.

Base Goal = 1 Site Determined No Further Action

Stretch Goal = 1 Site Determined No Further Action

This budget does not contain General Revenue.

Unknown settlements and level of work required each year may trigger a lapse of appropriation authority in any given year. In recent years, the Department has focused staff time on developing restoration plans for public comment and identifying restoration projects. Restoration project expenditures are anticipated to continue on existing projects as well as additional projects as they are identified. FY 2023 Planned is shown at full appropriation.

4. What are the sources of the "Other " funds?

Natural Resources Protection Fund – Damages Subaccount (0555); Natural Resources Protection Fund – Water Pollution Permit Fee Subaccount (0568)

5. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

| RSMo 640.235 | Natural Resources Protection Fund Damages |

AWO - Sales Tax Reimbursement to GR

Program is found in the following core budget(s): Sales Tax Reimbursement to GR

3. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year. (Note: Amounts do not include fringe benefit costs.)

This budget does not contain General Revenue. The majority of Missouri State Parks sales tax is collected and directly transferred to General Revenue by Parks' reservation contractor. FY 2023 Planned is shown at full appropriation.

4. What are the sources of the "Other " funds?

State Parks Earnings Fund (0415); DNR Revolving Services Fund (0425)

5. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

| RSMo 144.020.1 | Tax imposed upon all sellers |
|--------------------|------------------------------|
| RSMo 144.010.1(11) | Defines seller as a person |
| RSMo 144.010.1(6) | Defines person |

6. Are there federal matching requirements? If yes, please explain.

No

7. Is this a federally mandated program? If yes, please explain.

No

Agency Wide Operations

Cost Allocation and Federal Fund Transfers

HB Section <u>6.395, 6.400</u>

2. CORE DESCRIPTION

<u>Department:</u> Through a transfer to the Cost Allocation Fund, dedicated funds within the Department share in the cost of administering the programs in the Department. This cost share proposal uses the Department's federal indirect cost rate to allocate administrative costs to dedicated funding sources. The indirect cost rate is an established rate approved by our federal cognizant agency, the Environmental Protection Agency, and is used consistently throughout the Department. Each dedicated fund's share is based upon its proportionate percentage of personal services, fringe benefits, and expense and equipment appropriations.

HB 13: Through a transfer to the Cost Allocation Fund, dedicated funds within the Department share in the Department's HB 13 costs for leased and state-owned facilities.

<u>OA ITSD - DNR</u>: Through a transfer to the Cost Allocation Fund, dedicated funds within the Department share in the cost of the Office of Administration Information Technology Services Division - DNR (OA ITSD - DNR). In addition, a transfer from the Department's Federal Fund to the Office of Administration, Information Technology Services Division Federal Fund provides funding for OA ITSD-DNR's federal appropriations.

3. PROGRAM LISTING (list programs included in this core funding)

Not applicable - This core decision item represents appropriated transfers from the Department's dedicated funds to the DNR Cost Allocation Fund. These transfers provide funding for the Department's appropriations from DNR Cost Allocation Fund. The specific DNR Cost Allocation Fund appropriations/activities are included in other core budget decision items, HB 13 budget decision items, and OA ITSD - DNR (HB 5) budget decision items. In addition, this core decision item includes an appropriated transfer from the Department's Federal Fund to the OA ITSD's Federal Fund to provide funding for OA ITSD-DNR's federal appropriations.

The Environmental Improvement and Energy Resources Authority (EIERA) provides financing, research, and technical assistance for environmental and energyrelated projects. Section 260.010, RSMo, created and established the EIERA as a governmental instrumentality of the State of Missouri, functioning as a body corporate and politic. A five-member board appointed by the Governor directly oversees the activities of the Authority.

| | | | | | | | | |

Reverted includes the statutory three-percent reserve amount (when applicable).

Restricted includes any Governor's Expenditure Restrictions which remained at the end of the fiscal year (when applicable).

NOTES:

(1) Unexpended in Other Funds appropriation is due to staffing plan and project scheduling. The budget is continually reviewed to align with planned spending.

| PROGRAM DESCRIPTION | DN |
|---|--|
| Department of Natural Resources | HB Section(s): <u>6.405</u> |
| Environmental Improvement and Energy Resources Authority (EIERA) | |
| Program is found in the following core budget(s): EIERA | |
| 1a. What strategic priority does this program address? | |
| The Environmental Improvement and Energy Resources Authority provides solutions that he research, and technical assistance in order to foster the responsible management of our air Missouri's economy. | |
| 1b. What does this program do? | |
| The Environmental Improvement and Energy Resources Authority (EIERA) provides financi related projects. The EIERA: | ng, research, and technical assistance for environmental and energy- |
| Issues municipal bonds to capitalize the State Revolving Fund (SRF) programs, which p Provides financial assistance through the Market Development Program to small busines materials while creating jobs. | |
| Issues municipal bonds on behalf of private and investor-owned utilities to finance pollut Provides low-cost financing and technical assistance to communities and businesses to Brownfields. | |
| Provides paying-agent services to investor-owned utilities that fund low-income weatheri throughout the state. | zation services through Community Action Agencies located |
| Provides paying-agent services and technical and administrative assistance for environn | ental restoration efforts. |

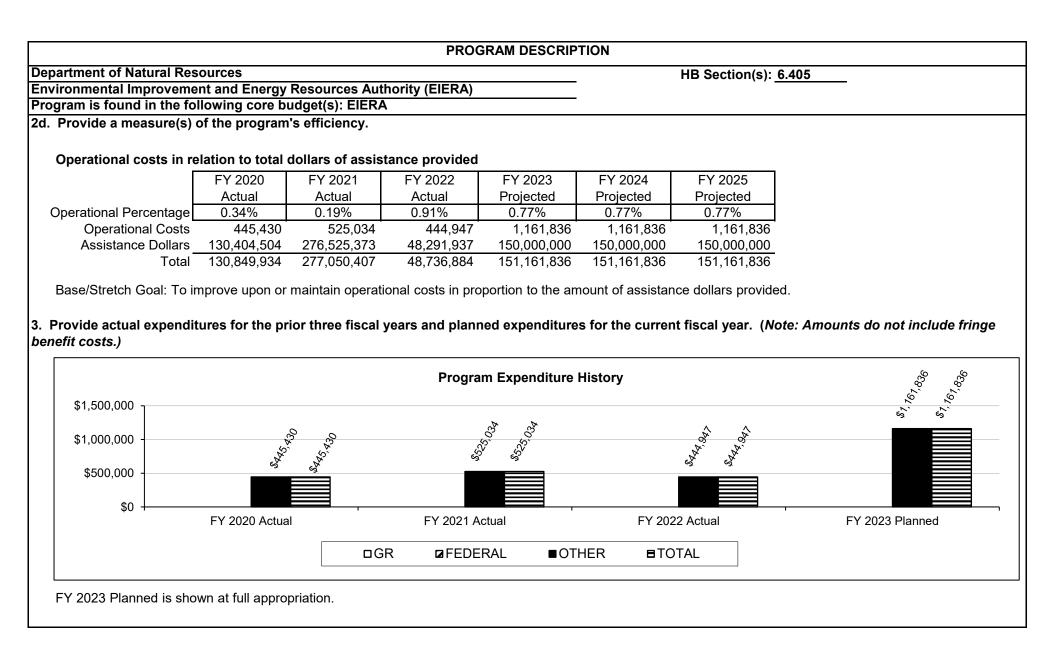

2a. Provide an activity measure(s) for the program.

Beneficiaries of EIERA Efforts

| | FY 2020 Actual | FY 2021 Actual | FY 2022 Actual | FY 2023 Projected | FY 2024 Projected | FY 2025 Projected |
|---|-------------------|-------------------|-------------------|----------------------|----------------------|----------------------|
| Water and Wastewater Systems | 17 | 11 | 8 | 12 | 12 | 12 |
| Other Governmental Entities | 2 | 1 | 0 | 5 | 5 | 5 |
| Private Entities (Small Businesses) | 24 | 22 | 13 | 17 | 17 | 17 |
| Total Project Assistance Dollars (in millions) * | \$130.4 mil | \$276.5 mil | \$48.3 mil | \$150.0 mil | \$150.0 mil | \$150.0 mil |

EIERA finance, research, and technical assistance supports entities in reaching their community development goals. *Drop in assistance dollars for 2022 is due to decrease in water/wastewater loan demand for that year.

provides an economical way for tank owners/operators to comply with this requirement. In addition, thousands of tank sites in the state were contaminated with petroleum before environmental laws were enacted and are not economically viable due to environmental liability. The PSTIF also pays for cleanup of these sites, subject to statutory criteria, which stimulates redevelopment of these properties.

The PSTIF is funded by a fee on all petroleum coming into the state and nominal fees paid by insured tank owners. It is managed by an 11-member Board of Trustees who has made preventing leaks a priority; loss ratios demonstrate the success of the Board's loss prevention efforts. This core funds all of the Board's staff and operating expenses including receipt/review of applications, deposit of participation fees, issuance of coverage documents, inspections, annual compliance reviews, loss prevention activities, accounting and annual audit, actuarial analyses and cash flow projections, data management, and coordination with other state agencies.

statutory criteria, which stimulates redevelopment of these properties. The PSTIF is funded by a fee on all petroleum coming into the state and is managed by an 11member Board of Trustees. It has a 12/31/2030 "sunset date".

This appropriation authorizes investigation, adjudication, and payment of claims. In addition, it authorizes refund of premiums when necessary.
