

## Single Feasible Source Purchase

Title: GT Software Maintenance

Description: The Family Assistance Management Information System (FAMIS) and the Missouri Automated Child Support System (MACSS) acquired maintenance services from GT Software via C215071001. Such maintenance services are proprietary to and only available from GT Software, the maintenance and support provider. GT Software supports the software used by FAMIS and MACSS, as well as The Missouri State Highway Patrol and the Department of Social Service, which have made a major investment in this software product. Such services are proprietary to and only available from GT Software. As a result, this represents a proprietary requirement that meets the criteria of a single feasible source under RSMo 34.044 and the State will be pursuing acquisition of the support services as a Single Feasible Source.

Agency: ITSD-DSS

Supplier: GT Software

Buyer: Daniel Engler
