Program Name: Affordable Housing Assistance Tax Credit Program						
Department: Missouri Housing Development Commission			Contact Name & No.: Megan Word, 816-759-6658			Date: January 2015
Program Category: Housing			Type: Tax Credit <u> x </u> Other (specify) _____			
Statutory Authority: Sections 32.105 - 32.125, RSMo			Applicable Taxes: Income Tax; Bank Tax; Financial Institutions Tax; Corporate Franchise Tax; Tax on Gross Receipts of Express Companies; Insurance Premium Tax			
Program Description and Eligibility Requirements: <p>The Affordable Housing Assistance Tax Credit Program (AHAP) is an incentive for businesses and qualified individuals in Missouri to participate in the production of affordable housing for low-income families. The credit can be used by a business or qualified individual as a reduction in their state tax obligation. To receive the AHAP credit, a business or qualified individual must donate cash, professional services or real or personal property to a non-profit housing organization to assist with the acquisition, rehabilitation and/or new construction of a specific affordable housing development. There is also a set-aside of AHAP credit for the basic operating expenses of non-profit organizations whose primary purpose is to provide affordable housing for low-income families.</p>						
Explanation of How Award is Computed: Entitlement _____ Discretionary <u> X </u> <p>The amount of Affordable Housing Assistance Program Tax Credit allocated is equal to 55% of the amount of the contribution. Non-profit organizations make application to the Missouri Housing Development Commission (MHDC) for a reservation of AHAP credit. The non-profit organization then solicits contributions from businesses or qualified individuals to assist in the production of a specific affordable housing development. After MHDC receives the necessary documentation of a qualified contribution to the non-profit organization that meets all of the criteria set out in the statute and program regulations, a tax credit is issued to the donor in the amount of 55% of the value of the contribution. Applications for production credits are accepted continuously, and applications for the operating credit set-aside are usually accepted twice a year.</p>						
Program Cap: Cumulative \$ _____ (remainder of cumulative cap) \$ _____ Annual <u> \$11,000,000 </u> None _____ Explanation of cap: The cap on the Affordable Housing Assistance Program is set by statute at \$11 million annually of which \$10 million is for production credits and \$1 million is for operating credits. Once MHDC has made reservations totaling \$11 million in AHAP credit in a fiscal year, the application cycle is closed.						
Explanation of Expiration of Authority: The AHAP program does not have a statutory sunset provision.						
Specific Provisions: (if applicable) Carry forward <u> 10 </u> years Carry Back <u> 0 </u> years Refundable <u> No </u> Sellable/Assignable <u> Yes </u> Additional Federal Deductions Available <u> Yes </u>

HISTORICAL AND PROJECTED INFORMATION

Comments on Historical and Projected Information: Recent experience (FY10-FY13) has seen a decline in utilization of the AHAP credit, which may be related to problems in the housing and construction industry and fewer charitable contributions due to the downturn in the overall economy. Prior to FY09 annual authorizations averaged approximately \$10,000,000 and annual issuances averaged approximately \$9,000,000. As the economy improves, authorizations and issuances are projected to return to full utilization.

Other Benefits: The Affordable Housing Assistance Program (AHAP) increases the availability of rental housing and for sale housing that is affordable to low-income families. Other benefits include the removal of blight in communities and increased local tax revenues such as property taxes. The AHAP credit also increases the capacity of non-profit housing organizations to build or renovate affordable housing for low-income families. The AHAP credit increases the amount of disposable income for low-income families by providing housing that is affordable to them. This improves the overall quality of their lives by providing additional income for other basic necessities such as food, clothing, healthcare and education. Lastly, the operating AHAP credit helps organizations attract donations to support operating funds, without which the agencies may not be able to administer their affordable housing programs.

In FY-2014, every dollar of authorized program tax credits returns:

\$16.48 in new personal income totaling \$20.26 million
 \$26.98 in new value-added/GSP totaling \$33.17 million
 \$44.05 in new economic output totaling \$54.17 million

Over 12 YEARS, every dollar of authorized program tax credits returns:

PERFORMANCE MEASURE(S)

Number of Units by Housing Type

Comments on Performance Measure: The number of housing units produced is based on what is reported to MHDC by the non-profit sponsor of the development. Projects awarded AHAP credits may be awarded additional credits in succeeding years, however, the projects receiving AHAP credits are not counted as "new units". In this circumstance, MHDC places a new LURA on the units, extending the affordability period - in 2014 MHDC extended the affordability on 159 beds. In 2014, five programs received AHAP funding for new production creating more new shelter beds than in prior years - a total of 558 new emergency shelter beds were created with AHAP funds.

Program Category: Redevelopment	Type: Tax Credit <input checked="" type="checkbox"/> Other (specify) _____	
Statutory Authority: 135.400 to 135.430 RSMo.	Applicable Taxes: Income Tax, excluding withholding tax; Corporate franchise tax; Bank tax; Insurance premium tax; Other financial institution tax; Express companies tax; Insurance co. retaliatory tax

Explanation of How Award is Computed: Entitlement _____ Discretionary
 Based upon 50% of a contribution/investment into a pre-approved community bank or CDC. The level of funding is determined during the application phase. Approval is subject to the amount of credits available, the application meeting the program requirements, and the projected outcomes attainable.

Statutory Authority: 100.700 - 100.850, RSMo	Applicable Taxes: Income Tax; Bank Tax; Insurance Premium Tax; Other Financial Institution Tax	

Program Description and Eligibility Requirements:
 The incentives offered by the BUILD Missouri Program are designed to offset infrastructure and other capital costs of certain large projects by making the cost of investing in Missouri more competitive. All businesses that manufacture, process (including agricultural processing) or assemble products are eligible. Businesses that conduct research and development or provide services in interstate commerce are also eligible. Certain office industries are also eligible. A manufacturing business must invest a minimum of \$15 million and 100 new jobs. An office business must invest a minimum of \$10 million and 500 jobs. There are other factors.

TAX CREDIT ANALYSIS

Program Name: Missouri Low Income Housing Tax Credit Program		
Department: Missouri Housing Development Commission	Contact Name & No.: Megan Word 816-759-6658	Date: January 2015
Program Category: Housing	Type: Tax Credit <input checked="" type="checkbox"/> Other (specify) _____	
Statutory Authority: Sections 135.350 - 135.363, RSMo	Applicable Taxes: Income Tax; Corporate Franchise Tax; Insurance Company Annual Tax on Gross Premium Receipts; Other Financial Institutions Tax; Express Company Annual Tax on Gross Premium Receipts	

Program Description and Eligibility Requirements:
 The Missouri Low Income Housing Tax Credit (MOLIHTC) is a ten-year state tax credit available to qualified owners of affordable rental housing. The MOLIHTC generates equity investments from the private sector for the development of new or rehabilitated rental housing which enables owners to lower rents to affordable levels for low-income families. A qualified development is one that (i) rents at least 20% of its units to families earning 50% of the area median family income or (ii) rents at least 40% of its units to families earning 60% of area median family income, each adjusted for family size. The development must (a) meet a demonstrated need for affordable rental housing in the community, (b) be economically feasible, (c) leverage tax credits with other financing, (d) demonstrate local support, and (e) provide affordable rental housing for qualified low-income Missourians for an extended period of time.

Explanation of How Award is Computed: Entitlement Discretionary
 The amount of the MOLIHTC allocated to a given housing development is directly related to the percentage of low-income housing units made available to qualified low-income families and the acquisition, construction or rehabilitation expenditures necessary to create the development, less land and non-depreciable costs. There are two types of MOLIHTCs: 9% and 4%. Developments compete annually for the 9% Missouri LIHTC. Developments receiving an allocation of tax-exempt bond-financing from the Department of Economic Development may apply to receive the 4% MOLIHTC. The maximum amount of MOLIHTC that can be issued for any development is 100% of the federal LIHTC issued for the development.

Program Cap: Cumulative \$ _____ (remainder of cumulative cap) \$ _____ Annual 100% of federal LIHTC for 9% and \$6 million for 4% None _____
Explanation of cap: The 9% MOLIHTC issued through the competitive application cycle is capped at 100% of the federal LIHTC or approx. \$2.30 per capita for 2015. No more than six million dollars in tax credits shall be authorized each fiscal year for projects financed through tax-exempt bond issuance (4% MOLIHTC-RSMo 135.352). The MOLIHTC is taken annually over a ten year period. There are five year carry forward and three year back provisions.

Explanation of Expiration of Authority: The MOLIHTC program does not have a statutory sunset provision.

Amount Authorized but Unissued represents developments that have received approval but have not completed construction or have not completed MHDC's process to receive their credits by an issuance of the Eligibility Statement. In order to determine the total maximum liability for MOLIHTC you may add the EST. Amount Outstanding and the EST. Amount Authorized but Unissued.

TAX CREDIT ANALYSIS

Program Name: Missouri Low Income Housing Tax Credit Program

HISTORICAL AND PROJECTED INFORMATION

Comments on Historical and Projected Information: 1) Historically, the amount of authorized and issued MOLIHTC has fluctuated based on the number and size of developments receiving an allocation of tax-exempt bond financing from the Department of Economic Development and therefore receiving 4% MOLIHTCs. No more than six million dollars in tax credits shall be authorized each fiscal year for developments financed through tax-exempt bond issuance (4% MOLIHTC - RSMo 135.352). The projections for redeemed credits in FY15 and FY16 are estimates based on the average percentage of credits redeemed compared to credits authorized; that average is applied to the estimated authorizations for FY 2015 and FY 2016. This projection cannot precisely account for carry forward and carry back provisions nor the individual credit holder's decision on when to claim a particular credit.

BENEFIT: COST ANALYSIS (includes only state revenue impacts)

	FY 2014 ACTUAL	Other Fiscal Period (15 years)	Derivation of Benefits: Investment: (a) \$331,001,761 in Residential Investment spending in 2014-2015. Employment: (a) 72 FTE employees in Rental/Leasing and Repair/Maintenance services in 2016-2028; (b) \$420,944 in annual maintenance contracting between in 2016-2028. Other Assumptions: (a) 1,628 low income households with total increased disposable income spending of \$3,418,800 per year due to monthly rental savings of \$175 as compared to market rent. Incentives/Credits: (a) \$157,419,280 in LIHTC tax credits over years 2015-2015. Impacts occur in Specified Regions. All Values in 2014\$. Assumptions provided by DED. Estimated using REMI. The multi-year fiscal Benefit-Cost Ratio is 0.06 if it is assumed that 40 percent of low income housing would be developed without the state LIHTC.

BENEFIT: COST	N/A	0.10	

Other Benefits: The MOLIHTC increases the availability of rental housing that is affordable to low-income families and seniors. It also reduces blight and improves communities through new construction and rehabilitation of affordable rental housing in Missouri. The additional project equity raised by the state LIHTC allows more projects to be built and makes tenant rents more affordable. The reduced rents brought about by the state tax credit increases households' disposable income and allows low-income families and seniors to meet more of their other basic necessities such as food, clothing, education and health care. The subsidy provided by the MOLIHTC also makes it economically feasible to develop new or rehabilitated affordable rental housing in many very low-income rural communities in Missouri. Finally the equity raised from the MOLIHTC helps preserve affordable rental housing that is in danger of being lost from existing stock and it leverages millions of dollars of federal rental assistance for many low-income families and seniors in Missouri. For 2014 developments, the average rent savings, per unit, per month is \$175 for a total of \$2,100 in rent savings for each LIHTC unit for twelve months.

Statutory Authority: 620.800 - 620.809, RSMo. **Applicable Taxes:** N/A - is an appropriation of funds, not a credit

Program Description and Eligibility Requirements:
 The program provides assistance to eligible companies to train workers in newly created jobs. Program Name: Shared Care Tax Credit

BENEFIT: COST ANALYSIS (includes only state revenue impacts)

	FY 2014 ACTIVITY	Other Fiscal Period (indicated time period)	
BENEFITS			Derivation of Benefits: Individuals claiming this tax credit are providing care for elderly persons who are not receiving state funded services. Without this private caregiver support, these elderly persons may need services such as personal care, homemaker, and respite care funded in part through Medicaid, Social Service Block Grant, or state General Revenue. The indirect fiscal benefits are calculated based on the estimated number of elderly persons claiming the credit who are potentially Medicaid eligible (14.80 percent of persons over age 60), multiplied by the average cost of care for elderly persons receiving care through DHSS (150 total claimants x 14.8% [percent potentially Medicaid eligible] X \$3,945 [FY 2014 GR average cost of care] = \$87,579).

Indirect Fiscal Benefits	\$ 87,579	Not Applicable

HISTORICAL AND PROJECTED INFORMATION

Comments on Historical and Projected Information:

Typically only the companies domiciled in Missouri take this credit as it often results in an increase in retaliatory tax of that amount for foreign (non-Missouri based) insurers. Due to this only about 35% of examination costs are taken each year in tax credits. Consequently, the department believes most carry-over each year will eventually expire.

 Under Chapter 148.400, RSMo., insurance companies are permitted a tax credit for the costs of insurance examinations conducted by the department. Examination costs are business expenses that are similar to corporate expenses deducted when calculating income tax. Due to their tax structure, insurers account for operating expenses through a premium tax credit rather than an income tax deduction.

HISTORICAL AND PROJECTED INFORMATION

Comments on Historical and Projected Information:
In 2008, National Prearranged Services ("NPS") was placed in liquidation by the state of Texas. NPS is a Missouri domestic corporation and was formerly one of the largest sellers of preneed funeral contracts in the state of Missouri and nationally. Generally, under a preneed contract, the funeral director or preneed seller agrees to provide funeral services at a fixed or guaranteed price when the contract beneficiary passes away. Ideally, this may result in some savings to the purchaser who may be able to "lock-in" current prices even though the death may not occur for some significant time. Once the services are provided, the funeral director/provider is then reimbursed by the preneed seller for the funeral expenses. Historically, this reimbursement has included all or a portion of the interest that may have been earned on the contract.

Under Missouri law, NPS was required to place 80% of all funds paid by consumers into a trust account with a financial institution. Frequently, these funds are used to purchase insurance coverage to guarantee payment of the funeral costs. According to information gathered by state regulators, NPS' trust funds were depleted because of improper policy loans, insurance investments and potentially the misappropriation of funds by company representatives/shareholders. At this time, based on the average payout rates, it is estimated that it may take an additional eight years to continue to fund these death claims.

To the extent insurance coverage on a particular NPS contract was in place, the various state insurance guaranty funds have agreed to cover the contract's obligations and the potential financial hardship to NP contract holders will be minimized. These guaranty funds will assess their member-insurers, who will in turn take as offsets against any state premium taxes due from the insurers.

<p>Other Benefits: The business of insurance is primarily regulated by the states. Consequently, no federal mechanism exists to guaranty the payment of claims under insurance policies in the event an insurance company becomes insolvent. Instead, the states have taken on this role. Every state in the U.S. has enacted laws creating a life and health insurance guarantee association. In the event that a licensed insurance company becomes insolvent and cannot pay its claims, the various state guarantee associations step in and provide coverage for policy or claim up to prescribed limits. In Missouri, life and health policies are guaranteed up to \$100,000 for most types of coverage.</p> <p>To get the money to pay claims for an insolvent company, the various guaranty associations are authorized by law to levy assessments against all of the other life and health insurance companies in the state. The insurance companies in Missouri are then allowed a tax credit against their premium tax liability for the amount of the assessment.</p>

SB 262 also provided that assessments will continue until all claims are paid and specified that all remaining assessment funds, after the payment of claims, will be deposited in the state General Revenue Fund. Other Benefits:
 The business of insurance is primarily regulated by the states. Consequently, no federal mechanism exists to guaranty the payment of claims under insurance policies in the event an insurance company becomes insolvent. Instead, the states have taken on this role. Every state in the U.S. has enacted laws creating a property and casualty insurance guarantee association. In the event that a licensed insurance company becomes insolvent and cannot pay its claims, the various state guarantee associations step in and provide coverage for policy or claim up to prescribed limits. In Missouri, property and casualty policies are guaranteed up to \$300,000 for most types of coverage.

To get the money to pay claims for an insolvent company, the various guaranty associations are authorized by law to levy assessments against all of the other property and casualty insurance companies in the state. The insurance companies in Missouri are then allowed a tax credit against their premium tax liability for the amount of the assessment.

TAX CREDIT ANALYSIS

Program Name: Charcoal Producers Tax Credit

HISTORICAL AND PROJECTED INFORMATION

Comments on Historical and Projected Information:

The tax credit expired at the end of calendar year 2005, at which time the expense had to be incurred in order to claim the credit. Tax credits issued since inception of the program totaled \$2,092,288. We have assumed that all outstanding authorized and issued credits will be claimed by the end of FY 2016.

The cost of the controls and expected tax credits were based upon the charcoal kiln industry implementing mandatory controls. The estimated expenditures for best available control technology (BACT) equipment were derived from discussions with the charcoal kiln industry.

Other Benefits: Using estimated data for the tax credits, the cost to implement controls is approximately \$283 per ton of air emission based on the total cost of the control technology installed as compared to the tons of emissions prevented by that technology. Assuming a useful life of 10 years, the annualized cost would be approximately \$28.31 per ton. This can be compared to the following information obtained from recent air permits:

Average Costs per Ton of Control Equipment Installed: Cost per Ton for Carbon Monoxide Control - \$5,000
 Cost per Ton for Particulate Matter Control - \$1,110

PERFORMANCE MEASURE(S)

Estimated Cumulative Tons of Air Emissions Prevented

Comments on Performance Measure: The performance measure is based on estimates for air emissions prevented by installing control equipment. Projected emission prevention is based on historical information and control equipment now in place. Tax credits issued since inception of the program totaled \$2,092,288. The benefit of reduced air emissions will continue to accumulate through the life of the control equipment.

Program Name: Domestic Violence Shelter

Department: Social Services **Contact Name & No.:** Patrick Luebbering (573) 751-7533 **Date:** January, 2015

Program Category: Domestic and Social **Type:** Tax Credit **Other (specify)** _____

Statutory Authority: 135.550 RSMo **Applicable Taxes:** _____

Program Description and Eligibility Requirements:
Allows a tax credit for taxpayers to apply to their state liability taxes in an amount not to exceed fifty percent of a contribution made to a qualifying domestic violence shelter. Contributions can include cash, stocks, bonds or other marketable securities, or real property, with a value of one hundred dollars (\$100) or more.

Explanation of How Award is Computed: Entitlement Discretionary _____
Taxpayers are eligible for a tax credit equivalent to up to fifty percent of an eligible contribution to a qualified domestic violence shelter. Contributions must have a value of at least \$100 (\$50 tax credit) and can not exceed \$100,000 (\$50,000 tax credit) per taxpayer during any fiscal year. Eligible tax credits can not exceed the taxpayers state income tax liability for the year the credit is claimed. The credit may be carried over for four years until fully claimed. Total tax credits may not exceed \$2 million in any fiscal year.

Annually, shelters must submit an application to be classified as a qualifying agency to receive donations eligible for the Domestic Violence Shelter Tax Credit. At least quarterly a review is conducted to determine the cumulative amount of approved tax credits. If a domestic violence shelter fails to use all, or some percentage of its apportioned tax credits during a predetermined period of time, the unused tax credits may be reapportioned to those domestic violence shelters that have used all, or most of their apportionment. Reapportionment may occur more than once during a fiscal year; to the maximum extent possible to ensure that taxpayers can claim all the tax credits possible up to the cumulative amount of tax credits available for the fiscal year.

Program Cap: Cumulative \$ _____ (remainder of cumulative cap) \$ _____ Annual \$2,000,000 None _____
Explanation of cap: Annually the \$2 million is allocated to those qualifying domestic violence shelters that have submitted an application and supporting documentation to the Department of Social Services. Allotments may be revised during the year at the Department's discretion in an effort to fully utilize the maximum tax credit possible. The cap is established in statute. Since the programs inception in 1997, the cap has never been reached or exceeded.

Explanation of Expiration of Authority: There was no sunset established for this program when it was created in 1997.

Grants are awarded for pre-business start-up costs such as feasibility studies, marketing studies, business planning, etc.

PERFORMANCE MEASURE(S)

Comments on Performance Measure: : If a funded study demonstrates the potential for a project then the cost of the study becomes one small part of the actual cost of the project. If the project is successful it generates a good benefit cost ratio. If the study finds that the project is not feasible, the benefits of the project are the savings of investments that would have been lost. In which case the benefit cost ratio is very high.

However, this analysis includes only actual grant dollars and does not take into account whether or not a project is feasible. If a project becomes operational and receives New Generation Cooperative Incentive Tax Credits then those benefits are accounted for in the New Generation Cooperative Incentive Tax Credit Program's Tax Credit Analysis.
