

Single Feasible Source Purchase

Title: Software Maintenance, Technical Support, and Enhancements by Computer Aid for NATC AgraGuard Applications

Description: The Missouri Department of Agriculture requires on-going software maintenance, technical support, training, and consulting services related to system enhancements for National Agribusiness Technology Center (NATC) AgraGuard applications the Department of Agriculture currently utilizes.

Computer Aid, Inc. (CAI) is the only vendor certified and approved by the NATC to provide the maintenance, technical support, and enhancements required by the Department of Agriculture for the AgraGuard applications. As a result, this meets the criteria for a single feasible source procurement under RSMo 34.044. The State intends to acquire the above referenced services from CAI via a single feasible source procurement since there are no other sources available to meet the specific needs of the state agency.
