

Single Feasible Source Purchase

Title: Newborn Cystic Fibrosis Screening Services

Description: To provide follow-up of newborns, infants, and children who are identified as having abnormal newborn screening results for cystic fibrosis to ensure that either a repeat or confirmation screening is completed to help reduce morbidity and mortality of cystic fibrosis in newborns, infants, and children and to help identify patients who should be referred to an accredited Cystic Fibrosis care center.

The four organizations listed below are considered a single feasible source because, based on past procurements, it has been determined that such organizations are the only organizations that provide the required newborn cystic fibrosis screening services.
