**Description**
The Web Developer Toolbar has been developed to aid manual examination of Web pages for a variety of aspects of usability/accessibility. It consists of a range of functions that:

- Identify components of a Web page
- Facilitate the use of 3rd party online applications
- Simulate user experiences
- Provide links to references and additional resources

**Rationale**
Through the use of a testing tool such as this, State of Missouri Web sites can conduct detailed testing of different aspects of their site (link checking, html checking, layout testing, etc.). Couple this with human evaluation testing, and State of Missouri Web sites will be as usable as possible.

**Benefits**

- Ensures your Web site take a proactive approach to current/future legal requirements;
- Broadens your market reach through increasing the usability/accessibility of your Web site to a wider range of people;
- Increases functionality and ease of use;
- Improves services to all users and increase Web site performance;
- Increases customer satisfaction;
- Increases compatibility with new browsing technologies ;
- Improves search engine ranking;
- Could improve download time
