

Single Feasible Source Purchase

Title: *Problem Solving Through Critical Thinking*

Description: Executive leadership training and development to enhance retention and engagement of public servants. Participants may enroll in Brookings Executive Education's Certificate of Public Leadership. All programs taken through Brookings Executive Education will count toward the Certificate in Public Leadership. The Certificate in Public Leadership is offered exclusively to government managers and executives through Washington University and Brookings Executive Education.

Executive leadership in the Office of Administration and the Department of Social Services have identified a need for a nationally-recognized certified public sector leadership training program for selected mid-level managers for the provision of intensive public sector leadership skills training for these individuals and to advance their development and recognized credentials as future leaders as they progress in their careers in Missouri state government. It is imperative that this succession planning initiative focus on intensive development of public sector-specific leadership skills for these individuals. The specific designation sought for these individuals who successfully complete the mandated coursework is the Brookings Executive Education's Certificate in Public Leadership (CPL). This CPL public sector leadership certification program is only available to be provided in Missouri through Washington University. Since the individuals selected this program are generally based out of mid-Missouri and have a demanding work schedule, having the training provided in mid-Missouri to minimize travel is required which Washington University is able to accommodate.
