

Single Feasible Source Purchase

Title: Software License Acquisition, Maintenance, Support, and Other Services for the DMH Care Systems Timekeeping and Scheduling System

Description: The Department of Mental Health (DMH) requires the ability to acquire additional software licenses, ongoing software maintenance, support, training, and consulting services for their existing Care Systems Timekeeping System. Licenses, ongoing maintenance, support, training, and customizations are available only from Care Systems as the software/system is the sole property of Care Systems.

According to RSMo 34.044, a single feasible source can be utilized when the product/service requirement is proprietary and only available from a single provider. As a result, this represents a requirement that meets the criteria as a single feasible source under RSMo 34.044 and the State is pursuing this acquisition of services as a Single Feasible Source procurement.

Agency: Department of Mental Health/Information Technology Services Division

Supplier: Care Systems

Buyer: Earl Pettit

Phone No: 573-751-5430
