

Single Feasible Source Purchase

Title: Toll Free Services

Description: The Missouri Information Technology Services Division has an ongoing need for Toll Free Services used for the Department of Corrections IVR application. The Toll free service is currently provided by Verizon via contract C107046001 which is set to expire December 31, 2014. The circuit used by Verizon is owned by Verizon and not available for use by other entities. Implementation of services by a new contractor is in progress but will not be complete until March 2015. Services are required through the current Verizon proprietary circuit until the new services are available. As a result, the state requires a 3-month extension of the current contract with Verizon from which the services are currently obtained.

According to RSMo 34.044, a single feasible source can be utilized when the product/service requirement is proprietary and only available from a single provider. Therefore, the state intends to acquire the above-mentioned services from Verizon via extension of the current agreement for three-months since the current circuit required for use by the state for that timeframe is proprietary and only available from Verizon.

Contract Period: January 1, 2015 through March 31, 2015

Agency: Office of Administration – ITSD

Supplier: Verizon, Contract C107046001

Buyer: Earl Pettit
