

Single Feasible Source Purchase

Title: Extension of Current Contract for Clinical Management Services and System for Pharmacy Claims and Prior Authorization (CMSP) Services

Description: The Department of Social Services, MO HealthNet Division(MHD), is in the process of preparing a series of future RFPs for a new Missouri Medicaid Management Information System (MMIS) which would include replacement of the Pharmacy Claims and Prior Authorization System and accompanying services. Several federal funding program and guideline changes for MMIS are resulting in delays in the state's preparation and issuance. In the meantime, the MHD requires extension of the current contract with Xerox Heritage in order to continue services and be able to transition to the newly acquired solution(s) upon award of the new RFP(s). Consideration of other services providers at this time for the existing MMIS is not feasible due to Xerox Heritage's unique knowledge of the current system, including the system's unique business rules and processes which would take other vendors multiple years and significant investment to learn and become familiar with so that the level and quality of the current services provided are continued. As a result, this represents a proprietary requirement that meets the criteria as a single feasible source under RSMo 34.044 and the State is pursuing this acquisition as a Single Feasible Source.

Agency: Department of Social Services, MO HealthNet Division (MHD)

Supplier: Xerox Heritage

Buyer: Gary Eggen
