

TECHNOLOGY AREA

DEFINITION			
<i>Name</i>	Remote Access Controls		
<i>Description</i>	Remote Access Controls are a means of securely handling interactions between an agency's systems and remote users, systems and services.		
<i>Rationale</i>	Remote access presents a unique set of vulnerabilities that require additional security controls due to a different operational environment. Agencies must implement Remote Access Controls based on existing security policies and procedures.		
<i>Benefits</i>	<ul style="list-style-type: none"> • Expands secure availability of state resources • Prevent unauthorized access • Ensure authentication of users and systems • Ensure confidentiality of data • Ensure data integrity
