Program Name: Missouri Examination Fee and Other Fee Credit

Comments on Historical and Projected Information:
 Typically only the companies domiciled in Missouri take this credit as it often results in an increase in retaliatory tax of that amount for foreign (non-Missouri based) insurers. Due to this only about 55% of examination costs are taken each year in tax credits. Consequently, the department believes most carry-over each year will eventually expire.

BENEFITS			The state has not conducted an economic analysis of Insurance Tax Credits, but in the state's 2010 (updated in 2012) Missouri Tax Credit Review Commission Report, this tax credit was considered a feature of Missouri's overall tax structure, rather than a true "tax credit" as that term is used to describe the state's various programs designed to provide an economic incentive or achieve a social outcome. In the report the credit's purpose was described as an attempt to equalize the burden on insurance companies, which, unlike other businesses when calculating income tax liability, cannot deduct certain fees and taxes as operating expenses when calculating their premium tax liability. The report stated that elimination or reduction of this credit would increase taxes on insurance companies above the taxes imposed on otherwise similarly situated industries.

 Under Chapter 148.400, RSMo., insurance companies are permitted a tax credit for the costs of insurance examinations conducted by the department. Examination costs are business expenses that are similar to corporate expenses deducted when calculating income tax. Due to their tax structure, insurers account for operating expenses through a premium tax credit rather than an income tax deduction.

Historical Background:

In 2008, Lincoln Memorial, along with affiliates Memorial Service Life Insurance Company and National Prearranged Services ("NPS") was placed in liquidation by the state of Texas. NPS was a Missouri domestic corporation and was formerly one of the largest sellers of preneed funeral contracts in the state of Missouri and nationally. Generally, under a preneed contract, the funeral director or preneed seller agrees to provide funeral services at a fixed or guaranteed price when the contract beneficiary passes away. Ideally, this may result in some savings to the purchaser who may be able to "lock-in" current prices even though the death may not occur for some significant time. Once the services are provided, the funeral director/provider is then reimbursed by the preneed seller for the funeral expenses. Historically, this reimbursement has included all or a portion of the interest that may have been earned on the contract. Under Missouri law, NPS was required to place 80% of all funds paid by consumers into a trust account with a financial institution. Frequently, these funds are used to purchase insurance coverage to guaranty payment of the funeral costs. According to information gathered by state regulators, NPS' trust funds were depleted because of improper policy loans, insurance investments and potentially the misappropriation of funds by company representatives/shareholders. To the extent insurance coverage on a particular NPS contract was in place, the various state insurance

Every state in the U.S. has enacted laws creating a life and health insurance guaranty association. In the event that a licensed insurance company becomes insolvent and cannot pay its claims, the various state guaranty associations step in and provide coverage for policy or claim up to prescribed limits. Statutory Authority: Sections 32.105-32.125, RSMo		Applicable Taxes: Income Tax, Bank Tax, Financial Institutions Tax, Corporate Franchise Tax, Tax on Gross Receipts of Express Companies, Insurance Premium Tax				
Tax Credit Creation Date: 1990		Year of Last Legislative Change: 2009				
Program Description and Eligibility Requirements: The Affordable Housing Assistance Tax Credit Program (AHAP) is an incentive for businesses and qualified individuals in Missouri to participate in the production of affordable housing for low-income families. The credit can be used by a business or qualified individual as a reduction in their state tax obligation. To receive the AHAP credit, a business or qualified individual must donate cash, professional services, or real or personal property to a non-profit organization whose primary purpose is to provide affordable housing for low-income families.						
Explanation of How Award is Computed:		Entitlement <input type="checkbox"/> No	Discretionary <input type="checkbox"/> Yes			
The amount of Affordable Housing Assistance Program Tax Credit allocated is equal to 55% of the amount of contribution. Non-profit organizations make application to the Missouri Housing Development Commission (MHDC) for a reservation of AHAP credit. The non-profit organization then solicits contributions from businesses or qualified individuals to assist in the production of a specific affordable housing development. After MHDC receives the necessary documentation of a qualified contribution to the non-profit organization that meets all the criteria set out in the statute and program regulations, a tax credit is issued to the donor in the amount of 55% of the value of the contribution. Applications for production credits are accepted continuously, and applications for the operating credit set-aside are accepted once a year.

 The Affordable Housing Assistance Program (AHAP) increases the availability of rental housing and for sale housing that is affordable to low-income families. Other benefits include the removal of blight in communities and increased local tax revenues such as property taxes. The AHAP credit increases the capacity of non-profit housing organizations to build or renovate affordable housing for low-income families. The AHAP credit increases the amount of disposable income for low-income families by providing housing that is affordable to them. This improves the overall quality of their lives by providing additional income for other basic necessities such as food, clothing, healthcare and education. Lastly, the operating AHAP credit helps organizations attract donations to support operating funds, without which the agencies may not be able to administer their affordable housing programs.

New Units/Shelter Beds

Comments on Performance Measure:

The number of housing units produced is based on what is reported to MHDC by the non-profit sponsor of the development. Projects awarded AHAP credits may be awarded additional credits in succeeding years; however, these projects receiving AHAP credits are not counted as "new units". In this circumstance, MHDC places a new Land Use Restrictive Agreement (LURA) on the units, extending the affordability period.

Program Category: Training and Educational	Type:	Other (specify)	Other: Appropriation based on employer withholding
Statutory Authority: Sections 620.800-620.809, RSMo	Applicable Taxes: N/A; This is an appropriation of funds, not a credit.		
Tax Credit Creation Date: 2004	Year of Last Legislative Change: 2022

The JRTP is suited for large retention projects and provides training to upskill existing workers. Eligible companies participating in JRTP must be making a large capital investment or be determined to represent a substantial risk of relocation. Both programs are administered locally through the community colleges and funds for these programs are generated by deferring a portion of the state employer withholding tax - approximately 2% - on the newly created or retained jobs in the project.

PERFORMANCE MEASURE(S)

Permanent New Jobs Created

Comments on Performance Measure:

The estimated number of jobs is the total projected for all projects for which DED issued benefits during FY2022, FY2023, and FY2024. The actual number is the actual number of jobs reported by those projects issued benefits during FY2023, FY2024, and FY2025. Companies have 2 years after authorization to create the statutory threshold number of jobs and ramp up over time. Many of the jobs estimated will be reported as actual in later years. The actual jobs numbers are totals for the projects to date. They are not net new for the year. These numbers do not include retained projects in the Retention category of the program.

TAX CREDIT ANALYSIS

Program Name: Missouri Low Income Housing Tax Credit Program										
Department: Economic Development - Missouri Housing Development Commission		Contact Name & No.: Courtney Bullard (816) 648-0548			Date: January 2025					
Program Category: Housing		Type:	Tax Credit	Other:						
Statutory Authority: Sections 135.350-135.363, RSMo		Applicable Taxes:		Income Tax, Corporate Franchise Tax, Insurance Company Annual Tax on Gross Premium Receipts, Other Financial Institutions Tax, Express Company Annual Tax on Gross Premium Receipts						
Tax Credit Creation Date: 1990		Year of Last Legislative Change:		2009						
Program Description and Eligibility Requirements: The Missouri Low Income Housing Tax Credit (MOLIHTC) is a ten-year state tax credit available to qualified owners of affordable rental housing. The MOLIHTC generates equity investments from the private sector for the development of new or rehabilitated rental housing which enables owners to lower rents to affordable levels for low-income families. A qualified development is one that (i) rents at least 20% of its units to families earning 50% of the area median income (AMI), (ii) rents at least 40% of its units to families earning 60% of AMI, or (iii) rents at least 40% of its units to families whose income does not exceed the income limitation designated for the respective unit, where the average of the income-designated units may not exceed 60% of AMI. The development must (a) meet a demonstrated need for affordable rental housing in the community, (b) be economically feasible, (c) leverage tax credits with other financing, and (d) provide affordable rental housing for qualified low-income Missourians for a minimum of 15 years.										
Explanation of How Award is Computed:										
		Entitlement	No	Discretionary	Yes					
The amount of the MOLIHTC allocated to a given housing development is directly related to the percentage of low-income housing units made available to qualified low-income families and the acquisition, construction or rehabilitation expenditures necessary to create the development, less land and non-depreciable costs. There are two types of MOLIHTCs: 9% and 4%. Developments compete annually for the 9% MOLIHTC. Developments receiving an allocation of tax-exempt bond-financing from the Department of Economic Development may apply to receive the 4% MOLIHTC. The statutory maximum amount of MOLIHTC that can be issued for any development is 100% of the federal LIHTC issued for the development.										
Program Cap: Cumulative \$ _____ (remainder of cumulative cap) \$ _____ Annual \$ 100% of Federal LIHTC for _____ None _____ 9% and \$6 million for 4%										
Cap Shared Between Programs		No	Which Program(s)? _____							
Explanation of Cap: The 9% MOLIHTC issued through the competitive application cycle is statutorily capped at 100% of the federal LIHTC. No more than six million dollars in tax credits shall be authorized each fiscal year for projects financed through tax-exempt bond issuance (4% MOLIHTC-RSMo 135.352). The MOLIHTC is redeemable annually over a ten year period. There are five year carry forward and three year back provisions.

Notes: (1) The Amount Authorized and Amount Issued represent the total 10 year stream. The Department of Revenue is responsible for all redemption data. The EST. Amount Outstanding represents the cumulative amount of MOLIHTC issued, minus the cumulative amount of MOLIHTC redeemed, less expired/withdrawn/ suspended credits; EST Amount Outstanding reflects only those tax credits eligible to be redeemed. (2) The EST. Amount Authorized but Unissued represents developments that have received approval but have not completed construction or have not completed MHDC's process to receive their credits by an issuance of the Eligibility Statement. In order to determine the total maximum liability for MOLIHTC you may add the EST. Amount Outstanding and the EST. Amount Authorized but Unissued.										

TAX CREDIT ANALYSIS

Comments on Historical and Projected Information:
 FY2022-FY2025 Authorized numbers reflect a 9% MOLIHTC up to 70% of the federal LIHTC allocation and a cap of \$3M Authorized annually for the 4% MOLIHTC. Issued projections include MOLIHTC that has been Authorized for developments which have not yet completed construction; the majority of credits are issued in years 2 and 3 after Authorization. Redemption projections cannot precisely account for carry forward and carry back provisions nor the individual credit holder's decision on when to claim a particular credit.

Other Benefits:
 The MOLIHTC program delivers rental housing that is affordable to low-income families, veterans, special needs tenants, and seniors. It reduces blight and improves communities through new construction and rehabilitation of affordable rental housing in Missouri. The reduced rents brought about by the MOLIHTC program increases households' disposable income and allows low-income families, veterans, special needs tenants, and seniors to meet more of their other basic necessities such as food, clothing, education and health care. The subsidy provided by the MOLIHTC program makes it economically feasible to develop new or rehabilitated affordable rental housing in many very low-income rural communities in Missouri. Finally, the equity raised from the MOLIHTC helps preserve affordable rental housing that is in danger of being lost from existing stock.

PERFORMANCE MEASURE(S)

Number of Housing Units Produced/Preserved

Comments on Performance Measure:

This performance measure reflects the total number of LIHTC housing units placed in service, or credits issued each year. Total number of units placed in service, or credits issued, each year varies - dependent on the applications received for consideration, the actual number of projects approved, and the type of projects approved (preservation or new construction). Authorized developments typically take 24 months to complete construction and submit cost certification documentation to MHDC; after which they are issued LIHTCs. No LIHTCs are issued by MHDC or eligible to be redeemed by a development owner until a development is completed to MHDC requirements and ready for leasing.

PERFORMANCE MEASURE(S)

Permanent New Jobs Created

Comments on Performance Measure:

The tax credit did not exist in previous fiscal years and the program has not existed for any period of time to determine if any permanent new jobs will be created. It is unlikely that this tax credit will directly create any permanent new jobs, although it may incentivize physicians to serve as community-based faculty preceptors, which in turn could improve training for medical students, which would result in an overall benefit to the state's healthcare workforce.

Program Name: Rolling Stock Tax Credit						
Department: State Tax Commission		Contact Name & No.: Stacey Jacobs 573-751-1716			Date: January 2025	
Program Category: Business Recruitment		Type: Tax Credit	Other:			
Statutory Authority: Section 137.1018		Applicable Taxes: Property Taxes				
Tax Credit Creation Date: 2008 / Beginning January 1, 2009		Year of Last Legislative Change: 2023				
Program Description and Eligibility Requirements: For tax year beginning January 1, 2009, a freight line company shall, subject to appropriation, be allowed a credit against the tax levied for the applicable year. The tax credit amount shall be equal to the amount of eligible expenses incurred during the calendar year immediately preceding the tax year for which the credit under this section is claimed. The amount of the tax credit issued shall not exceed the freight line company's liability for the tax levied under this section for the tax year for which the credit is claimed.						
Explanation of How Award is Computed:		Entitlement <input type="checkbox"/> Yes	Discretionary <input type="checkbox"/> No			
Private car ad valorem tax is assessed to the freight line companies by the following formula: The State Tax Commission determines the assessed value for freight line companies. The Tax Commission determines an average tax rate based on the actual taxes collected from the previous tax year paid by the operating railroads in Missouri. The tax rate is applied by the Tax Commission's calculated assessed value. This produces the "tax levied." This is returned to the Department of Revenue for central collection by October 1st and is due and payable by December 31st. For all taxable years beginning on or after January 1, 2009, a freight line company shall, subject to appropriation, be allowed a credit against the tax levied. The tax credit amount is equal to the amount of eligible expenses (eligible expenses are those incurred in this state to manufacture, maintain, or improve a freight line company's rolling stock) and are incurred during the calendar year immediately preceding the tax year for which the credit is claimed. The amount of the tax credit issued shall not exceed the freight line company's liability for the tax levied for which the credit is claimed. If the appropriation is not totally funded, each company would receive a pro-rata share (based on their claim to total claims).

PERFORMANCE MEASURE(S)

Total Missouri Value-Added & 'Farm to Table' Grants Awarded

Comments on Performance Measure:

In fiscal year 2024, only statewide grants will be funded. If a funded study demonstrates the potential for a project, then the cost of the study becomes one small part of the actual cost of the project. If the project is successful, it generates a good benefit cost ratio. If the study finds that the project is not feasible, the benefits of the project are the savings of investments that would have been lost. In which case the benefit cost ratio is very high. However, this analysis includes only actual grant dollars and does not take into account whether or not a project is feasible. If a project becomes operational and receives New Generation Cooperative Incentive Tax Credits then those benefits are accounted for in the New Generation Cooperative Incentive Tax Credit Program's tax credit analysis.
