1a. What strategic priority does this program address?

Access

1b. What does this program do?

This funding supports University of Missouri Kansas City's (UMKC) development of a satellite doctor of pharmacy program at Missouri State University(MSU). The staffing and distance education costs are part of UMKC's budget. The pharmacy students on the MSU campus are UMKC students, but receive student services at MSU. The satellite program admits up to 30 students per class. The first class of students was admitted in fall 2014. In FY 2014-15, the program completed renovation of a 15,000 square foot state-of-the-art distance education space on the MSU campus, and hired an associate dean to lead the site along with its first two faculty members and administrative support staff. In FY 2016, the school admitted the second class of students and hired additional faculty, administrative support staff, and IT specialist to assist with distance education. In subsequent years, the full cohort of faculty and staff were hired and are in place in FY 2022 including the associate dean for experiential learning, three additional faculty, and two full time administrative assistants. The appropriation supports the personnel and distance education costs for the program. The program is graduating highly knowledgeable and skilled pharmacists who are prepared to pass necessary board exams, achieve high placement rates in employment, and are skilled scientists who are ready to make contributions to new drug development, as well as drug delivery and understanding underlying health and disease.

2a. Provide an activity measure(s) for the program.

The program has been working since FY 2014-15 to recruit faculty and students and produce pharmacists, particularly in southwest Missouri with the UMKC/MSU joint expansion of UMKC's pharmacy program. Significant effort of faculty and staff in Kansas City, Columbia, and Springfield was required to deliver course work, establish and implement experiential education, and assess student learning. Execution of the Doctor of Pharmacy (PharmD) program in Springfield would not have been possible without the expertise of faculty in Kansas City and Columbia, as well as state-of-the-art distance education technology. The program saves the state money in that a totally separate, independently accredited, and fully staffed pharmacy program at MSU would cost approximately \$12-15 M/year in compensation and an additional \$1-3M in operational expenses. These costs do not include facilities, so the overall cost would be substantially higher yet.
