1a. What strategic priority does this program address?

Access to safe and effective medications

1b. What does this program do?

The Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003 required that all individuals who are eligible for both Medicare and Medicaid, also known as dual eligibles, receive their prescription drugs through the Medicare Part D program. This change resulted in a significant shift in benefits for elderly and disabled dual eligible participants because they receive their drugs through a prescription drug plan (PDP) rather than through the state's MO HealthNet program. States are required to make a monthly payment to the federal government in lieu of the money that the states would have spent on providing prescription drugs to participants in the MO HealthNet program.

The federal government refers to this payment as the Phased-Down State Contribution, also referred to as Clawback. This Clawback payment is a funding source for the Medicare Part D program.

PAYMENT METHODOLOGY

The Clawback consists of a monthly calculation based on the combination of (a) the state's per capita spending on prescription drugs in 2003, (b) the state's federal Medicaid match rate, (c) the number of dual eligibles residing in the state, and (d) a Phase-Down percentage of state savings to be returned to the federal government, which began with 90% in CY 2006 and phased down to the current floor of 75% in CY 2015. The Clawback rate for each state, as identified by the Centers for Medicare and Medicaid Services (CMS), is multiplied by the number of dual eligibles in each state in order to determine the monthly payment due. The Clawback assessment is paid one month in arrears.
