**Department: Social Services**

**HB Section(s): 11.620**

**Program Name: Information Systems**

**Program is found in the following core budget(s): Information Systems**

### 1a. What strategic priority does this program address?

Timely automated processing and reporting

### 1b. What does this program do?

The Information Systems program area manages the Medicaid Management Information System (MMIS) and the contracts with the vendors that develop, operate, and maintain the system.

The primary functions of the MMIS include claims and encounter processing, calculating provider payments, healthcare service provider management, drug rebate invoicing and collection, processing third party liability, federal financial reporting, administrative workflow management, and reporting and analytics.

The primary goal of the MMIS is to support the operation of the MO HealthNet Program by accomplishing the following:

- Automation of key business processes to support the program policies and processes to ensure compliance with federal and state law
- Access for providers and users to program and participant eligibility information required to support provision of services to program participants
- Timely and accurate claims processing and payment to providers
- Timely and accurate processing of capitation payments to Managed Care health plans
- Accurate reporting of program costs and outcomes to Centers for Medicare & Medicaid Services (CMS) and maximization of federal financial participation
- Comprehensive and accurate reporting and analytics services and sharing of claims data to support administrative and program decision support, monitoring of program metrics, and improvements in program quality and care management
- Ongoing system modifications to support new program initiatives, meet changing federal and state program requirements, and further business automation
- Procurement and implementation of replacement MMIS subsystems and services in compliance with federal MMIS enhanced funding requirements

The state receives enhanced federal funding for the development and operation of the MMIS. The Information Systems program area manages the enhanced funding including review of CMS regulations and guidance, the submission of planning documents to CMS to request enhanced funding, and the review and approval of system-related costs.

CMS updated the rule related to the enhanced funding in December 2016, and continues to issue sub-regulatory guidance that is changing the conditions for receiving enhanced funding for investments in Information Technology. The guidance encourages the replacement of legacy MMIS systems such as Missouri's system with more modular and reusable solutions. MO HealthNet is working on several system procurement projects intended to replace MMIS subsystems with solutions utilizing modern technologies and complying with the CMS conditions. The procurement and replacement of MMIS systems requires a multi-year effort, and a significant capital investment, but offers future cost savings through technology that is less expensive to operate and maintain, and is more flexible allowing for quicker implementation of program changes. As part of the MMIS procurement effort, MO HealthNet has implemented a Business Intelligence Solution and Enterprise Data Warehouse (BIS/EDW) and awarded a contract for the Beneficiary Support and Premium Collections Solution and Services, while Missouri Medicaid Audit and Compliance (MMAC) has implemented and certified a Program Integrity Solution.
